RE: Fiscal Note and Fiscal Note Summary Request for Senate Substitute for Senate Joint Resolution No. 78

Dear Mr. Fitzpatrick:

Enclosed please find a copy of Senate Substitute for Senate Joint Resolution No. 78 that was received by our office.

We are referring the enclosed joint resolution to you for the purposes of preparing a fiscal note and fiscal note summary in accordance with Sections 116.160.1, 116.170 and 116.175, RSMo. As you are aware, the fiscal note and fiscal note summary are required to be forwarded by you to our office within thirty days of receipt of the joint resolution, pursuant to Section 116.170, RSMo.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft
Secretary of State

SECOND REGULAR SESSION
[TRULY AGREED TO AND FINALLY PASSED]
SENATE SUBSTITUTE FOR

SENATE JOINT RESOLUTION NO. 78

102ND GENERAL ASSEMBLY
2024

3502S.03T

JOINT RESOLUTION

Submitting to the qualified voters of Missouri, an amendment repealing sections 2 and 3 of article VIII of the Constitution of Missouri, and adopting three new sections in lieu thereof relating to elections.

Be it resolved by the Senate, the House of Representatives concurring therein:

That at the next general election to be held in the
2 state of Missouri, on Tuesday next following the first Monday
3 in November, 2024, or at a special election to be called by
4 the governor for that purpose, there is hereby submitted to
5 the qualified voters of this state, for adoption or
6 rejection, the following amendment to article VIII of the
7 Constitution of the state of Missouri:

Section A. Sections 2 and 3, article VIII, Constitution
2 of Missouri, are repealed and three new sections adopted in
3 lieu thereof, to be known as sections 2, 3, and 24, to read as
4 follows:

Section 2. **[All]** Only citizens of the United States,
2 including occupants of soldiers' and sailors' homes, over
3 the age of eighteen who are residents of this state and of
4 the political subdivision in which they offer to vote are
5 entitled to vote at all elections by the people, if the
6 election is one for which registration is required if they
7 are registered within the time prescribed by law, or if the
8 election is one for which registration is not required, if

EXPLANATION-Matter enclosed in bold-faced brackets [thus] in this bill is not enacted and is intended to be omitted in the law.

9 they have been residents of the political subdivision in
10 which they offer to vote for thirty days next preceding the
11 election for which they offer to vote: Provided however, no
12 person who has a guardian of his or her estate or person by
13 reason of mental incapacity, appointed by a court of
14 competent jurisdiction and no person who is involuntarily
15 confined in a mental institution pursuant to an adjudication
16 of a court of competent jurisdiction shall be entitled to
17 vote, and persons convicted of felony, or crime connected
18 with the exercise of the right of suffrage may be excluded
19 by law from voting.

Section 3. 1. All elections by the people shall be by
2 paper ballot or by any mechanical method prescribed by law.

3 2. Voters shall have only a single vote for each issue
4 on which such voter is eligible to vote. Voters shall have
5 the same number of votes for an office as the number of open
6 seats to be elected to such office at that election. Under
7 no circumstance shall a voter be permitted to cast a ballot
8 in a manner that results in the ranking of candidates for a
9 particular office. Notwithstanding any provision of this
10 subsection to the contrary, this subsection shall not apply
11 to any nonpartisan municipal election held in a city that
12 had an ordinance in effect as of November 5, 2024, that
13 permits voters to cast more than a single vote for each
14 issue or candidate on which such voter is eligible to vote.

15 3. All election officers shall be sworn or affirmed
16 not to disclose how any voter voted; provided, that in cases
17 of contested elections, grand jury investigations and in the
18 trial of all civil or criminal cases in which the violation
19 of any law relating to elections, including nominating
20 elections, is under investigation or at issue, such officers

21 may be required to testify and the ballots cast may be
22 opened, examined, counted, and received as evidence.

Section 24. 1. The person receiving the greatest
2 number of votes at a primary election as a party candidate
3 for an office shall be the only candidate for that party for
4 the office at the general election. The name of such
5 candidate shall be placed on the official ballot at the
6 general election unless⁹ removed or replaced as provided by
7 law.

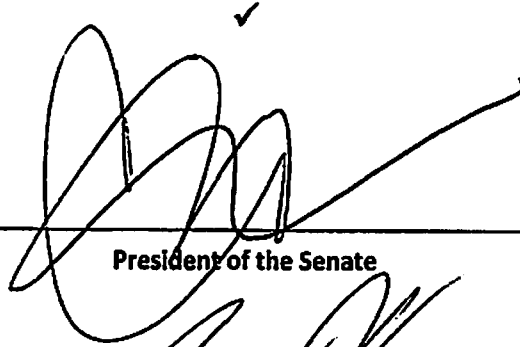

8 2. The person receiving the greatest number of votes
9 at the general election shall be declared the winner.

10 3. Notwithstanding any provision of this section to
11 the contrary, this section shall not apply to any
12 nonpartisan municipal election held in a city that had an
13 ordinance in effect as of November 5, 2024, that requires a
14 preliminary election at which more than one candidate
15 advances to a subsequent election.

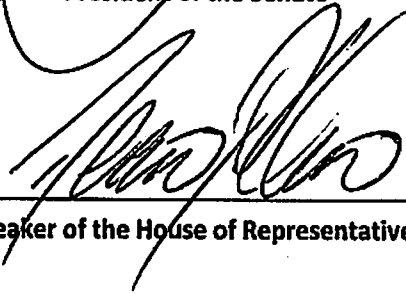

Section B. Pursuant to chapter 116, and other
2 applicable constitutional provisions and laws of this state
3 allowing the general assembly to adopt ballot language for
4 the submission of this joint resolution to the voters of
5 this state, the official summary statement of this
6 resolution shall be as follows:

7 "Shall the Missouri Constitution be amended to:
8 • Make the Constitution consistent with state
9 law by only allowing citizens of the United
10 States to vote;
11 • Prohibit the ranking of candidates by
12 limiting voters to a single vote per candidate
13 or issue; and

- 14 • Require the plurality winner of a political
15 party primary to be the single candidate at a
16 general election?".

President of the Senate

Speaker of the House of Representatives

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-SJR 78)**

Subject

Senate Substitute for Senate Joint Resolution No. 78. (Received May 31, 2024)

Date

June 20, 2024

Description

This proposal would amend Article VIII of the Constitution of Missouri.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **St. Charles County Election Authority**, the **St. Louis County Board of Elections**, the **Board of Election Commissioners City of St. Louis**, the **Kansas City Board of Election Commissioners**, the **Platte County Board of Elections**, the **Jackson County Election Board**, and the **Clay County Board of Election Commissioners**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed SJR 78 and determined there would be no fiscal impact on their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated there is no impact to their department for this fiscal note.

Officials from the **Department of Health and Senior Services** indicated this SJR has no impact on their agency.

Officials from the **Department of Commerce and Insurance** indicated this resolution, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the Senate Substitute for Senate Joint Resolution No. 78 proposing to amend Article VIII.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety** indicated there is no impact to their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated no impact anticipated from their department.

Officials from the **Governor's office** indicated this proposal relating to ranked voting does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated this will have no fiscal impact.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal relating to ranked voting does not financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-SJR 78 a proposed amendment repealing sections 2 and 3 of Article VIII, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated 24-SJR No. 78 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no fiscal impact from SJR 78.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for Senate Substitute for Senate Joint Resolution No. 78 proposing to amend Article VIII.

Officials from **St. Louis County** indicated this constitutional amendment should have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from **University of Missouri** indicated they see no significant fiscal impact from this resolution.

Officials from the **St. Louis County Board of Elections** indicated they have reviewed Senate Joint Resolution No. 78 and see no fiscal impact to their operations.

Officials from the **Board of Election Commissioners City of St. Louis** indicated no impact.

Officials from the **Platte County Board of Elections** indicated no fiscal impact directly on their board.

Officials from the **Jackson County Election Board** indicated this has no fiscal impact to their board.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, St. Louis Community College, the St. Charles County Election Authority, the Kansas City Board of Election Commissioners, and the Clay County Board of Election Commissioners.**

Fiscal Note Summary

State and local governmental entities estimate no costs or savings.

SECOND REGULAR SESSION
[TRULY AGREED TO AND FINALLY PASSED]

SENATE SUBSTITUTE FOR
SENATE COMMITTEE SUBSTITUTE FOR

SENATE JOINT RESOLUTION NO. 71

102ND GENERAL ASSEMBLY
2024

4005S.03T

JOINT RESOLUTION

Submitting to the qualified voters of Missouri, an amendment repealing section 14 of article I of the Constitution of Missouri, and adopting one new section in lieu thereof relating to the administration of justice.

Be it resolved by the Senate, the House of Representatives concurring therein:

That at the next general election to be held in the
2 state of Missouri, on Tuesday next following the first Monday
3 in November, 2024, or at a special election to be called by
4 the governor for that purpose, there is hereby submitted to
5 the qualified voters of this state, for adoption or
6 rejection, the following amendment to article I of the
7 Constitution of the state of Missouri:

Section A. Section 14, article I, Constitution of
2 Missouri, is repealed and one new section adopted in lieu
3 thereof, to be known as section 14, to read as follows:

Section 14. 1. That the courts of justice shall be
2 open to every person, and certain remedy afforded for every
3 injury to person, property or character, and that right and
4 justice shall be administered without sale, denial or delay.

5 2. In order to ensure that all Missourians have access
6 to the courts of justice as guaranteed by this Constitution,
7 the administration of justice shall include the levying of
8 costs and fees to support salaries and benefits for

9 sheriffs, former sheriffs, prosecuting attorneys, former
10 prosecuting attorneys, circuit attorneys, and former circuit
11 attorneys.

Section B. Pursuant to chapter 116, and other
2 applicable constitutional provisions and laws of this state
3 allowing the general assembly to adopt ballot language for
4 the submission of this joint resolution to the voters of
5 this state, the official summary statement of this
6 resolution shall be as follows:

7 "Shall the Missouri Constitution be amended to
8 preserve funding of law enforcement personnel
9 for the administration of justice?".

Description

This proposal would amend Article I of the Constitution of Missouri.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **Missouri Office of Prosecution Services**, the **Kansas City Board of Police Commissioners**, and **The Metropolitan Police Department - City of St. Louis**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed SJR 71 and determined there is no fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated there is no impact to their department for this fiscal note.

Officials from the **Department of Health and Senior Services** indicated this SJR has no impact on their agency.

Officials from the **Department of Commerce and Insurance** indicated this resolution, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for Senate Substitute for Senate Committee Substitute for Senate Joint Resolution No. 71 proposing to amend Article I.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety** indicated there is no impact to their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated no impact anticipated from their department.

Officials from the **Governor's office** indicated this proposal relating to the inclusion of court officer retirement costs in court costs and fees does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated this will have no fiscal impact.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal relating to the inclusion of court officer retirement costs in court costs and fees does not financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-SJR 71 a proposed amendment repealing section 14 of Article I, there may be some impact but there is no way to quantify that currently. Any significant changes will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender (SPD)** indicated 24-SJR 71 will have an unknown fiscal impact on SPD by possibly increasing the number of probation violation cases that SPD serves as counsel in because of the inability of SPD's indigent clients to pay these court costs and levies. SPD clients have all been deemed to be indigent but are still often assessed court costs and fees and when unable to pay because of their poverty, the SPD clients face a hearing for possible revocation of their probation. This change could result in an unknown number of additional probation revocation cases. For every additional 100 probation revocation cases SPD would need an additional attorney.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate an annual savings of approximately ~\$6,500 per year should SJR 71 pass.

Clay County covered the withholding cost (~\$6,500) for the Sheriff retirement upon the elimination of the court fee that had been funding the system. The county's understanding is this SJR reinstates that fee the courts had overturned, meaning there's the possibility of the withholding requirement going away.

Before the Supreme Court found the fees funding the Sheriff Retirement System unconstitutional, there was no cost to the County as the fees went from the Court to the System.

Once it was found unconstitutional, the General Assembly revised RSMo 57.961 to require elected Sheriffs to withhold 5% of pay to fund the System. Clay County covered this 5% cost for the Sheriff, in addition to providing the Sheriff their full salary. Clay County states that other counties did the same.

On the assumption/estimation that the fees would be reenacted upon voter approval of the SJR to amend the Missouri Constitution, the County reports it would likely cease this cost—presuming RSMo 57.961 would be revised once more.

Clay County states that this is an estimate, and they estimate \$6,500 in savings if the SJR passes.

Clay County reports they believe this is being withheld and taxed appropriately, but that the County essentially provided the Sheriff with a benefit of sorts.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for Senate Substitute for Senate Committee Substitute for Senate Joint Resolution No. 71 proposing to amend Article I.

Officials from **St. Louis County** indicated the fiscal impact of the proposed constitutional amendment on St. Louis County is unknown due to uncertainty over how much fees are collected and how they will be distributed.

Officials from the **City of Kansas City** indicated no fiscal impact except if a special election is called.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from **University of Missouri** indicated the University of Missouri System does not anticipate a significant fiscal cost for this resolution.

Officials from the **Missouri Office of Prosecution Services** indicated there is no fiscal impact to MOPS.

Officials from the **Kansas City Board of Police Commissioners** indicated there will be no estimated cost or savings to KCPD.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, St. Louis Community College, and The Metropolitan Police Department - City of St. Louis.**

Explanation of exclusion of fiscal note information from the fiscal note summary:

Clay County discussed saving \$6,500 annually if this proposal is passed. It is not clear if the costs the county indicated (that are potentially being saved) are necessary or appropriate for the county to incur. Also, it is not clear what costs or fees will be established if the proposal passes since they are not included in the resolution. As a result, these potential savings are not included in the fiscal note summary.

The City of Kansas City indicated no fiscal impact except if a special election is called. The state would be responsible for the costs if a special election was called. It is unlikely a special election would be called. Such costs would occur before the proposal is voted on and would have no impact on the potential costs or savings specifically related to the resolution being voted on.

Fiscal Note Summary

State and local governmental entities estimate an unknown fiscal impact.

RE: Fiscal Note and Fiscal Note Summary Request for Senate Joint Resolution No. 26

Dear Mr. Fitzpatrick:

Enclosed please find a copy of Senate Joint Resolution No. 26 that was received by our office.

We are referring the enclosed joint resolution to you for the purposes of preparing a fiscal note and fiscal note summary in accordance with Sections 116.160.1, 116.170 and 116.175, RSMo. As you are aware, the fiscal note and fiscal note summary are required to be forwarded by you to our office within thirty days of receipt of the joint resolution, pursuant to Section 116.170, RSMo.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft
Secretary of State

FIRST REGULAR SESSION

[TRULY AGREED TO AND FINALLY PASSED]

SENATE JOINT RESOLUTION NO. 26

102ND GENERAL ASSEMBLY

2023

1079S.01T

JOINT RESOLUTION

Submitting to the qualified voters of Missouri, an amendment repealing section 6 of article X of the Constitution of Missouri, and adopting one new section in lieu thereof relating to a property tax exemption for certain child care facilities.

Be it resolved by the Senate, the House of Representatives concurring therein:

That at the next general election to be held in the
2 state of Missouri, on Tuesday next following the first Monday
3 in November, 2024, or at a special election to be called by
4 the governor for that purpose, there is hereby submitted to
5 the qualified voters of this state, for adoption or
6 rejection, the following amendment to article X of the
7 Constitution of the state of Missouri:

Section A. Section 6, article X, Constitution of Missouri,
2 is repealed and one new section adopted in lieu thereof, to be
3 known as section 6, to read as follows:

Section 6. 1. All property, real and personal, of the
2 state, counties and other political subdivisions, and
3 nonprofit cemeteries, and all real property used as a
4 homestead as defined by law of any citizen of this state who
5 is a former prisoner of war, as defined by law, and who has
6 a total service-connected disability, shall be exempt from
7 taxation; all personal property held as industrial
8 inventories, including raw materials, work in progress and
9 finished work on hand, by manufacturers and refiners, and
10 all personal property held as goods, wares, merchandise,

11 stock in trade or inventory for resale by distributors,
12 wholesalers, or retail merchants or establishments shall be
13 exempt from taxation; and all property, real and personal,
14 not held for private or corporate profit and used
15 exclusively for religious worship, for schools and colleges,
16 for purposes purely charitable, for agricultural and
17 horticultural societies, or for veterans' organizations may
18 be exempted from taxation by general law. In addition to
19 the above, household goods, furniture, wearing apparel and
20 articles of personal use and adornment owned and used by a
21 person in his home or dwelling place may be exempt from
22 taxation by general law but any such law may provide for
23 approximate restitution to the respective political
24 subdivisions of revenues lost by reason of the exemption.
25 All laws exempting from taxation property other than the
26 property enumerated in this article, shall be void. The
27 provisions of this section exempting certain personal
28 property of manufacturers, refiners, distributors,
29 wholesalers, and retail merchants and establishments from
30 taxation shall become effective, unless otherwise provided
31 by law, in each county on January 1 of the year in which
32 that county completes its first general reassessment as
33 defined by law.

34 2. All revenues lost because of the exemption of
35 certain personal property of manufacturers, refiners,
36 distributors, wholesalers, and retail merchants and
37 establishments shall be replaced to each taxing authority
38 within a county from a countywide tax hereby imposed on all
39 property in subclass 3 of class 1 in each county. For the
40 year in which the exemption becomes effective, the county
41 clerk shall calculate the total revenue lost by all taxing
42 authorities in the county and extend upon all property in

43 subclass 3 of class 1 within the county, a tax at the rate
44 necessary to produce that amount. The rate of tax levied in
45 each county according to this subsection shall not be
46 increased above the rate first imposed and will stand levied
47 at that rate unless later reduced according to the
48 provisions of subsection 3. The county collector shall
49 disburse the proceeds according to the revenue lost by each
50 taxing authority because of the exemption of such property
51 in that county. Restitution of the revenues lost by any
52 taxing district contained in more than one county shall be
53 from the several counties according to the revenue lost
54 because of the exemption of property in each county. Each
55 year after the first year the replacement tax is imposed,
56 the amount distributed to each taxing authority in a county
57 shall be increased or decreased by an amount equal to the
58 amount resulting from the change in that district's total
59 assessed value of property in subclass 3 of class 1 at the
60 countywide replacement tax rate. In order to implement the
61 provisions of this subsection, the limits set in section
62 11(b) of this article may be exceeded, without voter
63 approval, if necessary to allow each county listed in
64 section 11(b) to comply with this subsection.

65 3. Any increase in the tax rate imposed pursuant to
66 subsection 2 of this section shall be decreased if such
67 decrease is approved by a majority of the voters of the
68 county voting on such decrease. A decrease in the increased
69 tax rate imposed under subsection 2 of this section may be
70 submitted to the voters of a county by the governing body
71 thereof upon its own order, ordinance, or resolution and
72 shall be submitted upon the petition of at least eight
73 percent of the qualified voters who voted in the immediately
74 preceding gubernatorial election.

75 4. As used in this section, the terms "revenues lost"
76 and "lost revenues" shall mean that revenue which each
77 taxing authority received from the imposition of a tangible
78 personal property tax on all personal property held as
79 industrial inventories, including raw materials, work in
80 progress and finished work on hand, by manufacturers and
81 refiners, and all personal property held as goods, wares,
82 merchandise, stock in trade or inventory for resale by
83 distributors, wholesalers, or retail merchants or
84 establishments in the last full tax year immediately
85 preceding the effective date of the exemption from taxation
86 granted for such property under subsection 1 of this
87 section, and which was no longer received after such
88 exemption became effective.

89 5. Because the availability of childcare supports the
90 well-being of children, families, the workforce, and society
91 as a whole, all property, real and personal, used primarily
92 for the care of a child outside of his or her home may be
93 exempted from taxation by general law. If a portion of the
94 property of an individual or a for profit or nonprofit
95 corporation, organization, or association is used for such
96 childcare, an assessing authority may be authorized by
97 general law to exempt from the assessment, levy, and
98 collection of taxes such portion of the property of such
99 individual, corporation, organization, or association that
100 is used primarily for such childcare.

 Section B. Pursuant to chapter 116, and other
2 applicable constitutional provisions and laws of this state
3 allowing the general assembly to adopt ballot language for
4 the submission of this joint resolution to the voters of
5 this state, the official summary statement of this
6 resolution shall be as follows:

7 "Shall the Missouri Constitution be amended to
8 allow places where individuals, corporations,
9 organizations, and associations provide
10 childcare outside of the child's home to be
11 exempt from property tax? This is intended to
12 make childcare more available, which would
13 support the well-being of children, families,
14 the workforce, and society as a whole."

President of the Senate

Speaker of the House of Representatives

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-SJR 26)**

Subject

Senate Joint Resolution No. 26. (Received June 1, 2023)

Date

June 21, 2023

Description

This proposal would amend Article X of the Constitution of Missouri.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office, the Department of Agriculture, the Department of Economic Development, the Department of Elementary and Secondary Education, the Department of Higher Education and Workforce Development, the Department of Health and Senior Services, the Department of Commerce and Insurance, the Department of Mental Health, the Department of Natural Resources, the Department of Corrections, the Department of Labor and Industrial Relations, the Department of Revenue, the Department of Public Safety, the Missouri Department of the National Guard, the Department of Social Services, the Governor's office, the Missouri House of Representatives, the Department of Conservation, the Department of Transportation, the Office of Administration, the Office of State Courts Administrator, the Missouri Senate, the Secretary of State's office, the Office of the State Public Defender, the State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kansas City, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, Truman State University, and the Missouri State Tax Commission.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed SJR 26 and determined there is no fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this resolution, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the Senate Joint Resolution No. 26 proposing to amend Article X.

Officials from the **Department of Revenue** indicated they note this is a property tax bill. Property tax is handled by the County Assessors and State Tax Commission. Their department defers to them for the fiscal impact.

Officials from the **Department of Public Safety - Office of the Director** indicated no impact for their department, Director's office.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated the estimated lost revenue to the Blind Pension Fund of \$0 in fiscal year (FY) 2024, up to \$397,715 in FY 2025, and up to \$397,715 in FY 2026.

Section A. Section 6, article X of the Missouri Constitution is amended to exempt from taxation all real and personal property used primarily for child care provided to children outside of their home.

Blind Pension is funded from 0.03% of each \$100 assessed valuation of taxable property.

Property Tax income for the BP fund in FY 2022 was \$39,771,524 or approximately \$39.8 million (rounded up). The amount collected from real and personal property used primarily for child care provided to children outside of their home is unknown. To determine the impact of this legislation, FSD made the assumption that up to 1% of all property is used to provide childcare. 1% of the property tax revenue collected for the BP fund is \$397,715 ($\$39,771,524 * .01 = \$397,715.24$, rounded down).

Therefore, the impact to the BP fund is up to \$397,715 beginning in SFY 25.

Officials from the **Governor's office** indicated this proposal relating to property taxes and child care centers does not financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated this senate joint resolution would have no fiscal impact for their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal relating to property taxes and child care centers does not financially impact their office.

Per section 209.130, RSMo, an annual tax of three cents (\$.03) on each one hundred dollar (\$100) valuation of taxable property goes to fund the State of Missouri's Blind Pension Fund. The Blind Pension Fund pays monthly pension payments to individuals who are blind as provided by law. A reduction in overall taxable property could result in reduced proceeds to the Blind Pension Fund.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills

that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated SJR 26 should have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated after conferring with the Assessor, they conservatively estimate a real estate assessed value for child care locations of \$7,934,774. They also estimate an assessed personal property value of \$209,051. Using last year's certified assessed valuation totals, this imputes 0.1% of total county assessed value at \$5,758,018,600.

Accordingly, they conservatively estimate the fiscal impact of this SJR #26, if passed by the voters, to be (~\$720,856.06) in lost revenue due to the exemption. They derived this figure based on the Collector's annual settlement number for distributions on collections of 2022 tax bills at \$509,675,837.18. Of note, this would be for ALL taxing jurisdictions in

Clay County (including the State of Missouri's property tax levy portion \$2,443.15), not just the county itself.

The county's collection commission of 1.6% on that amount is (~\$11,533.70) in lost revenue to just the county. For the county itself, they also conservatively estimate only (~\$7,712.20) in lost revenue from the county's general and road & bridge combined levies of just \$0.0947 per \$100 assessed value. For the county's portion of its \$1.59 surtax, or 9.6%, it's another (~\$7,637.46) in lost revenue. The levies and surtax amounts are in the \$720,856.06 total in the previous paragraph. Combined is (\$26,883.36).

Officials from **Greene County** indicated it has been determined, that there will be an impact to the total tax collected for the County of Greene if SJR 26 becomes law.

The estimated total tax impact would be around \$1,392,049 less tax collected annually.

Officials from the **City of Kansas City** indicated the proposed amendment would have a negative fiscal impact on Kansas City in an indeterminate amount.

Officials from **Metropolitan Community College** indicated there would be a fiscal impact to their college for the part about Childcare, but at this time that information is unknown.

Officials from **University of Missouri** indicated there is no impact on their university from this resolution.

Officials from the **Missouri State Tax Commission** indicated SJR 26 will not have a fiscal impact on the State Tax Commission. It will reduce the amount of taxes collected by the political subdivisions but the commission does not have enough information on how many childcare facilities would qualify for the exemption or the amount of their assessment.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, and Truman State University.**

Fiscal Note Summary

State governmental entities estimate the state's Blind Pension Fund could have annual lost revenue of up to \$400,000. Local governments expect an unknown fiscal impact.

RE: Petition approval request from Deirdre Hirner regarding a proposed statutory amendment to Chapter 196 (2024-174)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Deirdre Hirner on March 7, 2024.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Address of Notary (Street, City, State & Zip Code)

Be it enacted by the people of the State of Missouri:

Section 196.1131 is enacted to read as follows:

196.1131. 1. For the sole and exclusive purpose of providing funding for treatment and prevention of childhood cancer, on and after January 1, 2025, a tax equal to ten cents before discounts and deals shall be levied and imposed upon the sale of each package of twenty cigarettes, or lesser portion thereof. The tax imposed by this section shall be in addition to other taxes imposed by law on the sale of cigarette packages and shall be collected in the same manner and at the same time as the taxes imposed by law upon the sale of packages of cigarettes.

2. The Childhood Cancer Treatment and Prevention Fund is hereby created within the state treasury which shall consist of funds from the taxes established in subsection 1 of this section, appropriated moneys, gifts, contributions, grants, or bequests.

3. Beginning January 1, 2025, the state treasurer without legislative action shall credit to and place in the Childhood Cancer Treatment and Prevention Fund all moneys collected as a result of the tax imposed by subsection 1 of this section as said moneys are received. All of the moneys from the tax imposed by this section shall be kept separate from the general revenue fund as well as any other funds or accounts in the state treasury and shall be credited to and placed only in the Childhood Cancer Treatment and Prevention Fund and the accounts created within the Childhood Cancer Treatment and Prevention Fund. Any moneys credited to and placed in the Childhood Cancer Treatment and Prevention Fund and any account created by this section shall be appropriated and used only for a purpose authorized by this section and shall not be subject to the provisions of section 33.080, RSMo. The unexpended balances of such moneys shall remain in the Childhood Cancer Treatment and Prevention Fund and in the particular account in which the moneys are placed, and such balances shall not revert to the general revenue fund. All interest which accrues upon the moneys in any account within the Childhood Cancer Treatment and Prevention Fund shall be added to such account and shall not be credited to the general revenue fund. Except as otherwise provided in this section, generally applicable laws concerning use of public funds shall apply to the Childhood Cancer Treatment and Prevention Fund.

4. The Children's Trust Fund Board shall administer the fund. The fund shall be used exclusively for the treatment and prevention of childhood cancers.

5. No funding from the Childhood Cancer Treatment and Prevention Fund shall be used to fund abortion. No funding from the Childhood Cancer Treatment and Prevention Fund shall be used for research which is banned by Missouri law.

6. (1) The actual costs of collecting the tax imposed by this section shall be paid from the moneys in the Childhood Cancer Treatment and Prevention Fund as may be provided by law, not to exceed five percent of the total moneys collected;

(2) The department of revenue shall refund moneys overpaid or erroneously paid pursuant to this section as may be provided by law; and

7. The state auditor shall perform an annual audit of the funds and initiatives undertaken pursuant to this section, which shall include an evaluation of whether pre-existing funding for programs or initiatives has been reduced because of the new funding for such purposes provided through the Childhood Cancer Treatment and Prevention Fund or any of its accounts. Such audit shall be performed on a fiscal year basis. The state auditor shall make copies of each audit available to the public. Every three years the state auditor shall prepare a comprehensive report assessing the work and progress of initiatives undertaken pursuant to this section. Such assessment report shall analyze the impact of the programs, grants, and contracts performed, shall be provided to the governor and the general assembly, and shall be available to the public.

8. The tax imposed by this section shall be imposed on all cigarettes in the possession or under the control of any dealer or distributor on and after 12:01 a.m. on January 1, 2025, as determined by department of revenue rule. The initiatives and programs authorized under this section shall be implemented as soon as reasonably practicable, but at least by July 1, 2025.

9. The net proceeds from the tax imposed by this section shall constitute new and additional funding for the initiatives and programs described in this section and shall not be used to replace existing funding as of July 1, 2025 for the same or similar initiatives and programs.

10. All of the provisions of this section shall be self-enforcing. All of the provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-174)**

Subject

Initiative petition from Deirdre Hirner regarding a proposed amendment to Chapter 196 of the Revised Statutes of Missouri. (Received March 8, 2024)

Date

March 28, 2024

Description

This proposal would amend Chapter 196 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **Children's Trust Fund of Missouri**, and the **State Auditor's office**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-174 and determined there is no fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-174 proposing to amend Chapter 196, RSMo.

Officials from the **Department of Revenue** (DOR) indicated IP 24-174 attempts to levy a \$0.10 sales tax beginning January 1, 2025, on the price of cigarettes. The revenue generated from this new tax is to be deposited into the newly created "Childhood Cancer Treatment and Prevention Fund".

DOR notes that in FY23, \$63,622,252 in cigarette excise taxes were collected. At \$0.17 per pack (the current tax rate), DOR estimates approximately 374,248,541 packs of cigarettes were sold.

Numerous research reports indicate that when the price of cigarettes increases the quantity sold will decrease. The National Bureau of Economic Analysis notes the elasticity for cigarette sales between \$6.00 and \$6.50 per pack is -1.02 on average. In Missouri, the average price of cigarettes currently is \$6.11 per pack and per this proposal would increase to \$6.21 per pack.

Accounting for elasticity, DOR estimates that 368,102,453 packs of cigarettes would be sold. This new tax would generate \$36,810,245 (368,102,453 packs x \$0.10) annually in new sales tax revenues.

Additionally, this will reduce sales resulting in lower existing excise and sales tax collections. Using the information from above, DOR assumes this proposal could reduce excise tax collections by \$1,044,835 and state sales tax collections by \$1,586,598 annually. Using the location weighted average local sales tax rate of 6.32% for 2023, this proposal could reduce local sales tax collections by \$2,373,324 annually.

It should be noted that St. Louis County and Jackson County each levy their own excise tax on cigarettes. Lower demand could reduce the St. Louis County excise tax collections by \$35,310 and the Jackson County excise tax collections by \$25,750 annually.

Table 1: Estimated Revenue Impact by Source

State Funds	FY 2025	FY 2026+
Revenue gain from new sales tax

State Schools Money Fund	(\$230,478)	(\$553,148)
Fair Share Fund	(\$102,435)	(\$245,844)
TSR Impact	\$14,241,172	\$34,178,812
<u>Local Funds</u>	<u>FY 2025</u>	<u>FY 2026+</u>
St. Louis County	(\$14,713)	(\$35,310)
Jackson County	(\$10,729)	(\$25,750)
Local Sales Tax	(\$988,885)	(\$2,373,324)
Total Local Impact	(\$1,014,327)	(\$2,434,384)

Officials from the **Department of Public Safety** indicated there is no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated this proposal relating to tobacco taxation does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-174 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal would create a \$0.10 sales tax beginning January 1, 2025. Revenue generated is to be deposited into the newly created "Childhood Cancer Treatment and Prevention Fund".

In FY23, \$63,622,252 in cigarette excise taxes were collected. At \$0.17 per pack, Budget & Planning (B&P) estimates that approximately 374,248,541 packs of cigarettes were sold.

However, the quantity of cigarettes sold declines when prices are increase. Based on data published by the National Bureau of Economic Analysis, the elasticity for cigarette sales between \$6.00 and \$6.50 per pack is -1.02 on average. The average price of cigarettes in Missouri is currently \$6.11 per pack. Under this proposal, the average price would increase to \$6.21 per pack. Therefore, B&P estimates that under this proposal only 368,102,453 packs of cigarettes would be sold.

Accounting for elasticity, B&P estimates that this proposal could generate \$36,810,245 (368,102,453 packs x \$0.10) annually in new sales tax revenues.

B&P notes that reduced sales will result in lower existing excise and sales tax collections. Using the above information, B&P estimates that this proposal could reduce excise tax collections by \$1,044,835 and state sales tax collections by \$1,586,598 annually. Using the location weighted average local sales tax rate of 6.32% for 2023, B&P estimates that this proposal could reduce local sales tax collections by \$2,373,324 annually.

B&P further notes that both St. Louis County and Jackson County levy their own excise tax on cigarettes. B&P estimates that lower demand could reduce the St. Louis County excise tax collections by \$35,310 and the Jackson County excise tax collections by \$25,750 annually.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-174, a proposed statutory amendment to Chapter 196, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo

requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, they estimate publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-174 will have no fiscal impact on their office.

Officials from the **Office of the State Treasurer** indicated:

INITIATIVE PETITION FISCAL ESTIMATE WORKSHEET

Re: Petition approval request from Deirdre Hirner regarding a proposed statutory amendment to Chapter 196 (2024-174)

Analyst: Doug Shull, General Counsel **Date:** March 19, 2024

Agency: State Treasurer's Office **Telephone:** 573-751-4910

Division: Legal **E-Mail:** doug.shull@treasurer.mo.gov

Comments:

This proposal has a fiscal impact on the State Treasurer's Office ("STO").

The proposal creates the Childhood Cancer Treatment and Prevention Fund ("the fund"). (Proposal Section 196.1131.2). The proposal states that the "Children's Trust Fund Board shall administer the fund," (Proposal Section 196.1131.4), but requires that the state treasurer "shall credit to and place in [the fund] all moneys collected as a result of the tax imposed by [Proposal] subsection 1...as said moneys are received." (Proposal Section 196.1131.4). This language appears to split administration of the fund and, consequently, has an estimated cost to the STO ranging from \$ 133,930 to \$ 210,746 in FY 2025, ranging from \$ 154,028 to \$ 238,691 in FY 2026, and ranging from \$ 156,507 to \$242,564 in FY 2027. This cost is based on the additional 2 FTE required for the STO's administration responsibilities as enumerated in the current proposal. Please see the attached Exhibit A that provides additional details related to this calculation.

Additionally, the STO is concerned with the proposal's statement including "without legislative action" contained in subsection 3. (Proposal Section 196.1131.3). The inclusion of this statement in the proposal appears to require the STO and the Children's Trust Fund Board to violate the Missouri Constitution. The constitutional requirement is that "[n]o money shall be withdrawn from the state treasury except by warrant drawn in accordance with an appropriation made by law, nor shall any obligation for that payment of money be incurred unless the commissioner of administration certifies it for payment and certifies that the expenditure is within the purpose as directed by the general assembly of the appropriation and that there is in the appropriation an unencumbered balance sufficient to pay it." (Mo. Const. art. IV, § 28). This conflict could create litigation costs that are too speculative to estimate but could be substantial.

AMENDED INITIATIVE PETITION FISCAL ESTIMATE WORKSHEET

Re: Petition approval request from Deirdre Hirner regarding a proposed statutory amendment to Chapter 196 (2024-174)

Analyst: Doug Shull, General Counsel **Date:** March 26, 2024

Agency: State Treasurer's Office **Telephone:** 573-751-4910

Division: Legal **E-Mail:** doug.shull@treasurer.mo.gov

Comments:

This proposal has a fiscal impact on the State Treasurer's Office ("STO").

The proposal creates the Childhood Cancer Treatment and Prevention Fund ("the fund"). (Proposal Section 196.1131.2). The proposal states that the "Children's Trust Fund Board shall administer the fund," (Proposal Section 196.1131.4), but requires that the state treasurer "shall credit to and place in [the fund] all moneys collected as a result of the tax imposed by [Proposal] subsection 1...as said moneys are received." (Proposal Section 196.1131.4). This language appears to split administration of the fund and, consequently, has an estimated cost to the STO ranging from \$ 133,930 to \$ 210,746 in FY 2025, ranging from \$ 154,028 to \$ 238,691 in FY 2026, and ranging from \$ 156,507 to \$242,564 in FY 2027. This cost is based on the additional 2 FTE required for the STO's administration responsibilities as enumerated in the current proposal. Please see the attached Exhibit A that provides additional details related to this calculation.

On March 25, 2024, the State Auditor's Office requested additional detail regarding the responsibilities of the 2 estimated FTE. As stated in the above paragraph the estimated FTE are required due to the administration duties delegated to the STO by this proposal. The duties relate to the language stating to "credit to and place in [the fund] all moneys collected as a result of the tax imposed by [Proposal] subsection 1...as said moneys are received," (Proposal Section 196.1131.4). The proposal's language appears to require the STO to deposit moneys for this fund. Generally, the STO does not collect and deposit monies for individual state funds and those individual state funds are administered and managed by other state agencies. The assumption is that these additional administrative duties may take up to 2 additional FTE.

The additional administrative duties would include, among other duties, verifying the accuracy of fund accounting records by performing daily reconciliations with source

documents and corresponding appropriation and general ledger accounts; calculate prior period adjustments and document prior period adjustments; ensure accuracy and consistency of data between fund documents and annual reports and the Children's Trust Fund Board; track and manage fund balance changes and ensure a prudent reserve is maintained, and enter & approve documents in the statewide financial system for both incoming revenues & outgoing expenditures.

Additionally, the STO is concerned with the proposal's statement including "without legislative action" contained in subsection 3. (Proposal Section 196.1131.3). The inclusion of this statement in the proposal appears to require the STO and the Children's Trust Fund Board to violate the Missouri Constitution. The constitutional requirement is that "[n]o money shall be withdrawn from the state treasury except by warrant drawn in accordance with an appropriation made by law, nor shall any obligation for that payment of money be incurred unless the commissioner of administration certifies it for payment and certifies that the expenditure is within the purpose as directed by the general assembly of the appropriation and that there is in the appropriation an unencumbered balance sufficient to pay it." (Mo. Const. art. IV, § 28). This conflict could create litigation costs that are too speculative to estimate but could be substantial.

Exhibit A

	FY 2025	FY 2026	FY 2027
Cost Summary			
Salaries	(\$105,000) - (\$70,000)	(\$128,520) - (\$85,680)	(\$131,090) - (\$87,394)
Fringe Benefits	(\$78,246) - (\$52,164)	(\$94,871) - (\$63,248)	(\$95,868) - (\$63,912)
Equipment	(\$15,000) - (\$7,600)		
Expense	(\$12,500) - (\$4,167)	(\$15,300) - (\$5,100)	(\$15,606) - (\$5,202)
Other Cost			
Total Estimated Cost	(\$210,746) - (\$133,930)	(\$238,691) - (\$154,028)	(\$242,564) - (\$156,507)
Savings Summary			
Salaries			
Fringe Benefits			
Equipment

Other Savings			
Total Savings			
Total Revenue Gain			
Total Revenue Loss			
Estimated Net Effect	(\$210,746) - (\$133,930)	(\$238,691) - (\$154,028)	(\$242,564) - (\$156,507)

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-174 proposing to amend Chapter 196, RSMo.

Officials from **St. Louis County** indicated this proposed amendment has no financial impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated the University of Missouri Health Care has reviewed the proposed legislation and has determined that as written it should not create expenses in excess of \$100,000.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and determined it has no direct impact on the college either revenue or expense. This is not a statement of the college's approval or disapproval of the petition.

Officials from the **Children's Trust Fund of Missouri** (CTF) indicated it is hard for them to do a cost estimate for how it will affect CTF without a better understanding of how much funding the tax would collect. Do you have any estimates on how much revenue it would generate? Without that, it's hard to say what the cost for them would be. They would likely need to hire staff to administer the fund, but the number of staff would depend on how large the fund would be.

Their best estimate would be 1% or \$340k to administer the funds and another 1% or \$340k for evaluation. This would be a rough estimate at this time.

Officials from the **State Auditor's office** indicated there would be a fiscal impact on their office. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-**

V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and State Technical College of Missouri.

Fiscal Note Summary

State government entities estimate annual increased revenue of approximately \$34 million, one-time costs of up to \$15,000, and annual increased costs of at least \$879,000. The revenue for local government entities could decrease by \$2.4 million annually due to decreased cigarette sales.

The Honorable Scott Fitzpatrick
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Deirdre Hirner regarding a proposed constitutional amendment to Article X (2024-173)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Deirdre Hirner on February 20, 2024.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

INITIATIVE PETITION

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:

We, the undersigned, registered voters of the state of Missouri and _____ County (or city of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 5th day of November, 2024, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or city of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

Address of Notary (Street, City, State & Zip Code)

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section in Article X to be known as Section 27 is enacted as follows:

Section 27

1. This section shall be known as the “Local Voters’ Right and Option to Set Tobacco Taxes Initiative.”

2. Notwithstanding section 1 of this article or any other law to the contrary, local voters shall have the right and option to set tobacco taxes in counties.

3. Any tobacco tax approved by local voters under this initiative shall be used solely for education, health and mental health, crime prevention, job creation, veterans’ services, or other local use specifically approved by local voters, so long as the use is legal under Missouri law.

4. As used in this initiative, the following terms have the following meanings:

(1) “Local voters” shall not mean the General Assembly nor the local governing body in a county, but shall only mean a majority of the qualified voters casting ballots in an election in a county on a county-wide tobacco cigarette tax measure.

(2) “Right and option to set tobacco taxes” means the right, power, and authority to set, control, impose, establish, levy, collect, fix, reduce, eliminate, or change the rate or dedicated use of a county excise tax on tobacco cigarettes.

5. All existing local tobacco taxes and any dedicated uses in place on the effective date of this initiative shall remain in effect provided, however, that the rate or dedicated use of such taxes may only be modified with the approval of local voters.

6. All of the provisions of this initiative are severable. If any provision of this initiative is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-173)**

Subject

Initiative petition from Deirdre Hirner regarding a proposed constitutional amendment to Article X. (Received February 20, 2024)

Date

March 11, 2024

Description

This proposal would amend Article X of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **Missouri Veterans Commission**, the **Kansas City Board of Police Commissioners**, the **Metropolitan Police Department - City of St. Louis**, **St. Charles County Election Authority**, **St. Louis County Board of Elections**, **Board of Election Commissioners City of St. Louis**, **Kansas City Board of Election Commissioners**,

Platte County Board of Elections, Jackson County Election Board, and the Clay County Board of Election Commissioners.

Bradley Ketcher, Ketcher Law Firm, LLC provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-173 and determined there is no fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their agency.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-173 proposing to amend Article X.

Officials from the **Department of Revenue** indicated this IP attempts to give local political subdivisions the ability to vote on and create a tax on tobacco products. Currently, the only

two local political subdivisions that have a tax on tobacco are Jackson County and St. Louis County. The businesses in those areas remit the tax to the Department of Revenue (Department) and the Department distributes it. As reimbursement for the administration of this tax, the Department is allowed to retain 1% of all tobacco tax remitted.

While this proposal would allow the voters in their local political subdivision to implement a tax, this IP does not address who will collect the tax and where it is to be distributed. The Department notes while the proposal appears to require the collection of the tax, it does not give the locals or the Department the necessary authority to actually collect the tobacco tax or to deposit the tobacco tax into any state or local fund. Therefore it appears this tobacco tax will not generate any revenue to the state, to any local political subdivision, or to any Fund.

Officials from the **Department of Public Safety** indicated there is no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to local tobacco taxation does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated Initiative Petition 24-173 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal relating to local tobacco taxation does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-173, a proposed constitutional amendment to Article X, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, they estimate publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-173 will have no fiscal impact on their office.

Officials from the **Office of the State Treasurer** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated in reviewing initiative petition 24-173 it has been determined there may be an increased cost to the County of Greene if voters vote to amend Article X. After further review it has been determined that there is very likely opportunity for additional costs to the county. The language is vague as to how the ballot measure will be placed on the ballot for local voters, which requires an estimate for the issue placed on the ballot through initiative petition or by the County Commission if it chooses to put the question before voters. Therefore, in anticipation of those potential costs please find the following estimate for this IP.

The anticipated cost for verification of the signatures for the petition, if that option is used to place this question before voters is **\$7,482.90**. This estimate is based on the number of hours from signatures verified in 2022.

The language also appears to allow the election to be held at the next county election date available where the referendum provision may be presented to voters by a political subdivision. With that understanding the per voters cost to administer an election during an April election when costs are proportionally shared by political subdivisions will be submitted, as well as the costs to host an election when the political subdivision is the only entity to hold an election below:

Scenario 1 – Proportional Costs

The most recent April 2023 election cost **\$361,991.59**. The estimated cost total county portion to be paid from the **\$361,991.59** election cost total is estimated to be **\$99,103.27**.

Scenario 2 – County only Political Subdivision Cost

A countywide special election has an estimated total cost of **\$337,336.50**.

The county will also need to retain legal counsel to write the ballot summary and title for the question being proposed to the voters of the county. A minimum estimate for 8 hours of legal work at a **\$240.00** an hour would be **\$1,920** of legal fees at a minimum.

In addition, there is to their knowledge no adequate information available to know the volume of sales of tobacco products at retail establishments where the tobacco product would be sold within Greene County to create an estimate of potential sales tax the county would receive if a sales tax rate is applied to each tobacco purchase. The Greene County Budget office was contacted regarding any tobacco sales data specific to Greene County they could provide, as well as the Missouri Department of Revenue. Neither office was able to provide the sales data needed to create a reliable estimate. If this data does become available, an estimate could then be submitted. There also may be additional costs to attain the tax collected for each tobacco purchase that without the volume of tobacco sales information cannot be ascertained either.

Though the IP is silent on how the question is to be put before voters, it states that, “local voters shall have the right and option to set tobacco taxes in counties,” in subsection 2. State statute allows for voters to put an issue before voters in their respective county in RSMo 115.700. The election costs estimate submitted allow for a scenario of when the question would be presented to the voters as a stand-alone countywide issue when no other issue and/or candidate is on the ballot. In that scenario the county would pay the full cost. In an election where the issue would be shared with other political subdivisions, an estimate is submitted as well. The county pays its proportional share of the ballot costs for any election it has an issue and/or candidates on a ballot in an election per RSMo 115.065.

The county's prosecutor examined RSMo 115.700. In his brief research, he did not disagree with the understanding previously provided. The vagueness of the statute does not in the opinion of county officials present an issue for a county of any classification from using it as a method when a constitutional amendment with this language is passed.

Greene County Employee Initiative Petition Signature Costs

Employee	Rate of Pay	Estimate Hours*	Total Cost
Coordinator	23.07	30	\$692.10
Clerk I	15.49	120	\$1,858.80
Temporary Employee	20.55	120	\$2,466.00
Temporary Employee	20.55	120	\$2,466.00

*Estimate based on number of hours from 2022 petition

\$7,482.90

Officials from **St. Louis County** indicated there should be no fiscal cost to their county resulting from this proposed amendment.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated there may impact to their college. Unknown at this time as to what education level they're talking about, and how the local voters will decide how to spend the money.

Officials from **University of Missouri** indicated no fiscal impact expected for the University of Missouri System.

Officials from the **St. Louis Community College** indicated they have reviewed the petition initiative and do not see a revenue, expense, or operational change that would affect their college.

Officials from the **Missouri Veterans Commission** (MVC) indicated no fiscal impact to MVC.

Officials from the **Kansas City Board of Police Commissioners** indicated there is no anticipated cost or savings to KCPD based on this measure.

Officials from the **St. Louis County Board of Elections** indicated they have reviewed initiative petition 24-173 and see no fiscal impact to their operations.

Officials from the **Board of Election Commissioners City of St. Louis** indicated no impact on their organization, unless the election regarding this measure generated a stand alone election, in which case the cost could be potentially 500K.

Officials from the **Kansas City Board of Election Commissioners** indicated the effect of Article X (2024-173) on their operations would be immaterial (less than \$5000).

Officials from the **Platte County Board of Elections** indicated there would be no fiscal impact on their Board of Elections.

Officials from the **Jackson County Election Board** indicated this has no fiscal impact to their Board of Elections.

Bradley Ketcher, Ketcher Law Firm, LLC provided the following information:

This proposed measure would give local voters in counties control over local tobacco taxes in those counties. It does not call for a tax increase or decrease, but simply gives local voters the right and option to set local tobacco taxes.

It is directly analogous to statutory IP 24-113, which your office developed a fiscal note and summary for earlier this year. Like the current initiative, that proposal would give local voters the "right and option" to set certain taxes. In the fiscal note for that measure, your office found no cost or savings for state or local governments.

The current proposal should receive the same analysis, fiscal note, and fiscal summary as IP 24-113. The proposal has no fiscal impact on state funds because the proposal requires nothing from state government. Further, the proposal has no fiscal impact on local funds because it is a "local voters' option" measure that includes no mandate and requires nothing of local governments.

As an additional touchstone, the Committee on Legislative Research, Oversight Division has consistently developed a "zero cost" fiscal note for such local option proposals.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, the Metropolitan Police Department - City of St. Louis, St. Charles County Election Authority, and the Clay County Board of Election Commissioners.**

Fiscal Note Summary

State and local governmental entities estimate no costs or savings.

Jefferson City, MO 65101

RE: Petition approval request from Deirdre Hirner regarding a proposed constitutional amendment to Article X (2024-172)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Deirdre Hirner on December 1, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

INITIATIVE PETITION

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:

We, the undersigned, registered voters of the state of Missouri and _____ County (or city of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 5th day of November, 2024, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or city of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section in Article X to be known as Section 27 is enacted as follows:

Section 27

1. This section shall be known as the “Local Voters’ Right and Option to Set Tobacco Taxes Initiative.”

2. Notwithstanding section 1 of this article or any other law to the contrary, local voters shall have the right and option to set tobacco taxes in counties.

3. Any tobacco tax approved by local voters under this initiative shall be used solely for education, health and mental health, crime prevention, job creation, veterans’ services, or other local use specifically approved by local voters, so long as the use is legal under Missouri law.

4. As used in this initiative, the following terms have the following meanings:

(1) “Local voters” shall not mean the General Assembly nor the local governing body in a county, but shall only mean a majority of the qualified voters casting ballots in an election in a county on a county-wide tobacco cigarette tax measure, whether submitted to local voters by the local governing body or by initiative petition.

(2) “Right and option to set tobacco taxes” means the right, power, and authority to set, control, impose, establish, levy, collect, fix, reduce, eliminate, or change the rate or dedicated use of a county excise tax on tobacco cigarettes.

5. All existing local tobacco taxes and any dedicated uses in place on the effective date of this initiative shall remain in effect provided, however, that the rate or dedicated use of such taxes may only be modified with the approval of local voters.

6. The provisions of this initiative are self-executing. Governing bodies in counties are authorized, but not mandated, to submit measures to local voters to set local tobacco taxes at authorized elections. In addition, the people are authorized, but not mandated, to submit measures to local voters by initiative petition to set local tobacco taxes at authorized elections occurring after the date this initiative is approved by voters. The people may submit measures under existing county initiative petition procedures where otherwise available or, under this subsection, by filing with the appropriate local election authority or authorities a petition signed by five percent of the qualified voters of the county as measured by the total number of votes cast for governor in such county at the last general gubernatorial election prior to the filing of the petition. Any initiative petition submitted under the process created by this subsection that has a deficient number of valid signatures shall have sixty days after notification of such deficiency to submit additional valid signatures and cure the adequacy of the petition. Initiative petitions submitted under the process created by this subsection shall include the rate and dedicated use of any tobacco tax revenue, along with related administrative provisions. The ballot title for initiative petitions submitted under the provisions created by this subsection shall be fifty words or less, excluding articles, shall be prepared by the county’s attorney, shall be limited to the tobacco tax rate change, if any, and the dedicated use of tobacco tax revenue, if any. Such ballot title shall be a true and impartial statement of any tobacco tax rate change and any dedicated use of tobacco tax revenue in language neither intentionally argumentative nor likely to create prejudice either for or against the proposed measure. Both the adequacy of signatures and the formulation of the ballot title shall be subject to judicial review. If approved by local voters, the proposal shall carry the force of law. For purposes of this subsection, “authorized election” means any election day after January 1, 2026. However, where the people submit a measure to set local tobacco taxes through the initiative petition provisions established under this subsection, the authorized election shall be the earliest available election day, whether a general, primary, general municipal, or other established election day, after sufficient valid signatures are submitted that is also after January 1, 2025.

7. All of the provisions of this initiative are severable. If any provision of this initiative is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-172)**

Subject

Initiative petition from Deirdre Hirner regarding a proposed constitutional amendment to Article X. (Received December 04, 2023)

Date

December 22, 2023

Description

This proposal would amend Article X of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **Missouri Veterans Commission**, the **Kansas City Board of Police Commissioners**, the **Metropolitan Police Department - City of St. Louis**, **St. Charles County Election Authority**, **St. Louis County Board of Elections**, **Board of Election Commissioners City of St. Louis**, **Kansas City Board of Election Commissioners**,

Platte County Board of Elections, Jackson County Election Board, and the Clay County Board of Election Commissioners.

Bradley Ketcher, Ketcher Law Firm, LLC provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-172 and determined there is no measurable fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated no impact to their agency, however, the voting on local tobacco taxes could have an impact on local health agencies as the tobacco tax approved by local voters under this initiative shall be used solely for education, health and mental health, crime prevention, job creation, veterans' services or other local use specifically approved by voters.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-172 proposing to amend Article X.

Officials from the **Department of Revenue** indicated this IP attempts to give local political subdivisions the ability to vote on and create a tax on tobacco products. Currently, the only two local political subdivisions that have a tax on tobacco are Jackson County and St. Louis County. The businesses in those areas remit the tax to the Department of Revenue and the Department distributes it. As reimbursement for the administration of this tax, the Department is allowed to retain 1% of all tobacco tax remitted.

While this proposal would allow the voters in their local political subdivision to implement a tax, this IP does not address who will collect the tax and where it is to be distributed. The Department of Revenue (Department) notes while the proposal appears to require the collection of the tax, it does not give the locals or the Department the necessary authority to actually collect the tobacco tax or to deposit the tobacco tax into any state or local fund. Therefore it appears this tobacco tax will not generate any revenue to the state, to any local political subdivision, or to any Fund.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to local tobacco taxation does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated Initiative Petition 24-172 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal relating to local tobacco taxation does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-172, a proposed constitutional amendment to Article X, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills

that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, they estimate publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of our publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-172 will have no fiscal impact on their office.

Officials from the **Office of the State Treasurer** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated in reviewing initiative petition 24-172 it has been determined there will be an increased cost to the County of Greene if voters vote to amend Article X. After further review it has been determined that there are additional costs to the county that had not been previously set forth in previous IP estimates with similar language. Those cost are noted in the following estimate for this IP.

The anticipated cost for verification of the signatures for the petition if that option is used is **\$7,482.90**. This estimate is based on the number of hours from signatures verified in 2022. An attachment with the estimate totals has been provided.

The language allows the election to be held at the next county election date available where the referendum provision may be presented to voters by a political subdivision. With that understanding the per voter cost to administer an election during an April election when costs are proportionally shared by political subdivisions will be submitted, as well as the costs to host an election when the political subdivision is the only entity to hold an election below:

Scenario 1 – Proportional Costs

The most recent April 2023 election cost **\$361,991.59**. The estimated cost total county portion to be paid from the **\$361,991.59** election cost total is estimated to be **\$99,103.27**.

Scenario 2 – County only Political Subdivision Cost

A countywide special election has an estimated total cost of **\$337,336.50**.

It also calls for the county to retain legal counsel to write the ballot summary and title for the question being proposed to the voters of the county. A minimum estimate for 8 hours of legal work at a **\$240.00** an hour would be **\$1,920** of legal fees at a minimum.

In addition, there is to their knowledge no adequate information available to know the volume of sales of tobacco products at retail establishments where tobacco product are sold within Greene County to create an estimate of potential sales tax the county would receive if a sales tax rate is applied to each tobacco purchase. The Greene County Budget office was contacted regarding any tobacco sales data specific to Greene County they could provide, as well as the Missouri Department of Revenue. Neither office was able to provide the sales data needed to create a reliable estimate. If this data does become available, an estimate could then be submitted. There also may be additional costs to attain the tax collected for each tobacco purchase that without the volume of tobacco sales information cannot be ascertained either.

Officials from **St. Louis County** indicated this amendment should have no fiscal impact on their county.

Officials from the **City of Columbia** indicated their local government estimates the fiscal impact of the above-referenced bill for fiscal years 2024, 2025, and 2026 to be as follows:

Surveys administered by the National Center for Health Statistics have found that, as cigarette usage has dropped among adults in the US, electronic cigarette usage has increased.¹ It is reasonable to assume that a certain portion of prior cigarette users have switched to e-cigarette use.

Consistent with this trend, the City of Columbia has experienced a 33% fall in revenue from cigarette taxes over the last six years (as shown in Chart 2 below).

¹ https://wwwn.cdc.gov/NHISDataQueryTool/ER_Biannual/index_biannual.html

The amendment proposes granting greater control to local voters regarding taxes levied on tobacco products, which include electronic cigarettes.² Until local voters change the excise tax on cigarettes and tobacco products, current trends and substitution to e-cigarettes will continue to have a detrimental impact on local government revenue collection. If voters approve an excise tax on e-cigarettes, then, in FY 25 and FY 26, the City of Columbia would add approximately \$11,841 to \$59,206 annually, assuming a per unit rate of \$0.10 to \$0.50 is adopted. Furthermore, increasing the excise tax rate on cigarettes could add approximately \$345,177.50 annually if the excise tax is increased to \$0.20 per pack of cigarettes. Calculations and estimations are detailed below:

Population Over 18 in Columbia, MO	99,551
Estimated E-cigarette Users in Columbia, MO	6,073
Average US E-cigarette Usage Rate	19.5
Estimated Annual E-cigarette Sales in Columbia, MO	\$118,420

Assuming Columbia's overall electronic cigarette usage rate is that of the most recent national rate, 6.1%, Columbia has approximately 6,073 electronic cigarette users. The CDC has estimated that electronic cigarette sales averaged 23.91 million units per month, which means electronic cigarette users average 1.62 units per month or 19.5 units per year.³ Simply extending the \$0.10 per unit tax currently collected on packs of cigarettes in Columbia to electronic cigarette sales would generate \$11,842.35 in tax revenue per year.

² <https://www.federalregister.gov/documents/2023/03/20/2023-03950/definition-of-the-term-tobacco-product-in-regulations-issued-under-the-federal-food-drug-and#:~:text=Tobacco%20product%20means%20any%20product,or%20accessory%20of%20a%20tobacco>

³ https://www.cdcfoundation.org/Issue33-MonthlyECigaretteSalesDataBrief_9.10.2023.pdf?inline

The petition would allow altering the rate collected on cigarettes and other tobacco products, which are among the lowest in the nation here in Columbia and across Missouri. Such changes could have significant fiscal impacts. Demand for cigarettes is considered to be inelastic, so increases in the per unit excise tax rate would likely have a proportional impact on the total tax collected.

Tax Rate	Additional Revenue from E-Cigarette Tax	Additional Revenue from Change to Existing Cigarette Tax*	Additional Revenue from Change to Cigarette & Other Tobacco Tax
\$0.10	\$11,842.04	\$0 (Current Rate)	\$11,842.04
\$0.20	\$23,684.08	\$345,177.50	\$368,861.58
\$0.50	\$59,210.20	\$1,380,710.00	\$1,439,920.20

*Calculated based on FY 23 cigarette excise collection as shown in Chart 2.

The business license office anticipates that changes to taxes regarding cigarette and tobacco products, including electronic cigarettes, would necessitate an additional 0.5 FTE business service technician, which would cost the City anywhere from \$18,962.50 to \$27,685 annually.

Officials from the **City of Kansas City** indicated this petition would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **St. Louis Community College** indicated they have reviewed the petition initiative and are unable to determine whether it would have a positive effect on their revenue. They do not see a negative impact; however, they do not know if the State is currently allocating any tobacco tax revenues to the College and therefore, if the petition passed could/would impact them. That being said the petition wording is vague and therefore in their opinion flawed. For example, are there any limitations on the amount of taxes charged or does the "first come first served" mentality suck all the air out of the room to the detriment of other stakeholders. As an example, if the petition passes and then results in the police having a tax vote first, does that make it probable that another party (say veteran services) may be estopped (in a practical sense) from a tax vote because the police tax makes it more difficult to pass future taxes?

However, regarding your specific request, they do not see a negative impact and cannot determine if there is a positive impact.

Officials from the **Missouri Veterans Commission** (MVC) indicated there is no fiscal impact.

Officials from the **Kansas City Board of Police Commissioners** indicated there is no financial impacts to their board.

Officials from the **St. Louis County Board of Elections** indicated they have reviewed initiative petition 24-172 and see no fiscal impact to their operations.

Officials from the **Board of Election Commissioners City of St. Louis** indicated if an election was called, the cost of a city wide election could be upwards of 300k.

Officials from the **Kansas City Board of Election Commissioners** indicated the cost to conduct a jurisdiction-wide election in the Kansas City portion of Jackson County is \$850,000. If the election is held on a Primary or General election day, the cost is allocated one third each to Jackson County, Kansas City and the State. Outside those two dates, the cost is allocated based on voter registration for the entities participating in that election.

Officials from the **Platte County Board of Elections** indicated no fiscal impact to their Board of Elections.

Officials from the **Jackson County Election Board** indicated requiring the local election authority to create a ballot title for the Local Voters' Right and Option to Set Tobacco Taxes Initiatives would require legal review by both Election Board attorneys.

Cost \$500.00 - \$1,000.00

If the election were to be held on a primary or general election Jackson County would have a budget already in place for an additional question.

If an election were to be held in an off year or a non-countywide election the cost would be substantial.

The amount below would be for Eastern Jackson County only. The Kansas City Election Board would have to provide their cost for Kansas City proper.

Cost of a non-budgeted countywide election (Eastern Jackson County only)

\$600,000 - \$700,000.

Bradley Ketcher, Ketcher Law Firm, LLC provided the following information:

This proposed measure would give local voters in counties control over local tobacco taxes in those counties. It does not call for a tax increase or decrease, but simply gives local voters the right and option to set their own local tobacco taxes.

It is directly analogous to statutory IP 24-113, which your office developed a fiscal note and summary for earlier this year. Like the current initiative, that proposal would give local

voters the "right and option" to set certain taxes. In the fiscal note for that measure, your office found no cost or savings for state or local governments.

The current proposal should receive the same analysis, fiscal note, and fiscal summary as IP 24-113. The proposal has no fiscal impact on state funds because the proposal requires nothing from state government. Further, the proposal has no fiscal impact on local funds because it is a "local voters' option" measure that includes no mandate and requires nothing of local governments.

As an additional touchstone, the Committee on Legislative Research, Oversight Division has consistently developed a "zero cost" fiscal note for such local option proposals.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, University of Missouri, the Metropolitan Police Department - City of St. Louis, St. Charles County Election Authority, and the Clay County Board of Election Commissioners.**

Fiscal Note Summary

State and local governmental entities estimate no direct costs or savings. Attempts to implement a local tobacco tax, or to modify an existing local tobacco tax, could result in changes in revenue or increased election related or other costs for these entities that cannot be estimated.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-171)**

Subject

Initiative petition from Deirdre Hirner regarding a proposed constitutional amendment to Article X. (Received November 21, 2023)

Date

December 11, 2023

Description

This proposal would amend Article X of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **Missouri Veterans Commission**, the **Kansas City Board of Police Commissioners**, the **Metropolitan Police Department - City of St. Louis**, **St. Charles County Election Authority**, **St. Louis County Board of Elections**, **Board of Election Commissioners City of St. Louis**, **Kansas City Board of Election Commissioners**,

Platte County Board of Elections, Jackson County Election Board, and the Clay County Board of Election Commissioners.

Bradley Ketcher, Ketcher Law Firm, LLC provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-171 and determined there is no impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-171 proposing to amend Article X.

Officials from the **Department of Revenue** indicated this IP attempts to give local political subdivisions the ability to vote on and create a tax on tobacco products. Currently, the only two local political subdivisions that have a tax on tobacco are Jackson County and St. Louis

County. The businesses in those areas remit the tax to the Department of Revenue and the Department distributes it. As reimbursement for the administration of this tax, the Department is allowed to retain 1% of all tobacco tax remitted.

While this proposal would allow the voters in their local political subdivision to implement a tax, this IP does not address who will collect the tax and where it is to be distributed. The Department of Revenue (Department) notes while the proposal appears to require the collection of the tax, it does not give the locals or the Department the necessary authority to actually collect the tobacco tax or to deposit the tobacco tax into any state or local fund. Therefore it appears this tobacco tax will not generate any revenue to the state, to any local political subdivision, or to any Fund.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to local tobacco taxation does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated Initiative Petition 24-171 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal relating to local tobacco taxation does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated that in reference to Initiative Petition 24-171 a proposed constitutional amendment to Article X, there is no fiscal impact on the Courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, they estimate publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-171 will have no fiscal impact on their office.

Officials from the **Office of the State Treasurer** indicated no fiscal impact to their office.

Officials from **Cass County** provided comments of the estimated fiscal impact on proposed initiative petition 2024-171. The largest consideration, in their opinion, would be the very expensive but unknown amount of legal exposure and litigation costs. It would be important that this unlimited amount of legal exposure is highlighted in any fiscal impact statement because they believe such legal challenge is probable with this proposed IP. They provided the following information:

The Very Honorable Mr. Scott Fitzpatrick
Missouri State Auditor

RE: Initiative Petition No. 2024-171 – Fiscal impact

Mr. Auditor:

As the Auditor of Cass County, I write to provide insight as to the fiscal impact to county government by an Initiative Petition and the ramifications thereof. I have reviewed a summary of the proposed initiative petition numbered 2024-171. This initiative petition would commit county governments to some certain amounts and some uncertain amounts of spending by extending an initiative petition process to counties in Missouri and possibly forcing a special election.

The initiative petition process contained in 2024-171, would require signatures from five percent of the qualified voters in a county to put a product-specific tax on the ballot in that county. If sufficient signatures are verified by the county clerk, then the new taxation measure would go on the first available election day. Additionally, a ballot title would be required to be drafted for the tobacco tax proposal and such title would be drafted by the county clerk. Each of these provisions will carry varying degrees of costs with varying ranges of exposure and each provision certainly creates its own risk of large financial exposure to Cass County due to the possibility litigation costs throughout the process.

For example, signature verification requires staffing to review the submitted initiative petitions and compare those signatures to the files of registered voters in the county. Since the verification will take an unknown number of hours and could occur at any time, including holiday season or the weeks before or after a general election, I cannot reasonably even begin to estimate the cost, however it would cost the county money to achieve the signature verification. The major thing to consider with regard to fiscal impact in our county would be the exposure to unknown costs in litigation. I would conclude that signature verification for this IP is certain cost to the county, but an unknown, and possibly very large expense.

The proposed measure also requires an immediate election. The cost of ballot printing, staffing at the polling places, and advertising the ballot is estimated to be up to \$62,459.89 for Cass County. That cost estimate assumes that the IP is the sole ballot measure in a full county-wide election.

The drafting of a ballot title is a new duty for the county clerk. As we know, litigation over ballot titles is frequent and predictable. The proposed initiative expressly provides for judicial review of any ballot title. To draft a ballot title that would survive judicial scrutiny would require the retention of an election attorney with experience in this field. Moreover, if the ballot title is challenged, then there will be a need to retain election counsel with expertise in the field. Tare few attorneys with this experience, and I estimate the legal costs to be possible and likely. This provision may have an unknowably expensive fiscal impact that the county would be required to absorb.

In short, IP exposes Cass County to certain, clearly stated election and signature verification costs. More impactful would be the very, very large financial exposure that could easily reach hundreds of thousands, or possibly over a million dollars. This legal exposure is unlimited coming from both the signature, drafting, and election provisions. It is also possible, but much less likely that cost be contained to election and signature verification alone. These provisions, themselves, carry a certain fiscal impact that would range from \$20,000 to \$82,459.89.

Respectfully submitted,

Jack Bondon
Cass County, Missouri Auditor

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated that there are estimated costs to report from the County of Greene for 24-171 proposing to amend Article X. The anticipated cost for verification of the signatures for the petition if that option is used is **\$7,482.90**. This estimate is based on the number of hours from signatures verified in 2022. An attachment with the estimate totals has been provided.

In addition, there is to their knowledge no adequate information available to know the volume of sales of tobacco products at retail establishments where tobacco product are sold within Greene County to create an estimate of potential sales tax the county would receive if a sales tax rate is applied to each tobacco purchase. The Greene County Budget office was contacted regarding any tobacco sales data specific to Greene County they could provide, as well as the Missouri Department of Revenue. Neither office was able to provide the sales data needed to create a reliable estimate. If this data does become available, an estimate could then be submitted.

Greene County Employee Initiative Petition Signature Costs

Employee	Rate of Pay	Estimate Hours*	Total Cost
Coordinator	23.07	30	\$692.10
Clerk I	15.49	120	\$1,858.80
Temporary Employee	20.55	120	\$2,466.00
Temporary Employee	20.55	120	\$2,466.00

*Estimate based on number of hours from 2022 petition

\$7,482.90

3 weeks @ 40 hours a week
3 weeks @ 40 hours a week
3 weeks @ 40 hours a week

Officials from **St. Louis County** indicated this amendment should have no fiscal impact on their county.

Officials from the **City of Columbia** indicated their local government estimates the fiscal impact of this initiative petition for fiscal years 2024, 2025, and 2026 to be as follows:

Surveys administered by the National Center for Health Statistics have found that, as cigarette usage has dropped among adults in the US, electronic cigarette usage has increased.¹ It is reasonable to assume that a certain portion of prior cigarette users have switched to e-cigarette use.

Consistent with this trend, the City of Columbia has experienced a 33% fall in revenue from cigarette taxes over the last six years (as shown in Chart 2 below).

¹ https://wwwn.cdc.gov/NHISDataQueryTool/ER_Biannual/index_biannual.html

The amendment proposes granting greater control to local voters regarding taxes levied on tobacco products, which include electronic cigarettes.² Until local voters change the excise tax on cigarettes and tobacco products, current trends and substitution to e-cigarettes will continue to have a detrimental impact on local government revenue collection. If voters approve an excise tax on e-cigarettes, then, in FY 25 and FY 26, the City of Columbia would add approximately \$11,841 to \$59,206 annually, assuming a per unit rate of \$0.10 to \$0.50 is adopted. Furthermore, increasing the excise tax rate on cigarettes could add approximately \$345,177.50 annually if the excise tax is increased to \$0.20 per pack of cigarettes. Calculations and estimations are detailed below:

Population Over 18 in Columbia, MO	99,551
Estimated E-cigarette Users in Columbia, MO	6,073
Average US E-cigarette Usage Rate	19.5
Estimated Annual E-cigarette Sales in Columbia, MO	\$118,420

Assuming Columbia's overall electronic cigarette usage rate is that of the most recent national rate, 6.1%, Columbia has approximately 6,073 electronic cigarette users. The CDC has estimated that electronic cigarette sales averaged 23.91 million units per month, which means electronic cigarette users average 1.62 units per month or 19.5 units per year.³ Simply extending the \$0.10 per unit tax currently collected on packs of cigarettes in Columbia to electronic cigarette sales would generate \$11,842.35 in tax revenue per year.

² <https://www.federalregister.gov/documents/2023/03/20/2023-03950/definition-of-the-term-tobacco-product-in-regulations-issued-under-the-federal-food-drug-and#:~:text=Tobacco%20product%20means%20any%20product,or%20accessory%20of%20a%20tobacco>

³ https://www.cdcfoundation.org/Issue33-MonthlyECigaretteSalesDataBrief_9.10.2023.pdf?inline

The petition would allow altering the rate collected on cigarettes and other tobacco products, which are among the lowest in the nation here in Columbia and across Missouri. Such changes could have significant fiscal impacts. Demand for cigarettes is considered to be inelastic, so increases in the per unit excise tax rate would likely have a proportional impact on the total tax collected.

Tax Rate	Additional Revenue from E-Cigarette Tax	Additional Revenue from Change to Existing Cigarette Tax*	Additional Revenue from Change to Cigarette & Other Tobacco Tax
\$0.10	\$11,842.04	\$0 (Current Rate)	\$11,842.04
\$0.20	\$23,684.08	\$345,177.50	\$368,861.58
\$0.50	\$59,210.20	\$1,380,710.00	\$1,439,920.20

*Calculated based on FY 23 cigarette excise collection as shown in Chart 2.

The business license office anticipates that changes to taxes regarding cigarette and tobacco products, including electronic cigarettes, would necessitate an additional 0.5 FTE business service technician, which would cost the City anywhere from \$18,962.50 to \$27,685 annually.

Officials from the **City of Kansas City** indicated this petition would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated there will not be any significant impact to the University of Missouri system.

Officials from the **Missouri Veterans Commission** (MVC) indicated there is no fiscal impact to MVC on Initiative Petition.

Officials from the **Kansas City Board of Police Commissioners** indicated there is no immediate cost or savings that will affect KCPD.

Officials from the **St. Louis County Board of Elections** indicated they have reviewed initiative petition 24-171 and see no fiscal impact to their operations.

Officials from the **Board of Election Commissioners City of St. Louis** indicated if an election was called, the cost of a city wide election could be upwards of 300k.

Officials from the **Kansas City Board of Election Commissioners** indicated the cost to conduct a jurisdiction-wide election in the Kansas City portion of Jackson County is

\$850,000. If the election is held on a Primary or General election day, the cost is allocated one third each to Jackson County, Kansas City and the State. Outside those two dates, the cost is allocated based on voter registration for the entities participating in that election.

Officials from the **Platte County Board of Elections** indicated no fiscal impact to their Board of Elections.

Officials from the **Jackson County Election Board** indicated requiring the local election authority to create a ballot title for the Local Voters' Right and Option to Set Tobacco Taxes Initiatives would require legal review by both Election Board attorneys.

Cost \$500.00 - \$1,000.00

If the election were to be held on a primary or general election Jackson County would have a budget already in place for an additional question.

If an election were to be held in an off year or a non-countywide election the cost would be substantial.

The amount below would be for Eastern Jackson County only. The Kansas City Election Board would have to provide their cost for Kansas City proper.

Cost of a non-budgeted countywide election (Eastern Jackson County only)

\$600,000 - \$700,000.

Bradley Ketcher, Ketcher Law Firm, LLC provided the following information:

This proposed measure would give local voters in counties control over local tobacco taxes in those counties. It does not call for a tax increase or decrease, but simply gives local voters the right and option to set their own local tobacco taxes.

It is directly analogous to statutory IP 24-113, which your office developed a fiscal note and summary for earlier this year. Like the current initiative, that proposal would give local voters the “right and option” to set certain taxes. In the fiscal note for that measure, your office found no cost or savings for state or local governments.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, St. Louis Community College, the Metropolitan Police Department - City**

of St. Louis, St. Charles County Election Authority, and the Clay County Board of Election Commissioners.

Fiscal Note Summary

State and local governmental entities estimate no direct costs or savings. Attempts to implement a local tobacco tax, or to modify an existing local tobacco tax, could result in changes in revenue or increased election related or other costs for these entities that cannot be estimated.

STATE AUDITORS OFFICE

RE: Petition approval request from Deirdre Hirner regarding a proposed constitutional amendment to Article X, version 2 (2024-170)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Deirdre Hirner on November 13, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

INITIATIVE PETITION

To the Honorable John Ashcroft, Secretary of State for the state of Missouri:

We, the undersigned, registered voters of the state of Missouri and _____ County (or city of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 5th day of November, 2024, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or city of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

One new section in Article X to be known as Section 27 is enacted as follows:

Section 27

1. This section shall be known as the “Local Voters’ Right and Option to Set Tobacco Taxes Initiative.”

2. Notwithstanding section 1 of this article or any other law to the contrary, local voters shall have the right and option to set tobacco taxes in counties.

3. Any tobacco tax approved by local voters under this initiative shall be used solely for education, health and mental health, crime prevention, job creation, veterans’ services, or other local use specifically approved by voters.

4. As used in this initiative, the following terms have the following meanings:

(1) “Local voters” shall not mean the General Assembly nor the local governing body in a county, but shall only mean a majority of the qualified voters casting ballots in an election in a county on a county-wide tobacco tax measure, whether submitted to local voters by the local governing body or by initiative petition.

(2) “Right and option to set tobacco taxes” means the right, power, and authority to set, control, impose, establish, levy, collect, fix, reduce, eliminate, or change the rate, base, or dedicated use of a county excise tax on cigarettes or tobacco products, or other tax on cigarettes or tobacco products, or on the selling of cigarettes or tobacco products, or on the business of selling cigarettes or tobacco products.

5. All existing local tobacco taxes in place on the effective date of this initiative shall remain in effect provided, however, that the rate, base, or dedicated use of such local tobacco taxes may only be modified with the approval of local voters.

6. The provisions of this initiative are self-executing. Governing bodies in counties are authorized, but not mandated, to submit measures to local voters to set local tobacco taxes at authorized elections. In addition, the people are authorized, but not mandated, to submit measures to local voters by initiative petition to set local tobacco taxes at authorized elections occurring after the date this initiative is approved by voters. The people may submit measures under existing county initiative petition procedures where otherwise available or, under this subsection, by filing with the appropriate local election authority or authorities a petition signed by five percent of the qualified voters of the county as measured by the total number of votes cast for governor in such county at the last general gubernatorial election prior to the filing of the petition. Any initiative petition submitted under the process created by this subsection that has a deficient number of valid signatures shall have thirty days after notification of such deficiency to submit additional valid signatures and cure the petition. Initiative petitions submitted under the process created by this subsection shall include the rate, base, and dedicated use of any tax revenue, but only if the tax rate is increased or tax base broadened, along with related administrative provisions. The ballot title for initiative petitions submitted under the provisions created by this subsection shall be fifty words or less, excluding articles, shall be prepared by the local election authority or authorities, and shall be a true and impartial statement of the purposes of the proposed measure in language neither intentionally argumentative nor likely to create prejudice either for or against the proposed measure. Both the adequacy of signatures and the formulation of the ballot title shall be subject to judicial review. If approved by local voters, the proposal shall carry the force of law. For purposes of this subsection, “authorized election” means any election day after January 1, 2026. However, where the people submit a measure to set local tobacco taxes through the initiative petition provisions established under this subsection, the authorized election shall be the earliest available election day, whether a general, primary, general municipal, or other established election day, after sufficient valid signatures are submitted that is also after January 1, 2025.

7. All of the provisions of this initiative are severable. If any provision of this initiative is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-170)**

Subject

Initiative petition from Deirdre Hirner regarding a proposed constitutional amendment to Article X. (Received November 14, 2023)

Date

December 8, 2023

Description

This proposal would amend Article X of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **Missouri Veterans Commission**, the **Kansas City Board of Police Commissioners**, the **Metropolitan Police Department - City of St. Louis**, **St. Charles County Election Authority**, **St. Louis County Board of Elections**, **Board of Election Commissioners City of St. Louis**, **Kansas City Board of Election Commissioners**,

Platte County Board of Elections, Jackson County Election Board, and the Clay County Board of Election Commissioners.

Bradley Ketcher, Ketcher Law Firm, LLC provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-170 and determined there is no fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their agency, however, the voting on local tobacco taxes could have an impact on local health agencies as the tobacco tax approved by local voters under this initiative shall be used solely for education, health and mental health, crime prevention, job creation, veterans' services or other local use specifically approved by voters.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-170 proposing to amend Article X.

Officials from the **Department of Revenue** indicated this IP attempts to give local political subdivisions the ability to vote on and create a tax on tobacco products. Currently, the only two local political subdivisions that have a tax on tobacco are Jackson County and St. Louis County. The businesses in those areas remit the tax to the Department of Revenue and the Department distributes it. As reimbursement for the administration of this tax, the Department is allowed to retain 1% of all tobacco tax remitted.

While this proposal would allow the voters in their local political subdivision to implement a tax, this IP does not address who will collect the tax and where it is to be distributed. The Department of Revenue (Department) notes while the proposal appears to require the collection of the tax, it does not give the locals or the Department the necessary authority to actually collect the tobacco tax or to deposit the tobacco tax into any state or local fund. Therefore it appears this tobacco tax will not generate any revenue to the state, to any local political subdivision, or to any Fund.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to local tobacco taxation does not financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated Initiative Petition 24-170 will not impact their department because it will have no fiscal impact on their department because it will not impact the rate of state sales tax.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal relating to local tobacco taxation does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-170, a proposed constitutional amendment to Article X, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, Section 115.063.2, RSMo, requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Sections 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, they estimate publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-170 will have no fiscal impact on their office.

Officials from the **Office of the State Treasurer** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are estimated costs to report from the County of Greene for 24-170 proposing to amend Article X. The anticipated cost for verification of the signatures for the petition is **\$7,482.90**. This estimate is based on the number of hours from signatures verified in 2022. An attachment with the estimate totals has been provided.

In addition, there is to their knowledge no adequate information available to know the volume of sales of tobacco products at retail establishments where tobacco product are sold within Greene County to create an estimate of potential sales tax the county would receive if a sales tax rate is applied to each tobacco purchase. The Greene County Budget office was contacted regarding any tobacco sales data specific to Greene County they could provide, as well as the Missouri Department of Revenue. Neither office was able to provide the sales data needed to create a reliable estimate. If this data does become available, an estimate could then be submitted.

The county budgets financial resources for petition signature verification work via temporary employees. The information received notated that in the attached spreadsheet. As previously mentioned, the resources allocated for signature verification are a cost for the county that is reflected through the hiring of temporary employees and the work of regular employees in fulfillment of the work necessary to verify the signatures. As an office this same process to takes place in terms of costs associated to administer elections by regular employees of the office and Sunshine requests that require research time by regular employees of the office for example.

Greene County Employee Initiative Petition Signature Costs

Employee	Rate of Pay	Estimate Hours*	Total Cost
Coordinator	23.07	30	\$692.10
Clerk I	15.49	120	\$1,858.80
Temporary Employee	20.55	120	\$2,466.00
Temporary Employee	20.55	120	\$2,466.00

*Estimate based on number of hours from 2022 petition

\$7,482.90

Comments
3 weeks @ 10 hours a week to check work/train
3 weeks @ 40 hours a week
3 weeks @ 40 hours a week
3 weeks @ 40 hours a week

Officials from **St. Louis County** indicated this proposal will not have a fiscal impact to their county.

Officials from the **City of Kansas City** indicated this petition would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated there will not be any significant impact to the University of Missouri system.

Officials from the **Missouri Veterans Commission** (MVC) indicated there is no fiscal impact to MVC on Initiative Petition 24-170.

Officials from the **Kansas City Board of Police Commissioners** indicated they are unable to determine any cost or savings that this measure would have on their board. Any funds from this petition would be determined at a later time by voters.

Officials from the **St. Louis County Board of Elections** indicated they have reviewed initiative petition 24-170 and see no fiscal impact to their operations.

Officials from the **Board of Election Commissioners City of St. Louis** indicated the initiative petition has the potential of generating an election on the soonest available day. If the petition generated a city wide election the cost of the election could be upwards of 300K.

Officials from the **Kansas City Board of Election Commissioners** indicated the cost to conduct a jurisdiction-wide election in the Kansas City portion of Jackson County is \$850,000. If the election is held on a Primary or General election day, the cost is allocated one third each to Jackson County, Kansas City and the State. Outside those two dates, the cost is allocated based on voter registration for the entities participating in that election.

Officials from the **Platte County Board of Elections** indicated there is no fiscal impact to their Board of Elections.

Officials from the **Jackson County Election Board** indicated requiring the local election authority to create a ballot title for the Local Voters' Right and Option to Set Tobacco Taxes Initiatives would require legal review by both Election Board attorneys.

Cost \$500.00 - \$1,000.00

If the election were to be held on a primary or general election Jackson County would have a budget already in place for an additional question.

If an election were to be held in an off year or a non-countywide election the cost would be substantial.

The amount below would be for Eastern Jackson County only. The Kansas City Election Board would have to provide their cost for Kansas City proper.

Cost of a non-budgeted countywide election (Eastern Jackson County only)

\$600,000 - \$700,000.

Bradley Ketcher, Ketcher Law Firm, LLC provided the following information:

This proposed measure would give local voters in counties control over local tobacco taxes in those counties. It does not call for a tax increase or decrease, but simply gives local voters the right and option to set their own local tobacco taxes.

It is directly analogous to statutory IP 24-113, which your office developed a fiscal note and summary for earlier this year. Like the current initiative, that proposal would give local voters the “right and option” to set certain taxes. In the fiscal note for that measure, your office found no cost or savings for state or local governments.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, St. Louis Community College, the Metropolitan Police Department - City of St. Louis, St. Charles County Election Authority, and the Clay County Board of Election Commissioners.**

Fiscal Note Summary

State and local governmental entities estimate no direct costs or savings. Attempts to implement a local tobacco tax, or to modify an existing local tobacco tax, could result in changes in revenue or increased election related or other costs for these entities that cannot be estimated.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article XV of the Missouri Constitution is revised by amending and adding Article XV Section 1. The following underlined text would be added.

ARTICLE XV
HEALTHCARE SECTION 1

1. The purpose of this section is to permit Missouri licensed Advanced Practice Registered Nurses to provide healthcare to patients who chose an Advanced Practice Registered Nurse for healthcare. Advanced Practice Registered Nurses will increase healthcare availability throughout Missouri by offering more choice of healthcare providers. This creates a larger healthcare network in Missouri with Advanced Practice Registered Nurses who are included in healthcare insurance panels. Advanced Practice Registered Nurses will improve health results throughout Missouri by increasing health prevention, health education, diagnosis, and treatment of acute and chronic health conditions, including prescribing all needed medications. In communities this will decrease wait times to get healthcare, reduce transportation issues having more local healthcare and increase provider choice while reducing healthcare costs for patients and Missouri.
2. Definition. "Advanced Practice Registered Nurses" includes Certified Nurse Practitioners, Certified Clinical Nurse Specialists, Certified Nurse Midwives and Certified Nurse Anesthetists licensed and in good standing under Missouri law.
3. Advance Practice Registered Nurses are licensed healthcare practitioners regulated solely by Missouri State Board of Nursing. Advanced Practice Registered Nurses shall practice with an Advanced Practice Registered Nurse license issued by Missouri State Board of Nursing.
4. Advanced Practice Registered Nurses may and will collaborate with any other healthcare professionals as determined by patient needs, including but not limited to physicians, pharmacists, registered professional nurses, physical therapists, occupational therapists, speech therapists, audiologists without required written agreements.
5. The Missouri General Assembly or the Missouri Executive Branch shall not enact laws or rules that are inconsistent with this section.
6. Advanced Practice Registered Nurses licensed and granted a controlled substance prescriptive authority certificate by Missouri State Board of Nursing can prescribe schedule II-V controlled substances, after obtaining registrations from the Missouri Bureau of Narcotics and Dangerous Drugs (BNDD) and the Federal Drug Enforcement Administration (DEA) which then allows Missouri Board of Pharmacy to accept all prescriptions prescribed by Advanced Practice Registered Nurses.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-168)**

Subject

Initiative petition from JoAnn Franklin regarding a proposed constitutional amendment to Article XV. (Received November 13, 2023)

Date

December 1, 2023

Description

This proposal would amend Article XV of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, and **St. Louis Community College**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-168 and determined there is no fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department. They also indicated the initiative petition proposes a constitutional amendment to Article XV that adds a new section regarding Advanced Practice Registered Nurses (APRNs). The proposed amendment allows APRNs to provide healthcare to patients who chose an APRN for healthcare and defines Advance Practice Registered Nurses as including Certified Nurse Practitioners, Certified Clinical Nurse Specialists, Certified Nurse Midwives and Certified Nurse Anesthetists licensed and in good standing under Missouri law. The proposed amendment would also allow APRNs to be granted a controlled substance prescriptive authority certificate after obtaining registrations from the Missouri Bureau of Narcotics and Dangerous Drugs (BNDD) and the Federal Drug Enforcement Administration (DEA).

The Department of Health and Senior Services' Bureau of Narcotics and Dangerous Drugs (BNDD) currently registers APRNs, with the exception of Certified Nurse Anesthetists, which are exempt from the current statute. Should the proposed amendment become effective, BNDD would begin registering Certified Nurse Anesthetists as another type of APRN. Any new or additional applications and registrations could be absorbed in the normal ebb and flow of the program.

It is assumed that their department can absorb the costs of this bill with current resources. However, if the workload significantly increased or other legislation was enacted, additional resources would be requested through the appropriation process.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department. The Missouri State

Board of Nursing is currently licensing these nurses and does not anticipate anything in this initiative petition would increase the board's costs, therefore they do not anticipate a fiscal impact.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the Initiative Petition 24-168 proposing to amend Article XV.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-168, their department assumes this will not have a fiscal or administrative impact on their Department or their operations. Their department also notes no impact is expected to state tax revenue from this IP 24-168.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to advanced practice nurses does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated IP 24-168 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal relating to advanced practice nurses does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-168 a proposed constitutional amendment to Article XV, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, they estimate publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-168 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for initiative petition 24-168 proposing to amend Article XV.

Officials from **St. Louis County** indicated this proposal will not have a fiscal impact to their county.

Officials from the **City of Kansas City** indicated the amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **St. Louis Community College** indicated they have reviewed the petition initiative and do not see an impact to their college; however, if the petition would require certain testing and licensure, their answer may change.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, and the University of Missouri.**

Fiscal Note Summary

State and local governmental entities estimate no costs or savings.

RE: Petition approval request from JoAnn Franklin regarding a proposed constitutional amendment to Article XV (2024-167)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by JoAnn Franklin on October 26, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by amending Section 39(e).

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article III of the Constitution is revised by amending Section 39(e) to read as follows:

Section 39(e). 1. The general assembly is authorized to permit upon the Mississippi and Missouri Rivers only, which shall include artificial spaces that contain water and that are within 1000 feet of the closest edge of the main channel of either of those rivers, lotteries, gift enterprises and games of chance to be conducted on excursion gambling boats and floating facilities. Any license issued before or after the adoption date of this amendment for any excursion gambling boat or floating facility located in any such artificial space shall be deemed to be authorized by the General Assembly and to be in compliance with this Section.

2. Notwithstanding any other provision of law to the contrary, lotteries, gift enterprises, and games of chance may be conducted on excursion gambling boats and floating facilities licensed by the Missouri Gaming Commission upon the portion of the Osage River from the Missouri River to the Bagnell Dam, which shall include artificial spaces that contain water and that are within 500 feet of the 100-year base flood elevation as established by the Federal Emergency Management Agency.

3. Notwithstanding any other provision of law to the contrary, in addition to such licenses as have been authorized prior to January 1, 2024, the Missouri Gaming Commission shall issue one additional excursion gambling boat license. Such license shall only be issued to an excursion gambling boat that will operate upon the portion of the Osage River from the Missouri River to the Bagnell Dam.

4. Notwithstanding any other provision of law to the contrary, all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024 shall only be appropriated to early-childhood literacy programs in public institutions of elementary education and shall not be included within the definition of "total state revenues" in section 17 of article X of this constitution.

5. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

[NOTICE: You are advised that the proposed constitutional amendment may be construed to change, repeal, or modify by implication Article III, Sections 39, 39(9), and 39(e).]

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-165 and determined there is no measureable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(e) of the Missouri Constitution regarding excursion gambling boats. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for this initiative petition proposing to amend Article III, version 4.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP24-165 attempts to expand the existing number of excursion gambling boats in the state of Missouri. It appears it wants the Missouri Gaming Commission (Commission) to add an additional excursion gambling boat on the Osage River.

Currently in Section 313.870 the Commission is restricted to issuing not more than 13 excursion gambling boat licenses. This proposal would add another license, to be issued to an excursion gambling boat on the Osage River.

This proposal states that the annual license fee of the Osage River excursion gambling boat is to be appropriated solely for early-childhood literacy programs in public institutions of elementary education. The Department of Revenue (Department) notes while the proposal appears to require the Osage River excursion gambling boat to pay for the license, it does not give the Commission the necessary authority to actually collect the license fee or to deposit the fee into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears this license fees will not generate any revenue to the state, the Commission, or to any Fund.

The Department notes that once the license is issued, the Osage River excursion gambling boat would be subject to all the current collection requirements of the admission fees and taxes that the current excursion gambling boats collect. The Department would be required to add this boat to our gambling revenue collection database. That can be done with existing resources.

The Department defers to the Commission for an estimate of the revenue generated from an additional excursion gambling boat from admission fees and taxes.

Officials from the **Department of Public Safety - Office of the Director** indicated there is no impact for their department, Director's Office.

The Missouri State Highway Patrol will have an impact.

Response from the Missouri State Highway Patrol:

The Patrol is tasked with enforcing gaming regulations at Missouri's thirteen (13) casinos. This proposal would add one (1) casino and the Patrol would have expenses related to staffing the additional casino. Using the current staffing model for the other casinos around the state, the Patrol is requesting nine (9) additional FTE to staff the additional casino. The one time and on-going expenses would include salary, fringe, vehicles, gasoline, and related equipment and funding for these positions would come from the Gaming Fund (0286). These expenses and equipment costs are shown below differentiating the one time and on-going costs for the nine (9) FTE.

In addition to the expenses indicated for the nine (9) FTE that will be transferring from Highway funded positions, it is assumed there will be an unknown savings to the Highway

Fund (0644), as those nine tenured troopers would be replaced with Highway funded probationary troopers.

Salary:

Position Title: Sergeant (V07005)
Annual Salary per FTE: \$99,648
Total Cost for Salaries: \$896,832

Fringe:

Annual Cost per FTE: \$85,637
Total Fringe Amount: \$770,733

Expense & Equipment:

Initial Costs: \$731,411
Ongoing Costs: \$192,103

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$2,398,976

Ongoing Costs: \$1,859,668

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-165 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for initiative petition 24-165.

Officials from the **Office of Administration** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-165 a proposed constitutional amendment to Article III, version 4 (2024-165), there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-165 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-165 proposing to amend Article III, Version 4.

Officials from **St. Louis County** indicated the initiative petition would have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Jennings School District** indicated this proposed legislation should have a small but positive impact on their school district by generating additional revenue for early childhood literacy. It is unclear how much revenue such a limited proposal shall generate if divided among all 500+ school districts in MO. Our district has seen success with DESE allocating funds to early childhood literacy, from a logistical perspective.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and do not see a financial impact to their college.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Missouri Dept. of Elementary and Secondary Education, Home Dock Cities/Counties.

This proposal may have an impact on local jurisdictions and businesses surrounding and in close proximity to the physical location of the proposed excursion gambling boat.

By allowing another casino to be licensed in Missouri, total state revenue will likely increase, in that one more casino will produce increased gaming tax and admission fees for the state and the home dock city in which it is located or increase gaming tax and admission fees for distribution to newly identified worthy causes.

Missouri Constitution, Article III, Section 39(e) (Amended by Initiative Petitions) – Permits an excursion gambling boat to be located on the portion of the Osage River between the Missouri River and the Bagnell Dam. It requires the Missouri Gaming Commission (the “Commission”) to issue one additional gambling boat license (the 14th license in the state) for an excursion gambling boat to be located on the portion of the Osage River between the Missouri River and the Bagnell Dam, to include artificial spaces

that contain water and that are within 500 feet of the 100-year base flood elevation as established by the Federal Emergency Management Agency.

Fiscal Impact

The Commission is basing its estimates for anticipated gaming revenues, taxes, and fees of an additional licensed casino on Century Casino Cape Girardeau in Cape Girardeau, Missouri. The Commission believes Century Casino Cape Girardeau would be comparable in size and volume of traffic to a casino located on the Osage River, likely near Osage Beach, Missouri (Lake of the Ozarks).

Anticipated revenue streams from an additional casino include initial licensing and renewal fees for the Class A Licensee (parent company), the Class B Licensee (casino company), Key Persons and Level I licensees (management), and Level II occupational licensees working at the casino. These fees would be paid to the Commission and deposited for use as identified in each Initiative Petition – (24-162) STEM Career Awareness Fund, (24-163) increase in teacher salaries, (24-164) pre-kindergarten education funding, and (24-165) early childhood literacy funding. The Commission estimates collecting fees totaling \$271,000 in the first year, followed by ongoing fee collections of \$63,100 each year thereafter.

The Commission estimates gaming taxes generated from an additional casino, based on the current 21% tax on annual gross revenue, to be \$14,339,908 each year. If the language of the Initiative Petitions is interpreted that “all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024” applies to the collection and appropriation of licensing fees only and *not* tax revenues, the revenues would be divided as follows: \$12,905,917 to the State of Missouri and \$1,433,991 to the Home Dock City. The Commission would also collect admission fees of \$2,085,164 each year (\$1,042,582 to the State of Missouri and \$1,042,582 to the Home Dock City) resulting in total additional revenue of \$16,425,072 annually. These numbers are based on the FY 2023 MGC Annual Report using Century Casino Cape Girardeau data.

If the language of the Initiative Petitions, however, is interpreted that “all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024” applies to both licensing fees and tax revenues, the licensing fees as described above would be distributed to the funds identified in each petition as well as \$14,339,908 in tax revenue and \$2,085,164 in admission fees. These collected taxes and admissions fees would be appropriated for: (24-162) STEM Career Awareness Fund, (24-163) increase in teacher salaries, (24-164) pre-kindergarten education funding, and (24-165) early childhood literacy funding.

The above figures would change if the language of the petitions is interpreted such that any renewal or new license issued to an existing excursion gambling boat after January 1, 2024, would be subject to the appropriations identified in proposed Article III, Section 39(e).4.

These Initiative Petitions propose to amend Article III, Section 39(e), but do not address Article III, Section 39(d), which states that gaming revenues shall be appropriated to public

institutions of elementary, secondary, and higher education. The proposed amendment to Article III, Section 39(e) creates a conflict with Article III, Section 39(d).

The Commission estimates needing three (3) FTE positions if another casino is opened, which include an Electronic Gaming Device Specialist I, a Gaming Financial Analyst, and an Administrative Support Professional – Licensing. The total first year cost for these three positions is estimated to be \$304,435.57, with a second year and ongoing cost of \$292,780.51. Additional Commission operational expenses for the additional casino are estimated to total \$20,014.18

Through the existing Memorandum of Understanding with the Missouri State Highway Patrol, additional troopers would need to be added to the Gaming Division to provide the support for the enforcement of criminal activity and gaming regulations at the new casino. The Commission estimates there would be eight (8) or nine (9) additional troopers assigned to this new excursion gambling boat. The Commission assumes the Missouri State Highway Patrol will submit a separate fiscal note for these positions and expenses on its own behalf.

Technical Notes:

Section 39(e).2 – This section amends existing Article III, Section 39(e) and permits the operation of excursion gambling boats “upon” the portion of the Osage River from the Missouri River to the Bagnell Dam, which shall include artificial spaces that contain water and that are within 500 feet of the 100-year base flood elevation as established by the Federal Emergency Management Agency. The use of “upon” is problematic in that all existing Missouri casinos are located in artificial spaces near, rather than upon, the Missouri and Mississippi Rivers. The Missouri Gaming Commission (the “Commission”) suggests using “located on” rather than “upon” in order to reduce confusion. Further, Article III, Section 39 as it exists presently permits excursion gambling boats within 1000 feet of the main channel of the Missouri or Mississippi Rivers. To reduce confusion, the Commission suggests that the present initiative petition specify the same distance (1000 feet). Historically, the analysis regarding flood plains has been performed utilizing data from the Army Corps of Engineers, and the Commission would suggest that continue. Further, the current language also permits non-floating facilities and the Commission would suggest continuity in the proposed Amendment.

Section 39(e).4 – This section states that “all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024, shall only be appropriated” as follows:

Initiative Petition 24-162: to the STEM Career Awareness Fund

Initiative Petition 24-163: to fund increases in teacher salaries

Initiative Petition 24-164: to fund pre-kindergarten education

Initiative Petition 24-165: to fund early childhood literacy programs in schools

“All state revenues” raises the question as to whether this includes just licensing fees or licensing fees and tax revenues. Additionally, the Commission renews parent company

(Class A) licenses and excursion gambling boat (Class B) licenses every four years. The Commission also reviews the suitability of new Class A or Class B applicants and issues new Class A and/or Class B licenses in the event there is a change in ownership to one of the existing licenses. The language in this section, as applied, would potentially result in the entirety of state gaming revenues being appropriated to either STEM, teacher salaries, pre-kindergarten education, or early childhood literacy upon the renewal of any Class A or Class B license or the issuance of a new Class A or Class B license to an existing facility after January 1, 2024. As a result, the current worthy causes would no longer have any funds appropriated to them, as has been designated pursuant to Section 313.835, RSMo. Further, these Initiative Petitions propose to amend Article III, Section 39(e), but do not address Article III, Section 39(d), which states that gaming revenues shall be appropriated to public institutions of elementary, secondary, and higher education. The proposed amendment to Article III, Section 39(e) creates a conflict with Article III, Section 39(d).

They also provided the following information.

Osage River Gambling Boat - License Fees Only Interpretation

The below assumes that only the revenues received from licensing fees are appropriated to the applicable fund (see "Fund in Which Revenues are Deposited, by Petition Number). The Annual Revenues from the Admission Fees and Gaming Tax would still be distributed as specified in RSMo. 313.820 and 313.822.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate one-time costs of \$763,000, ongoing costs of \$2.2 million annually, initial fee revenue of \$271,000, ongoing admission and other fee revenue of \$2.1 million annually, and annual gaming tax revenue of \$14.3 million. Local governments estimate unknown revenue.

RE: Petition approval request from Greta Bax regarding a proposed constitutional amendment to Article III, version 3 (2024-164)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Greta Bax on October 11, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by amending Section 39(e).

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article III of the Constitution is revised by amending Section 39(e) to read as follows:

Section 39(e). 1. The general assembly is authorized to permit upon the Mississippi and Missouri Rivers only, which shall include artificial spaces that contain water and that are within 1000 feet of the closest edge of the main channel of either of those rivers, lotteries, gift enterprises and games of chance to be conducted on excursion gambling boats and floating facilities. Any license issued before or after the adoption date of this amendment for any excursion gambling boat or floating facility located in any such artificial space shall be deemed to be authorized by the General Assembly and to be in compliance with this Section.

2. Notwithstanding any other provision of law to the contrary, lotteries, gift enterprises, and games of chance may be conducted on excursion gambling boats and floating facilities licensed by the Missouri Gaming Commission upon the portion of the Osage River from the Missouri River to the Bagnell Dam, which shall include artificial spaces that contain water and that are within 500 feet of the 100-year base flood elevation as established by the Federal Emergency Management Agency.

3. Notwithstanding any other provision of law to the contrary, in addition to such licenses as have been authorized prior to January 1, 2024, the Missouri Gaming Commission shall issue one additional excursion gambling boat license. Such license shall only be issued to an excursion gambling boat that will operate upon the portion of the Osage River from the Missouri River to the Bagnell Dam.

4. Notwithstanding any other provision of law to the contrary, all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024 shall be appropriated solely to public pre-kindergarten education programs to serve students in the year prior to kindergarten eligibility and shall not be included within the definition of "total state revenues" in section 17 of article X of this constitution.

5. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

[NOTICE: You are advised that the proposed constitutional amendment may be construed to change, repeal, or modify by implication Article III, Sections 39, 39(9), and 39(e).]

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-164)**

Subject

Initiative petition from Greta Bax regarding a proposed constitutional amendment to Article III. (Received October 11, 2023)

Date

October 31, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-164 and determined there is no measureable impact to their agency. Impact will be based upon appropriations.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(e) of the Missouri Constitution regarding excursion gambling boats. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for this initiative petition proposing to amend Article III, version 3.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP24-164 attempts to expand the existing number of excursion gambling boats in the state of Missouri. It appears it wants the Missouri Gaming Commission (Commission) to add an additional excursion gambling boat on the Osage River.

Currently in Section 313.870 the Commission is restricted to issuing not more than 13 excursion gambling boat licenses. This proposal would add another license, to be issued to an excursion gambling boat on the Osage River.

This proposal states that the annual license fee of the Osage River excursion gambling boat is to be appropriated solely for public pre-kindergarten education programs to serve students. The Department of Revenue (Department) notes while the proposal appears to require the Osage River excursion gambling boat to pay for the license, it does not give the Commission the necessary authority to actually collect the license fee or to deposit the fee into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears this license fees will not generate any revenue to the state, the Commission, or to any Fund.

The Department notes that once the license is issued, the Osage River excursion gambling boat would be subject to all the current collection requirements of the admission fees and taxes that the current excursion gambling boats collect. The Department would be required to add this boat to our gambling revenue collection database. That can be done with existing resources.

The Department defers to the Commission for an estimate of the revenue generated from an additional excursion gambling boat from admission fees and taxes.

Officials from the **Department of Public Safety - Office of the Director** indicated there is no impact for their department, Director's Office.

The Missouri State Highway Patrol will have an impact.

Response from the Missouri State Highway Patrol:

The Patrol is tasked with enforcing gaming regulations at Missouri's thirteen (13) casinos. This proposal would add one (1) casino and the Patrol would have expenses related to staffing the additional casino. Using the current staffing model for the other casinos around the state, the Patrol is requesting nine (9) additional FTE to staff the additional casino. The one time and on-going expenses would include salary, fringe, vehicles, gasoline, and related equipment and funding for these positions would come from the Gaming Fund (0286). These expenses and equipment costs are shown below differentiating the one time and on-going costs for the nine (9) FTE.

In addition to the expenses indicated for the nine (9) FTE that will be transferring from Highway funded positions, it is assumed there will be an unknown savings to the **Highway**

Fund (0644), as those nine tenured troopers would be replaced with Highway funded probationary troopers.

Salary:

Position Title: Sergeant (V07005)
Annual Salary per FTE: \$99,648
Total Cost for Salaries: \$896,832

Fringe:

Annual Cost per FTE: \$85,637
Total Fringe Amount: \$770,733

Expense & Equipment:

Initial Costs: \$731,411
Ongoing Costs: \$192,103

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$2,398,976

Ongoing Costs: \$1,859,668

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-164 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for initiative petition 24-164.

Officials from the **Office of Administration** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-164 a proposed constitutional amendment to Article III, version 3 (2024-164), there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-164 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-164 proposing to amend Article III, Version 3.

Officials from **St. Louis County** indicated the initiative petition would have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Jennings School District** indicated his proposed legislation should have a small but positive impact on their school district by generating additional revenue for public pre-kindergarten programs. It is unclear how much revenue such a limited proposal shall generate if divided among all 500+ school districts in MO.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and do not see a financial impact to their college.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Missouri Dept. of Elementary and Secondary Education, Home Dock Cities/Counties.

This proposal may have an impact on local jurisdictions and businesses surrounding and in close proximity to the physical location of the proposed excursion gambling boat.

By allowing another casino to be licensed in Missouri, total state revenue will likely increase, in that one more casino will produce increased gaming tax and admission fees for the state and the home dock city in which it is located or increase gaming tax and admission fees for distribution to newly identified worthy causes.

Missouri Constitution, Article III, Section 39(e) (Amended by Initiative Petitions) – Permits an excursion gambling boat to be located on the portion of the Osage River between the Missouri River and the Bagnell Dam. It requires the Missouri Gaming Commission (the “Commission”) to issue one additional gambling boat license (the 14th license in the state) for an excursion gambling boat to be located on the portion of the Osage River between the Missouri River and the Bagnell Dam, to include artificial spaces that contain water and that are within 500 feet of the 100-year base flood elevation as established by the Federal Emergency Management Agency.

Fiscal Impact

The Commission is basing its estimates for anticipated gaming revenues, taxes, and fees of an additional licensed casino on Century Casino Cape Girardeau in Cape Girardeau, Missouri. The Commission believes Century Casino Cape Girardeau would be comparable in size and volume of traffic to a casino located on the Osage River, likely near Osage Beach, Missouri (Lake of the Ozarks).

Anticipated revenue streams from an additional casino include initial licensing and renewal fees for the Class A Licensee (parent company), the Class B Licensee (casino company), Key Persons and Level I licensees (management), and Level II occupational licensees working at the casino. These fees would be paid to the Commission and deposited for use as identified in each Initiative Petition – (24-162) STEM Career Awareness Fund, (24-163) increase in teacher salaries, (24-164) pre-kindergarten education funding, and (24-165) early childhood literacy funding. The Commission estimates collecting fees totaling \$271,000 in the first year, followed by ongoing fee collections of \$63,100 each year thereafter.

The Commission estimates gaming taxes generated from an additional casino, based on the current 21% tax on annual gross revenue, to be \$14,339,908 each year. If the language of the Initiative Petitions is interpreted that “all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024” applies to the collection and appropriation of licensing fees only and *not* tax revenues, the revenues would be divided as follows: \$12,905,917 to the State of Missouri and \$1,433,991 to the Home Dock City. The Commission would also collect admission fees of \$2,085,164 each year (\$1,042,582 to the State of Missouri and \$1,042,582 to the Home Dock City) resulting in total additional revenue of \$16,425,072 annually. These numbers are based on the FY 2023 MGC Annual Report using Century Casino Cape Girardeau data.

If the language of the Initiative Petitions, however, is interpreted that “all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024” applies to both licensing fees and tax revenues, the licensing fees as described above would be distributed to the funds identified in each petition as well as \$14,339,908 in tax revenue and \$2,085,164 in admission fees. These collected taxes and admissions fees would be appropriated for: (24-162) STEM Career Awareness Fund, (24-163) increase in teacher salaries, (24-164) pre-kindergarten education funding, and (24-165) early childhood literacy funding.

The above figures would change if the language of the petitions is interpreted such that any renewal or new license issued to an existing excursion gambling boat after January 1, 2024, would be subject to the appropriations identified in proposed Article III, Section 39(e).4.

These Initiative Petitions propose to amend Article III, Section 39(e), but do not address Article III, Section 39(d), which states that gaming revenues shall be appropriated to public institutions of elementary, secondary, and higher education. The proposed amendment to Article III, Section 39(e) creates a conflict with Article III, Section 39(d).

The Commission estimates needing three (3) FTE positions if another casino is opened, which include an Electronic Gaming Device Specialist I, a Gaming Financial Analyst, and an Administrative Support Professional – Licensing. The total first year cost for these three positions is estimated to be \$304,435.57, with a second year and ongoing cost of \$292,780.51. Additional Commission operational expenses for the additional casino are estimated to total \$20,014.18

Through the existing Memorandum of Understanding with the Missouri State Highway Patrol, additional troopers would need to be added to the Gaming Division to provide the support for the enforcement of criminal activity and gaming regulations at the new casino. The Commission estimates there would be eight (8) or nine (9) additional troopers assigned to this new excursion gambling boat. The Commission assumes the Missouri State Highway Patrol will submit a separate fiscal note for these positions and expenses on its own behalf.

Technical Notes:

Section 39(e).2 – This section amends existing Article III, Section 39(e) and permits the operation of excursion gambling boats “upon” the portion of the Osage River from the Missouri River to the Bagnell Dam, which shall include artificial spaces that contain water and that are within 500 feet of the 100-year base flood elevation as established by the Federal Emergency Management Agency. The use of “upon” is problematic in that all existing Missouri casinos are located in artificial spaces near, rather than upon, the Missouri and Mississippi Rivers. The Missouri Gaming Commission (the “Commission”) suggests using “located on” rather than “upon” in order to reduce confusion. Further, Article III, Section 39 as it exists presently permits excursion gambling boats within 1000 feet of the main channel of the Missouri or Mississippi Rivers. To reduce confusion, the Commission suggests that the present initiative petition specify the same distance (1000 feet). Historically, the analysis regarding flood plains has been performed utilizing data from the Army Corps of Engineers, and the Commission would suggest that continue. Further, the current language also permits non-floating facilities and the Commission would suggest continuity in the proposed Amendment.

Section 39(e).4 – This section states that “all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024, shall only be appropriated” as follows:

Initiative Petition 24-162: to the STEM Career Awareness Fund

Initiative Petition 24-163: to fund increases in teacher salaries

Initiative Petition 24-164: to fund pre-kindergarten education

Initiative Petition 24-165: to fund early childhood literacy programs in schools

“All state revenues” raises the question as to whether this includes just licensing fees or licensing fees and tax revenues. Additionally, the Commission renews parent company (Class A) licenses and excursion gambling boat (Class B) licenses every four years. The Commission also reviews the suitability of new Class A or Class B applicants and issues

new Class A and/or Class B licenses in the event there is a change in ownership to one of the existing licenses. The language in this section, as applied, would potentially result in the entirety of state gaming revenues being appropriated to either STEM, teacher salaries, pre-kindergarten education, or early childhood literacy upon the renewal of any Class A or Class B license or the issuance of a new Class A or Class B license to an existing facility after January 1, 2024. As a result, the current worthy causes would no longer have any funds appropriated to them, as has been designated pursuant to Section 313.835, RSMo. Further, these Initiative Petitions propose to amend Article III, Section 39(e), but do not address Article III, Section 39(d), which states that gaming revenues shall be appropriated to public institutions of elementary, secondary, and higher education. The proposed amendment to Article III, Section 39(e) creates a conflict with Article III, Section 39(d).

They also provided the following information.

Osage River Gambling Boat - License Fees Only Interpretation

The below assumes that only the revenues received from licensing fees are appropriated to the applicable fund (see "Fund in Which Revenues are Deposited, by Petition Number). The Annual Revenues from the Admission Fees and Gaming Tax would still be distributed as specified in RSMo. 313.820 and 313.822.

RE: Petition approval request from Greta Bax regarding a proposed constitutional amendment to Article III, version 2 (2024-163)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Greta Bax on October 11, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey

NOTICE: The proposed amendment revises Article III of the Constitution by amending Section 39(e).

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article III of the Constitution is revised by amending Section 39(e) to read as follows:

Section 39(e). 1. The general assembly is authorized to permit upon the Mississippi and Missouri Rivers only, which shall include artificial spaces that contain water and that are within 1000 feet of the closest edge of the main channel of either of those rivers, lotteries, gift enterprises and games of chance to be conducted on excursion gambling boats and floating facilities. Any license issued before or after the adoption date of this amendment for any excursion gambling boat or floating facility located in any such artificial space shall be deemed to be authorized by the General Assembly and to be in compliance with this Section.

2. Notwithstanding any other provision of law to the contrary, lotteries, gift enterprises, and games of chance may be conducted on excursion gambling boats and floating facilities licensed by the Missouri Gaming Commission upon the portion of the Osage River from the Missouri River to the Bagnell Dam, which shall include artificial spaces that contain water and that are within 500 feet of the 100-year base flood elevation as established by the Federal Emergency Management Agency.

3. Notwithstanding any other provision of law to the contrary, in addition to such licenses as have been authorized prior to January 1, 2024, the Missouri Gaming Commission shall issue one additional excursion gambling boat license. Such license shall only be issued to an excursion gambling boat that will operate upon the portion of the Osage River from the Missouri River to the Bagnell Dam.

4. Notwithstanding any other provision of law to the contrary, all state revenues derived from the issuance of excursion boat licenses issued after January 1, 2024 shall be appropriated solely for annual increases of teacher salaries and shall not be included within the definition of "total state revenues" in section 17 of article X of this constitution.

5. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

[NOTICE: You are advised that the proposed constitutional amendment may be construed to change, repeal, or modify by implication Article III, Sections 39, 39(9), and 39(e).]

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-163)**

Subject

Initiative petition from Greta Bax regarding a proposed constitutional amendment to Article III. (Received October 11, 2023)

Date

October 31, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-163 and determined there is no measureable impact to their agency. Potential impact will be based upon appropriation.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(e) of the Missouri Constitution regarding excursion gambling boats. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for this initiative petition proposing to amend Article III, version 2.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP24-163 attempts to expand the existing number of excursion gambling boats in the state of Missouri. It appears it wants the Missouri Gaming Commission (Commission) to add an additional excursion gambling boat on the Osage River.

Currently in Section 313.870 the Commission is restricted to issuing not more than 13 excursion gambling boat licenses. This proposal would add another license, to be issued to an excursion gambling boat on the Osage River.

This proposal states that the annual license fee of the Osage River excursion gambling boat is to be appropriated solely for annual increases of teacher salaries. The Department of Revenue (Department) notes while the proposal appears to require the Osage River excursion gambling boat to pay for the license, it does not give the Commission the necessary authority to actually collect the license fee or to deposit the fee into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears this license fees will not generate any revenue to the state, the Commission, or to any Fund.

The Department notes that once the license is issued, the Osage River excursion gambling boat would be subject to all the current collection requirements of the admission fees and taxes that the current excursion gambling boats collect. The Department would be required to add this boat to our gambling revenue collection database. That can be done with existing resources.

The Department defers to the Commission for an estimate of the revenue generated from an additional excursion gambling boat from admission fees and taxes.

Officials from the **Department of Public Safety - Office of the Director** indicated there is no impact for their department, Director's Office.

The Missouri State Highway Patrol will have an impact.

Response from the Missouri State Highway Patrol:

The Patrol is tasked with enforcing gaming regulations at Missouri's thirteen (13) casinos. This proposal would add one (1) casino and the Patrol would have expenses related to staffing the additional casino. Using the current staffing model for the other casinos around the state, the Patrol is requesting nine (9) additional FTE to staff the additional casino. The one time and on-going expenses would include salary, fringe, vehicles, gasoline, and related equipment and funding for these positions would come from the Gaming Fund (0286). These expenses and equipment costs are shown below differentiating the one time and on-going costs for the nine (9) FTE.

In addition to the expenses indicated for the nine (9) FTE that will be transferring from Highway funded positions, it is assumed there will be an unknown savings to the Highway

Fund (0644), as those nine tenured troopers would be replaced with Highway funded probationary troopers.

Salary:

Position Title: Sergeant (V07005)
Annual Salary per FTE: \$99,648
Total Cost for Salaries: \$896,832

Fringe:

Annual Cost per FTE: \$85,637
Total Fringe Amount: \$770,733

Expense & Equipment:

Initial Costs: \$731,411
Ongoing Costs: \$192,103

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$2,398,976

Ongoing Costs: \$1,859,668

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-163 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for initiative petition 24-163.

Officials from the **Office of Administration** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-163 a proposed constitutional amendment to Article III, version 2 (2024-163), there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-163 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-163 proposing to amend Article III, Version 2.

Officials from **St. Louis County** indicated the initiative petition would have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Jennings School District** indicated this proposed legislation may have a small but positive impact on their school district by generating additional revenue for teacher salaries. It is unclear how much revenue such a limited proposal shall generate if divided among all 500+ school districts in MO.

However, their district has not seen success with DESE allocating funds to support teacher pay increases, and it is hard to imagine how this will work logistically. Is it only going to serve rural districts where teacher salaries are lower than \$38,000? If so, this will have no benefit to St. Louis area districts who all start above \$38,000.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and do not see a financial impact to their college.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Missouri Dept. of Elementary and Secondary Education, Home Dock Cities/Counties.

This proposal may have an impact on local jurisdictions and businesses surrounding and in close proximity to the physical location of the proposed excursion gambling boat.

By allowing another casino to be licensed in Missouri, total state revenue will likely increase, in that one more casino will produce increased gaming tax and admission fees for the state and the home dock city in which it is located or increase gaming tax and admission fees for distribution to newly identified worthy causes.

Missouri Constitution, Article III, Section 39(e) (Amended by Initiative Petitions) – Permits an excursion gambling boat to be located on the portion of the Osage River between the Missouri River and the Bagnell Dam. It requires the Missouri Gaming

Commission (the “Commission”) to issue one additional gambling boat license (the 14th license in the state) for an excursion gambling boat to be located on the portion of the Osage River between the Missouri River and the Bagnell Dam, to include artificial spaces that contain water and that are within 500 feet of the 100-year base flood elevation as established by the Federal Emergency Management Agency.

Fiscal Impact

The Commission is basing its estimates for anticipated gaming revenues, taxes, and fees of an additional licensed casino on Century Casino Cape Girardeau in Cape Girardeau, Missouri. The Commission believes Century Casino Cape Girardeau would be comparable in size and volume of traffic to a casino located on the Osage River, likely near Osage Beach, Missouri (Lake of the Ozarks).

Anticipated revenue streams from an additional casino include initial licensing and renewal fees for the Class A Licensee (parent company), the Class B Licensee (casino company), Key Persons and Level I licensees (management), and Level II occupational licensees working at the casino. These fees would be paid to the Commission and deposited for use as identified in each Initiative Petition – (24-162) STEM Career Awareness Fund, (24-163) increase in teacher salaries, (24-164) pre-kindergarten education funding, and (24-165) early childhood literacy funding. The Commission estimates collecting fees totaling \$271,000 in the first year, followed by ongoing fee collections of \$63,100 each year thereafter.

The Commission estimates gaming taxes generated from an additional casino, based on the current 21% tax on annual gross revenue, to be \$14,339,908 each year. If the language of the Initiative Petitions is interpreted that “all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024” applies to the collection and appropriation of licensing fees only and *not* tax revenues, the revenues would be divided as follows: \$12,905,917 to the State of Missouri and \$1,433,991 to the Home Dock City. The Commission would also collect admission fees of \$2,085,164 each year (\$1,042,582 to the State of Missouri and \$1,042,582 to the Home Dock City) resulting in total additional revenue of \$16,425,072 annually. These numbers are based on the FY 2023 MGC Annual Report using Century Casino Cape Girardeau data.

If the language of the Initiative Petitions, however, is interpreted that “all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024” applies to both licensing fees and tax revenues, the licensing fees as described above would be distributed to the funds identified in each petition as well as \$14,339,908 in tax revenue and \$2,085,164 in admission fees. These collected taxes and admissions fees would be appropriated for: (24-162) STEM Career Awareness Fund, (24-163) increase in teacher salaries, (24-164) pre-kindergarten education funding, and (24-165) early childhood literacy funding.

The above figures would change if the language of the petitions is interpreted such that any renewal or new license issued to an existing excursion gambling boat after January 1, 2024, would be subject to the appropriations identified in proposed Article III, Section 39(e).4.

These Initiative Petitions propose to amend Article III, Section 39(e), but do not address Article III, Section 39(d), which states that gaming revenues shall be appropriated to public institutions of elementary, secondary, and higher education. The proposed amendment to Article III, Section 39(e) creates a conflict with Article III, Section 39(d).

The Commission estimates needing three (3) FTE positions if another casino is opened, which include an Electronic Gaming Device Specialist I, a Gaming Financial Analyst, and an Administrative Support Professional – Licensing. The total first year cost for these three positions is estimated to be \$304,435.57, with a second year and ongoing cost of \$292,780.51. Additional Commission operational expenses for the additional casino are estimated to total \$20,014.18

Through the existing Memorandum of Understanding with the Missouri State Highway Patrol, additional troopers would need to be added to the Gaming Division to provide the support for the enforcement of criminal activity and gaming regulations at the new casino. The Commission estimates there would be eight (8) or nine (9) additional troopers assigned to this new excursion gambling boat. The Commission assumes the Missouri State Highway Patrol will submit a separate fiscal note for these positions and expenses on its own behalf.

Technical Notes:

Section 39(e).2 – This section amends existing Article III, Section 39(e) and permits the operation of excursion gambling boats “upon” the portion of the Osage River from the Missouri River to the Bagnell Dam, which shall include artificial spaces that contain water and that are within 500 feet of the 100-year base flood elevation as established by the Federal Emergency Management Agency. The use of “upon” is problematic in that all existing Missouri casinos are located in artificial spaces near, rather than upon, the Missouri and Mississippi Rivers. The Missouri Gaming Commission (the “Commission”) suggests using “located on” rather than “upon” in order to reduce confusion. Further, Article III, Section 39 as it exists presently permits excursion gambling boats within 1000 feet of the main channel of the Missouri or Mississippi Rivers. To reduce confusion, the Commission suggests that the present initiative petition specify the same distance (1000 feet). Historically, the analysis regarding flood plains has been performed utilizing data from the Army Corps of Engineers, and the Commission would suggest that continue. Further, the current language also permits non-floating facilities and the Commission would suggest continuity in the proposed Amendment.

Section 39(e).4 – This section states that “all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024, shall only be appropriated” as follows:

Initiative Petition 24-162: to the STEM Career Awareness Fund

Initiative Petition 24-163: to fund increases in teacher salaries

Initiative Petition 24-164: to fund pre-kindergarten education

Initiative Petition 24-165: to fund early childhood literacy programs in schools

“All state revenues” raises the question as to whether this includes just licensing fees or licensing fees and tax revenues. Additionally, the Commission renews parent company (Class A) licenses and excursion gambling boat (Class B) licenses every four years. The Commission also reviews the suitability of new Class A or Class B applicants and issues new Class A and/or Class B licenses in the event there is a change in ownership to one of the existing licenses. The language in this section, as applied, would potentially result in the entirety of state gaming revenues being appropriated to either STEM, teacher salaries, pre-kindergarten education, or early childhood literacy upon the renewal of any Class A or Class B license or the issuance of a new Class A or Class B license to an existing facility after January 1, 2024. As a result, the current worthy causes would no longer have any funds appropriated to them, as has been designated pursuant to Section 313.835, RSMo. Further, these Initiative Petitions propose to amend Article III, Section 39(e), but do not address Article III, Section 39(d), which states that gaming revenues shall be appropriated to public institutions of elementary, secondary, and higher education. The proposed amendment to Article III, Section 39(e) creates a conflict with Article III, Section 39(d).

They also provided the following information.

Osage River Gambling Boat - License Fees Only Interpretation

The below assumes that only the revenues received from licensing fees are appropriated to the applicable fund (see "Fund in Which Revenues are Deposited, by Petition Number). The Annual Revenues from the Admission Fees and Gaming Tax would still be distributed as specified in RSMo. 313.820 and 313.822.

RE: Petition approval request from Greta Bax regarding a proposed constitutional amendment to Article III, version 1 (2024-162)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Greta Bax on October 11, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by amending Section 39(e).

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article III of the Constitution is revised by amending Section 39(e) to read as follows:

Section 39(e). 1. The general assembly is authorized to permit upon the Mississippi and Missouri Rivers only, which shall include artificial spaces that contain water and that are within 1000 feet of the closest edge of the main channel of either of those rivers, lotteries, gift enterprises and games of chance to be conducted on excursion gambling boats and floating facilities. Any license issued before or after the adoption date of this amendment for any excursion gambling boat or floating facility located in any such artificial space shall be deemed to be authorized by the General Assembly and to be in compliance with this Section.

2. Notwithstanding any other provision of law to the contrary, lotteries, gift enterprises, and games of chance may be conducted on excursion gambling boats and floating facilities licensed by the Missouri Gaming Commission upon the portion of the Osage River from the Missouri River to the Bagnell Dam, which shall include artificial spaces that contain water and that are within 500 feet of the 100-year base flood elevation as established by the Federal Emergency Management Agency.

3. Notwithstanding any other provision of law to the contrary, in addition to such licenses as have been authorized prior to January 1, 2024, the Missouri Gaming Commission shall issue one additional excursion gambling boat license. Such license shall only be issued to an excursion gambling boat that will operate upon the portion of the Osage River from the Missouri River to the Bagnell Dam.

4. Notwithstanding any other provision of law to the contrary, all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024 shall be appropriated to the STEM Career Awareness Program Fund, or its successor fund, and shall not be included within the definition of "total state revenues" in section 17 of article X of this constitution.

5. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

[NOTICE: You are advised that the proposed constitutional amendment may be construed to change, repeal, or modify by implication Article III, Sections 39, 39(9), and 39(e).]

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-162)**

Subject

Initiative petition from Greta Bax regarding a proposed constitutional amendment to Article III. (Received October 11, 2023)

Date

October 31, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-162 and determined that while there is potential for an increase in appropriation for the STEM Career Awareness Fund they are unable to estimate the impact.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(e) of the Missouri Constitution regarding excursion gambling boats. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for this initiative petition proposing to amend Article III, version 1.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP24-162 attempts to expand the existing number of excursion gambling boats in the state of Missouri. It appears it wants the Missouri Gaming Commission (Commission) to add an additional excursion gambling boat license on the Osage River.

Currently in Section 313.870 the Commission is restricted to issuing not more than 13 excursion gambling boat licenses. This proposal would add another license, to be issued to an excursion gambling boat on the Osage River.

This proposal states that the annual license fee of the Osage River excursion gambling boat is to be appropriated into the Stem Career Awareness Fund (Fund # 0997). The Department of Revenue (Department) notes while the proposal appears to require the Osage River excursion gambling boat to pay for the license, it does not give the Commission the necessary authority to actually collect the license fee or to deposit the fee into the fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears this license fees will not generate any revenue to the state, the Commission, or to any Fund.

The Department notes that once the license is issued, the Osage River excursion gambling boat would be subject to all the current collection requirements of the admission fees and taxes that the current excursion gambling boats collect. The Department would be required to add this boat to our gambling revenue collection database. That can be done with existing resources.

The Department defers to the Commission for an estimate of the revenue generated from an additional excursion gambling boat from admission fees and taxes.

Officials from the **Department of Public Safety - Office of the Director** indicated there is no impact for their department, Director's Office.

The Missouri State Highway Patrol will have an impact.

Response from the Missouri State Highway Patrol:

The Patrol is tasked with enforcing gaming regulations at Missouri's thirteen (13) casinos. This proposal would add one (1) casino and the Patrol would have expenses related to staffing the additional casino. Using the current staffing model for the other casinos around the state, the Patrol is requesting nine (9) additional FTE to staff the additional casino. The one time and on-going expenses would include salary, fringe, vehicles, gasoline, and related equipment and funding for these positions would come from the Gaming Fund (0286). These expenses and equipment costs are shown below differentiating the one time and on-going costs for the nine (9) FTE.

In addition to the expenses indicated for the nine (9) FTE that will be transferring from Highway funded positions, it is assumed there will be an unknown savings to the Highway

Fund (0644), as those nine tenured troopers would be replaced with Highway funded probationary troopers.

Salary:

Position Title: Sergeant (V07005)
Annual Salary per FTE: \$99,648
Total Cost for Salaries: \$896,832

Fringe:

Annual Cost per FTE: \$85,637
Total Fringe Amount: \$770,733

Expense & Equipment:

Initial Costs: \$731,411
Ongoing Costs: \$192,103

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$2,398,976

Ongoing Costs: \$1,859,668

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-162 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for initiative petition 24-162.

Officials from the **Office of Administration** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-162 a proposed constitutional amendment to Article III, version 1 (2024-162), there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-162 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for initiative petition, 24-162 proposing to amend Article III, Version 1.

Officials from **St. Louis County** indicated the initiative petition would have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Jennings School District** indicated this proposed legislation should have a small but positive impact on their school district by generating additional revenue for STEM Career Awareness. It is unclear how much revenue such a limited proposal shall generate if divided among all 500+ school districts in MO.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and do not see a financial impact to their college.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Missouri Dept. of Elementary and Secondary Education, Home Dock Cities/Counties.

This proposal may have an impact on local jurisdictions and businesses surrounding and in close proximity to the physical location of the proposed excursion gambling boat.

By allowing another casino to be licensed in Missouri, total state revenue will likely increase, in that one more casino will produce increased gaming tax and admission fees for the state and the home dock city in which it is located or increase gaming tax and admission fees for distribution to newly identified worthy causes.

Missouri Constitution, Article III, Section 39(e) (Amended by Initiative Petitions) – Permits an excursion gambling boat to be located on the portion of the Osage River between the Missouri River and the Bagnell Dam. It requires the Missouri Gaming Commission (the “Commission”) to issue one additional gambling boat license (the 14th license in the state) for an excursion gambling boat to be located on the portion of the Osage River between the Missouri River and the Bagnell Dam, to include artificial spaces that contain water and that are within 500 feet of the 100-year base flood elevation as established by the Federal Emergency Management Agency.

Fiscal Impact

The Commission is basing its estimates for anticipated gaming revenues, taxes, and fees of an additional licensed casino on Century Casino Cape Girardeau in Cape Girardeau, Missouri. The Commission believes Century Casino Cape Girardeau would be comparable in size and volume of traffic to a casino located on the Osage River, likely near Osage Beach, Missouri (Lake of the Ozarks).

Anticipated revenue streams from an additional casino include initial licensing and renewal fees for the Class A Licensee (parent company), the Class B Licensee (casino company), Key Persons and Level I licensees (management), and Level II occupational licensees working at the casino. These fees would be paid to the Commission and deposited for use as identified in each Initiative Petition – (24-162) STEM Career Awareness Fund, (24-163) increase in teacher salaries, (24-164) pre-kindergarten education funding, and (24-165) early childhood literacy funding. The Commission estimates collecting fees totaling \$271,000 in the first year, followed by ongoing fee collections of \$63,100 each year thereafter.

The Commission estimates gaming taxes generated from an additional casino, based on the current 21% tax on annual gross revenue, to be \$14,339,908 each year. If the language of the Initiative Petitions is interpreted that “all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024” applies to the collection and appropriation of licensing fees only and *not* tax revenues, the revenues would be divided as follows: \$12,905,917 to the State of Missouri and \$1,433,991 to the Home Dock City. The Commission would also collect admission fees of \$2,085,164 each year (\$1,042,582 to the State of Missouri and \$1,042,582 to the Home Dock City) resulting in total additional revenue of \$16,425,072 annually. These numbers are based on the FY 2023 MGC Annual Report using Century Casino Cape Girardeau data.

If the language of the Initiative Petitions, however, is interpreted that “all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024” applies to both licensing fees and tax revenues, the licensing fees as described above would be distributed to the funds identified in each petition as well as \$14,339,908 in tax revenue and \$2,085,164 in admission fees. These collected taxes and admissions fees would be appropriated for: (24-162) STEM Career Awareness Fund, (24-163) increase in teacher salaries, (24-164) pre-kindergarten education funding, and (24-165) early childhood literacy funding.

The above figures would change if the language of the petitions is interpreted such that any renewal or new license issued to an existing excursion gambling boat after January 1, 2024, would be subject to the appropriations identified in proposed Article III, Section 39(e).4.

These Initiative Petitions propose to amend Article III, Section 39(e), but do not address Article III, Section 39(d), which states that gaming revenues shall be appropriated to public institutions of elementary, secondary, and higher education. The proposed amendment to Article III, Section 39(e) creates a conflict with Article III, Section 39(d).

The Commission estimates needing three (3) FTE positions if another casino is opened, which include an Electronic Gaming Device Specialist I, a Gaming Financial Analyst, and an Administrative Support Professional – Licensing. The total first year cost for these three positions is estimated to be \$304,435.57, with a second year and ongoing cost of \$292,780.51. Additional Commission operational expenses for the additional casino are estimated to total \$20,014.18

Through the existing Memorandum of Understanding with the Missouri State Highway Patrol, additional troopers would need to be added to the Gaming Division to provide the support for the enforcement of criminal activity and gaming regulations at the new casino. The Commission estimates there would be eight (8) or nine (9) additional troopers assigned to this new excursion gambling boat. The Commission assumes the Missouri State Highway Patrol will submit a separate fiscal note for these positions and expenses on its own behalf.

Technical Notes:

Section 39(e).2 – This section amends existing Article III, Section 39(e) and permits the operation of excursion gambling boats “upon” the portion of the Osage River from the Missouri River to the Bagnell Dam, which shall include artificial spaces that contain water and that are within 500 feet of the 100-year base flood elevation as established by the Federal Emergency Management Agency. The use of “upon” is problematic in that all existing Missouri casinos are located in artificial spaces near, rather than upon, the Missouri and Mississippi Rivers. The Missouri Gaming Commission (the “Commission”) suggests using “located on” rather than “upon” in order to reduce confusion. Further, Article III, Section 39 as it exists presently permits excursion gambling boats within 1000 feet of the main channel of the Missouri or Mississippi Rivers. To reduce confusion, the Commission suggests that the present initiative petition specify the same distance (1000 feet). Historically, the analysis regarding flood plains has been performed utilizing data from the Army Corps of Engineers, and the Commission would suggest that continue. Further, the current language also permits non-floating facilities and the Commission would suggest continuity in the proposed Amendment.

Section 39(e).4 – This section states that “all state revenues derived from the issuance of excursion gambling boat licenses issued after January 1, 2024, shall only be appropriated” as follows:

Initiative Petition 24-162: to the STEM Career Awareness Fund

Initiative Petition 24-163: to fund increases in teacher salaries

Initiative Petition 24-164: to fund pre-kindergarten education

Initiative Petition 24-165: to fund early childhood literacy programs in schools

“All state revenues” raises the question as to whether this includes just licensing fees or licensing fees and tax revenues. Additionally, the Commission renews parent company (Class A) licenses and excursion gambling boat (Class B) licenses every four years. The Commission also reviews the suitability of new Class A or Class B applicants and issues new Class A and/or Class B licenses in the event there is a change in ownership to one of

the existing licenses. The language in this section, as applied, would potentially result in the entirety of state gaming revenues being appropriated to either STEM, teacher salaries, pre-kindergarten education, or early childhood literacy upon the renewal of any Class A or Class B license or the issuance of a new Class A or Class B license to an existing facility after January 1, 2024. As a result, the current worthy causes would no longer have any funds appropriated to them, as has been designated pursuant to Section 313.835, RSMo. Further, these Initiative Petitions propose to amend Article III, Section 39(e), but do not address Article III, Section 39(d), which states that gaming revenues shall be appropriated to public institutions of elementary, secondary, and higher education. The proposed amendment to Article III, Section 39(e) creates a conflict with Article III, Section 39(d).

They also provided the following information.

Osage River Gambling Boat - License Fees Only Interpretation

The below assumes that only the revenues received from licensing fees are appropriated to the applicable fund (see "Fund in Which Revenues are Deposited, by Petition Number). The Annual Revenues from the Admission Fees and Gaming Tax would still be distributed as specified in RSMo. 313.820 and 313.822.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 8 (2024-161)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 4, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey

Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

County: _____

INITIATIVE PETITION

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 5th day of November, 2024, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

[OFFICIAL BALLOT TITLE]

CIRCULATOR'S AFFIDAVIT

STATE OF MISSOURI, COUNTY OF _____ I, _____ being first duly sworn, say (print names of signers)

	NAME (Signature)	DATE Signed	REGISTERED VOTING ADDRESS (Number)(Street), (City, Town Or Village)	ZIP CODE	CONG. DIST.	NAME (Printed or Typed)

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than two mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license per distinct sports wagering operator brand. For purposes of Article III, Section 39(g) brand shall refer to the name, trade name, licensed trademark, or assumed business name of the sports wagering operator. If there are more than two qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant for licensure based on the applicant's ability to satisfy the following criteria:

(1) Expertise in the business of online sports wagering;

(2) Integrity, sustainability, and safety of the applicant's online sports wagering platform;

(3) Past relevant experience of the applicant;

(4) Advertising and promotional plans to increase and sustain revenue;

(5) Ability to generate, maximize, and sustain revenues for the state;

(6) Demonstrated commitment to and plans for the promotion of responsible gaming; and

(7) Capacity to increase the number of bettors on the applicant's online sports wagering platform.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

8. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States;

b. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

c. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

d. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

e. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed

\$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court;

f. Prohibiting all sports wagering activity, including sports wagering promotional and advertising activity, within a sports district, unless approved by the professional sports team that plays its home games within the district, except such rules shall not prohibit any licensee from offering sports wagering through an online sports wagering platform to persons physically located within a sports district; and

g. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license.

9. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

10. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamers.

11. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers;

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers.

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat," means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. "License," means any retail license or mobile license.

e. "Licensee," means the holder of any retail or mobile license.

f. "Mobile license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. "Online sports wagering platform," means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. "Professional sports team," means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women's National Basketball Association, or the National Women's Soccer League.

i. "Retail license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. "Sports district," means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. "Sports wagering," means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a "participant" for purposes of this section;

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. "Sports wagering operator," means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. "Tier one sports wager," means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. "Tier two sports wager," means a sports wager that is not a tier one sports wager.

12. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

13. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-161)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article III. (Received October 4, 2023)

Date

October 24, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-161 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated they defer to the fiscal determination of the gaming commission.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(g) of the Missouri Constitution legalizing sports wagering in Missouri. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-161 proposing to amend Article III.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP 24-161 attempts to create a sports wagering program in the state of Missouri. It appears it wants the Missouri Gaming Commission (Commission) to regulate the sports betting.

Sections 39(g)2 – 39(g)5. requires that a retail license be offered to certain organizations to allow for sports betting. Only licensed organizations will be allowed to offer sports betting. It appears it would allow each of the current 13 excursion gambling boats and the 6 current professional sports teams in Missouri to apply for a sports betting retail license. For purposes of the fiscal note they will assume all these groups apply for the sports betting retail license. Section 39(g)6 allows the Commission to set the fee for the retail license up to \$250,000. For purposes of the fiscal note only, they will assume that the Commission sets the fee at the full amount allowed and therefore the retail licenses could potentially generate \$4,750,000 $[(13 \text{ boats} * \$250,000) + (6 \text{ teams} * \$250,000)]$ in the first year and the same in the fifth year due to renewal fees.

The Department of Revenue (Department) notes while the proposal appears to allow the Commission to set the retail license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the retail license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these retail license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)4.(c) allows the Commission to issue not more than 2 mobile license to certain organizations in the state. It allows the Commission to set the mobile license fee at up to \$500,000. The Department is unaware of the number of organizations that would apply for this mobile license and would defer to the Commission for an estimate of that number. However, the Department notes that while the proposal appears to allow the Commission to set the mobile license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the mobile license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these mobile license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)7 says that all fees prescribed by the Commission and collected by the state shall be appropriated as identified in the proposal. It should be noted that the Commission is not expressly authorized under this proposal to collect any of the fees described in this proposal nor is any other agency expressly authorized to collect the fees under these sections. This proposal requires the assessment of fees but does not require the fees remittance. Therefore, these sections will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Section 39(g)8 provides the Commission rule making authority, limited to certain delineated items. Collection of fees and/or the taxes outlined in the proposal is not one of

them. They are allowed to create rules on the use of the funds in the Compulsive Gaming Prevention Fund but not for its collection. Since no money is to be remitted by the sports betting retail or mobile licensees, it appears this authority may not be needed.

Section 39(g)9 appears to impose a 10% wagering tax on the adjusted gross revenue of the licensee. The Department defers to the Commission for an estimate of the tax that would be collected from the 10% sports betting tax.

This section requires collection of the 10% sports betting tax but does not require remittance of the tax to the Department, Commission or any other state agency. Without the identification of an agency to collect the tax, no tax can be collected. Therefore, it appears this section will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Should the Department be asked to collect the taxes generated under this proposal, it was not provided rulemaking authority in which to do it. In addition, the Department expects to have an administrative fiscal impact. Excursion gambling boats currently remit their gambling taxes they collect nightly. The Department would want to create a system similar to the existing gambling tax system. The Department estimates such a system would cost \$100,415 (\$95 per hour * 1,057 hours work). The Department would also need 1 Associate Customer Service Representative with an annual salary of \$36,628 to process payments and reports.

Section 39(g)10 creates the Compulsive Gaming Prevention Fund. This fund appears to duplicate the already existing Compulsive Gamblers Fund (0249) created in Section 313.842 RSMo.

The Department notes that the Sports districts definition may include more than intended. Section 11(j) explains that "sports district" includes any Missouri stadium with a capacity over 11,500 that operates as home for one or more "professional sports team". It also extends to the surrounding area within 400 yards of such premises. Section 11(h) which defines "professional sports team" includes both Major League Soccer (MLS) and National Women's Soccer League (NWSL). The Department notes that CITYPARK, which is home to the MLS team the St. Louis City SC is in downtown St. Louis. The 400 yard extension will potentially cover multiple streets with private retail and residential locations. Additionally, the planned KC Current Stadium, home to the NWSL team the Kansas City Current will also be located in close proximity to private locations. Built within the Berkley Riverfront Park, the stadium will also be next to a public park.

Summary:

Due to the wording in this IP, the Department of Revenue assumes this IP will not generate any revenue to the state.

Officials from the **Department of Public Safety - Office of the Director** indicated:

The Missouri State Highway Patrol anticipates the need for two (2) additional full-time employees (FTE) to conduct background investigations and the subsequent renewals for sports wagering vendors, along with four (4) additional FTE for enforcement activities. Expenses related to the six (6) FTE would be paid from the Gaming Fund (0286). One-time and ongoing expenses, shown below, would include salary, fringe, vehicles, gasoline, and related equipment. The Patrol's response below is applicable for each of the initiative petitions.

Salary:

Position Title: Sergeant (V07005)
Annual Salary: \$99,648
Total Cost for Salaries: \$597,888

Fringe:

Annual Cost per Position: \$85,637
Total Fringe Amount: \$513,822

Expense & Equipment:

Initial Costs: \$501,330
Ongoing Costs: \$130,956

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$1,613,040
Ongoing Costs: \$1,242,666

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-161 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for initiative petition 24-161.

Officials from the **Office of Administration** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-161 a proposed constitutional amendment to Article III, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-161 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-161 proposing to amend Article III.

Officials from **St. Louis County** indicated the initiative petition should have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated this will have a fiscal impact to their college. Unknown impact at this time due to revenues and expenses being unknown.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and cannot determine the effect on the college since no estimate of revenues has been made. Their response in no way assesses the merits of the petition on its face.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Home Dock Cities/Counties, "sports districts" located in St. Louis and Kansas City, as that term is defined in the proposal.

It may have an impact on local jurisdictions and businesses surrounding and in close proximity to the "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal.

The MGC anticipates licensees to pay license fees and renewal fees to the MGC in order to regulate and manage sports wagering in Missouri. It also imposes certain taxes be paid by licensees based on their adjusted gross revenue.

If this initiative petition passes, the Missouri Gaming Commission (MGC) estimates needing fifteen new FTE positions, which would result in an initial cost to the MGC of \$1,786,582.86 (including salary, fringe, supplies, equipment, and travel/lodging related to job performance of those additional employees), in addition to approximately \$2,182,431.33, which represents 7.7% of the MGC existing budget each year (to cover the costs of MGC and MSHP Gaming Division staff plus expenses needed to license and regulate sports wagering) for a total initial cost of \$3,969,014.17. Additional costs included

in this estimate may also encompass those associated with the development and implementation of responsible gambling programs. The total annual ongoing personnel cost, after the first year, is estimated to be \$3,910,738.87.

The MGC and the Missouri State Highway Patrol (MSHP) currently have a Memorandum of Understanding (MOU) in place which states that the MSHP will provide background and criminal and regulatory investigation and enforcement support to the MGC to assist it in carrying out its duties, which results in these additional costs.

The MGC estimates a total of 19 applicants for retail sports wagering licenses, to include the 13 current excursion gambling boats, plus 6 “sports districts” located in St. Louis and Kansas City areas, as that term is defined in the proposal. Initiative 24-161, Article III, Section 39(g).4 allows for the excursion gambling boat owners and the professional teams to apply for mobile licenses, in addition to two mobile licenses to untethered sports wagering operators, for a total of 14 mobile licenses.

Based on the number of sports wagering licenses, the MGC estimates collection of fees approximately \$11.75 million the first year and every fifth year of operation. Pursuant to Section 39(g).7 the fees would be utilized for reimbursement of expenses incurred by the MGC to regulate sports wagering. Any remaining fees will be deposited into the Compulsive Gambling Prevention Fund. Pursuant to Section 39(g).11 a wagering tax of 10% is imposed based on adjusted gross revenue. Annual revenues will be appropriated to elementary, secondary and higher education only after the annual tax revenues are used to reimburse expenses incurred by MGC and to fund the Compulsive Gambling Prevention Fund at the greater of 10% of annual tax revenues or \$5,000,000 to the Compulsive Gambling Fund.

In calculating tax revenue estimates, the Missouri Gaming Commission used the sports wagering data from a comparable state, Indiana, due to it having similar population, number of casinos, geographical proximity and other demographics as Missouri. Indiana’s total adjusted receipts from sports wagering, which includes both retail (in-person) and online, was \$84,969,839 for 2020, \$240,503,973 for 2021, and \$328,639,984 for 2022. Assuming that the total adjusted gross revenue for sports wagering in Missouri will be comparable to that of Indiana, the Gaming Commission estimates that total adjusted gross revenue for sports wagering in Missouri will be \$63,514,955 for the first year, \$179,776,720 for the second year, \$245,658,388 for the third year, and \$266,539,351 for the fourth year (fourth year estimate is based on 8.5% growth from the previous year per a study completed by Eilers & Krejcik). In determining the aforementioned estimates, a .25% deduction for excise tax and a 25% deduction for promotional wagering were made to Missouri’s total adjusted gross revenue from sports wagering due to the initiative’s definition of adjusted gross revenue including such deductions for sports wagering, whereas Indiana’s definition does not. In addition, the term of adjusted gross revenue includes deducting voided or cancelled wagers, uncollectible receivables, and actual costs for anything of value provided to the patron, but such deduction was not made in determining the aforementioned tax revenue estimates, because Indiana’s adjusted gross receipts already include a 2% deduction for such, which the Missouri Gaming Commission estimates will be a similar amount in Missouri. Thus, using the total adjusted gross revenue

for sports wagering in Missouri estimates, the Missouri Gaming Commission estimates that the revenue from the Gaming Tax (10% of Adjusted Gross Receipts) on sports wagering will be \$6,351,495.47 for the first year, \$17,977,671.98 for the second year, \$24,565,838.80 for the third year, \$26,653,935.10 for the fourth year, and \$28,919,519.62 for the fifth year. These estimates, however, are uncertain based on the inclusion of a deduction for “any federal tax” with no corresponding definition or explanation as to what that would include.

Based on the licensing and renewal fees for sports wagering applicants and the taxes on the adjusted gross revenue the total amount of fees and taxes collected may be sufficient to cover the Missouri Gaming Commission’s costs to license and regulate sports wagering, however, that is dependent on the total amount of deductions applied to the adjusted gross revenue.

Technical Notes:

Section 4(c) – It is the understanding of the Missouri Gaming Commission (the “Commission”) that this section permits a certain number of mobile licenses that would be untethered from any casino or sports team location or district. Such allowance would potentially be in conflict with Article III, Section 39(e) of the Missouri Constitution, which permits gambling upon the Missouri or Mississippi Rivers only (or in artificial spaces that contain water and are within 1000 feet of the closest edge of the main channel).

Section 6(a) and 6(b) – These sections specify the fees for both (a) retail and (b) mobile licenses. Retail license applicants shall be required to pay a license fee of \$250,000 with a license renewal fee of \$250,000 every five (5) years. Mobile license applicants shall be required to pay a license fee of \$500,000 with a license renewal fee of \$500,000 every five (5) years. To the extent that other language in the petition proscribes allocation of the fees, there is concern that the licensing fees will not cover the expenses of the Missouri Gaming Commission (the “Commission”) during years in which licensing fees or renewals are not collected (i.e., years two, three, and four). These sections are also not clear as to where the license fees and renewal fees are to be deposited. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 7 – This section describes appropriation for the fees collected by the Commission. Section 7 requires that the fees first be used to reimburse the Commission for their reasonable expenses incurred to regulate sports wagering with the remaining fees being deposited into the Compulsive Gambling Prevention Fund. This section raises the question of where the fee monies are being deposited in the first instance if the language requires reimbursement to the Commission. Currently, fees for licensees are deposited with the Missouri Gaming Commission Fund and appropriated accordingly after the Commission’s reasonable expenses have been satisfied. The process by which the Commission is reimbursed is not clear in the current petition, nor is it clear in general how the funds will be dispersed. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 8(e) – This section proscribes the maximum fine that the Commission could impose for violations of the laws and rules promulgated for sports wagering in the State. Historically, the Commission has had broad discretion to discipline operators for violations of statute and rules and would suggest that this continue.

Section 9 – This section requires that a 10% tax be imposed upon the adjusted gross revenue received from sports wagering by each licensee, to be appropriated for elementary, secondary, and higher education, and to be paid after appropriations for the Commission's reasonable expenses and contributions to the Compulsive Gambling Prevention Fund of the greater of 10% of annual tax revenues or \$5,000,000. In years where the Commission does not collect renewal fees, licensing fees will be insufficient to meet the Commission's reasonable expenses and would thus require the Commission to rely upon tax funds that would otherwise be appropriated to education in the state of Missouri. Section 9 also raises the question of whether an annual 10% or \$5,000,000 contribution to the Compulsive Gambling Prevention Fund is required regardless of the balance of the Fund.

Section 10 – This section requires that licensees maintain in the state, or other location approved by the Commission and consistent with federal law, a computer server or servers used to receive transmissions of requests to place wagers and that transmit acceptance of those requests. Under current federal law, the servers would only be intrastate. The Commission is also aware of a potential conflict between the petition and Article III, Section 39 regarding the location of the servers within the state.

Section 10 – This section is included under the language requiring the placement of servers to accept wagers and would likely be better included under its own section. As it stands, this portion of Section 10 requires that there will be the Compulsive Gambling Prevention Fund created in the state treasury which shall consist of the taxes and fees collected pursuant to the petition. The section is not clear if the Compulsive Gambling Prevention Fund shall contain only the funds specifically directed to the Fund, or if the entirety of fees and taxes will be deposited into this fund in the first instance for later reimbursement and appropriation. This concern mirrors the notes related to Section 7. Further, a compulsive gambling fund was previously authorized under Section 313.842, RSMo. The language here is not clear as to whether the Fund contemplated in this section is a separately established fund, or if it adds to or changes the existing statute. Additionally, this Section invests in the Commission the oversight into use of the Fund for counseling, treatment programs, and grants for compulsive gambling prevention. This oversight would potentially be better accomplished by the Department of Mental Health with their qualifications in understanding Gambling Disorders under the Diagnostic and Statistical Manual (DSM) V.

Section 11(a) – This section states that the definition of adjusted gross revenue (as related to the wagering tax of 10% imposed in Section 7) is the total of all cash or cash equivalents received by a licensee from sports wagering minus (1) all cash and cash equivalents paid out as winnings to patrons, (2) the actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to

sports wagering patrons to incentivize sports wagering, (3) voided or cancelled wagers, (4) the costs of free play or promotional credits provided to and redeemed by the applicable licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month, (5) any sums paid as a result of any federal tax, including federal excise tax, and (6) uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons. Section 11(a) also states in (7) that if the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month and any negative receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

1. Section 11(a)(4) would allow an operator to deduct up to 25% of the gross costs of promotional credits and free play. As a result, the Commission anticipates that operators will be permitted to deduct amounts to the extent the operator pays zero gaming taxes for sports wagering.
2. Section 11(a)(5) is not clear as to whether "any federal tax" includes taxes from any jurisdiction or just federal taxes imposed from business in the State of Missouri. Further, by using the language contained in the present initiative petition ("*any* sums paid as a result of *any* federal tax"), the provision appears to permit a sports wagering operator to deduct its federal income tax, its federal employment tax, its federal excise tax, and any other federal tax when determining its adjusted gross receipts. If a sports wagering operator is permitted to make such deductions, the Commission anticipates that some operators may have no adjusted gross receipts on which to pay gaming tax. In other words, the Commission anticipates that by permitting such deductions, some operators will pay no gaming taxes on sports wagering.
3. Section 11(a)(7) appears as if it needs to be its own separate section independent from Sections 11(a)(1) through (6), as it does not define or identify deductions from gross revenue.
4. The Commission anticipates that the totality of the deductions identified in Sections 11(a)(1) through (6) will result in sports wagering licensees showing negative adjusted gross revenues and therefore paying no sports wagering tax. This would in turn impact the ability of the Commission to meet its reasonable expenses as well as limit or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri. Additionally, the carryover provisions in Section 11(a)(7) would further impact the ability of the Commission to meet its reasonable expenses and further impact or eliminate contributions.

MGC officials further indicated the projections in the spreadsheets and fiscal impact response are based on estimates from other jurisdictions and the impact of the taxes collected in other jurisdictions comparable to the proposed taxes and tax deductions in Missouri. The narrative, however, also noted that operators may pay little to no taxes if they are permitted to claim deductions that would be in excess of their adjusted gross revenue. Such deductions would potentially be permitted under the language of these petitions, particularly with respect to deductions for promotional or free play and deductions for any federal tax. An example of this is Kansas. In February 2023, Kansans wagered more than \$194 million in sports bets. The state, however, received \$1,134 in state tax revenue due to language permitting operators to deduct free play or promotional credits before assessing their state taxes. Some operators had not paid any state taxes through the first quarter of 2023 due to the deductions they were permitted to claim. The link to this information is at the end of the response.

The projected revenues in the response provided are based on what the MGC can estimate from a strictly numbers perspective. These numbers, however, are subject to a wide margin based on the uncertainty of operators' abilities to claim deductions consistent with the language in these petitions.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and the State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate onetime costs of \$660,000, ongoing annual costs of at least \$5.2 million, and initial license fee revenue of \$11.75 million. Because the proposal allows for deductions against sports gaming revenues, they estimate unknown tax revenue ranging from \$0 to \$28.9 million annually. Local governments estimate unknown revenue.

JOHN R. ASHCROFT

The Honorable Scott Fitzpatrick
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 7 (2024-160)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 4, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than two mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license per distinct sports wagering operator brand. For purposes of Article III, Section 39(g) brand shall refer to the name, trade name, licensed trademark, or assumed business name of the sports wagering operator. If there are more than two qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant for licensure based on the applicant's ability to satisfy the following criteria:

(1) Expertise in the business of online sports wagering;

(2) Integrity, sustainability, and safety of the applicant's online sports wagering platform;

(3) Past relevant experience of the applicant;

(4) Advertising and promotional plans to increase and sustain revenue;

(5) Ability to generate, maximize, and sustain revenues for the state;

(6) Demonstrated commitment to and plans for the promotion of responsible gaming; and

(7) Capacity to increase the number of bettors on the applicant's online sports wagering platform.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control. In the application, the Commission shall require applicants to disclose the identity of all of the following:

a. The applicant's principal owners who directly own 10% or more of the applicant;

b. Each holding, intermediary, or parent company that directly owns 15% or more of the applicant; and

c. The applicant's board appointed chief executive officer and chief financial officer, or the equivalent individuals, as determined by the Commission.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. a. A license for sports wagering shall not be assignable or transferable without approval of the Commission. Such approval shall not be unreasonably withheld.

b. A license shall authorize a licensee to offer sports wagering under not more than one sports wagering operator brand, provided, however, that such licensee shall also be permitted, but not required, to use the brand of a professional team or excursion gambling boat pursuant to a partnership with such entity. Notwithstanding any other provision of law to the contrary and subject to approval by the Commission, a person or entity may hold and operate more than one license under distinct sports wagering operator brands, regardless of whether multiple brands are owned by the same parent entity.

c. Commercial agreements between an excursion gambling boat or a professional sports team and a sports wagering operator shall be submitted to the Commission as agreed to by the contracting parties. The Commission shall not prescribe any terms or conditions that are required to be included into such commercial agreements. A sports governing body or professional sports team may enter into commercial agreements with sports wagering operators or other entities in which such sports governing body or professional sports team may share in the amount wagered on sporting events of such sports governing body or professional sports team. A professional sports team may grant any such rights provided under this paragraph to its affiliate. Neither a sports governing body nor a professional sports team, nor such team's affiliate, is required to obtain a license or any other approval from the Commission to lawfully accept such amounts.

d. Each mobile licensee shall determine, set, and display applicable lines, point spreads, odds, or other information pertaining to online sports wagering.

e. Any submission to the Commission under this section, including all documents, reports, and data submitted therewith, that contain proprietary information, trade secrets, financial information, or personal information about any person or entity shall be treated in the same confidential manner as submissions by other licensees of the Commission and shall not be subject to disclosure pursuant to Chapter 610 RSMo.

8. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

9. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data on the terms and conditions set forth below from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States.

(1) A sports governing body may notify the Commission that it desires sports wagering operators to use official league data to settle tier two sports wagers on sporting events of such sports governing body. Such notification shall be made in the form and manner the Commission may require. The Commission shall notify each sports wagering operator of a sports governing body's notification within five days of the Commission's receipt of such notification. If a sports governing body does not notify the Commission of its desire to supply official league data, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers on sporting events of such sports governing body.

(2) Within 60 days of the Commission notifying each sports wagering operator of a sports governing body's notification to the Commission, or such longer period as may be agreed between the sports governing body and the applicable sports wagering operator, sports wagering operators shall use only official league data to determine the results of tier two sports wagers on sporting events of that sports governing body, unless:

(a) The sports governing body or its designee cannot provide a feed of official league data to determine the results of a particular type of tier two sports wager, in which case sports wagering operators may use any data source for determining the results of the applicable tier two sports wager until such time as such a data feed becomes available from the sports governing body on commercially reasonable terms and conditions;

(b) A sports wagering operator can demonstrate to the Commission that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms and conditions; or

(c) The sports governing body or its designee does not obtain the necessary supplier approvals to provide official league data to sports wagering operators to determine the results of tier two sports wagers, if and to the extent required by law.

(3) The following is a non-exclusive list of factors that the Commission may consider in evaluating official league data is being offered on commercially reasonable terms and conditions for the purposes of paragraphs (a) and (b) of subsection (2):

(a) The availability of a sports governing body's tier two official league data to a sports wagering operator from more than one authorized source;

(b) Market information, including, but not limited to, price and other terms and conditions, regarding the purchase by sports wagering operators of comparable data for the purpose of settling sports wagers in this state and other jurisdictions;

(c) The nature and quantity of data, including the quality and complexity of the process utilized for collecting such data; and

(d) The extent to which sports governing bodies or their designees have made data used to settle tier two bets or wagers available to operators and any terms and conditions relating to the use of that data.

(4) Notwithstanding anything set forth to the contrary herein, including without limitation subparagraph (3), during the pendency of the Commission's determination as to whether a sports governing body or its designee will provide a feed of official league data on commercially reasonable terms, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers. The Commission's determination shall be made within 120 days of the sports wagering operator notifying the Commission that it desires to demonstrate that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms.

b. Standards concerning a licensee's books and financial records relating to sports wagering, including auditing requirements, standards for the daily counting of a licensee's gross receipts from sports wagering, and standards to ensure that internal controls are followed;

c. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to, research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

d. Standards concerning the detection and prevention of compulsive gaming including, but not limited to, requirements to prominently display information regarding compulsive gaming on all online sports wagering platforms and promotions;

e. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

f. Standards for licensees and sports wagering operators to report to the Commission and the sports governing bodies information related to: abnormal betting activity or patterns that may indicate a concern with the integrity of a sporting event or events; suspicious or illegal betting activities if known to the applicable licensee or sports wagering operator; and any other conduct that corrupts a betting outcome of a sporting event or events for purposes of financial gain, including match fixing;

g. Standards for any sports governing body to submit to the Commission a written request to restrict, limit, or exclude a certain type, form, or category of sports betting with respect to a sporting event of that sports governing body, if the applicable sports governing body believes that such type, form, or category of sports wagering with respect to the sporting event of the sports governing body may undermine the integrity or perceived integrity of the applicable sports governing body or sporting events of the applicable sports governing body.

These standards shall also require the Commission to request comment from sports wagering operators on all requests made pursuant to this paragraph and after giving due consideration to all comments received, the Commission shall, upon a demonstration of good cause from the applicable sports governing body that such type, form, or category of sports betting is likely to undermine the integrity or perceived integrity of such body or sporting events of the applicable sports governing body, grant the request.

These standards shall require the Commission to respond to a request concerning a sporting event before the start of the event, or, if it is not feasible to respond before the start of the event, no later than 7 days after the request is made, and if the Commission determines that the applicable sports governing body is more likely than not to prevail in successfully demonstrating good cause for its request, the Commission may provisionally grant the request of the applicable sports governing body pending the Commission's final determination thereon. Unless the Commission provisionally grants the request, sports wagering operators may continue to offer sports betting and accept bets on the covered sporting event pending a final determination by the Commission;

h. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

i. Standards for the regulation of suppliers of sports wagering goods, services, software, or any other components necessary for the creation of sports wagering markets and determination of wager outcomes;

j. Standards for the implementation of responsible gaming programs, including using commercially reasonable efforts to verify that a person placing a bet on a sporting event is of the legal minimum age for placing such bet, displaying a hyperlink on its online sports wagering platform to responsible gaming information, allowing individuals to voluntarily exclude themselves from placing bets with the operator through a process established by the Commission, and allowing persons to place limits on their time, deposit, or bet limits in a daily, weekly, or monthly manner;

k. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed \$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court;

l. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license; and

m. Prohibiting all sports wagering activity, including sports wagering promotional and advertising activity, within a sports district, unless approved by the professional sports team that plays its home games within the district, except such rules shall not prohibit any licensee from offering sports wagering through an online sports wagering platform to persons physically located within a sports district.

10. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

11. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

12. All wagers authorized under this section must be initiated, made, or otherwise placed by a bettor while physically present within this state. The intermediate routing of electronic data related to lawful intrastate wagers authorized under this section shall not determine the location or locations in which the bet is initiated, transmitted, received, or otherwise made. Each online sports wagering operator shall use commercially reasonable geolocation and geofencing technology to ensure that it accepts bets only from customers who, at the time of placing the bet, are physically present in this state.

13. a. An individual wagering in this state shall establish an online sports wagering account with an online sports wagering operator:

(1) over the Internet;

(2) through an online sports wagering platform; or

(3) through other means approved by the Commission.

b. An individual wagering in this State shall not register more than one account with each online sports wagering platform. Mobile licensees shall use commercially reasonable means to ensure that each customer is limited to one account per platform.

c. Permissible methods of funding and withdrawal for accounts include, but are not limited to, credit cards, debit cards, gift cards, reloadable prepaid cards, free and promotional credit, automated clearing house transfers, online and mobile payment systems that support online money transfers, and wire transfers. The Commission may approve additional funding and withdrawal methods including, but not limited to, cash deposits at approved locations and secure cryptocurrencies.

14. a. A sports wagering operator shall use commercially and technologically reasonable means to ensure marketing and advertisements do not purposefully target individuals who have self-excluded from placing bets on sporting events.

b. A sports wagering operator shall employ commercially reasonable methods to ensure that advertisements for sports betting:

(1) do not purposefully target minors;

(2) are not false, misleading, or deceptive to a reasonable consumer; and

(3) clearly and conspicuously disclose the material terms of any promotional offer in the advertisement. Any promotion or advertisement must provide the consumer with the full and complete terms of a promotion by providing a website, or other location, in the promotional advertisement, that directs the viewer to where the full and complete promotional terms can be viewed. This may be satisfied by the promotional advertisement containing a hyperlink that takes the viewer directly to the full and complete offer and terms.

15. There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamers.

16. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat," means an excursion gambling boat or floating facility as described in Article III, Section 39(c);

d. "License," means any retail license or mobile license.

e. "Licensee," means the holder of any retail or mobile license.

f. "Mobile license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. "Online sports wagering platform," means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. "Professional sports team," means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women's National Basketball Association, or the National Women's Soccer League.

i. "Retail license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. "Sports district," means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. "Sports wagering," means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a "participant" for purposes of this section; and

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. "Sports wagering operator," means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. "Tier one sports wager," means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. "Tier two sports wager," means a sports wager that is not a tier one sports wager.

17. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

18. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-160)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article III. (Received October 4, 2023)

Date

October 24, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-160 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated they defer to the fiscal determination of the gaming commission.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(g) of the Missouri Constitution legalizing sports wagering in Missouri. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-160 proposing to amend Article III.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP 24-160 attempts to create a sports wagering program in the state of Missouri. It appears it wants the Missouri Gaming Commission (Commission) to regulate the sports betting.

Sections 39(g)2 – 39(g)5. requires that a retail license be offered to certain organizations to allow for sports betting. Only licensed organizations will be allowed to offer sports betting. It appears it would allow each of the current 13 excursion gambling boats and the 6 current professional sports teams in Missouri to apply for a sports betting retail license. For purposes of the fiscal note they will assume all these groups apply for the sports betting retail license. Section 39(g)6 allows the Commission to set the fee for the retail license up to \$250,000. For purposes of the fiscal note only, they will assume that the Commission sets the fee at the full amount allowed and therefore the retail licenses could potentially generate \$4,750,000 $[(13 \text{ boats} * \$250,000) + (6 \text{ teams} * \$250,000)]$ in the first year and the same in the fifth year due to renewal fees.

The Department of Revenue (Department) notes while the proposal appears to allow the Commission to set the retail license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the retail license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these retail license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)4.(c) allows the Commission to issue not more than 2 mobile license to certain organizations in the state. It allows the Commission to set the mobile license fee at up to \$500,000. The Department is unaware of the number of organizations that would apply for this mobile license and would defer to the Commission for an estimate of that number. However, the Department notes that while the proposal appears to allow the Commission to set the mobile license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the mobile license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these mobile license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)8 says that all fees prescribed by the Commission and collected by the state shall be appropriated as identified in the proposal. It should be noted that the Commission is not expressly authorized under this proposal to collect any of the fees described in this proposal nor is any other agency expressly authorized to collect the fees under these sections. This proposal requires the assessment of fees but does not require the fees remittance. Therefore, these sections will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Section 39(g)9 provides the Commission rule making authority, limited to certain delineated items. Collection of fees and/or the taxes outlined in the proposal is not one of

them. They are allowed to create rules on the use of the funds in the Compulsive Gaming Prevention Fund but not for its collection. Since no money is to be remitted by the sports betting retail or mobile licensees, it appears this authority may not be needed.

Section 39(g)10 appears to impose a 10% wagering tax on the adjusted gross revenue of the licensee. The Department defers to the Commission for an estimate of the tax that would be collected from the 10% sports betting tax.

This section requires collection of the 10% sports betting tax but does not require remittance of the tax to the Department, Commission or any other state agency. Without the identification of an agency to collect the tax, no tax can be collected. Therefore, it appears this section will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Should the Department be asked to collect the taxes generated under this proposal, it was not provided rulemaking authority in which to do it. In addition, the Department expects to have an administrative fiscal impact. Excursion gambling boats currently remit their gambling taxes they collect nightly. The Department would want to create a system similar to the existing gambling tax system. The Department estimates such a system would cost \$100,415 (\$95 per hour * 1,057 hours work). The Department would also need 1 Associate Customer Service Representative with an annual salary of \$36,628 to process payments and reports.

Section 39(g)15 creates the Compulsive Gaming Prevention Fund. This fund appears to duplicate the already existing Compulsive Gamblers Fund (0249) created in Section 313.842 RSMo.

The Department notes that the Sports districts definition may include more than intended. Section 16(j) explains that "sports district" includes any Missouri stadium with a capacity over 11,500 that operates as home for one or more "professional sports team". It also extends to the surrounding area within 400 yards of such premises. Section 16(h) which defines "professional sports team" includes both Major League Soccer (MLS) and National Women's Soccer League (NWSL). The Department notes that CITYPARK, which is home to the MLS team the St. Louis City SC is in downtown St. Louis. The 400 yard extension will potentially cover multiple streets with private retail and residential locations. Additionally, the planned KC Current Stadium, home to the NWSL team the Kansas City Current will also be located in close proximity to private locations. Built within the Berkley Riverfront Park, the stadium will also be next to a public park.

Summary:

Due to the wording in this IP, the Department of Revenue assumes this IP will not generate any revenue to the state.

Officials from the **Department of Public Safety - Office of the Director** indicated:

The Missouri State Highway Patrol anticipates the need for two (2) additional full-time employees (FTE) to conduct background investigations and the subsequent renewals for sports wagering vendors, along with four (4) additional FTE for enforcement activities. Expenses related to the six (6) FTE would be paid from the Gaming Fund (0286). One-time and ongoing expenses, shown below, would include salary, fringe, vehicles, gasoline, and related equipment. The Patrol's response below is applicable for each of the initiative petitions.

Salary:

Position Title: Sergeant (V07005)
Annual Salary: \$99,648
Total Cost for Salaries: \$597,888

Fringe:

Annual Cost per Position: \$85,637
Total Fringe Amount: \$513,822

Expense & Equipment:

Initial Costs: \$501,330
Ongoing Costs: \$130,956

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$1,613,040
Ongoing Costs: \$1,242,666

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-160 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for initiative petition 24-160.

Officials from the **Office of Administration** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-160 a proposed constitutional amendment to Article III, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-160 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-160 proposing to amend Article III.

Officials from **St. Louis County** indicated the initiative petition should have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated this will have a fiscal impact to their college. Unknown impact at this time due to revenues and expenses being unknown.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and cannot determine the effect on the college since no estimate of revenues has been made. Their response in no way assesses the merits of the petition on its face.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Home Dock Cities/Counties, "sports districts" located in St. Louis and Kansas City, as that term is defined in the proposal.

It may have an impact on local jurisdictions and businesses surrounding and in close proximity to the "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal.

The MGC anticipates licensees to pay license fees and renewal fees to the MGC in order to regulate and manage sports wagering in Missouri. It also imposes certain taxes be paid by licensees based on their adjusted gross revenue.

If this initiative petition passes, the Missouri Gaming Commission (MGC) estimates needing fifteen new FTE positions, which would result in an initial cost to the MGC of \$1,786,582.86 (including salary, fringe, supplies, equipment, and travel/lodging related to job performance of those additional employees), in addition to approximately \$2,182,431.33, which represents 7.7% of the MGC existing budget each year (to cover the costs of MGC and MSHP Gaming Division staff plus expenses needed to license and regulate sports wagering) for a total initial cost of \$3,969,014.17. Additional costs included

in this estimate may also encompass those associated with the development and implementation of responsible gambling programs. The total annual ongoing personnel cost, after the first year, is estimated to be \$3,910,738.87.

The MGC and the Missouri State Highway Patrol (MSHP) currently have a Memorandum of Understanding (MOU) in place which states that the MSHP will provide background and criminal and regulatory investigation and enforcement support to the MGC to assist it in carrying out its duties, which results in these additional costs.

The MGC estimates a total of 19 applicants for retail sports wagering licenses, to include the 13 current excursion gambling boats, plus 6 “sports districts” located in St. Louis and Kansas City areas, as that term is defined in the proposal. Initiative 24-160, Article III, Section 39(g).4 allows for the excursion gambling boat owners and the professional teams to apply for mobile licenses, in addition to two mobile licenses to untethered sports wagering operators, for a total of 14 mobile licenses.

Based on the number of sports wagering licenses, the MGC estimates collection of fees approximately \$11.75 million the first year and every fifth year of operation. Pursuant to Section 39(g).7 the fees would be utilized for reimbursement of expenses incurred by the MGC to regulate sports wagering. Any remaining fees will be deposited into the Compulsive Gambling Prevention Fund. Pursuant to Section 39(g).16 a wagering tax of 10% is imposed based on adjusted gross revenue. Annual revenues will be appropriated to elementary, secondary and higher education only after the annual tax revenues are used to reimburse expenses incurred by MGC and to fund the Compulsive Gambling Prevention Fund at the greater of 10% of annual tax revenues or \$5,000,000 to the Compulsive Gambling Fund.

In calculating tax revenue estimates, the Missouri Gaming Commission used the sports wagering data from a comparable state, Indiana, due to it having similar population, number of casinos, geographical proximity and other demographics as Missouri. Indiana’s total adjusted receipts from sports wagering, which includes both retail (in-person) and online, was \$84,969,839 for 2020, \$240,503,973 for 2021, and \$328,639,984 for 2022. Assuming that the total adjusted gross revenue for sports wagering in Missouri will be comparable to that of Indiana, the Gaming Commission estimates that total adjusted gross revenue for sports wagering in Missouri will be \$63,514,955 for the first year, \$179,776,720 for the second year, \$245,658,388 for the third year, and \$266,539,351 for the fourth year (fourth year estimate is based on 8.5% growth from the previous year per a study completed by Eilers & Krejcik). In determining the aforementioned estimates, a .25% deduction for excise tax and a 25% deduction for promotional wagering were made to Missouri’s total adjusted gross revenue from sports wagering due to the initiative’s definition of adjusted gross revenue including such deductions for sports wagering, whereas Indiana’s definition does not. In addition, the term of adjusted gross revenue includes deducting voided or cancelled wagers, uncollectible receivables, and actual costs for anything of value provided to the patron, but such deduction was not made in determining the aforementioned tax revenue estimates, because Indiana’s adjusted gross receipts already include a 2% deduction for such, which the Missouri Gaming Commission estimates will be a similar amount in Missouri. Thus, using the total adjusted gross revenue

for sports wagering in Missouri estimates, the Missouri Gaming Commission estimates that the revenue from the Gaming Tax (10% of Adjusted Gross Receipts) on sports wagering will be \$6,351,495.47 for the first year, \$17,977,671.98 for the second year, \$24,565,838.80 for the third year, \$26,653,935.10 for the fourth year, and \$28,919,519.62 for the fifth year. These estimates, however, are uncertain based on the inclusion of a deduction for “any federal tax” with no corresponding definition or explanation as to what that would include.

Based on the licensing and renewal fees for sports wagering applicants and the taxes on the adjusted gross revenue the total amount of fees and taxes collected may be sufficient to cover the Missouri Gaming Commission’s costs to license and regulate sports wagering, however, that is dependent on the total amount of deductions applied to the adjusted gross revenue

Technical Notes:

Section 4(c) – It is the understanding of the Missouri Gaming Commission (the “Commission”) that this section permits a certain number of mobile licenses that would be untethered from any casino or sports team location or district. Such allowance would potentially be in conflict with Article III, Section 39(e) of the Missouri Constitution, which permits gambling upon the Missouri or Mississippi Rivers only (or in artificial spaces that contain water and are within 1000 feet of the closest edge of the main channel).

Section 6(a) and 6(b) – These sections specify the fees for both (a) retail and (b) mobile licenses. Retail license applicants shall be required to pay a license fee of \$250,000 with a license renewal fee of \$250,000 every five (5) years. Mobile license applicants shall be required to pay a license fee of \$500,000 with a license renewal fee of \$500,000 every five (5) years. To the extent that other language in the petition proscribes allocation of the fees, there is concern that the licensing fees will not cover the expenses of the Missouri Gaming Commission (the “Commission”) during years in which licensing fees or renewals are not collected (i.e., years two, three, and four). These sections are also not clear as to where the license fees and renewal fees are to be deposited. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 8 – This section describes appropriation for the fees collected by the Commission. Section 8 requires that the fees first be used to reimburse the Commission for their reasonable expenses incurred to regulate sports wagering with the remaining fees being deposited into the Compulsive Gambling Prevention Fund. This section raises the question of where the fee monies are being deposited in the first instance if the language requires reimbursement to the Commission. Currently, fees for licensees are deposited with the Missouri Gaming Commission Fund and appropriated accordingly after the Commission’s reasonable expenses have been satisfied. The process by which the Commission is reimbursed is not clear in the current petition, nor is it clear in general how the funds will be dispersed. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 9(k) – This section proscribes the maximum fine that the Commission could impose for violations of the laws and rules promulgated for sports wagering in the State. Historically, the Commission has had broad discretion to discipline operators for violations of statute and rules and would suggest that this continue.

Section 10 – This section requires that a 10% tax be imposed upon the adjusted gross revenue received from sports wagering by each licensee, to be appropriated for elementary, secondary, and higher education, and to be paid after appropriations for the Commission's reasonable expenses and contributions to the Compulsive Gambling Prevention Fund of the greater of 10% of annual tax revenues or \$5,000,000. In years where the Commission does not collect renewal fees, licensing fees will be insufficient to meet the Commission's reasonable expenses and would thus require the Commission to rely upon tax funds that would otherwise be appropriated to education in the state of Missouri. Section 10 also raises the question of whether an annual 10% or \$5,000,000 contribution to the Compulsive Gambling Prevention Fund is required regardless of the balance of the Fund.

Section 11 – This section requires that licensees maintain in the state, or other location approved by the Commission and consistent with federal law, a computer server or servers used to receive transmissions of requests to place wagers and that transmit acceptance of those requests. Under current federal law, the servers would only be intrastate. The Commission is also aware of a potential conflict between the petition and Article III, Section 39 regarding the location of the servers within the state.

Section 15 – Section 15 requires that there will be the Compulsive Gambling Prevention Fund created in the state treasury which shall consist of the taxes and fees collected pursuant to the petition. The section is not clear if the Compulsive Gambling Prevention Fund shall contain only the funds specifically directed to the Fund, or if the entirety of fees and taxes will be deposited into this fund in the first instance for later reimbursement and appropriation. This concern mirrors the notes related to Section 8. Further, a compulsive gambling fund was previously authorized under Section 313.842, RSMo. The language here is not clear as to whether the Fund contemplated in this section is a separately established fund, or if it adds to or changes the existing statute. Additionally, this Section invests in the Commission the oversight into use of the Fund for counseling, treatment programs, and grants for compulsive gambling prevention. This oversight would potentially be better accomplished by the Department of Mental Health with their qualifications in understanding Gambling Disorders under the Diagnostic and Statistical Manual (DSM) V.

Section 16(a) – This section states that the definition of adjusted gross revenue (as related to the wagering tax of 10% imposed in Section 10) is the total of all cash or cash equivalents received by a licensee from sports wagering minus (1) all cash and cash equivalents paid out as winnings to patrons, (2) the actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering, (3) voided or cancelled wagers, (4) the costs of free play or promotional credits provided to and redeemed by the applicable

licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month, (5) any sums paid as a result of any federal tax, including federal excise tax, and (6) uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons. Section 16(a) also states in (7) that if the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month and any negative receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

1. Section 16(a)(4) would allow an operator to deduct up to 25% of the gross costs of promotional credits and free play. As a result, the Commission anticipates that operators will be permitted to deduct amounts to the extent the operator pays zero gaming taxes for sports wagering.
2. Section 16(a)(5) is not clear as to whether "any federal tax" includes taxes from any jurisdiction or just federal taxes imposed from business in the State of Missouri. Further, by using the language contained in the present initiative petition ("*any* sums paid as a result of *any* federal tax"), the provision appears to permit a sports wagering operator to deduct its federal income tax, its federal employment tax, its federal excise tax, and any other federal tax when determining its adjusted gross receipts. If a sports wagering operator is permitted to make such deductions, the Commission anticipates that some operators may have no adjusted gross receipts on which to pay gaming tax. In other words, the Commission anticipates that by permitting such deductions, some operators will pay no gaming taxes on sports wagering.
3. Section 16(a)(7) appears as if it needs to be its own separate section independent from Sections 16(a)(1) through (6), as it does not define or identify deductions from gross revenue.
4. The Commission anticipates that the totality of the deductions identified in Sections 16(a)(1) through (6) will result in sports wagering licensees showing negative adjusted gross revenues and therefore paying no sports wagering tax. This would in turn impact the ability of the Commission to meet its reasonable expenses as well as limit or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri. Additionally, the carryover provisions in Section 16(a)(7) would further impact the ability of the Commission to meet its reasonable expenses and further impact or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri.

MGC officials further indicated the projections in the spreadsheets and fiscal impact response are based on estimates from other jurisdictions and the impact of the taxes collected in other jurisdictions comparable to the proposed taxes and tax deductions in Missouri. The narrative, however, also noted that operators may pay little to no taxes if they are permitted to claim deductions that would be in excess of their adjusted gross revenue. Such deductions would potentially be permitted under the language of these petitions, particularly with respect to deductions for promotional or free play and deductions for any federal tax. An example of this is Kansas. In February 2023, Kansans wagered more than \$194 million in sports bets. The state, however, received \$1,134 in state tax revenue due to language permitting operators to deduct free play or promotional credits before assessing their state taxes. Some operators had not paid any state taxes through the first quarter of 2023 due to the deductions they were permitted to claim. The link to this information is at the end of the response.

The projected revenues in the response provided are based on what the MGC can estimate from a strictly numbers perspective. These numbers, however, are subject to a wide margin based on the uncertainty of operators' abilities to claim deductions consistent with the language in these petitions.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and the State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate onetime costs of \$660,000, ongoing annual costs of at least \$5.2 million, and initial license fee revenue of \$11.75 million. Because the proposal allows for deductions against sports gaming revenues, they estimate unknown tax revenue ranging from \$0 to \$28.9 million annually. Local governments estimate unknown revenue.

The Honorable Scott Fitzpatrick
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 6 (2024-159)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 4, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than four mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license per distinct sports wagering operator brand. For purposes of Article III, Section 39(g) brand shall refer to the name, trade name, licensed trademark, or assumed business name of the sports wagering operator. If there are more than four qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant for licensure based on the applicant's ability to satisfy the following criteria:

(1) Expertise in the business of online sports wagering;

(2) Integrity, sustainability, and safety of the applicant's online sports wagering platform;

(3) Past relevant experience of the applicant;

(4) Advertising and promotional plans to increase and sustain revenue;

(5) Ability to generate, maximize, and sustain revenues for the state;

(6) Demonstrated commitment to and plans for the promotion of responsible gaming; and

(7) Capacity to increase the number of bettors on the applicant's online sports wagering platform.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control. In the application, the Commission shall require applicants to disclose the identity of all of the following:

a. The applicant's principal owners who directly own 10% or more of the applicant;

b. Each holding, intermediary, or parent company that directly owns 15% or more of the applicant; and

c. The applicant's board appointed chief executive officer and chief financial officer, or the equivalent individuals, as determined by the Commission.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. a. A license for sports wagering shall not be assignable or transferable without approval of the Commission. Such approval shall not be unreasonably withheld.

b. A license shall authorize a licensee to offer sports wagering under not more than one sports wagering operator brand, provided, however, that such licensee shall also be permitted, but not required, to use the brand of a professional team or excursion gambling boat pursuant to a partnership with such entity. Notwithstanding any other provision of law to the contrary and subject to approval by the Commission, a person or entity may hold and operate more than one license under distinct sports wagering operator brands, regardless of whether multiple brands are owned by the same parent entity.

c. Commercial agreements between an excursion gambling boat or a professional sports team and a sports wagering operator shall be submitted to the Commission as agreed to by the contracting parties. The Commission shall not prescribe any terms or conditions that are required to be included into such commercial agreements. A sports governing body or professional sports team may enter into commercial agreements with sports wagering operators or other entities in which such sports governing body or professional sports team may share in the amount wagered on sporting events of such sports governing body or professional sports team. A professional sports team may grant any such rights provided under this paragraph to its affiliate. Neither a sports governing body nor a professional sports team, nor such team's affiliate, is required to obtain a license or any other approval from the Commission to lawfully accept such amounts.

d. Each mobile licensee shall determine, set, and display applicable lines, point spreads, odds, or other information pertaining to online sports wagering.

e. Any submission to the Commission under this section, including all documents, reports, and data submitted therewith, that contain proprietary information, trade secrets, financial information, or personal information about any person or entity shall be treated in the same confidential manner as submissions by other licensees of the Commission and shall not be subject to disclosure pursuant to Chapter 610 RSMo.

8. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

9. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data on the terms and conditions set forth below from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States.

(1) A sports governing body may notify the Commission that it desires sports wagering operators to use official league data to settle tier two sports wagers on sporting events of such sports governing body. Such notification shall be made in the form and manner the Commission may require. The Commission shall notify each sports wagering operator of a sports governing body's notification within five days of the Commission's receipt of such notification. If a sports governing body does not notify the Commission of its desire to supply official league data, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers on sporting events of such sports governing body.

(2) Within 60 days of the Commission notifying each sports wagering operator of a sports governing body's notification to the Commission, or such longer period as may be agreed between the sports governing body and the applicable sports wagering operator, sports wagering operators shall use only official league data to determine the results of tier two sports wagers on sporting events of that sports governing body, unless:

(a) The sports governing body or its designee cannot provide a feed of official league data to determine the results of a particular type of tier two sports wager, in which case sports wagering operators may use any data source for determining the results of the applicable tier two sports wager until such time as such a data feed becomes available from the sports governing body on commercially reasonable terms and conditions;

(b) A sports wagering operator can demonstrate to the Commission that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms and conditions; or

(c) The sports governing body or its designee does not obtain the necessary supplier approvals to provide official league data to sports wagering operators to determine the results of tier two sports wagers, if and to the extent required by law.

(3) The following is a non-exclusive list of factors that the Commission may consider in evaluating official league data is being offered on commercially reasonable terms and conditions for the purposes of paragraphs (a) and (b) of subsection (2):

(a) The availability of a sports governing body's tier two official league data to a sports wagering operator from more than one authorized source;

(b) Market information, including, but not limited to, price and other terms and conditions, regarding the purchase by sports wagering operators of comparable data for the purpose of settling sports wagers in this state and other jurisdictions;

(c) The nature and quantity of data, including the quality and complexity of the process utilized for collecting such data; and

(d) The extent to which sports governing bodies or their designees have made data used to settle tier two bets or wagers available to operators and any terms and conditions relating to the use of that data.

(4) Notwithstanding anything set forth to the contrary herein, including without limitation subparagraph (3), during the pendency of the Commission's determination as to whether a sports governing body or its designee will provide a feed of official league data on commercially reasonable terms, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers. The Commission's determination shall be made within 120 days of the sports wagering operator notifying the Commission that it desires to demonstrate that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms.

b. Standards concerning a licensee's books and financial records relating to sports wagering, including auditing requirements, standards for the daily counting of a licensee's gross receipts from sports wagering, and standards to ensure that internal controls are followed;

c. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to, research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

d. Standards concerning the detection and prevention of compulsive gaming including, but not limited to, requirements to prominently display information regarding compulsive gaming on all online sports wagering platforms and promotions;

e. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

f. Standards for licensees and sports wagering operators to report to the Commission and the sports governing bodies information related to: abnormal betting activity or patterns that may indicate a concern with the integrity of a sporting event or events; suspicious or illegal betting activities if known to the applicable licensee or sports wagering operator; and any other conduct that corrupts a betting outcome of a sporting event or events for purposes of financial gain, including match fixing;

g. Standards for any sports governing body to submit to the Commission a written request to restrict, limit, or exclude a certain type, form, or category of sports betting with respect to a sporting event of that sports governing body, if the applicable sports governing body believes that such type, form, or category of sports wagering with respect to the sporting event of the sports governing body may undermine the integrity or perceived integrity of the applicable sports governing body or sporting events of the applicable sports governing body.

These standards shall also require the Commission to request comment from sports wagering operators on all requests made pursuant to this paragraph and after giving due consideration to all comments received, the Commission shall, upon a demonstration of good cause from the applicable sports governing body that such type, form, or category of sports betting is likely to undermine the integrity or perceived integrity of such body or sporting events of the applicable sports governing body, grant the request.

These standards shall require the Commission to respond to a request concerning a sporting event before the start of the event, or, if it is not feasible to respond before the start of the event, no later than 7 days after the request is made, and if the Commission determines that the applicable sports governing body is more likely than not to prevail in successfully demonstrating good cause for its request, the Commission may provisionally grant the request of the applicable sports governing body pending the Commission's final determination thereon. Unless the Commission provisionally grants the request, sports wagering operators may continue to offer sports betting and accept bets on the covered sporting event pending a final determination by the Commission;

h. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

i. Standards for the regulation of suppliers of sports wagering goods, services, software, or any other components necessary for the creation of sports wagering markets and determination of wager outcomes;

j. Standards for the implementation of responsible gaming programs, including using commercially reasonable efforts to verify that a person placing a bet on a sporting event is of the legal minimum age for placing such bet, displaying a hyperlink on its online sports wagering platform to responsible gaming information, allowing individuals to voluntarily exclude themselves from placing bets with the operator through a process established by the Commission, and allowing persons to place limits on their time, deposit, or bet limits in a daily, weekly, or monthly manner;

k. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed \$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court;

l. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license; and

m. Prohibiting all sports wagering activity, including sports wagering promotional and advertising activity, within a sports district, unless approved by the professional sports team that plays its home games within the district, except such rules shall not prohibit any licensee from offering sports wagering through an online sports wagering platform to persons physically located within a sports district.

10. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

11. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

12. All wagers authorized under this section must be initiated, made, or otherwise placed by a bettor while physically present within this state. The intermediate routing of electronic data related to lawful intrastate wagers authorized under this section shall not determine the location or locations in which the bet is initiated, transmitted, received, or otherwise made. Each online sports wagering operator shall use commercially reasonable geolocation and geofencing technology to ensure that it accepts bets only from customers who, at the time of placing the bet, are physically present in this state.

13. a. An individual wagering in this state shall establish an online sports wagering account with an online sports wagering operator:

(1) over the Internet;

(2) through an online sports wagering platform; or

(3) through other means approved by the Commission.

b. An individual wagering in this State shall not register more than one account with each online sports wagering platform. Mobile licensees shall use commercially reasonable means to ensure that each customer is limited to one account per platform.

c. Permissible methods of funding and withdrawal for accounts include, but are not limited to, credit cards, debit cards, gift cards, reloadable prepaid cards, free and promotional credit, automated clearing house transfers, online and mobile payment systems that support online money transfers, and wire transfers. The Commission may approve additional funding and withdrawal methods including, but not limited to, cash deposits at approved locations and secure cryptocurrencies.

14. a. A sports wagering operator shall use commercially and technologically reasonable means to ensure marketing and advertisements do not purposefully target individuals who have self-excluded from placing bets on sporting events.

b. A sports wagering operator shall employ commercially reasonable methods to ensure that advertisements for sports betting:

(1) do not purposefully target minors;

(2) are not false, misleading, or deceptive to a reasonable consumer; and

(3) clearly and conspicuously disclose the material terms of any promotional offer in the advertisement. Any promotion or advertisement must provide the consumer with the full and complete terms of a promotion by providing a website, or other location, in the promotional advertisement, that directs the viewer to where the full and complete promotional terms can be viewed. This may be satisfied by the promotional advertisement containing a hyperlink that takes the viewer directly to the full and complete offer and terms.

15. There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamers.

16. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat," means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. "License," means any retail license or mobile license.

e. "Licensee," means the holder of any retail or mobile license.

f. "Mobile license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. "Online sports wagering platform," means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. "Professional sports team," means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women's National Basketball Association, or the National Women's Soccer League.

i. "Retail license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. "Sports district," means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. "Sports wagering," means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a "participant" for purposes of this section; and

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. "Sports wagering operator," means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. "Tier one sports wager," means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. "Tier two sports wager," means a sports wager that is not a tier one sports wager.

17. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

18. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-159)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article III. (Received October 4, 2023)

Date

October 24, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-159 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated they defer to the fiscal determination of the gaming commission.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(g) of the Missouri Constitution legalizing sports wagering in Missouri. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-159 proposing to amend Article III.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP 24-159 attempts to create a sports wagering program in the state of Missouri. It appears it wants the Missouri Gaming Commission (Commission) to regulate the sports betting.

Sections 39(g)2 – 39(g)5. requires that a retail license be offered to certain organizations to allow for sports betting. Only licensed organizations will be allowed to offer sports betting. It appears it would allow each of the current 13 excursion gambling boats and the 6 current professional sports teams in Missouri to apply for a sports betting retail license. For purposes of the fiscal note they will assume all these groups apply for the sports betting retail license. Section 39(g)6 allows the Commission to set the fee for the retail license up to \$250,000. For purposes of the fiscal note only, they will assume that the Commission sets the fee at the full amount allowed and therefore the retail licenses could potentially generate \$4,750,000 $[(13 \text{ boats} * \$250,000) + (6 \text{ teams} * \$250,000)]$ in the first year and the same in the fifth year due to renewal fees.

The Department of Revenue (Department) notes while the proposal appears to allow the Commission to set the retail license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the retail license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these retail license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)4.(c) allows the Commission to issue not more than 4 mobile license to certain organizations in the state. It allows the Commission to set the mobile license fee at up to \$500,000. The Department is unaware of the number of organizations that would apply for this mobile license and would defer to the Commission for an estimate of that number. However, the Department notes that while the proposal appears to allow the Commission to set the mobile license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the mobile license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these mobile license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)8 says that all fees prescribed by the Commission and collected by the state shall be appropriated as identified in the proposal. It should be noted that the Commission is not expressly authorized under this proposal to collect any of the fees described in this proposal nor is any other agency expressly authorized to collect the fees under these sections. This proposal requires the assessment of fees but does not require the fees remittance. Therefore, these sections will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Section 39(g)9 provides the Commission rule making authority, limited to certain delineated items. Collection of fees and/or the taxes outlined in the proposal is not one of

them. They are allowed to create rules on the use of the funds in the Compulsive Gaming Prevention Fund but not for its collection. Since no money is to be remitted by the sports betting retail or mobile licensees, it appears this authority may not be needed.

Section 39(g)10 appears to impose a 10% wagering tax on the adjusted gross revenue of the licensee. The Department defers to the Commission for an estimate of the tax that would be collected from the 10% sports betting tax.

This section requires collection of the 10% sports betting tax but does not require remittance of the tax to the Department, Commission or any other state agency. Without the identification of an agency to collect the tax, no tax can be collected. Therefore, it appears this section will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Should the Department be asked to collect the taxes generated under this proposal, it was not provided rulemaking authority in which to do it. In addition, the Department expects to have an administrative fiscal impact. Excursion gambling boats currently remit their gambling taxes they collect nightly. The Department would want to create a system similar to the existing gambling tax system. The Department estimates such a system would cost \$100,415 (\$95 per hour * 1,057 hours work). The Department would also need 1 Associate Customer Service Representative with an annual salary of \$36,628 to process payments and reports.

Section 39(g)15 creates the Compulsive Gaming Prevention Fund. This fund appears to duplicate the already existing Compulsive Gamblers Fund (0249) created in Section 313.842 RSMo.

The Department notes that the Sports districts definition may include more than intended. Section 16(j) explains that "sports district" includes any Missouri stadium with a capacity over 11,500 that operates as home for one or more "professional sports team". It also extends to the surrounding area within 400 yards of such premises. Section 16(h) which defines "professional sports team" includes both Major League Soccer (MLS) and National Women's Soccer League (NWSL). The Department notes that CITYPARK, which is home to the MLS team the St. Louis City SC is in downtown St. Louis. The 400 yard extension will potentially cover multiple streets with private retail and residential locations. Additionally, the planned KC Current Stadium, home to the NWSL team the Kansas City Current will also be located in close proximity to private locations. Built within the Berkley Riverfront Park, the stadium will also be next to a public park.

Summary:

Due to the wording in this IP, the Department of Revenue assumes this IP will not generate any revenue to the state.

Officials from the **Department of Public Safety - Office of the Director** indicated:

The Missouri State Highway Patrol anticipates the need for two (2) additional full-time employees (FTE) to conduct background investigations and the subsequent renewals for sports wagering vendors, along with four (4) additional FTE for enforcement activities. Expenses related to the six (6) FTE would be paid from the Gaming Fund (0286). One-time and ongoing expenses, shown below, would include salary, fringe, vehicles, gasoline, and related equipment. The Patrol's response below is applicable for each of the initiative petitions.

Salary:

Position Title: Sergeant (V07005)
Annual Salary: \$99,648
Total Cost for Salaries: \$597,888

Fringe:

Annual Cost per Position: \$85,637
Total Fringe Amount: \$513,822

Expense & Equipment:

Initial Costs: \$501,330
Ongoing Costs: \$130,956

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$1,613,040
Ongoing Costs: \$1,242,666

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-159 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for initiative petition 24-159.

Officials from the **Office of Administration** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-159 a proposed constitutional amendment to Article III, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-159 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-159 proposing to amend Article III.

Officials from **St. Louis County** indicated the initiative petition should have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated this will have a fiscal impact to their college. Unknown impact at this time due to revenues and expenses being unknown.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and cannot determine the effect on the college since no estimate of revenues has been made. Their response in no way assesses the merits of the petition on its face.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Home Dock Cities/Counties, "sports districts" located in St. Louis and Kansas City, as that term is defined in the proposal.

It may have an impact on local jurisdictions and businesses surrounding and in close proximity to the "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal.

The MGC anticipates licensees to pay license fees and renewal fees to the MGC in order to regulate and manage sports wagering in Missouri. It also imposes certain taxes be paid by licensees based on their adjusted gross revenue.

If this initiative petition passes, the Missouri Gaming Commission (MGC) estimates needing fifteen new FTE positions, which would result in an initial cost to the MGC of \$1,786,582.86 (including salary, fringe, supplies, equipment, and travel/lodging related to job performance of those additional employees), in addition to approximately \$2,182,431.33, which represents 7.7% of the MGC existing budget each year (to cover the costs of MGC and MSHP Gaming Division staff plus expenses needed to license and regulate sports wagering) for a total initial cost of \$3,969,014.17. Additional costs included

in this estimate may also encompass those associated with the development and implementation of responsible gambling programs. The total annual ongoing personnel cost, after the first year, is estimated to be \$3,910,738.87.

The MGC and the Missouri State Highway Patrol (MSHP) currently have a Memorandum of Understanding (MOU) in place which states that the MSHP will provide background and criminal and regulatory investigation and enforcement support to the MGC to assist it in carrying out its duties, which results in these additional costs.

The MGC estimates a total of 19 applicants for retail sports wagering licenses, to include the 13 current excursion gambling boats, plus 6 “sports districts” located in St. Louis and Kansas City areas, as that term is defined in the proposal. Initiative 24-159, Article III, Section 39(g).4 allows for the excursion gambling boat owners and the professional teams to apply for mobile licenses, in addition to four mobile licenses to untethered sports wagering operators, for a total of 16 mobile licenses.

Based on the number of sports wagering licenses, the MGC estimates collection of fees approximately \$12.75 million the first year and every fifth year of operation. Pursuant to Section 39(g).7 the fees would be utilized for reimbursement of expenses incurred by the MGC to regulate sports wagering. Any remaining fees will be deposited into the Compulsive Gambling Prevention Fund. Pursuant to Section 39(g).16 a wagering tax of 10% is imposed based on adjusted gross revenue. Annual revenues will be appropriated to elementary, secondary and higher education only after the annual tax revenues are used to reimburse expenses incurred by MGC and to fund the Compulsive Gambling Prevention Fund at the greater of 10% of annual tax revenues or \$5,000,000 to the Compulsive Gambling Fund.

In calculating tax revenue estimates, the Missouri Gaming Commission used the sports wagering data from a comparable state, Indiana, due to it having similar population, number of casinos, geographical proximity and other demographics as Missouri. Indiana’s total adjusted receipts from sports wagering, which includes both retail (in-person) and online, was \$84,969,839 for 2020, \$240,503,973 for 2021, and \$328,639,984 for 2022. Assuming that the total adjusted gross revenue for sports wagering in Missouri will be comparable to that of Indiana, the Gaming Commission estimates that total adjusted gross revenue for sports wagering in Missouri will be \$63,514,955 for the first year, \$179,776,720 for the second year, \$245,658,388 for the third year, and \$266,539,351 for the fourth year (fourth year estimate is based on 8.5% growth from the previous year per a study completed by Eilers & Krejcik). In determining the aforementioned estimates, a .25% deduction for excise tax and a 25% deduction for promotional wagering were made to Missouri’s total adjusted gross revenue from sports wagering due to the initiative’s definition of adjusted gross revenue including such deductions for sports wagering, whereas Indiana’s definition does not. In addition, the term of adjusted gross revenue includes deducting voided or cancelled wagers, uncollectible receivables, and actual costs for anything of value provided to the patron, but such deduction was not made in determining the aforementioned tax revenue estimates, because Indiana’s adjusted gross receipts already include a 2% deduction for such, which the Missouri Gaming Commission estimates will be a similar amount in Missouri. Thus, using the total adjusted gross revenue

for sports wagering in Missouri estimates, the Missouri Gaming Commission estimates that the revenue from the Gaming Tax (10% of Adjusted Gross Receipts) on sports wagering will be \$6,351,495.47 for the first year, \$17,977,671.98 for the second year, \$24,565,838.80 for the third year, \$26,653,935.10 for the fourth year, and \$28,919,519.62 for the fifth year. These estimates, however, are uncertain based on the inclusion of a deduction for “any federal tax” with no corresponding definition or explanation as to what that would include.

Based on the licensing and renewal fees for sports wagering applicants and the taxes on the adjusted gross revenue the total amount of fees and taxes collected may be sufficient to cover the Missouri Gaming Commission’s costs to license and regulate sports wagering, however, that is dependent on the total amount of deductions applied to the adjusted gross revenue.

Technical Notes:

Section 4(c) – It is the understanding of the Missouri Gaming Commission (the “Commission”) that this section permits a certain number of mobile licenses that would be untethered from any casino or sports team location or district. Such allowance would potentially be in conflict with Article III, Section 39(e) of the Missouri Constitution, which permits gambling upon the Missouri or Mississippi Rivers only (or in artificial spaces that contain water and are within 1000 feet of the closest edge of the main channel).

Section 6(a) and 6(b) – These sections specify the fees for both (a) retail and (b) mobile licenses. Retail license applicants shall be required to pay a license fee of \$250,000 with a license renewal fee of \$250,000 every five (5) years. Mobile license applicants shall be required to pay a license fee of \$500,000 with a license renewal fee of \$500,000 every five (5) years. To the extent that other language in the petition proscribes allocation of the fees, there is concern that the licensing fees will not cover the expenses of the Missouri Gaming Commission (the “Commission”) during years in which licensing fees or renewals are not collected (i.e., years two, three, and four). These sections are also not clear as to where the license fees and renewal fees are to be deposited. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 8 – This section describes appropriation for the fees collected by the Commission. Section 8 requires that the fees first be used to reimburse the Commission for their reasonable expenses incurred to regulate sports wagering with the remaining fees being deposited into the Compulsive Gambling Prevention Fund. This section raises the question of where the fee monies are being deposited in the first instance if the language requires reimbursement to the Commission. Currently, fees for licensees are deposited with the Missouri Gaming Commission Fund and appropriated accordingly after the Commission’s reasonable expenses have been satisfied. The process by which the Commission is reimbursed is not clear in the current petition, nor is it clear in general how the funds will be dispersed. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 9(k) – This section proscribes the maximum fine that the Commission could impose for violations of the laws and rules promulgated for sports wagering in the State. Historically, the Commission has had broad discretion to discipline operators for violations of statute and rules and would suggest that this continue.

Section 10 – This section requires that a 10% tax be imposed upon the adjusted gross revenue received from sports wagering by each licensee, to be appropriated for elementary, secondary, and higher education, and to be paid after appropriations for the Commission's reasonable expenses and contributions to the Compulsive Gambling Prevention Fund of the greater of 10% of annual tax revenues or \$5,000,000. In years where the Commission does not collect renewal fees, licensing fees will be insufficient to meet the Commission's reasonable expenses and would thus require the Commission to rely upon tax funds that would otherwise be appropriated to education in the state of Missouri. Section 10 also raises the question of whether an annual 10% or \$5,000,000 contribution to the Compulsive Gambling Prevention Fund is required regardless of the balance of the Fund.

Section 11 – This section requires that licensees maintain in the state, or other location approved by the Commission and consistent with federal law, a computer server or servers used to receive transmissions of requests to place wagers and that transmit acceptance of those requests. Under current federal law, the servers would only be intrastate. The Commission is also aware of a potential conflict between the petition and Article III, Section 39 regarding the location of the servers within the state.

Section 15 – Section 15 requires that there will be the Compulsive Gambling Prevention Fund created in the state treasury which shall consist of the taxes and fees collected pursuant to the petition. The section is not clear if the Compulsive Gambling Prevention Fund shall contain only the funds specifically directed to the Fund, or if the entirety of fees and taxes will be deposited into this fund in the first instance for later reimbursement and appropriation. This concern mirrors the notes related to Section 8. Further, a compulsive gambling fund was previously authorized under Section 313.842, RSMo. The language here is not clear as to whether the Fund contemplated in this section is a separately established fund, or if it adds to or changes the existing statute. Additionally, this Section invests in the Commission the oversight into use of the Fund for counseling, treatment programs, and grants for compulsive gambling prevention. This oversight would potentially be better accomplished by the Department of Mental Health with their qualifications in understanding Gambling Disorders under the Diagnostic and Statistical Manual (DSM) V.

Section 16(a) – This section states that the definition of adjusted gross revenue (as related to the wagering tax of 10% imposed in Section 10) is the total of all cash or cash equivalents received by a licensee from sports wagering minus (1) all cash and cash equivalents paid out as winnings to patrons, (2) the actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering, (3) voided or cancelled wagers, (4) the costs of free play or promotional credits provided to and redeemed by the applicable

licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month, (5) any sums paid as a result of any federal tax, including federal excise tax, and (6) uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons. Section 16(a) also states in (7) that if the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month and any negative receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

1. Section 16(a)(4) would allow an operator to deduct up to 25% of the gross costs of promotional credits and free play. As a result, the Commission anticipates that operators will be permitted to deduct amounts to the extent the operator pays zero gaming taxes for sports wagering.
2. Section 16(a)(5) is not clear as to whether "any federal tax" includes taxes from any jurisdiction or just federal taxes imposed from business in the State of Missouri. Further, by using the language contained in the present initiative petition ("*any* sums paid as a result of *any* federal tax"), the provision appears to permit a sports wagering operator to deduct its federal income tax, its federal employment tax, its federal excise tax, and any other federal tax when determining its adjusted gross receipts. If a sports wagering operator is permitted to make such deductions, the Commission anticipates that some operators may have no adjusted gross receipts on which to pay gaming tax. In other words, the Commission anticipates that by permitting such deductions, some operators will pay no gaming taxes on sports wagering.
3. Section 16(a)(7) appears as if it needs to be its own separate section independent from Sections 16(a)(1) through (6), as it does not define or identify deductions from gross revenue.
4. The Commission anticipates that the totality of the deductions identified in Sections 16(a)(1) through (6) will result in sports wagering licensees showing negative adjusted gross revenues and therefore paying no sports wagering tax. This would in turn impact the ability of the Commission to meet its reasonable expenses as well as limit or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri. Additionally, the carryover provisions in Section 16(a)(7) would further impact the ability of the Commission to meet its reasonable expenses and further impact or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri

MGC officials further indicated the projections in the spreadsheets and fiscal impact response are based on estimates from other jurisdictions and the impact of the taxes collected in other jurisdictions comparable to the proposed taxes and tax deductions in Missouri. The narrative, however, also noted that operators may pay little to no taxes if they are permitted to claim deductions that would be in excess of their adjusted gross revenue. Such deductions would potentially be permitted under the language of these petitions, particularly with respect to deductions for promotional or free play and deductions for any federal tax. An example of this is Kansas. In February 2023, Kansans wagered more than \$194 million in sports bets. The state, however, received \$1,134 in state tax revenue due to language permitting operators to deduct free play or promotional credits before assessing their state taxes. Some operators had not paid any state taxes through the first quarter of 2023 due to the deductions they were permitted to claim. The link to this information is at the end of the response.

The projected revenues in the response provided are based on what the MGC can estimate from a strictly numbers perspective. These numbers, however, are subject to a wide margin based on the uncertainty of operators' abilities to claim deductions consistent with the language in these petitions.

<https://wichitabeacon.org/stories/2023/06/14/loophole-in-kansas-sports-betting-law-helps-companies-avoid-tax/>

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and the State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate onetime costs of \$660,000, ongoing annual costs of at least \$5.2 million, and initial license fee revenue of \$12.75 million. Because the proposal allows for deductions against sports gaming revenues, they estimate unknown tax revenue ranging from \$0 to \$28.9 million annually. Local governments estimate unknown revenue.

JOHN R. ASHCROFT
SECRETARY OF STATE

October 4, 2023

The Honorable Scott Fitzpatrick
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 5 (2024-158)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 4, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

County: _____

INITIATIVE PETITION

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 5th day of November, 2024, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

[OFFICIAL BALLOT TITLE]

CIRCULATOR'S AFFIDAVIT

STATE OF MISSOURI, COUNTY OF _____ I, _____ being first duly sworn, say (print names of signers)

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than three mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license per distinct sports wagering operator brand. For purposes of Article III, Section 39(g) brand shall refer to the name, trade name, licensed trademark, or assumed business name of the sports wagering operator. If there are more than three qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant for licensure based on the applicant's ability to satisfy the following criteria:

(1) Expertise in the business of online sports wagering;

(2) Integrity, sustainability, and safety of the applicant's online sports wagering platform;

(3) Past relevant experience of the applicant;

(4) Advertising and promotional plans to increase and sustain revenue;

(5) Ability to generate, maximize, and sustain revenues for the state;

(6) Demonstrated commitment to and plans for the promotion of responsible gaming; and

(7) Capacity to increase the number of bettors on the applicant's online sports wagering platform.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control. In the application, the Commission shall require applicants to disclose the identity of all of the following:

a. The applicant's principal owners who directly own 10% or more of the applicant;

b. Each holding, intermediary, or parent company that directly owns 15% or more of the applicant; and

c. The applicant's board appointed chief executive officer and chief financial officer, or the equivalent individuals, as determined by the Commission.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. a. A license for sports wagering shall not be assignable or transferable without approval of the Commission. Such approval shall not be unreasonably withheld.

b. A license shall authorize a licensee to offer sports wagering under not more than one sports wagering operator brand, provided, however, that such licensee shall also be permitted, but not required, to use the brand of a professional team or excursion gambling boat pursuant to a partnership with such entity. Notwithstanding any other provision of law to the contrary and subject to approval by the Commission, a person or entity may hold and operate more than one license under distinct sports wagering operator brands, regardless of whether multiple brands are owned by the same parent entity.

c. Commercial agreements between an excursion gambling boat or a professional sports team and a sports wagering operator shall be submitted to the Commission as agreed to by the contracting parties. The Commission shall not prescribe any terms or conditions that are required to be included into such commercial agreements. A sports governing body or professional sports team may enter into commercial agreements with sports wagering operators or other entities in which such sports governing body or professional sports team may share in the amount wagered on sporting events of such sports governing body or professional sports team. A professional sports team may grant any such rights provided under this paragraph to its affiliate. Neither a sports governing body nor a professional sports team, nor such team's affiliate, is required to obtain a license or any other approval from the Commission to lawfully accept such amounts.

d. Each mobile licensee shall determine, set, and display applicable lines, point spreads, odds, or other information pertaining to online sports wagering.

e. Any submission to the Commission under this section, including all documents, reports, and data submitted therewith, that contain proprietary information, trade secrets, financial information, or personal information about any person or entity shall be treated in the same confidential manner as submissions by other licensees of the Commission and shall not be subject to disclosure pursuant to Chapter 610 RSMo.

8. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

9. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data on the terms and conditions set forth below from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States.

(1) A sports governing body may notify the Commission that it desires sports wagering operators to use official league data to settle tier two sports wagers on sporting events of such sports governing body. Such notification shall be made in the form and manner the Commission may require. The Commission shall notify each sports wagering operator of a sports governing body's notification within five days of the Commission's receipt of such notification. If a sports governing body does not notify the Commission of its desire to supply official league data, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers on sporting events of such sports governing body.

(2) Within 60 days of the Commission notifying each sports wagering operator of a sports governing body's notification to the Commission, or such longer period as may be agreed between the sports governing body and the applicable sports wagering operator, sports wagering operators shall use only official league data to determine the results of tier two sports wagers on sporting events of that sports governing body, unless:

(a) The sports governing body or its designee cannot provide a feed of official league data to determine the results of a particular type of tier two sports wager, in which case sports wagering operators may use any data source for determining the results of the applicable tier two sports wager until such time as such a data feed becomes available from the sports governing body on commercially reasonable terms and conditions;

(b) A sports wagering operator can demonstrate to the Commission that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms and conditions; or

(c) The sports governing body or its designee does not obtain the necessary supplier approvals to provide official league data to sports wagering operators to determine the results of tier two sports wagers, if and to the extent required by law.

(3) The following is a non-exclusive list of factors that the Commission may consider in evaluating official league data is being offered on commercially reasonable terms and conditions for the purposes of paragraphs (a) and (b) of subsection (2):

(a) The availability of a sports governing body's tier two official league data to a sports wagering operator from more than one authorized source;

(b) Market information, including, but not limited to, price and other terms and conditions, regarding the purchase by sports wagering operators of comparable data for the purpose of settling sports wagers in this state and other jurisdictions;

(c) The nature and quantity of data, including the quality and complexity of the process utilized for collecting such data; and

(d) The extent to which sports governing bodies or their designees have made data used to settle tier two bets or wagers available to operators and any terms and conditions relating to the use of that data.

(4) Notwithstanding anything set forth to the contrary herein, including without limitation subparagraph (3), during the pendency of the Commission's determination as to whether a sports governing body or its designee will provide a feed of official league data on commercially reasonable terms, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers. The Commission's determination shall be made within 120 days of the sports wagering operator notifying the Commission that it desires to demonstrate that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms.

b. Standards concerning a licensee's books and financial records relating to sports wagering, including auditing requirements, standards for the daily counting of a licensee's gross receipts from sports wagering, and standards to ensure that internal controls are followed;

c. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to, research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

d. Standards concerning the detection and prevention of compulsive gaming including, but not limited to, requirements to prominently display information regarding compulsive gaming on all online sports wagering platforms and promotions;

e. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

f. Standards for licensees and sports wagering operators to report to the Commission and the sports governing bodies information related to: abnormal betting activity or patterns that may indicate a concern with the integrity of a sporting event or events; suspicious or illegal betting activities if known to the applicable licensee or sports wagering operator; and any other conduct that corrupts a betting outcome of a sporting event or events for purposes of financial gain, including match fixing;

g. Standards for any sports governing body to submit to the Commission a written request to restrict, limit, or exclude a certain type, form, or category of sports betting with respect to a sporting event of that sports governing body, if the applicable sports governing body believes that such type, form, or category of sports wagering with respect to the sporting event of the sports governing body may undermine the integrity or perceived integrity of the applicable sports governing body or sporting events of the applicable sports governing body.

These standards shall also require the Commission to request comment from sports wagering operators on all requests made pursuant to this paragraph and after giving due consideration to all comments received, the Commission shall, upon a demonstration of good cause from the applicable sports governing body that such type, form, or category of sports betting is likely to undermine the integrity or perceived integrity of such body or sporting events of the applicable sports governing body, grant the request.

These standards shall require the Commission to respond to a request concerning a sporting event before the start of the event, or, if it is not feasible to respond before the start of the event, no later than 7 days after the request is made, and if the Commission determines that the applicable sports governing body is more likely than not to prevail in successfully demonstrating good cause for its request, the Commission may provisionally grant the request of the applicable sports governing body pending the Commission's final determination thereon. Unless the Commission provisionally grants the request, sports wagering operators may continue to offer sports betting and accept bets on the covered sporting event pending a final determination by the Commission;

h. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

i. Standards for the regulation of suppliers of sports wagering goods, services, software, or any other components necessary for the creation of sports wagering markets and determination of wager outcomes;

j. Standards for the implementation of responsible gaming programs, including using commercially reasonable efforts to verify that a person placing a bet on a sporting event is of the legal minimum age for placing such bet, displaying a hyperlink on its online sports wagering platform to responsible gaming information, allowing individuals to voluntarily exclude themselves from placing bets with the operator through a process established by the Commission, and allowing persons to place limits on their time, deposit, or bet limits in a daily, weekly, or monthly manner;

k. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed \$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court;

l. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license; and

m. Prohibiting all sports wagering activity, including sports wagering promotional and advertising activity, within a sports district, unless approved by the professional sports team that plays its home games within the district, except such rules shall not prohibit any licensee from offering sports wagering through an online sports wagering platform to persons physically located within a sports district.

10. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

11. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

12. All wagers authorized under this section must be initiated, made, or otherwise placed by a bettor while physically present within this state. The intermediate routing of electronic data related to lawful intrastate wagers authorized under this section shall not determine the location or locations in which the bet is initiated, transmitted, received, or otherwise made. Each online sports wagering operator shall use commercially reasonable geolocation and geofencing technology to ensure that it accepts bets only from customers who, at the time of placing the bet, are physically present in this state.

13. a. An individual wagering in this state shall establish an online sports wagering account with an online sports wagering operator:

(1) over the Internet;

(2) through an online sports wagering platform; or

(3) through other means approved by the Commission.

b. An individual wagering in this State shall not register more than one account with each online sports wagering platform. Mobile licensees shall use commercially reasonable means to ensure that each customer is limited to one account per platform.

c. Permissible methods of funding and withdrawal for accounts include, but are not limited to, credit cards, debit cards, gift cards, reloadable prepaid cards, free and promotional credit, automated clearing house transfers, online and mobile payment systems that support online money transfers, and wire transfers. The Commission may approve additional funding and withdrawal methods including, but not limited to, cash deposits at approved locations and secure cryptocurrencies.

14. a. A sports wagering operator shall use commercially and technologically reasonable means to ensure marketing and advertisements do not purposefully target individuals who have self-excluded from placing bets on sporting events.

b. A sports wagering operator shall employ commercially reasonable methods to ensure that advertisements for sports betting:

(1) do not purposefully target minors;

(2) are not false, misleading, or deceptive to a reasonable consumer; and

(3) clearly and conspicuously disclose the material terms of any promotional offer in the advertisement. Any promotion or advertisement must provide the consumer with the full and complete terms of a promotion by providing a website, or other location, in the promotional advertisement, that directs the viewer to where the full and complete promotional terms can be viewed. This may be satisfied by the promotional advertisement containing a hyperlink that takes the viewer directly to the full and complete offer and terms.

15. There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamblers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamblers.

16. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat," means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. "License," means any retail license or mobile license.

e. "Licensee," means the holder of any retail or mobile license.

f. "Mobile license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. "Online sports wagering platform," means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. "Professional sports team," means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women's National Basketball Association, or the National Women's Soccer League.

i. "Retail license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. "Sports district," means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. "Sports wagering," means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a "participant" for purposes of this section; and

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. "Sports wagering operator," means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. "Tier one sports wager," means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. "Tier two sports wager," means a sports wager that is not a tier one sports wager.

17. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

18. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-158)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article III. (Received October 4, 2023)

Date

October 24, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-158 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated they defer to the fiscal determination of the gaming commission.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(g) of the Missouri Constitution legalizing sports wagering in Missouri. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-158 proposing to amend Article III.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP 24-158 attempts to create a sports wagering program in the state of Missouri. It appears it wants the Missouri Gaming Commission (Commission) to regulate the sports betting.

Sections 39(g)2 – 39(g)5. requires that a retail license be offered to certain organizations to allow for sports betting. Only licensed organizations will be allowed to offer sports betting. It appears it would allow each of the current 13 excursion gambling boats and the 6 current professional sports teams in Missouri to apply for a sports betting retail license. For purposes of the fiscal note they will assume all these groups apply for the sports betting retail license. Section 39(g)6 allows the Commission to set the fee for the retail license up to \$250,000. For purposes of the fiscal note only, they will assume that the Commission sets the fee at the full amount allowed and therefore the retail licenses could potentially generate \$4,750,000 $[(13 \text{ boats} * \$250,000) + (6 \text{ teams} * \$250,000)]$ in the first year and the same in the fifth year due to renewal fees.

The Department of Revenue (Department) notes while the proposal appears to allow the Commission to set the retail license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the retail license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these retail license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)4.(c) allows the Commission to issue not more than 3 mobile license to certain organizations in the state. It allows the Commission to set the mobile license fee at up to \$500,000. The Department is unaware of the number of organizations that would apply for this mobile license and would defer to the Commission for an estimate of that number. However, the Department notes that while the proposal appears to allow the Commission to set the mobile license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the mobile license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these mobile license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)8 says that all fees prescribed by the Commission and collected by the state shall be appropriated as identified in the proposal. It should be noted that the Commission is not expressly authorized under this proposal to collect any of the fees described in this proposal nor is any other agency expressly authorized to collect the fees under these sections. This proposal requires the assessment of fees but does not require the fees remittance. Therefore, these sections will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Section 39(g)9 provides the Commission rule making authority, limited to certain delineated items. Collection of fees and/or the taxes outlined in the proposal is not one of

them. They are allowed to create rules on the use of the funds in the Compulsive Gaming Prevention Fund but not for its collection. Since no money is to be remitted by the sports betting retail or mobile licensees, it appears this authority may not be needed.

Section 39(g)10 appears to impose a 10% wagering tax on the adjusted gross revenue of the licensee. The Department defers to the Commission for an estimate of the tax that would be collected from the 10% sports betting tax.

This section requires collection of the 10% sports betting tax but does not require remittance of the tax to the Department, Commission or any other state agency. Without the identification of an agency to collect the tax, no tax can be collected. Therefore, it appears this section will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Should the Department be asked to collect the taxes generated under this proposal, it was not provided rulemaking authority in which to do it. In addition, the Department expects to have an administrative fiscal impact. Excursion gambling boats currently remit their gambling taxes they collect nightly. The Department would want to create a system similar to the existing gambling tax system. The Department estimates such a system would cost \$100,415 (\$95 per hour * 1,057 hours work). The Department would also need 1 Associate Customer Service Representative with an annual salary of \$36,628 to process payments and reports.

Section 39(g)15 creates the Compulsive Gaming Prevention Fund. This fund appears to duplicate the already existing Compulsive Gamblers Fund (0249) created in Section 313.842 RSMo.

The Department notes that the Sports districts definition may include more than intended. Section 16(j) explains that "sports district" includes any Missouri stadium with a capacity over 11,500 that operates as home for one or more "professional sports team". It also extends to the surrounding area within 400 yards of such premises. Section 16(h) which defines "professional sports team" includes both Major League Soccer (MLS) and National Women's Soccer League (NWSL). The Department notes that CITYPARK, which is home to the MLS team the St. Louis City SC is in downtown St. Louis. The 400 yard extension will potentially cover multiple streets with private retail and residential locations. Additionally, the planned KC Current Stadium, home to the NWSL team the Kansas City Current will also be located in close proximity to private locations. Built within the Berkley Riverfront Park, the stadium will also be next to a public park.

Summary:

Due to the wording in this IP, the Department of Revenue assumes this IP will not generate any revenue to the state.

Officials from the **Department of Public Safety - Office of the Director** indicated:

The Missouri State Highway Patrol anticipates the need for two (2) additional full-time employees (FTE) to conduct background investigations and the subsequent renewals for sports wagering vendors, along with four (4) additional FTE for enforcement activities. Expenses related to the six (6) FTE would be paid from the Gaming Fund (0286). One-time and ongoing expenses, shown below, would include salary, fringe, vehicles, gasoline, and related equipment. The Patrol's response below is applicable for each of the initiative petitions.

Salary:

Position Title: Sergeant (V07005)
Annual Salary: \$99,648
Total Cost for Salaries: \$597,888

Fringe:

Annual Cost per Position: \$85,637
Total Fringe Amount: \$513,822

Expense & Equipment:

Initial Costs: \$501,330
Ongoing Costs: \$130,956

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$1,613,040
Ongoing Costs: \$1,242,666

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-158 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for initiative petition 24-158.

Officials from the **Office of Administration** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-158 a proposed constitutional amendment to Article III, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-158 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-158 proposing to amend Article III.

Officials from **St. Louis County** indicated the initiative petition should have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated this will have a fiscal impact to their college. Unknown impact at this time due to revenues and expenses being unknown.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and cannot determine the effect on the college since no estimate of revenues has been made. Their response in no way assesses the merits of the petition on its face.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Home Dock Cities/Counties, "sports districts" located in St. Louis and Kansas City, as that term is defined in the proposal.

It may have an impact on local jurisdictions and businesses surrounding and in close proximity to the "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal.

The MGC anticipates licensees to pay license fees and renewal fees to the MGC in order to regulate and manage sports wagering in Missouri. It also imposes certain taxes be paid by licensees based on their adjusted gross revenue.

If this initiative petition passes, the Missouri Gaming Commission (MGC) estimates needing fifteen new FTE positions, which would result in an initial cost to the MGC of \$1,786,582.86 (including salary, fringe, supplies, equipment, and travel/lodging related to job performance of those additional employees), in addition to approximately \$2,182,431.33, which represents 7.7% of the MGC existing budget each year (to cover the costs of MGC and MSHP Gaming Division staff plus expenses needed to license and regulate sports wagering) for a total initial cost of \$3,969,014.17. Additional costs included

in this estimate may also encompass those associated with the development and implementation of responsible gambling programs. The total annual ongoing personnel cost, after the first year, is estimated to be \$3,910,738.87.

The MGC and the Missouri State Highway Patrol (MSHP) currently have a Memorandum of Understanding (MOU) in place which states that the MSHP will provide background and criminal and regulatory investigation and enforcement support to the MGC to assist it in carrying out its duties, which results in these additional costs.

The MGC estimates a total of 19 applicants for retail sports wagering licenses, to include the 13 current excursion gambling boats, plus 6 “sports districts” located in St. Louis and Kansas City areas, as that term is defined in the proposal. Initiative 24-158, Article III, Section 39(g).4 allows for the excursion gambling boat owners and the professional teams to apply for mobile licenses, in addition to three mobile licenses to untethered sports wagering operators, for a total of 15 mobile licenses.

Based on the number of sports wagering licenses, the MGC estimates collection of fees approximately \$12.25 million the first year and every fifth year of operation. Pursuant to Section 39(g).7 the fees would be utilized for reimbursement of expenses incurred by the MGC to regulate sports wagering. Any remaining fees will be deposited into the Compulsive Gambling Prevention Fund. Pursuant to Section 39(g).16 a wagering tax of 10% is imposed based on adjusted gross revenue. Annual revenues will be appropriated to elementary, secondary and higher education only after the annual tax revenues are used to reimburse expenses incurred by MGC and to fund the Compulsive Gambling Prevention Fund at the greater of 10% of annual tax revenues or \$5,000,000 to the Compulsive Gambling Fund.

In calculating tax revenue estimates, the Missouri Gaming Commission used the sports wagering data from a comparable state, Indiana, due to it having similar population, number of casinos, geographical proximity and other demographics as Missouri. Indiana’s total adjusted receipts from sports wagering, which includes both retail (in-person) and online, was \$84,969,839 for 2020, \$240,503,973 for 2021, and \$328,639,984 for 2022. Assuming that the total adjusted gross revenue for sports wagering in Missouri will be comparable to that of Indiana, the Gaming Commission estimates that total adjusted gross revenue for sports wagering in Missouri will be \$63,514,955 for the first year, \$179,776,720 for the second year, \$245,658,388 for the third year, and \$266,539,351 for the fourth year (fourth year estimate is based on 8.5% growth from the previous year per a study completed by Eilers & Krejcik). In determining the aforementioned estimates, a .25% deduction for excise tax and a 25% deduction for promotional wagering were made to Missouri’s total adjusted gross revenue from sports wagering due to the initiative’s definition of adjusted gross revenue including such deductions for sports wagering, whereas Indiana’s definition does not. In addition, the term of adjusted gross revenue includes deducting voided or cancelled wagers, uncollectible receivables, and actual costs for anything of value provided to the patron, but such deduction was not made in determining the aforementioned tax revenue estimates, because Indiana’s adjusted gross receipts already include a 2% deduction for such, which the Missouri Gaming Commission

estimates will be a similar amount in Missouri. Thus, using the total adjusted gross revenue for sports wagering in Missouri estimates, the Missouri Gaming Commission estimates that the revenue from the Gaming Tax (10% of Adjusted Gross Receipts) on sports wagering will be \$6,351,495.47 for the first year, \$17,977,671.98 for the second year, \$24,565,838.80 for the third year, \$26,653,935.10 for the fourth year, and \$28,919,519.62 for the fifth year. These estimates, however, are uncertain based on the inclusion of a deduction for “any federal tax” with no corresponding definition or explanation as to what that would include.

Based on the licensing and renewal fees for sports wagering applicants and the taxes on the adjusted gross revenue the total amount of fees and taxes collected may be sufficient to cover the Missouri Gaming Commission’s costs to license and regulate sports wagering, however, that is dependent on the total amount of deductions applied to the adjusted gross revenue

Technical Notes:

Section 4(c) – It is the understanding of the Missouri Gaming Commission (the “Commission”) that this section permits a certain number of mobile licenses that would be untethered from any casino or sports team location or district. Such allowance would potentially be in conflict with Article III, Section 39(e) of the Missouri Constitution, which permits gambling upon the Missouri or Mississippi Rivers only (or in artificial spaces that contain water and are within 1000 feet of the closest edge of the main channel).

Section 6(a) and 6(b) – These sections specify the fees for both (a) retail and (b) mobile licenses. Retail license applicants shall be required to pay a license fee of \$250,000 with a license renewal fee of \$250,000 every five (5) years. Mobile license applicants shall be required to pay a license fee of \$500,000 with a license renewal fee of \$500,000 every five (5) years. To the extent that other language in the petition proscribes allocation of the fees, there is concern that the licensing fees will not cover the expenses of the Missouri Gaming Commission (the “Commission”) during years in which licensing fees or renewals are not collected (i.e., years two, three, and four). These sections are also not clear as to where the license fees and renewal fees are to be deposited. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 8 – This section describes appropriation for the fees collected by the Commission. Section 8 requires that the fees first be used to reimburse the Commission for their reasonable expenses incurred to regulate sports wagering with the remaining fees being deposited into the Compulsive Gambling Prevention Fund. This section raises the question of where the fee monies are being deposited in the first instance if the language requires reimbursement to the Commission. Currently, fees for licensees are deposited with the Missouri Gaming Commission Fund and appropriated accordingly after the Commission’s reasonable expenses have been satisfied. The process by which the Commission is reimbursed is not clear in the current petition, nor is it clear in general how the funds will

be dispersed. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 9(k) – This section proscribes the maximum fine that the Commission could impose for violations of the laws and rules promulgated for sports wagering in the State. Historically, the Commission has had broad discretion to discipline operators for violations of statute and rules and would suggest that this continue.

Section 10 – This section requires that a 10% tax be imposed upon the adjusted gross revenue received from sports wagering by each licensee, to be appropriated for elementary, secondary, and higher education, and to be paid after appropriations for the Commission's reasonable expenses and contributions to the Compulsive Gambling Prevention Fund of the greater of 10% of annual tax revenues or \$5,000,000. In years where the Commission does not collect renewal fees, licensing fees will be insufficient to meet the Commission's reasonable expenses and would thus require the Commission to rely upon tax funds that would otherwise be appropriated to education in the state of Missouri. Section 10 also raises the question of whether an annual 10% or \$5,000,000 contribution to the Compulsive Gambling Prevention Fund is required regardless of the balance of the Fund.

Section 11 – This section requires that licensees maintain in the state, or other location approved by the Commission and consistent with federal law, a computer server or servers used to receive transmissions of requests to place wagers and that transmit acceptance of those requests. Under current federal law, the servers would only be intrastate. The Commission is also aware of a potential conflict between the petition and Article III, Section 39 regarding the location of the servers within the state.

Section 15 – Section 15 requires that there will be the Compulsive Gambling Prevention Fund created in the state treasury which shall consist of the taxes and fees collected pursuant to the petition. The section is not clear if the Compulsive Gambling Prevention Fund shall contain only the funds specifically directed to the Fund, or if the entirety of fees and taxes will be deposited into this fund in the first instance for later reimbursement and appropriation. This concern mirrors the notes related to Section 8. Further, a compulsive gambling fund was previously authorized under Section 313.842, RSMo. The language here is not clear as to whether the Fund contemplated in this section is a separately established fund, or if it adds to or changes the existing statute. Additionally, this Section invests in the Commission the oversight into use of the Fund for counseling, treatment programs, and grants for compulsive gambling prevention. This oversight would potentially be better accomplished by the Department of Mental Health with their qualifications in understanding Gambling Disorders under the Diagnostic and Statistical Manual (DSM) V.

Section 16(a) – This section states that the definition of adjusted gross revenue (as related to the wagering tax of 10% imposed in Section 10) is the total of all cash or cash equivalents received by a licensee from sports wagering minus (1) all cash and cash equivalents paid out as winnings to patrons, (2) the actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to

sports wagering patrons to incentivize sports wagering, (3) voided or cancelled wagers, (4) the costs of free play or promotional credits provided to and redeemed by the applicable licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month, (5) any sums paid as a result of any federal tax, including federal excise tax, and (6) uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons. Section 16(a) also states in (7) that if the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month and any negative receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

1. Section 16(a)(4) would allow an operator to deduct up to 25% of the gross costs of promotional credits and free play. As a result, the Commission anticipates that operators will be permitted to deduct amounts to the extent the operator pays zero gaming taxes for sports wagering.
2. Section 16(a)(5) is not clear as to whether "any federal tax" includes taxes from any jurisdiction or just federal taxes imposed from business in the State of Missouri. Further, by using the language contained in the present initiative petition ("*any* sums paid as a result of *any* federal tax"), the provision appears to permit a sports wagering operator to deduct its federal income tax, its federal employment tax, its federal excise tax, and any other federal tax when determining its adjusted gross receipts. If a sports wagering operator is permitted to make such deductions, the Commission anticipates that some operators may have no adjusted gross receipts on which to pay gaming tax. In other words, the Commission anticipates that by permitting such deductions, some operators will pay no gaming taxes on sports wagering.
3. Section 16(a)(7) appears as if it needs to be its own separate section independent from Sections 16(a)(1) through (6), as it does not define or identify deductions from gross revenue.
4. The Commission anticipates that the totality of the deductions identified in Sections 16(a)(1) through (6) will result in sports wagering licensees showing negative adjusted gross revenues and therefore paying no sports wagering tax. This would in turn impact the ability of the Commission to meet its reasonable expenses as well as limit or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri. Additionally, the carryover provisions in Section 16(a)(7) would further impact the ability of the Commission to meet its reasonable expenses and further impact or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri.

MGC officials further indicated the projections in the spreadsheets and fiscal impact response are based on estimates from other jurisdictions and the impact of the taxes collected in other jurisdictions comparable to the proposed taxes and tax deductions in Missouri. The narrative, however, also noted that operators may pay little to no taxes if they are permitted to claim deductions that would be in excess of their adjusted gross revenue. Such deductions would potentially be permitted under the language of these petitions, particularly with respect to deductions for promotional or free play and deductions for any federal tax. An example of this is Kansas. In February 2023, Kansans wagered more than \$194 million in sports bets. The state, however, received \$1,134 in state tax revenue due to language permitting operators to deduct free play or promotional credits before assessing their state taxes. Some operators had not paid any state taxes through the first quarter of 2023 due to the deductions they were permitted to claim. The link to this information is at the end of the response.

The projected revenues in the response provided are based on what the MGC can estimate from a strictly numbers perspective. These numbers, however, are subject to a wide margin based on the uncertainty of operators' abilities to claim deductions consistent with the language in these petitions.

<https://wichitabeacon.org/stories/2023/06/14/loophole-in-kansas-sports-betting-law-helps-companies-avoid-tax/>

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and the State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate onetime costs of \$660,000, ongoing annual costs of at least \$5.2 million, and initial license fee revenue of \$12.25 million. Because the proposal allows for deductions against sports gaming revenues, they estimate unknown tax revenue ranging from \$0 to \$28.9 million annually. Local governments estimate unknown revenue.

JOHN R. ASHCROFT
SECRETARY OF STATE
STATE OF MISSOURI

JAMES C. KIRKPATRICK
STATE INFORMATION CENTER

October 4, 2023

The Honorable Scott Fitzpatrick
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 4 (2024-157)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 4, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control. In the application, the Commission shall require applicants to disclose the identity of all of the following:

a. The applicant's principal owners who directly own 10% or more of the applicant;

b. Each holding, intermediary, or parent company that directly owns 15% or more of the applicant; and

c. The applicant's board appointed chief executive officer and chief financial officer, or the equivalent individuals, as determined by the Commission.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. a. A license for sports wagering shall not be assignable or transferable without approval of the Commission. Such approval shall not be unreasonably withheld.

b. A license shall authorize a licensee to offer sports wagering under not more than one sports wagering operator brand, provided, however, that such licensee shall also be permitted, but not required, to use the brand of a professional team or excursion gambling boat pursuant to a partnership with such entity. Notwithstanding any other provision of law to the contrary and subject to approval by the Commission, a person or entity may hold and operate more than one license under distinct sports wagering operator brands, regardless of whether multiple brands are owned by the same parent entity.

c. Commercial agreements between an excursion gambling boat or a professional sports team and a sports wagering operator shall be submitted to the Commission as agreed to by the contracting parties. The Commission shall not prescribe any terms or conditions that are required to be included into such commercial agreements. A sports governing body or professional sports team may enter into commercial agreements with sports wagering operators or other entities in which such sports governing body or professional sports team may share in the amount wagered on sporting events of such sports governing body or professional sports team. A professional sports team may grant any such rights provided under this paragraph to its affiliate. Neither a sports governing body nor a professional sports team, nor such team's affiliate, is required to obtain a license or any other approval from the Commission to lawfully accept such amounts.

d. Each mobile licensee shall determine, set, and display applicable lines, point spreads, odds, or other information pertaining to online sports wagering.

e. Any submission to the Commission under this section, including all documents, reports, and data submitted therewith, that contain proprietary information, trade secrets, financial information, or personal information about any person or entity shall be treated in the same confidential manner as submissions by other licensees of the Commission and shall not be subject to disclosure pursuant to Chapter 610 RSMo.

8. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

9. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data on the terms and conditions set forth below from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all

sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States.

(1) A sports governing body may notify the Commission that it desires sports wagering operators to use official league data to settle tier two sports wagers on sporting events of such sports governing body. Such notification shall be made in the form and manner the Commission may require. The Commission shall notify each sports wagering operator of a sports governing body's notification within five days of the Commission's receipt of such notification. If a sports governing body does not notify the Commission of its desire to supply official league data, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers on sporting events of such sports governing body.

(2) Within 60 days of the Commission notifying each sports wagering operator of a sports governing body's notification to the Commission, or such longer period as may be agreed between the sports governing body and the applicable sports wagering operator, sports wagering operators shall use only official league data to determine the results of tier two sports wagers on sporting events of that sports governing body, unless:

(a) The sports governing body or its designee cannot provide a feed of official league data to determine the results of a particular type of tier two sports wager, in which case sports wagering operators may use any data source for determining the results of the applicable tier two sports wager until such time as such a data feed becomes available from the sports governing body on commercially reasonable terms and conditions;

(b) A sports wagering operator can demonstrate to the Commission that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms and conditions; or

(c) The sports governing body or its designee does not obtain the necessary supplier approvals to provide official league data to sports wagering operators to determine the results of tier two sports wagers, if and to the extent required by law.

(3) The following is a non-exclusive list of factors that the Commission may consider in evaluating official league data is being offered on commercially reasonable terms and conditions for the purposes of paragraphs (a) and (b) of subsection (2):

(a) The availability of a sports governing body's tier two official league data to a sports wagering operator from more than one authorized source;

(b) Market information, including, but not limited to, price and other terms and conditions, regarding the purchase by sports wagering operators of comparable data for the purpose of settling sports wagers in this state and other jurisdictions;

(c) The nature and quantity of data, including the quality and complexity of the process utilized for collecting such data; and

(d) The extent to which sports governing bodies or their designees have made data used to settle tier two bets or wagers available to operators and any terms and conditions relating to the use of that data.

(4) Notwithstanding anything set forth to the contrary herein, including without limitation subparagraph (3), during the pendency of the Commission's determination as to whether a sports governing body or its designee will provide a feed of official league data on commercially reasonable terms, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers. The Commission's determination shall be made within 120 days of the sports wagering operator notifying the Commission that it desires to demonstrate that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms.

b. Standards concerning a licensee's books and financial records relating to sports wagering, including auditing requirements, standards for the daily counting of a licensee's gross receipts from sports wagering, and standards to ensure that internal controls are followed;

c. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to, research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

d. Standards concerning the detection and prevention of compulsive gaming including, but not limited to, requirements to prominently display information regarding compulsive gaming on all online sports wagering platforms and promotions;

e. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

f. Standards for licensees and sports wagering operators to report to the Commission and the sports governing bodies information related to: abnormal betting activity or patterns that may indicate a concern with the integrity of a sporting event or events; suspicious or illegal betting activities if known to the applicable licensee or sports wagering operator; and any other conduct that corrupts a betting outcome of a sporting event or events for purposes of financial gain, including match fixing;

g. Standards for any sports governing body to submit to the Commission a written request to restrict, limit, or exclude a certain type, form, or category of sports betting with respect to a sporting event of that sports governing body, if the applicable sports governing body believes that such type, form, or category of sports wagering with respect to the sporting event of the sports governing body may undermine the integrity or perceived integrity of the applicable sports governing body or sporting events of the applicable sports governing body.

These standards shall also require the Commission to request comment from sports wagering operators on all requests made pursuant to this paragraph and after giving due consideration to all comments received, the Commission shall, upon a demonstration of good cause from the applicable sports governing body that such type, form, or category of sports betting is likely to undermine the integrity or perceived integrity of such body or sporting events of the applicable sports governing body, grant the request.

These standards shall require the Commission to respond to a request concerning a sporting event before the start of the event, or, if it is not feasible to respond before the start of the event, no later than 7 days after the request is made, and if the Commission determines that the applicable sports governing body is more likely than not to prevail in successfully demonstrating good cause for its request, the Commission may provisionally grant the request of the applicable sports governing body pending the Commission's final determination thereon. Unless the Commission provisionally grants the request, sports wagering operators may continue to offer sports betting and accept bets on the covered sporting event pending a final determination by the Commission;

h. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

i. Standards for the regulation of suppliers of sports wagering goods, services, software, or any other components necessary for the creation of sports wagering markets and determination of wager outcomes;

j. Standards for the implementation of responsible gaming programs, including using commercially reasonable efforts to verify that a person placing a bet on a sporting event is of the legal minimum age for placing such bet, displaying a hyperlink on its online sports wagering platform to responsible gaming information, allowing individuals to voluntarily exclude themselves from placing bets with the operator through a process established by the Commission, and allowing persons to place limits on their time, deposit, or bet limits in a daily, weekly, or monthly manner;

k. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a

license or approval under this section or the rules subsequently adopted. Fines shall not exceed \$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court;

l. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license; and

m. Prohibiting all sports wagering activity, including sports wagering promotional and advertising activity, within a sports district, unless approved by the professional sports team that plays its home games within the district, except such rules shall not prohibit any licensee from offering sports wagering through an online sports wagering platform to persons physically located within a sports district.

10. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

11. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

12. All wagers authorized under this section must be initiated, made, or otherwise placed by a bettor while physically present within this state. The intermediate routing of electronic data related to lawful intrastate wagers authorized under this section shall not determine the location or locations in which the bet is initiated, transmitted, received, or otherwise made. Each online sports wagering operator shall use commercially reasonable geolocation and geofencing technology to ensure that it accepts bets only from customers who, at the time of placing the bet, are physically present in this state.

13. a. An individual wagering in this state shall establish an online sports wagering account with an online sports wagering operator:

(1) over the Internet;

(2) through an online sports wagering platform; or

(3) through other means approved by the Commission.

b. An individual wagering in this State shall not register more than one account with each online sports wagering platform. Mobile licensees shall use commercially reasonable means to ensure that each customer is limited to one account per platform.

c. Permissible methods of funding and withdrawal for accounts include, but are not limited to, credit cards, debit cards, gift cards, reloadable prepaid cards, free and promotional credit, automated clearing house transfers, online and mobile payment systems that support online money transfers, and wire transfers. The Commission may approve additional funding and withdrawal methods including, but not limited to, cash deposits at approved locations and secure cryptocurrencies.

14. a. A sports wagering operator shall use commercially and technologically reasonable means to ensure marketing and advertisements do not purposefully target individuals who have self-excluded from placing bets on sporting events.

b. A sports wagering operator shall employ commercially reasonable methods to ensure that advertisements for sports betting:

(1) do not purposefully target minors;

(2) are not false, misleading, or deceptive to a reasonable consumer; and

(3) clearly and conspicuously disclose the material terms of any promotional offer in the advertisement. Any promotion or advertisement must provide the consumer with the full and complete terms of a promotion by providing a website, or other location, in the promotional advertisement, that directs the viewer to where the full and complete promotional terms can be viewed. This may be satisfied by the promotional advertisement containing a hyperlink that takes the viewer directly to the full and complete offer and terms.

15. There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamers.

16. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee’s customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts

shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. “Commission,” means the Missouri Gaming Commission;

c. “Excursion gambling boat,” means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. “License,” means any retail license or mobile license.

e. “Licensee,” means the holder of any retail or mobile license.

f. “Mobile license,” means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. “Online sports wagering platform,” means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. “Professional sports team,” means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women’s National Basketball Association, or the National Women’s Soccer League.

i. “Retail license,” means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. “Sports district,” means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. “Sports wagering,” means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a “participant” for purposes of this section; and

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. “Sports wagering operator,” means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. “Tier one sports wager,” means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. “Tier two sports wager,” means a sports wager that is not a tier one sports wager.

17. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

18. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-157)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article III. (Received October 4, 2023)

Date

October 24, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-157 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated they defer to the fiscal determination of the gaming commission.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(g) of the Missouri Constitution legalizing sports wagering in Missouri. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-157 proposing to amend Article III.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP 24-157 attempts to create a sports wagering program in the state of Missouri. It appears it wants the Missouri Gaming Commission (Commission) to regulate the sports betting.

Sections 39(g)2 – 39(g)5. requires that a retail license be offered to certain organizations to allow for sports betting. Only licensed organizations will be allowed to offer sports betting. It appears it would allow each of the current 13 excursion gambling boats and the 6 current professional sports teams in Missouri to apply for a sports betting retail license. For purposes of the fiscal note they will assume all these groups apply for the sports betting retail license. Section 39(g)6 allows the Commission to set the fee for the retail license up to \$250,000. For purposes of the fiscal note only, they will assume that the Commission sets the fee at the full amount allowed and therefore the retail licenses could potentially generate \$4,750,000 $[(13 \text{ boats} * \$250,000) + (6 \text{ teams} * \$250,000)]$ in the first year and the same in the fifth year due to renewal fees.

The Department of Revenue (Department) notes while the proposal appears to allow the Commission to set the retail license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the retail license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these retail license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)4.(c) allows the Commission to issue not more than 1 mobile license to certain organizations in the state. It allows the Commission to set the mobile license fee at up to \$500,000. The Department is unaware of the number of organizations that would apply for this mobile license and would defer to the Commission for an estimate of that number. However, the Department notes that while the proposal appears to allow the Commission to set the mobile license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the mobile license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these mobile license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)8 says that all fees prescribed by the Commission and collected by the state shall be appropriated as identified in the proposal. It should be noted that the Commission is not expressly authorized under this proposal to collect any of the fees described in this proposal nor is any other agency expressly authorized to collect the fees under these sections. This proposal requires the assessment of fees but does not require the fees remittance. Therefore, these sections will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Section 39(g)9 provides the Commission rule making authority, limited to certain delineated items. Collection of fees and/or the taxes outlined in the proposal is not one of

them. They are allowed to create rules on the use of the funds in the Compulsive Gaming Prevention Fund but not for its collection. Since no money is to be remitted by the sports betting retail or mobile licensees, it appears this authority may not be needed.

Section 39(g)10 appears to impose a 10% wagering tax on the adjusted gross revenue of the licensee. The Department defers to the Commission for an estimate of the tax that would be collected from the 10% sports betting tax.

This section requires collection of the 10% sports betting tax but does not require remittance of the tax to the Department, Commission or any other state agency. Without the identification of an agency to collect the tax, no tax can be collected. Therefore, it appears this section will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Should the Department be asked to collect the taxes generated under this proposal, it was not provided rulemaking authority in which to do it. In addition, the Department expects to have an administrative fiscal impact. Excursion gambling boats currently remit their gambling taxes they collect nightly. The Department would want to create a system similar to the existing gambling tax system. The Department estimates such a system would cost \$100,415 (\$95 per hour * 1,057 hours work). The Department would also need 1 Associate Customer Service Representative with an annual salary of \$36,628 to process payments and reports.

Section 39(g)15 creates the Compulsive Gaming Prevention Fund. This fund appears to duplicate the already existing Compulsive Gamblers Fund (0249) created in Section 313.842 RSMo.

The Department notes that the Sports districts definition may include more than intended. Section 16(j) explains that "sports district" includes any Missouri stadium with a capacity over 11,500 that operates as home for one or more "professional sports team". It also extends to the surrounding area within 400 yards of such premises. Section 16(h) which defines "professional sports team" includes both Major League Soccer (MLS) and National Women's Soccer League (NWSL). The Department notes that CITYPARK, which is home to the MLS team the St. Louis City SC is in downtown St. Louis. The 400 yard extension will potentially cover multiple streets with private retail and residential locations. Additionally, the planned KC Current Stadium, home to the NWSL team the Kansas City Current will also be located in close proximity to private locations. Built within the Berkley Riverfront Park, the stadium will also be next to a public park.

Summary:

Due to the wording in this IP, the Department of Revenue assumes this IP will not generate any revenue to the state.

Officials from the **Department of Public Safety - Office of the Director** indicated:

The Missouri State Highway Patrol anticipates the need for two (2) additional full-time employees (FTE) to conduct background investigations and the subsequent renewals for sports wagering vendors, along with four (4) additional FTE for enforcement activities. Expenses related to the six (6) FTE would be paid from the Gaming Fund (0286). One-time and ongoing expenses, shown below, would include salary, fringe, vehicles, gasoline, and related equipment. The Patrol's response below is applicable for each of the initiative petitions.

Salary:

Position Title: Sergeant (V07005)
Annual Salary: \$99,648
Total Cost for Salaries: \$597,888

Fringe:

Annual Cost per Position: \$85,637
Total Fringe Amount: \$513,822

Expense & Equipment:

Initial Costs: \$501,330
Ongoing Costs: \$130,956

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$1,613,040
Ongoing Costs: \$1,242,666

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-157 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for initiative petition 24-157.

Officials from the **Office of Administration** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-157 a proposed constitutional amendment to Article III, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-157 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-157 proposing to amend Article III.

Officials from **St. Louis County** indicated the initiative petition should have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated this will have a fiscal impact to their college. Unknown impact at this time due to revenues and expenses being unknown.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and cannot determine the effect on the college since no estimate of revenues has been made. Their response in no way assesses the merits of the petition on its face.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Home Dock Cities/Counties, "sports districts" located in St. Louis and Kansas City, as that term is defined in the proposal.

It may have an impact on local jurisdictions and businesses surrounding and in close proximity to the "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal.

The MGC anticipates licensees to pay license fees and renewal fees to the MGC in order to regulate and manage sports wagering in Missouri. It also imposes certain taxes be paid by licensees based on their adjusted gross revenue.

If this initiative petition passes, the Missouri Gaming Commission (MGC) estimates needing fifteen new FTE positions, which would result in an initial cost to the MGC of \$1,786,582.86 (including salary, fringe, supplies, equipment, and travel/lodging related to job performance of those additional employees), in addition to approximately \$2,182,431.33, which represents 7.7% of the MGC existing budget each year (to cover the costs of MGC and MSHP Gaming Division staff plus expenses needed to license and regulate sports wagering) for a total initial cost of \$3,969,014.17. Additional costs included

in this estimate may also encompass those associated with the development and implementation of responsible gambling programs. The total annual ongoing personnel cost, after the first year, is estimated to be \$3,910,738.87.

The MGC and the Missouri State Highway Patrol (MSHP) currently have a Memorandum of Understanding (MOU) in place which states that the MSHP will provide background and criminal and regulatory investigation and enforcement support to the MGC to assist it in carrying out its duties, which results in these additional costs.

The MGC estimates a total of 19 applicants for retail sports wagering licenses, to include the 13 current excursion gambling boats, plus 6 “sports districts” located in St. Louis and Kansas City areas, as that term is defined in the proposal. Initiative 24-157, Article III, Section 39(g).4 allows for the excursion gambling boat owners and the professional teams to apply for mobile licenses for a total of 12 mobile licenses.

Based on the number of sports wagering licenses, the MGC estimates collection of fees approximately \$10.75 million the first year and every fifth year of operation. Pursuant to Section 39(g).7 the fees would be utilized for reimbursement of expenses incurred by the MGC to regulate sports wagering. Any remaining fees will be deposited into the Compulsive Gambling Prevention Fund. Pursuant to Section 39(g).16 a wagering tax of 10% is imposed based on adjusted gross revenue. Annual revenues will be appropriated to elementary, secondary and higher education only after the annual tax revenues are used to reimburse expenses incurred by MGC and to fund the Compulsive Gambling Prevention Fund at the greater of 10% of annual tax revenues or \$5,000,000 to the Compulsive Gambling Fund.

In calculating tax revenue estimates, the Missouri Gaming Commission used the sports wagering data from a comparable state, Indiana, due to it having similar population, number of casinos, geographical proximity and other demographics as Missouri. Indiana’s total adjusted receipts from sports wagering, which includes both retail (in-person) and online, was \$84,969,839 for 2020, \$240,503,973 for 2021, and \$328,639,984 for 2022. Assuming that the total adjusted gross revenue for sports wagering in Missouri will be comparable to that of Indiana, the Gaming Commission estimates that total adjusted gross revenue for sports wagering in Missouri will be \$63,514,955 for the first year, \$179,776,720 for the second year, \$245,658,388 for the third year, and \$266,539,351 for the fourth year (fourth year estimate is based on 8.5% growth from the previous year per a study completed by Eilers & Krejcik). In determining the aforementioned estimates, a .25% deduction for excise tax and a 25% deduction for promotional wagering were made to Missouri’s total adjusted gross revenue from sports wagering due to the initiative’s definition of adjusted gross revenue including such deductions for sports wagering, whereas Indiana’s definition does not. In addition, the term of adjusted gross revenue includes deducting voided or cancelled wagers, uncollectible receivables, and actual costs for anything of value provided to the patron, but such deduction was not made in determining the aforementioned tax revenue estimates, because Indiana’s adjusted gross receipts already include a 2% deduction for such, which the Missouri Gaming Commission estimates will be a similar amount in Missouri. Thus, using the total adjusted gross revenue for sports wagering in Missouri estimates, the Missouri

Gaming Commission estimates that the revenue from the Gaming Tax (10% of Adjusted Gross Receipts) on sports wagering will be \$6,351,495.47 for the first year, \$17,977,671.98 for the second year, \$24,565,838.80 for the third year, \$26,653,935.10 for the fourth year, and \$28,919,519.62 for the fifth year. These estimates, however, are uncertain based on the inclusion of a deduction for “any federal tax” with no corresponding definition or explanation as to what that would include.

Based on the licensing and renewal fees for sports wagering applicants and the taxes on the adjusted gross revenue the total amount of fees and taxes collected may be sufficient to cover the Missouri Gaming Commission’s costs to license and regulate sports wagering, however, that is dependent on the total amount of deductions applied to the adjusted gross revenue.

Technical Notes:

Section 6(a) and 6(b) – These sections specify the fees for both (a) retail and (b) mobile licenses. Retail license applicants shall be required to pay a license fee of \$250,000 with a license renewal fee of \$250,000 every five (5) years. Mobile license applicants shall be required to pay a license fee of \$500,000 with a license renewal fee of \$500,000 every five (5) years. To the extent that other language in the petition proscribes allocation of the fees, there is concern that the licensing fees will not cover the expenses of the Missouri Gaming Commission (the “Commission”) during years in which licensing fees or renewals are not collected (i.e., years two, three, and four). These sections are also not clear as to where the license fees and renewal fees are to be deposited. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 8 – This section describes appropriation for the fees collected by the Commission. Section 8 requires that the fees first be used to reimburse the Commission for their reasonable expenses incurred to regulate sports wagering with the remaining fees being deposited into the Compulsive Gambling Prevention Fund. This section raises the question of where the fee monies are being deposited in the first instance if the language requires reimbursement to the Commission. Currently, fees for licensees are deposited with the Missouri Gaming Commission Fund and appropriated accordingly after the Commission’s reasonable expenses have been satisfied. The process by which the Commission is reimbursed is not clear in the current petition, nor is it clear in general how the funds will be dispersed. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 9(k) – This section proscribes the maximum fine that the Commission could impose for violations of the laws and rules promulgated for sports wagering in the State. Historically, the Commission has had broad discretion to discipline operators for violations of statute and rules and would suggest that this continue.

Section 10 – This section requires that a 10% tax be imposed upon the adjusted gross revenue received from sports wagering by each licensee, to be appropriated for elementary, secondary, and higher education, and to be paid after appropriations for the Commission's reasonable expenses and contributions to the Compulsive Gambling Prevention Fund of the greater of 10% of annual tax revenues or \$5,000,000. In years where the Commission does not collect renewal fees, licensing fees will be insufficient to meet the Commission's reasonable expenses and would thus require the Commission to rely upon tax funds that would otherwise be appropriated to education in the state of Missouri. Section 10 also raises the question of whether an annual 10% or \$5,000,000 contribution to the Compulsive Gambling Prevention Fund is required regardless of the balance of the Fund.

Section 11 – This section requires that licensees maintain in the state, or other location approved by the Commission and consistent with federal law, a computer server or servers used to receive transmissions of requests to place wagers and that transmit acceptance of those requests. Under current federal law, the servers would only be intrastate. The Commission is also aware of a potential conflict between the petition and Article III, Section 39 regarding the location of the servers within the state.

Section 15 – Section 15 requires that there will be the Compulsive Gambling Prevention Fund created in the state treasury which shall consist of the taxes and fees collected pursuant to the petition. The section is not clear if the Compulsive Gambling Prevention Fund shall contain only the funds specifically directed to the Fund, or if the entirety of fees and taxes will be deposited into this fund in the first instance for later reimbursement and appropriation. This concern mirrors the notes related to Section 8. Further, a compulsive gambling fund was previously authorized under Section 313.842, RSMo. The language here is not clear as to whether the Fund contemplated in this section is a separately established fund, or if it adds to or changes the existing statute. Additionally, this Section invests in the Commission the oversight into use of the Fund for counseling, treatment programs, and grants for compulsive gambling prevention. This oversight would potentially be better accomplished by the Department of Mental Health with their qualifications in understanding Gambling Disorders under the Diagnostic and Statistical Manual (DSM) V.

Section 16(a) – This section states that the definition of adjusted gross revenue (as related to the wagering tax of 10% imposed in Section 10) is the total of all cash or cash equivalents received by a licensee from sports wagering minus (1) all cash and cash equivalents paid out as winnings to patrons, (2) the actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering, (3) voided or cancelled wagers, (4) the costs of free play or promotional credits provided to and redeemed by the applicable licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month, (5) any sums paid as a result of any federal tax, including federal excise tax, and (6) uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports

wagering patrons. Section 16(a) also states in (7) that if the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month and any negative receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

1. Section 16(a)(4) would allow an operator to deduct up to 25% of the gross costs of promotional credits and free play. As a result, the Commission anticipates that operators will be permitted to deduct amounts to the extent the operator pays zero gaming taxes for sports wagering.
2. Section 16(a)(5) is not clear as to whether “any federal tax” includes taxes from any jurisdiction or just federal taxes imposed from business in the State of Missouri. Further, by using the language contained in the present initiative petition (“*any* sums paid as a result of *any* federal tax”), the provision appears to permit a sports wagering operator to deduct its federal income tax, its federal employment tax, its federal excise tax, and any other federal tax when determining its adjusted gross receipts. If a sports wagering operator is permitted to make such deductions, the Commission anticipates that some operators may have no adjusted gross receipts on which to pay gaming tax. In other words, the Commission anticipates that by permitting such deductions, some operators will pay no gaming taxes on sports wagering.
3. Section 16(a)(7) appears as if it needs to be its own separate section independent from Sections 16(a)(1) through (6), as it does not define or identify deductions from gross revenue.
4. The Commission anticipates that the totality of the deductions identified in Sections 16(a)(1) through (6) will result in sports wagering licensees showing negative adjusted gross revenues and therefore paying no sports wagering tax. This would in turn impact the ability of the Commission to meet its reasonable expenses as well as limit or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri. Additionally, the carryover provisions in Section 16(a)(7) would further impact the ability of the Commission to meet its reasonable expenses and further impact or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri.

MGC officials further indicated the projections in the spreadsheets and fiscal impact response are based on estimates from other jurisdictions and the impact of the taxes collected in other jurisdictions comparable to the proposed taxes and tax deductions in Missouri. The narrative, however, also noted that operators may pay little to no taxes if they are permitted to claim deductions that would be in excess of their adjusted gross revenue. Such deductions would potentially be permitted under the language of these petitions, particularly with respect to deductions for promotional or free play and deductions for any federal tax. An example of this is Kansas. In February 2023, Kansans wagered more than \$194 million in sports bets. The state, however, received \$1,134 in state tax revenue due to language permitting operators to deduct free play or promotional credits before assessing their state taxes. Some operators had not paid any state taxes through the first quarter of 2023 due to the deductions they were permitted to claim. The link to this information is at the end of the response.

The projected revenues in the response provided are based on what the MGC can estimate from a strictly numbers perspective. These numbers, however, are subject to a wide margin based on the uncertainty of operators' abilities to claim deductions consistent with the language in these petitions.

<https://wichitabeacon.org/stories/2023/06/14/loophole-in-kansas-sports-betting-law-helps-companies-avoid-tax/>

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and the State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate onetime costs of \$660,000, ongoing annual costs of at least \$5.2 million, and initial license fee revenue of \$10.75 million. Because the proposal allows for deductions against sports gaming revenues, they estimate unknown tax revenue ranging from \$0 to \$28.9 million annually. Local governments estimate unknown revenue.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 3 (2024-156)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 4, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than four mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license per distinct sports wagering operator brand. For purposes of Article III, Section 39(g) brand shall refer to the name, trade name, licensed trademark, or assumed business name of the sports wagering operator. If there are more than four qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant for licensure based on the applicant's ability to satisfy the following criteria:

(1) Expertise in the business of online sports wagering;

(2) Integrity, sustainability, and safety of the applicant's online sports wagering platform;

(3) Past relevant experience of the applicant;

(4) Advertising and promotional plans to increase and sustain revenue;

(5) Ability to generate, maximize, and sustain revenues for the state;

(6) Demonstrated commitment to and plans for the promotion of responsible gaming; and

(7) Capacity to increase the number of bettors on the applicant's online sports wagering platform.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

8. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States;

b. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

c. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

d. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

e. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed

\$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court;

f. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license; and

g. Prohibiting all sports wagering activity, including sports wagering promotional and advertising activity, within a sports district, unless approved by the professional sports team that plays its home games within the district, except such rules shall not prohibit any licensee from offering sports wagering through an online sports wagering platform to persons physically located within a sports district.

9. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

10. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamers.

11. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers;

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers.

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat," means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. "License," means any retail license or mobile license.

e. "Licensee," means the holder of any retail or mobile license.

f. "Mobile license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. "Online sports wagering platform," means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. "Professional sports team," means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women's National Basketball Association, or the National Women's Soccer League.

i. "Retail license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. "Sports district," means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. "Sports wagering," means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a "participant" for purposes of this section;

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. "Sports wagering operator," means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. "Tier one sports wager," means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. "Tier two sports wager," means a sports wager that is not a tier one sports wager.

12. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

13. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-156)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article III. (Received October 4, 2023)

Date

October 24, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-156 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated they defer to the fiscal determination of the gaming commission.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(g) of the Missouri Constitution legalizing sports wagering in Missouri. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-156 proposing to amend Article III.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP 24-156 attempts to create a sports wagering program in the state of Missouri. It appears it wants the Missouri Gaming Commission (Commission) to regulate the sports betting.

Sections 39(g)2 – 39(g)5. requires that a retail license be offered to certain organizations to allow for sports betting. Only licensed organizations will be allowed to offer sports betting. It appears it would allow each of the current 13 excursion gambling boats and the 6 current professional sports teams in Missouri to apply for a sports betting retail license. For purposes of the fiscal note they will assume all these groups apply for the sports betting retail license. Section 39(g)6 allows the Commission to set the fee for the retail license up to \$250,000. For purposes of the fiscal note only, they will assume that the Commission sets the fee at the full amount allowed and therefore the retail licenses could potentially generate \$4,750,000 $[(13 \text{ boats} * \$250,000) + (6 \text{ teams} * \$250,000)]$ in the first year and the same in the fifth year due to renewal fees.

The Department of Revenue (Department) notes while the proposal appears to allow the Commission to set the retail license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the retail license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these retail license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)4.(c) allows the Commission to issue not more than 4 mobile license to certain organizations in the state. It allows the Commission to set the mobile license fee at up to \$500,000. The Department is unaware of the number of organizations that would apply for this mobile license and would defer to the Commission for an estimate of that number. However, the Department notes that while the proposal appears to allow the Commission to set the mobile license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the mobile license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these mobile license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)7 says that all fees prescribed by the Commission and collected by the state shall be appropriated as identified in the proposal. It should be noted that the Commission is not expressly authorized under this proposal to collect any of the fees described in this proposal nor is any other agency expressly authorized to collect the fees under these sections. This proposal requires the assessment of fees but does not require the fees remittance. Therefore, these sections will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Section 39(g)8 provides the Commission rule making authority, limited to certain delineated items. Collection of fees and/or the taxes outlined in the proposal is not one of

them. They are allowed to create rules on the use of the funds in the Compulsive Gaming Prevention Fund but not for its collection. Since no money is to be remitted by the sports betting retail or mobile licensees, it appears this authority may not be needed.

Section 39(g)9 appears to impose a 10% wagering tax on the adjusted gross revenue of the licensee. The Department defers to the Commission for an estimate of the tax that would be collected from the 10% sports betting tax.

This section requires collection of the 10% sports betting tax but does not require remittance of the tax to the Department, Commission or any other state agency. Without the identification of an agency to collect the tax, no tax can be collected. Therefore, it appears this section will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Should the Department be asked to collect the taxes generated under this proposal, it was not provided rulemaking authority in which to do it. In addition, the Department expects to have an administrative fiscal impact. Excursion gambling boats currently remit their gambling taxes they collect nightly. The Department would want to create a system similar to the existing gambling tax system. The Department estimates such a system would cost \$100,415 (\$95 per hour * 1,057 hours work). The Department would also need 1 Associate Customer Service Representative with an annual salary of \$36,628 to process payments and reports.

Section 39(g)10 creates the Compulsive Gaming Prevention Fund. This fund appears to duplicate the already existing Compulsive Gamblers Fund (0249) created in Section 313.842 RSMo.

The Department notes that the Sports districts definition may include more than intended. Section 11(j) explains that "sports district" includes any Missouri stadium with a capacity over 11,500 that operates as home for one or more "professional sports team". It also extends to the surrounding area within 400 yards of such premises. Section 11(h) which defines "professional sports team" includes both Major League Soccer (MLS) and National Women's Soccer League (NWSL). The Department notes that CITYPARK, which is home to the MLS team the St. Louis City SC is in downtown St. Louis. The 400 yard extension will potentially cover multiple streets with private retail and residential locations. Additionally, the planned KC Current Stadium, home to the NWSL team the Kansas City Current will also be located in close proximity to private locations. Built within the Berkley Riverfront Park, the stadium will also be next to a public park.

Summary:

Due to the wording in this IP, the Department of Revenue assumes this IP will not generate any revenue to the state.

Officials from the **Department of Public Safety - Office of the Director** indicated:

The Missouri State Highway Patrol anticipates the need for two (2) additional full-time employees (FTE) to conduct background investigations and the subsequent renewals for sports wagering vendors, along with four (4) additional FTE for enforcement activities. Expenses related to the six (6) FTE would be paid from the Gaming Fund (0286). One-time and ongoing expenses, shown below, would include salary, fringe, vehicles, gasoline, and related equipment. The Patrol's response below is applicable for each of the initiative petitions.

Salary:

Position Title: Sergeant (V07005)
Annual Salary: \$99,648
Total Cost for Salaries: \$597,888

Fringe:

Annual Cost per Position: \$85,637
Total Fringe Amount: \$513,822

Expense & Equipment:

Initial Costs: \$501,330
Ongoing Costs: \$130,956

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$1,613,040
Ongoing Costs: \$1,242,666

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-156 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for initiative petition 24-156.

Officials from the **Office of Administration** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-156 a proposed constitutional amendment to Article III, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-156 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-156 proposing to amend Article III.

Officials from **St. Louis County** indicated the initiative petition should have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated this will have a fiscal impact to their college. Unknown impact at this time due to revenues and expenses being unknown.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and cannot determine the effect on the college since no estimate of revenues has been made. Their response in no way assesses the merits of the petition on its face.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Home Dock Cities/Counties, "sports districts" located in St. Louis and Kansas City, as that term is defined in the proposal.

It may have an impact on local jurisdictions and businesses surrounding and in close proximity to the "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal.

The MGC anticipates licensees to pay license fees and renewal fees to the MGC in order to regulate and manage sports wagering in Missouri. It also imposes certain taxes be paid by licensees based on their adjusted gross revenue.

If this initiative petition passes, the Missouri Gaming Commission (MGC) estimates needing fifteen new FTE positions, which would result in an initial cost to the MGC of \$1,786,582.86 (including salary, fringe, supplies, equipment, and travel/lodging related to job performance of those additional employees), in addition to approximately \$2,182,431.33, which represents 7.7% of the MGC existing budget each year (to cover the costs of MGC and MSHP Gaming Division staff plus expenses needed to license and regulate sports wagering) for a total initial cost of \$3,969,014.17. Additional costs included

in this estimate may also encompass those associated with the development and implementation of responsible gambling programs. The total annual ongoing personnel cost, after the first year, is estimated to be \$3,910,738.87.

The MGC and the Missouri State Highway Patrol (MSHP) currently have a Memorandum of Understanding (MOU) in place which states that the MSHP will provide background and criminal and regulatory investigation and enforcement support to the MGC to assist it in carrying out its duties, which results in these additional costs.

The MGC estimates a total of 19 applicants for retail sports wagering licenses, to include the 13 current excursion gambling boats, plus 6 “sports districts” located in St. Louis and Kansas City areas, as that term is defined in the proposal. Initiative 24-156, Article III, Section 39(g).4 allows for the excursion gambling boat owners and the professional teams to apply for mobile licenses, in addition to four mobile licenses to untethered sports wagering operators, for a total of 16 mobile licenses.

Based on the number of sports wagering licenses, the MGC estimates collection of fees approximately \$12.75 million the first year and every fifth year of operation. Pursuant to Section 39(g).7 the fees would be utilized for reimbursement of expenses incurred by the MGC to regulate sports wagering. Any remaining fees will be deposited into the Compulsive Gambling Prevention Fund. Pursuant to Section 39(g).11 a wagering tax of 10% is imposed based on adjusted gross revenue. Annual revenues will be appropriated to elementary, secondary and higher education only after the annual tax revenues are used to reimburse expenses incurred by MGC and to fund the Compulsive Gambling Prevention Fund at the greater of 10% of annual tax revenues or \$5,000,000 to the Compulsive Gambling Fund.

In calculating tax revenue estimates, the Missouri Gaming Commission used the sports wagering data from a comparable state, Indiana, due to it having similar population, number of casinos, geographical proximity and other demographics as Missouri. Indiana’s total adjusted receipts from sports wagering, which includes both retail (in-person) and online, was \$84,969,839 for 2020, \$240,503,973 for 2021, and \$328,639,984 for 2022. Assuming that the total adjusted gross revenue for sports wagering in Missouri will be comparable to that of Indiana, the Gaming Commission estimates that total adjusted gross revenue for sports wagering in Missouri will be \$63,514,955 for the first year, \$179,776,720 for the second year, \$245,658,388 for the third year, and \$266,539,351 for the fourth year (fourth year estimate is based on 8.5% growth from the previous year per a study completed by Eilers & Krejcik). In determining the aforementioned estimates, a .25% deduction for excise tax and a 25% deduction for promotional wagering were made to Missouri’s total adjusted gross revenue from sports wagering due to the initiative’s definition of adjusted gross revenue including such deductions for sports wagering, whereas Indiana’s definition does not. In addition, the term of adjusted gross revenue includes deducting voided or cancelled wagers, uncollectible receivables, and actual costs for anything of value provided to the patron, but such deduction was not made in determining the aforementioned tax revenue estimates, because Indiana’s adjusted gross receipts already include a 2% deduction for such, which the Missouri Gaming Commission estimates will be a similar amount in Missouri. Thus, using

the total adjusted gross revenue for sports wagering in Missouri estimates, the Missouri Gaming Commission estimates that the revenue from the Gaming Tax (10% of Adjusted Gross Receipts) on sports wagering will be \$6,351,495.47 for the first year, \$17,977,671.98 for the second year, \$24,565,838.80 for the third year, \$26,653,935.10 for the fourth year, and \$28,919,519.62 for the fifth year. These estimates, however, are uncertain based on the inclusion of a deduction for “any federal tax” with no corresponding definition or explanation as to what that would include.

Based on the licensing and renewal fees for sports wagering applicants and the taxes on the adjusted gross revenue the total amount of fees and taxes collected may be sufficient to cover the Missouri Gaming Commission’s costs to license and regulate sports wagering, however, that is dependent on the total amount of deductions applied to the adjusted gross revenue.

Technical Notes:

Section 4(c) – It is the understanding of the Missouri Gaming Commission (the “Commission”) that this section permits a certain number of mobile licenses that would be untethered from any casino or sports team location or district. Such allowance would potentially be in conflict with Article III, Section 39(e) of the Missouri Constitution, which permits gambling upon the Missouri or Mississippi Rivers only (or in artificial spaces that contain water and are within 1000 feet of the closest edge of the main channel).

Section 6(a) and 6(b) – These sections specify the fees for both (a) retail and (b) mobile licenses. Retail license applicants shall be required to pay a license fee of \$250,000 with a license renewal fee of \$250,000 every five (5) years. Mobile license applicants shall be required to pay a license fee of \$500,000 with a license renewal fee of \$500,000 every five (5) years. To the extent that other language in the petition proscribes allocation of the fees, there is concern that the licensing fees will not cover the expenses of the Missouri Gaming Commission (the “Commission”) during years in which licensing fees or renewals are not collected (i.e., years two, three, and four). These sections are also not clear as to where the license fees and renewal fees are to be deposited. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 7 – This section describes appropriation for the fees collected by the Commission. Section 7 requires that the fees first be used to reimburse the Commission for their reasonable expenses incurred to regulate sports wagering with the remaining fees being deposited into the Compulsive Gambling Prevention Fund. This section raises the question of where the fee monies are being deposited in the first instance if the language requires reimbursement to the Commission. Currently, fees for licensees are deposited with the Missouri Gaming Commission Fund and appropriated accordingly after the Commission’s reasonable expenses have been satisfied. The process by which the Commission is reimbursed is not clear in the current petition, nor is it clear in general how the funds will be dispersed. The Commission suggests explicitly requiring fees to

be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 8(e) – This section proscribes the maximum fine that the Commission could impose for violations of the laws and rules promulgated for sports wagering in the State. Historically, the Commission has had broad discretion to discipline operators for violations of statute and rules and would suggest that this continue.

Section 9 – This section requires that a 10% tax be imposed upon the adjusted gross revenue received from sports wagering by each licensee, to be appropriated for elementary, secondary, and higher education, and to be paid after appropriations for the Commission's reasonable expenses and contributions the Compulsive Gambling Prevention Fund of the greater of 10% of annual tax revenues or \$5,000,000. In years where the Commission does not collect renewal fees, licensing fees will be insufficient to meet the Commission's reasonable expenses and would thus require the Commission to rely upon tax funds that would otherwise be appropriated to education in the state of Missouri. Section 9 also raises the question of whether an annual 10% or \$5,000,000 contribution to the Compulsive Gambling Prevention Fund is required regardless of the balance of the Fund.

Section 10 – This section requires that licensees maintain in the state, or other location approved by the Commission and consistent with federal law, a computer server or servers used to receive transmissions of requests to place wagers and that transmit acceptance of those requests. Under current federal law, the servers would only be intrastate. The Commission is also aware of a potential conflict between the petition and Article III, Section 39 regarding the location of the servers within the state.

Section 10 – This section is included under the language requiring the placement of servers to accept wagers and would likely be better included under its own section. As it stands, this portion of Section 10 requires that there will be the Compulsive Gambling Prevention Fund created in the state treasury which shall consist of the taxes and fees collected pursuant to the petition. The section is not clear if the Compulsive Gambling Prevention Fund shall contain only the funds specifically directed to the Fund, or if the entirety of fees and taxes will be deposited into this fund in the first instance for later reimbursement and appropriation. This concern mirrors the notes related to Section 7. Further, a compulsive gambling fund was previously authorized under Section 313.842, RSMo. The language here is not clear as to whether the Fund contemplated in this section is a separately established fund, or if it adds to or changes the existing statute. Additionally, this Section invests in the Commission the oversight into use of the Fund for counseling, treatment programs, and grants for compulsive gambling prevention. This oversight would potentially be better accomplished by the Department of Mental Health with their qualifications in understanding Gambling Disorders under the Diagnostic and Statistical Manual (DSM) V.

Section 11(a) – This section states that the definition of adjusted gross revenue (as related to the wagering tax of 10% imposed in Section 9) is the total of all cash or cash equivalents received by a licensee from sports wagering minus (1) all cash and cash equivalents paid out as winnings to patrons, (2) the actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering, (3) voided or cancelled wagers, (4) the costs of free

play or promotional credits provided to and redeemed by the applicable licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month, (5) any sums paid as a result of any federal tax, including federal excise tax, and (6) uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons. Section 11(a) also states in (7) that if the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month and any negative receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

1. Section 11(a)(4) would allow an operator to deduct up to 25% of the gross costs of promotional credits and free play. As a result, the Commission anticipates that operators will be permitted to deduct amounts to the extent the operator pays zero gaming taxes for sports wagering.
2. Section 11(a)(5) is not clear as to whether "any federal tax" includes taxes from any jurisdiction or just federal taxes imposed from business in the State of Missouri. Further, by using the language contained in the present initiative petition ("*any* sums paid as a result of *any* federal tax"), the provision appears to permit a sports wagering operator to deduct its federal income tax, its federal employment tax, its federal excise tax, and any other federal tax when determining its adjusted gross receipts. If a sports wagering operator is permitted to make such deductions, the Commission anticipates that some operators may have no adjusted gross receipts on which to pay gaming tax. In other words, the Commission anticipates that by permitting such deductions, some operators will pay no gaming taxes on sports wagering.
3. Section 11(a)(7) appears as if it needs to be its own separate section independent from Sections 11(a)(1) through (6), as it does not define or identify deductions from gross revenue.
4. The Commission anticipates that the totality of the deductions identified in Sections 11(a)(1) through (6) will result in sports wagering licensees showing negative adjusted gross revenues and therefore paying no sports wagering tax. This would in turn impact the ability of the Commission to meet its reasonable expenses as well as limit or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri. Additionally, the carryover provisions in Section 11(a)(7) would further impact the ability of the Commission to meet its reasonable expenses and further impact or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri.

MGC officials further indicated the projections in the spreadsheets and fiscal impact response are based on estimates from other jurisdictions and the impact of the taxes collected in other jurisdictions comparable to the proposed taxes and tax deductions in Missouri. The narrative, however, also noted that operators may pay little to no taxes if they are permitted to claim deductions that would be in excess of their adjusted gross revenue. Such deductions would potentially be permitted under the language of these petitions, particularly with respect to deductions for promotional or free play and deductions for any federal tax. An example of this is Kansas. In February 2023, Kansans wagered more than \$194 million in sports bets. The state, however, received \$1,134 in state tax revenue due to language permitting operators to deduct free play or promotional credits before assessing their state taxes. Some operators had not paid any state taxes through the first quarter of 2023 due to the deductions they were permitted to claim. The link to this information is at the end of the response.

The projected revenues in the response provided are based on what the MGC can estimate from a strictly numbers perspective. These numbers, however, are subject to a wide margin based on the uncertainty of operators' abilities to claim deductions consistent with the language in these petitions.

<https://wichitabeacon.org/stories/2023/06/14/loophole-in-kansas-sports-betting-law-helps-companies-avoid-tax/>

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and the State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate onetime costs of \$660,000, ongoing annual costs of at least \$5.2 million, and initial license fee revenue of \$12.75 million. Because the proposal allows for deductions against sports gaming revenues, they estimate unknown tax revenue ranging from \$0 to \$28.9 million annually. Local governments estimate unknown revenue.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-155)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article III. (Received October 4, 2023)

Date

October 24, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-155 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated they defer to the fiscal determination of the gaming commission.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(g) of the Missouri Constitution legalizing sports wagering in Missouri. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-155 proposing to amend Article III.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP 24-155 attempts to create a sports wagering program in the state of Missouri. It appears it wants the Missouri Gaming Commission (Commission) to regulate the sports betting.

Sections 39(g)2 – 39(g)5. requires that a retail license be offered to certain organizations to allow for sports betting. Only licensed organizations will be allowed to offer sports betting. It appears it would allow each of the current 13 excursion gambling boats and the 6 current professional sports teams in Missouri to apply for a sports betting retail license. For purposes of the fiscal note they will assume all these groups apply for the sports betting retail license. Section 39(g)6 allows the Commission to set the fee for the retail license up to \$250,000. For purposes of the fiscal note only, they will assume that the Commission sets the fee at the full amount allowed and therefore the retail licenses could potentially generate \$4,750,000 $[(13 \text{ boats} * \$250,000) + (6 \text{ teams} * \$250,000)]$ in the first year and the same in the fifth year due to renewal fees.

The Department of Revenue (Department) notes while the proposal appears to allow the Commission to set the retail license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the retail license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these retail license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)4.(c) allows the Commission to issue not more than 1 mobile license to certain organizations in the state. It allows the Commission to set the mobile license fee at up to \$500,000. The Department is unaware of the number of organizations that would apply for this mobile license and would defer to the Commission for an estimate of that number. However, the Department notes that while the proposal appears to allow the Commission to set the mobile license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the mobile license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these mobile license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)7 says that all fees prescribed by the Commission and collected by the state shall be appropriated as identified in the proposal. It should be noted that the Commission is not expressly authorized under this proposal to collect any of the fees described in this proposal nor is any other agency expressly authorized to collect the fees under these sections. This proposal requires the assessment of fees but does not require the fees remittance. Therefore, these sections will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Section 39(g)8 provides the Commission rule making authority, limited to certain delineated items. Collection of fees and/or the taxes outlined in the proposal is not one of

them. They are allowed to create rules on the use of the funds in the Compulsive Gaming Prevention Fund but not for its collection. Since no money is to be remitted by the sports betting retail or mobile licensees, it appears this authority may not be needed.

Section 39(g)9 appears to impose a 10% wagering tax on the adjusted gross revenue of the licensee. The Department defers to the Commission for an estimate of the tax that would be collected from the 10% sports betting tax.

This section requires collection of the 10% sports betting tax but does not require remittance of the tax to the Department, Commission or any other state agency. Without the identification of an agency to collect the tax, no tax can be collected. Therefore, it appears this section will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Should the Department be asked to collect the taxes generated under this proposal, it was not provided rulemaking authority in which to do it. In addition, the Department expects to have an administrative fiscal impact. Excursion gambling boats currently remit their gambling taxes they collect nightly. The Department would want to create a system similar to the existing gambling tax system. The Department estimates such a system would cost \$100,415 (\$95 per hour * 1,057 hours work). The Department would also need 1 Associate Customer Service Representative with an annual salary of \$36,628 to process payments and reports.

Section 39(g)10 creates the Compulsive Gaming Prevention Fund. This fund appears to duplicate the already existing Compulsive Gamblers Fund (0249) created in Section 313.842 RSMo.

The Department notes that the Sports districts definition may include more than intended. Section 11(j) explains that "sports district" includes any Missouri stadium with a capacity over 11,500 that operates as home for one or more "professional sports team". It also extends to the surrounding area within 400 yards of such premises. Section 11(h) which defines "professional sports team" includes both Major League Soccer (MLS) and National Women's Soccer League (NWSL). The Department notes that CITYPARK, which is home to the MLS team the St. Louis City SC is in downtown St. Louis. The 400 yard extension will potentially cover multiple streets with private retail and residential locations. Additionally, the planned KC Current Stadium, home to the NWSL team the Kansas City Current will also be located in close proximity to private locations. Built within the Berkley Riverfront Park, the stadium will also be next to a public park.

Summary:

Due to the wording in this IP, the Department of Revenue assumes this IP will not generate any revenue to the state.

Officials from the **Department of Public Safety - Office of the Director** indicated:

The Missouri State Highway Patrol anticipates the need for two (2) additional full-time employees (FTE) to conduct background investigations and the subsequent renewals for sports wagering vendors, along with four (4) additional FTE for enforcement activities. Expenses related to the six (6) FTE would be paid from the Gaming Fund (0286). One-time and ongoing expenses, shown below, would include salary, fringe, vehicles, gasoline, and related equipment. The Patrol's response below is applicable for each of the initiative petitions.

Salary:

Position Title: Sergeant (V07005)
Annual Salary: \$99,648
Total Cost for Salaries: \$597,888

Fringe:

Annual Cost per Position: \$85,637
Total Fringe Amount: \$513,822

Expense & Equipment:

Initial Costs: \$501,330
Ongoing Costs: \$130,956

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$1,613,040
Ongoing Costs: \$1,242,666

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-155 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for initiative petition 24-155.

Officials from the **Office of Administration** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-155 a proposed constitutional amendment to Article III, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-155 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-155 proposing to amend Article III.

Officials from **St. Louis County** indicated the initiative petition should have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated this will have a fiscal impact to their college. Unknown impact at this time due to revenues and expenses being unknown.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and cannot determine the effect on the college since no estimate of revenues has been made. Their response in no way assesses the merits of the petition on its face.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Home Dock Cities/Counties, "sports districts" located in St. Louis and Kansas City, as that term is defined in the proposal.

It may have an impact on local jurisdictions and businesses surrounding and in close proximity to the "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal.

The MGC anticipates licensees to pay license fees and renewal fees to the MGC in order to regulate and manage sports wagering in Missouri. It also imposes certain taxes be paid by licensees based on their adjusted gross revenue.

If this initiative petition passes, the Missouri Gaming Commission (MGC) estimates needing fifteen new FTE positions, which would result in an initial cost to the MGC of \$1,786,582.86 (including salary, fringe, supplies, equipment, and travel/lodging related to job performance of those additional employees), in addition to approximately \$2,182,431.33, which represents 7.7% of the MGC existing budget each year (to cover the costs of MGC and MSHP Gaming Division staff plus expenses needed to license and regulate sports wagering) for a total initial cost of \$3,969,014.17. Additional costs included

in this estimate may also encompass those associated with the development and implementation of responsible gambling programs. The total annual ongoing personnel cost, after the first year, is estimated to be \$3,910,738.87.

The MGC and the Missouri State Highway Patrol (MSHP) currently have a Memorandum of Understanding (MOU) in place which states that the MSHP will provide background and criminal and regulatory investigation and enforcement support to the MGC to assist it in carrying out its duties, which results in these additional costs.

The MGC estimates a total of 19 applicants for retail sports wagering licenses, to include the 13 current excursion gambling boats, plus 6 “sports districts” located in St. Louis and Kansas City areas, as that term is defined in the proposal. Initiative 24-155, Article III, Section 39(g).4 allows for the excursion gambling boat owners and the professional teams to apply for mobile licenses for a total of 12 mobile licenses.

Based on the number of sports wagering licenses, the MGC estimates collection of fees approximately \$10.75 million the first year and every fifth year of operation. Pursuant to Section 39(g).7 the fees would be utilized for reimbursement of expenses incurred by the MGC to regulate sports wagering. Any remaining fees will be deposited into the Compulsive Gambling Prevention Fund. Pursuant to Section 39(g).11 a wagering tax of 10% is imposed based on adjusted gross revenue. Annual revenues will be appropriated to elementary, secondary and higher education only after the annual tax revenues are used to reimburse expenses incurred by MGC and to fund the Compulsive Gambling Prevention Fund at the greater of 10% of annual tax revenues or \$5,000,000 to the Compulsive Gambling Fund.

In calculating tax revenue estimates, the Missouri Gaming Commission used the sports wagering data from a comparable state, Indiana, due to it having similar population, number of casinos, geographical proximity and other demographics as Missouri. Indiana’s total adjusted receipts from sports wagering, which includes both retail (in-person) and online, was \$84,969,839 for 2020, \$240,503,973 for 2021, and \$328,639,984 for 2022. Assuming that the total adjusted gross revenue for sports wagering in Missouri will be comparable to that of Indiana, the Gaming Commission estimates that total adjusted gross revenue for sports wagering in Missouri will be \$63,514,955 for the first year, \$179,776,720 for the second year, \$245,658,388 for the third year, and \$266,539,351 for the fourth year (fourth year estimate is based on 8.5% growth from the previous year per a study completed by Eilers & Krejcik). In determining the aforementioned estimates, a .25% deduction for excise tax and a 25% deduction for promotional wagering were made to Missouri’s total adjusted gross revenue from sports wagering due to the initiative’s definition of adjusted gross revenue including such deductions for sports wagering, whereas Indiana’s definition does not. In addition, the term of adjusted gross revenue includes deducting voided or cancelled wagers, uncollectible receivables, and actual costs for anything of value provided to the patron, but such deduction was not made in determining the aforementioned tax revenue estimates, because Indiana’s adjusted gross receipts already include a 2% deduction for such, which the Missouri Gaming Commission estimates will be a similar amount in Missouri. Thus, using the total adjusted gross revenue for sports wagering in Missouri estimates, the Missouri

Gaming Commission estimates that the revenue from the Gaming Tax (10% of Adjusted Gross Receipts) on sports wagering will be \$6,351,495.47 for the first year, \$17,977,671.98 for the second year, \$24,565,838.80 for the third year, \$26,653,935.10 for the fourth year, and \$28,919,519.62 for the fifth year. These estimates, however, are uncertain based on the inclusion of a deduction for “any federal tax” with no corresponding definition or explanation as to what that would include.

Based on the licensing and renewal fees for sports wagering applicants and the taxes on the adjusted gross revenue the total amount of fees and taxes collected may be sufficient to cover the Missouri Gaming Commission’s costs to license and regulate sports wagering, however, that is dependent on the total amount of deductions applied to the adjusted gross revenue.

Technical Notes:

Section 6(a) and 6(b) – These sections specify the fees for both (a) retail and (b) mobile licenses. Retail license applicants shall be required to pay a license fee of \$250,000 with a license renewal fee of \$250,000 every five (5) years. Mobile license applicants shall be required to pay a license fee of \$500,000 with a license renewal fee of \$500,000 every five (5) years. To the extent that other language in the petition proscribes allocation of the fees, there is concern that the licensing fees will not cover the expenses of the Missouri Gaming Commission (the “Commission”) during years in which licensing fees or renewals are not collected (i.e., years two, three, and four). These sections are also not clear as to where the license fees and renewal fees are to be deposited. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 7 – This section describes appropriation for the fees collected by the Commission. Section 7 requires that the fees first be used to reimburse the Commission for their reasonable expenses incurred to regulate sports wagering with the remaining fees being deposited into the Compulsive Gambling Prevention Fund. This section raises the question of where the fee monies are being deposited in the first instance if the language requires reimbursement to the Commission. Currently, fees for licensees are deposited with the Missouri Gaming Commission Fund and appropriated accordingly after the Commission’s reasonable expenses have been satisfied. The process by which the Commission is reimbursed is not clear in the current petition, nor is it clear in general how the funds will be dispersed. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 8(e) – This section proscribes the maximum fine that the Commission could impose for violations of the laws and rules promulgated for sports wagering in the State. Historically, the Commission has had broad discretion to discipline operators for violations of statute and rules and would suggest that this continue.

Section 9 – This section requires that a 10% tax be imposed upon the adjusted gross revenue received from sports wagering by each licensee, to be appropriated for elementary, secondary, and higher education, and to be paid after appropriations for the Commission's reasonable expenses and contributions to the Compulsive Gambling Prevention Fund of the greater of 10% of annual tax revenues or \$5,000,000. In years where the Commission does not collect renewal fees, licensing fees will be insufficient to meet the Commission's reasonable expenses and would thus require the Commission to rely upon tax funds that would otherwise be appropriated to education in the state of Missouri. Section 9 also raises the question of whether an annual 10% or \$5,000,000 contribution to the Compulsive Gambling Prevention Fund is required regardless of the balance of the Fund

Section 10 – This section requires that licensees maintain in the state, or other location approved by the Commission and consistent with federal law, a computer server or servers used to receive transmissions of requests to place wagers and that transmit acceptance of those requests. Under current federal law, the servers would only be intrastate. The Commission is also aware of a potential conflict between the petition and Article III, Section 39 regarding the location of the servers within the state.

Section 10 – This section is included under the language requiring the placement of servers to accept wagers and would likely be better included under its own section. As it stands, this portion of Section 10 requires that there will be the Compulsive Gambling Prevention Fund created in the state treasury which shall consist of the taxes and fees collected pursuant to the petition. The section is not clear if the Compulsive Gambling Prevention Fund shall contain only the funds specifically directed to the Fund, or if the entirety of fees and taxes will be deposited into this fund in the first instance for later reimbursement and appropriation. This concern mirrors the notes related to Section 7. Further, a compulsive gambling fund was previously authorized under Section 313.842, RSMo. The language here is not clear as to whether the Fund contemplated in this section is a separately established fund, or if it adds to or changes the existing statute. Additionally, this Section invests in the Commission the oversight into use of the Fund for counseling, treatment programs, and grants for compulsive gambling prevention. This oversight would potentially be better accomplished by the Department of Mental Health with their qualifications in understanding Gambling Disorders under the Diagnostic and Statistical Manual (DSM) V.

Section 11(a) – This section states that the definition of adjusted gross revenue (as related to the wagering tax of 10% imposed in Section 9) is the total of all cash or cash equivalents received by a licensee from sports wagering minus (1) all cash and cash equivalents paid out as winnings to patrons, (2) the actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering, (3) voided or cancelled wagers, (4) the costs of free play or promotional credits provided to and redeemed by the applicable licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month, (5) any sums paid as a result of any federal

tax, including federal excise tax, and (6) uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons. Section 11(a) also states in (7) that if the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month and any negative receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

1. Section 11(a)(4) would allow an operator to deduct up to 25% of the gross costs of promotional credits and free play. As a result, the Commission anticipates that operators will be permitted to deduct amounts to the extent the operator pays zero gaming taxes for sports wagering.
2. Section 11(a)(5) is not clear as to whether “any federal tax” includes taxes from any jurisdiction or just federal taxes imposed from business in the State of Missouri. Further, by using the language contained in the present initiative petition (“*any* sums paid as a result of *any* federal tax”), the provision appears to permit a sports wagering operator to deduct its federal income tax, its federal employment tax, its federal excise tax, and any other federal tax when determining its adjusted gross receipts. If a sports wagering operator is permitted to make such deductions, the Commission anticipates that some operators may have no adjusted gross receipts on which to pay gaming tax. In other words, the Commission anticipates that by permitting such deductions, some operators will pay no gaming taxes on sports wagering.
3. Section 11(a)(7) appears as if it needs to be its own separate section independent from Sections 11(a)(1) through (6), as it does not define or identify deductions from gross revenue.
4. The Commission anticipates that the totality of the deductions identified in Sections 11(a)(1) through (6) will result in sports wagering licensees showing negative adjusted gross revenues and therefore paying no sports wagering tax. This would in turn impact the ability of the Commission to meet its reasonable expenses as well as limit or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri. Additionally, the carryover provisions in Section 11(a)(7) would further impact the ability of the Commission to meet its reasonable expenses and further impact or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri.

MGC officials further indicated the projections in the spreadsheets and fiscal impact response are based on estimates from other jurisdictions and the impact of the taxes collected in other jurisdictions comparable to the proposed taxes and tax deductions in Missouri. The narrative, however, also noted that operators may pay little to no taxes if they are permitted to claim deductions that would be in excess of their adjusted gross revenue. Such deductions would potentially be permitted under the language of these petitions, particularly with respect to deductions for promotional or free play and deductions for any federal tax. An example of this is Kansas. In February 2023, Kansans wagered more than \$194 million in sports bets. The state, however, received \$1,134 in state tax revenue due to language permitting operators to deduct free play or promotional credits before assessing their state taxes. Some operators had not paid any state taxes through the first quarter of 2023 due to the deductions they were permitted to claim. The link to this information is at the end of the response.

The projected revenues in the response provided are based on what the MGC can estimate from a strictly numbers perspective. These numbers, however, are subject to a wide margin based on the uncertainty of operators' abilities to claim deductions consistent with the language in these petitions.

<https://wichitabeacon.org/stories/2023/06/14/loophole-in-kansas-sports-betting-law-helps-companies-avoid-tax/>

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and the State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate onetime costs of \$660,000, ongoing annual costs of at least \$5.2 million, and initial license fee revenue of \$10.75 million. Because the proposal allows for deductions against sports gaming revenues, they estimate unknown tax revenue ranging from \$0 to \$28.9 million annually. Local governments estimate unknown revenue.

The Honorable Scott Fitzpatrick
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 1 (2024-154)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 4, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than three mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license per distinct sports wagering operator brand. For purposes of Article III, Section 39(g) brand shall refer to the name, trade name, licensed trademark, or assumed business name of the sports wagering operator. If there are more than three qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant for licensure based on the applicant's ability to satisfy the following criteria:

(1) Expertise in the business of online sports wagering;

(2) Integrity, sustainability, and safety of the applicant's online sports wagering platform;

(3) Past relevant experience of the applicant;

(4) Advertising and promotional plans to increase and sustain revenue;

(5) Ability to generate, maximize, and sustain revenues for the state;

(6) Demonstrated commitment to and plans for the promotion of responsible gaming; and

(7) Capacity to increase the number of bettors on the applicant's online sports wagering platform.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

8. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States;

b. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

c. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

d. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

e. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed

\$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court;

f. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license; and

g. Prohibiting all sports wagering activity, including sports wagering promotional and advertising activity, within a sports district, unless approved by the professional sports team that plays its home games within the district, except such rules shall not prohibit any licensee from offering sports wagering through an online sports wagering platform to persons physically located within a sports district.

9. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

10. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamers.

11. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers;

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers.

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat," means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. "License," means any retail license or mobile license.

e. "Licensee," means the holder of any retail or mobile license.

f. "Mobile license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. "Online sports wagering platform," means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. "Professional sports team," means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women's National Basketball Association, or the National Women's Soccer League.

i. "Retail license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. "Sports district," means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. "Sports wagering," means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a "participant" for purposes of this section;

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. “Sports wagering operator,” means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. “Tier one sports wager,” means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. “Tier two sports wager,” means a sports wager that is not a tier one sports wager.

12. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

13. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-154)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article III. (Received October 4, 2023)

Date

October 24, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-154 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated they defer to the fiscal determination of the gaming commission.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(g) of the Missouri Constitution legalizing sports wagering in Missouri. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-154 proposing to amend Article III.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP 24-154 attempts to create a sports wagering program in the state of Missouri. It appears it wants the Missouri Gaming Commission (Commission) to regulate the sports betting.

Sections 39(g)2 – 39(g)5. requires that a retail license be offered to certain organizations to allow for sports betting. Only licensed organizations will be allowed to offer sports betting. It appears it would allow each of the current 13 excursion gambling boats and the 6 current professional sports teams in Missouri to apply for a sports betting retail license. For purposes of the fiscal note they will assume all these groups apply for the sports betting retail license. Section 39(g)6 allows the Commission to set the fee for the retail license up to \$250,000. For purposes of the fiscal note only, they will assume that the Commission sets the fee at the full amount allowed and therefore the retail licenses could potentially generate \$4,750,000 $[(13 \text{ boats} * \$250,000) + (6 \text{ teams} * \$250,000)]$ in the first year and the same in the fifth year due to renewal fees.

The Department of Revenue (Department) notes while the proposal appears to allow the Commission to set the retail license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the retail license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these retail license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)4.(c) allows the Commission to issue not more than 3 mobile license to certain organizations in the state. It allows the Commission to set the mobile license fee at up to \$500,000. The Department is unaware of the number of organizations that would apply for this mobile license and would defer to the Commission for an estimate of that number. However, the Department notes that while the proposal appears to allow the Commission to set the mobile license fee amount and to issue the licenses, it does not give the Commission the necessary authority to actually collect the mobile license fee or to deposit the fees into any state fund. The proposal also does not give collection authority or deposit authority to any other agency including the Department. Therefore it appears these mobile license fees will not generate any revenue to the state, the Commission, or to the Compulsive Gaming Prevention Fund.

Section 39(g)7 says that all fees prescribed by the Commission and collected by the state shall be appropriated as identified in the proposal. It should be noted that the Commission is not expressly authorized under this proposal to collect any of the fees described in this proposal nor is any other agency expressly authorized to collect the fees under these sections. This proposal requires the assessment of fees but does not require the fees remittance. Therefore, these sections will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Section 39(g)8 provides the Commission rule making authority, limited to certain delineated items. Collection of fees and/or the taxes outlined in the proposal is not one of

them. They are allowed to create rules on the use of the funds in the Compulsive Gaming Prevention Fund but not for its collection. Since no money is to be remitted by the sports betting retail or mobile licensees, it appears this authority may not be needed.

Section 39(g)9 appears to impose a 10% wagering tax on the adjusted gross revenue of the licensee. The Department defers to the Commission for an estimate of the tax that would be collected from the 10% sports betting tax.

This section requires collection of the 10% sports betting tax but does not require remittance of the tax to the Department, Commission or any other state agency. Without the identification of an agency to collect the tax, no tax can be collected. Therefore, it appears this section will not generate any revenue to the state, the Commission or to the Compulsive Gaming Prevention Fund.

Should the Department be asked to collect the taxes generated under this proposal, it was not provided rulemaking authority in which to do it. In addition, the Department expects to have an administrative fiscal impact. Excursion gambling boats currently remit their gambling taxes they collect nightly. The Department would want to create a system similar to the existing gambling tax system. The Department estimates such a system would cost \$100,415 (\$95 per hour * 1,057 hours work). The Department would also need 1 Associate Customer Service Representative with an annual salary of \$36,628 to process payments and reports.

Section 39(g)10 creates the Compulsive Gaming Prevention Fund. This fund appears to duplicate the already existing Compulsive Gamblers Fund (0249) created in Section 313.842 RSMo.

The Department notes that the Sports districts definition may include more than intended. Section 11(j) explains that "sports district" includes any Missouri stadium with a capacity over 11,500 that operates as home for one or more "professional sports team". It also extends to the surrounding area within 400 yards of such premises. Section 11(h) which defines "professional sports team" includes both Major League Soccer (MLS) and National Women's Soccer League (NWSL). The Department notes that CITYPARK, which is home to the MLS team the St. Louis City SC is in downtown St. Louis. The 400 yard extension will potentially cover multiple streets with private retail and residential locations. Additionally, the planned KC Current Stadium, home to the NWSL team the Kansas City Current will also be located in close proximity to private locations. Built within the Berkley Riverfront Park, the stadium will also be next to a public park.

Summary:

Due to the wording in this IP, the Department of Revenue assumes this IP will not generate any revenue to the state.

Officials from the **Department of Public Safety - Office of the Director** indicated:

The Missouri State Highway Patrol anticipates the need for two (2) additional full-time employees (FTE) to conduct background investigations and the subsequent renewals for sports wagering vendors, along with four (4) additional FTE for enforcement activities. Expenses related to the six (6) FTE would be paid from the Gaming Fund (0286). One-time and ongoing expenses, shown below, would include salary, fringe, vehicles, gasoline, and related equipment. The Patrol's response below is applicable for each of the initiative petitions.

Salary:

Position Title: Sergeant (V07005)
Annual Salary: \$99,648
Total Cost for Salaries: \$597,888

Fringe:

Annual Cost per Position: \$85,637
Total Fringe Amount: \$513,822

Expense & Equipment:

Initial Costs: \$501,330
Ongoing Costs: \$130,956

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$1,613,040
Ongoing Costs: \$1,242,666

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-154 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for initiative petition 24-154.

Officials from the **Office of Administration** indicated this proposal relating to gaming does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-154 a proposed constitutional amendment to Article III, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-154 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-154 proposing to amend Article III.

Officials from **St. Louis County** indicated the initiative petition should have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated this will have a fiscal impact to their college. Unknown impact at this time due to revenues and expenses being unknown.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and cannot determine the effect on the college since no estimate of revenues has been made. Their response in no way assesses the merits of the petition on its face.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Home Dock Cities/Counties, "sports districts" located in St. Louis and Kansas City, as that term is defined in the proposal.

It may have an impact on local jurisdictions and businesses surrounding and in close proximity to the "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal.

The MGC anticipates licensees to pay license fees and renewal fees to the MGC in order to regulate and manage sports wagering in Missouri. It also imposes certain taxes be paid by licensees based on their adjusted gross revenue.

If this initiative petition passes, the Missouri Gaming Commission (MGC) estimates needing fifteen new FTE positions, which would result in an initial cost to the MGC of \$1,786,582.86 (including salary, fringe, supplies, equipment, and travel/lodging related to job performance of those additional employees), in addition to approximately \$2,182,431.33, which represents 7.7% of the MGC existing budget each year (to cover the costs of MGC and MSHP Gaming Division staff plus expenses needed to license and regulate sports wagering) for a total initial cost of \$3,969,014.17. Additional costs included

in this estimate may also encompass those associated with the development and implementation of responsible gambling programs. The total annual ongoing personnel cost, after the first year, is estimated to be \$3,910,738.87.

The MGC and the Missouri State Highway Patrol (MSHP) currently have a Memorandum of Understanding (MOU) in place which states that the MSHP will provide background and criminal and regulatory investigation and enforcement support to the MGC to assist it in carrying out its duties, which results in these additional costs.

The MGC estimates a total of 19 applicants for retail sports wagering licenses, to include the 13 current excursion gambling boats, plus 6 “sports districts” located in St. Louis and Kansas City areas, as that term is defined in the proposal. Initiative 24-154, Article III, Section 39(g).4 allows for the excursion gambling boat owners and the professional teams to apply for mobile licenses, in addition to three mobile licenses to untethered sports wagering operators, for a total of 15 mobile licenses.

Based on the number of sports wagering licenses, the MGC estimates collection of fees approximately \$12.25 million the first year and every fifth year of operation. Pursuant to Section 39(g).7 the fees would be utilized for reimbursement of expenses incurred by the MGC to regulate sports wagering. Any remaining fees will be deposited into the Compulsive Gambling Prevention Fund. Pursuant to Section 39(g).11 a wagering tax of 10% is imposed based on adjusted gross revenue. Annual revenues will be appropriated to elementary, secondary and higher education only after the annual tax revenues are used to reimburse expenses incurred by MGC and to fund the Compulsive Gambling Prevention Fund at the greater of 10% of annual tax revenues or \$5,000,000 to the Compulsive Gambling Fund.

In calculating tax revenue estimates, the Missouri Gaming Commission used the sports wagering data from a comparable state, Indiana, due to it having similar population, number of casinos, geographical proximity and other demographics as Missouri. Indiana’s total adjusted receipts from sports wagering, which includes both retail (in-person) and online, was \$84,969,839 for 2020, \$240,503,973 for 2021, and \$328,639,984 for 2022. Assuming that the total adjusted gross revenue for sports wagering in Missouri will be comparable to that of Indiana, the Gaming Commission estimates that total adjusted gross revenue for sports wagering in Missouri will be \$63,514,955 for the first year, \$179,776,720 for the second year, \$245,658,388 for the third year, and \$266,539,351 for the fourth year (fourth year estimate is based on 8.5% growth from the previous year per a study completed by Eilers & Krejcik). In determining the aforementioned estimates, a .25% deduction for excise tax and a 25% deduction for promotional wagering were made to Missouri’s total adjusted gross revenue from sports wagering due to the initiative’s definition of adjusted gross revenue including such deductions for sports wagering, whereas Indiana’s definition does not. In addition, the term of adjusted gross revenue includes deducting voided or cancelled wagers, uncollectible receivables, and actual costs for anything of value provided to the patron, but such deduction was not made in determining the aforementioned tax revenue estimates, because Indiana’s adjusted gross receipts already include a 2% deduction for such, which the Missouri Gaming Commission

estimates will be a similar amount in Missouri. Thus, using the total adjusted gross revenue for sports wagering in Missouri estimates, the Missouri Gaming Commission estimates that the revenue from the Gaming Tax (10% of Adjusted Gross Receipts) on sports wagering will be \$6,351,495.47 for the first year, \$17,977,671.98 for the second year, \$24,565,838.80 for the third year, \$26,653,935.10 for the fourth year, and \$28,919,519.62 for the fifth year. These estimates, however, are uncertain based on the inclusion of a deduction for “any federal tax” with no corresponding definition or explanation as to what that would include.

Based on the licensing and renewal fees for sports wagering applicants and the taxes on the adjusted gross revenue the total amount of fees and taxes collected may be sufficient to cover the Missouri Gaming Commission’s costs to license and regulate sports wagering, however, that is dependent on the total amount of deductions applied to the adjusted gross revenue.

Technical Notes:

Section 4(c) – It is the understanding of the Missouri Gaming Commission (the “Commission”) that this section permits a certain number of mobile licenses that would be untethered from any casino or sports team location or district. Such allowance would potentially be in conflict with Article III, Section 39(e) of the Missouri Constitution, which permits gambling upon the Missouri or Mississippi Rivers only (or in artificial spaces that contain water and are within 1000 feet of the closest edge of the main channel).

Section 6(a) and 6(b) – These sections specify the fees for both (a) retail and (b) mobile licenses. Retail license applicants shall be required to pay a license fee of \$250,000 with a license renewal fee of \$250,000 every five (5) years. Mobile license applicants shall be required to pay a license fee of \$500,000 with a license renewal fee of \$500,000 every five (5) years. To the extent that other language in the petition proscribes allocation of the fees, there is concern that the licensing fees will not cover the expenses of the Missouri Gaming Commission (the “Commission”) during years in which licensing fees or renewals are not collected (i.e., years two, three, and four). These sections are also not clear as to where the license fees and renewal fees are to be deposited. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 7 – This section describes appropriation for the fees collected by the Commission. Section 7 requires that the fees first be used to reimburse the Commission for their reasonable expenses incurred to regulate sports wagering with the remaining fees being deposited into the Compulsive Gambling Prevention Fund. This section raises the question of where the fee monies are being deposited in the first instance if the language requires reimbursement to the Commission. Currently, fees for licensees are deposited with the Missouri Gaming Commission Fund and appropriated accordingly after the Commission’s reasonable expenses have been satisfied. The process by which the Commission is reimbursed is not clear in the current petition, nor is it clear in general how the funds will

be dispersed. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 8(e) – This section proscribes the maximum fine that the Commission could impose for violations of the laws and rules promulgated for sports wagering in the State. Historically, the Commission has had broad discretion to discipline operators for violations of statute and rules and would suggest that this continue.

Section 9 – This section requires that a 10% tax be imposed upon the adjusted gross revenue received from sports wagering by each licensee, to be appropriated for elementary, secondary, and higher education, and to be paid after appropriations for the Commission's reasonable expenses and contributions the Compulsive Gambling Prevention Fund of the greater of 10% of annual tax revenues or \$5,000,000. In years where the Commission does not collect renewal fees, licensing fees will be insufficient to meet the Commission's reasonable expenses and would thus require the Commission to rely upon tax funds that would otherwise be appropriated to education in the state of Missouri. Section 9 also raises the question of whether an annual 10% or \$5,000,000 contribution to the Compulsive Gambling Prevention Fund is required regardless of the balance of the Fund.

Section 10 – This section requires that licensees maintain in the state, or other location approved by the Commission and consistent with federal law, a computer server or servers used to receive transmissions of requests to place wagers and that transmit acceptance of those requests. Under current federal law, the servers would only be intrastate. The Commission is also aware of a potential conflict between the petition and Article III, Section 39 regarding the location of the servers within the state.

Section 10 – This section is included under the language requiring the placement of servers to accept wagers and would likely be better included under its own section. As it stands, this portion of Section 10 requires that there will be the Compulsive Gambling Prevention Fund created in the state treasury which shall consist of the taxes and fees collected pursuant to the petition. The section is not clear if the Compulsive Gambling Prevention Fund shall contain only the funds specifically directed to the Fund, or if the entirety of fees and taxes will be deposited into this fund in the first instance for later reimbursement and appropriation. This concern mirrors the notes related to Section 7. Further, a compulsive gambling fund was previously authorized under Section 313.842, RSMo. The language here is not clear as to whether the Fund contemplated in this section is a separately established fund, or if it adds to or changes the existing statute. Additionally, this Section invests in the Commission the oversight into use of the Fund for counseling, treatment programs, and grants for compulsive gambling prevention. This oversight would potentially be better accomplished by the Department of Mental Health with their qualifications in understanding Gambling Disorders under the Diagnostic and Statistical Manual (DSM) V.

Section 11(a) – This section states that the definition of adjusted gross revenue (as related to the wagering tax of 10% imposed in Section 9) is the total of all cash or cash equivalents received by a licensee from sports wagering minus (1) all cash and cash equivalents paid

out as winnings to patrons, (2) the actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering, (3) voided or cancelled wagers, (4) the costs of free play or promotional credits provided to and redeemed by the applicable licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month, (5) any sums paid as a result of any federal tax, including federal excise tax, and (6) uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons. Section 11(a) also states in (7) that if the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month and any negative receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

1. Section 11(a)(4) would allow an operator to deduct up to 25% of the gross costs of promotional credits and free play. As a result, the Commission anticipates that operators will be permitted to deduct amounts to the extent the operator pays zero gaming taxes for sports wagering.
2. Section 11(a)(5) is not clear as to whether "any federal tax" includes taxes from any jurisdiction or just federal taxes imposed from business in the State of Missouri. Further, by using the language contained in the present initiative petition ("*any* sums paid as a result of *any* federal tax"), the provision appears to permit a sports wagering operator to deduct its federal income tax, its federal employment tax, its federal excise tax, and any other federal tax when determining its adjusted gross receipts. If a sports wagering operator is permitted to make such deductions, the Commission anticipates that some operators may have no adjusted gross receipts on which to pay gaming tax. In other words, the Commission anticipates that by permitting such deductions, some operators will pay no gaming taxes on sports wagering.
3. Section 11(a)(7) appears as if it needs to be its own separate section independent from Sections 11(a)(1) through (6), as it does not define or identify deductions from gross revenue.
4. The Commission anticipates that the totality of the deductions identified in Sections 11(a)(1) through (6) will result in sports wagering licensees showing negative adjusted gross revenues and therefore paying no sports wagering tax. This would in turn impact the ability of the Commission to meet its reasonable expenses as well as limit or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri. Additionally, the carryover provisions in Section 11(a)(7) would further impact the ability of the Commission to meet its reasonable expenses and further impact or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri.

MGC officials further indicated the projections in the spreadsheets and fiscal impact response are based on estimates from other jurisdictions and the impact of the taxes collected in other jurisdictions comparable to the proposed taxes and tax deductions in Missouri. The narrative, however, also noted that operators may pay little to no taxes if they are permitted to claim deductions that would be in excess of their adjusted gross revenue. Such deductions would potentially be permitted under the language of these petitions, particularly with respect to deductions for promotional or free play and deductions for any federal tax. An example of this is Kansas. In February 2023, Kansans wagered more than \$194 million in sports bets. The state, however, received \$1,134 in state tax revenue due to language permitting operators to deduct free play or promotional credits before assessing their state taxes. Some operators had not paid any state taxes through the first quarter of 2023 due to the deductions they were permitted to claim. The link to this information is at the end of the response.

The projected revenues in the response provided are based on what the MGC can estimate from a strictly numbers perspective. These numbers, however, are subject to a wide margin based on the uncertainty of operators' abilities to claim deductions consistent with the language in these petitions.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and the State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate onetime costs of \$660,000, ongoing annual costs of at least \$5.2 million, and initial license fee revenue of \$12.25 million. Because the proposal allows for deductions against sports gaming revenues, they estimate unknown tax revenue ranging from \$0 to \$28.9 million annually. Local governments estimate unknown revenue.

Jefferson City, MO 65101

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 8 (2024-153)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 3, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than two mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license per distinct sports wagering operator brand. For purposes of Article III, Section 39(g) brand shall refer to the name, trade name, licensed trademark, or assumed business name of the sports wagering operator. If there are more than two qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant for licensure based on the applicant's ability to satisfy the following criteria:

(1) Expertise in the business of online sports wagering;

(2) Integrity, sustainability, and safety of the applicant's online sports wagering platform;

(3) Past relevant experience of the applicant;

(4) Advertising and promotional plans to increase and sustain revenue;

(5) Ability to generate, maximize, and sustain revenues for the state;

(6) Demonstrated commitment to and plans for the promotion of responsible gaming; and

(7) Capacity to increase the number of bettors on the applicant's online sports wagering platform.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control. In the application, the Commission shall require applicants to disclose the identity of all of the following:

a. The applicant's principal owners who directly own 10% or more of the applicant;

b. Each holding, intermediary, or parent company that directly owns 15% or more of the applicant; and

c. The applicant's board appointed chief executive officer and chief financial officer, or the equivalent individuals, as determined by the Commission.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. a. A license for sports wagering shall not be assignable or transferable without approval of the Commission. Such approval shall not be unreasonably withheld.

b. A license shall authorize a licensee to offer sports wagering under not more than one sports wagering operator brand, provided, however, that such licensee shall also be permitted, but not required, to use the brand of a professional team or excursion gambling boat pursuant to a partnership with such entity. Notwithstanding any other provision of law to the contrary and subject to approval by the Commission, a person or entity may hold and operate more than one license under distinct sports wagering operator brands, regardless of whether multiple brands are owned by the same parent entity.

c. Commercial agreements between an excursion gambling boat or a professional sports team and a sports wagering operator shall be submitted to the Commission as agreed to by the contracting parties. The Commission shall not prescribe any terms or conditions that are required to be included into such commercial agreements. A sports governing body or professional sports team may enter into commercial agreements with sports wagering operators or other entities in which such sports governing body or professional sports team may share in the amount wagered on sporting events of such sports governing body or professional sports team. A professional sports team may grant any such rights provided under this paragraph to its affiliate. Neither a sports governing body nor a professional sports team, nor such team's affiliate, is required to obtain a license or any other approval from the Commission to lawfully accept such amounts.

d. Each mobile licensee shall determine, set, and display applicable lines, point spreads, odds, or other information pertaining to online sports wagering.

e. Any submission to the Commission under this section, including all documents, reports, and data submitted therewith, that contain proprietary information, trade secrets, financial information, or personal information about any person or entity shall be treated in the same confidential manner as submissions by other licensees of the Commission and shall not be subject to disclosure pursuant to Chapter 610 RSMo.

8. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

9. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data on the terms and conditions set forth below from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States.

(1) A sports governing body may notify the Commission that it desires sports wagering operators to use official league data to settle tier two sports wagers on sporting events of such sports governing body. Such notification shall be made in the form and manner the Commission may require. The Commission shall notify each sports wagering operator of a sports governing body's notification within five days of the Commission's receipt of such notification. If a sports governing body does not notify the Commission of its desire to supply official league data, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers on sporting events of such sports governing body.

(2) Within 60 days of the Commission notifying each sports wagering operator of a sports governing body's notification to the Commission, or such longer period as may be agreed between the sports governing body and the applicable sports wagering operator, sports wagering operators shall use only official league data to determine the results of tier two sports wagers on sporting events of that sports governing body, unless:

(a) The sports governing body or its designee cannot provide a feed of official league data to determine the results of a particular type of tier two sports wager, in which case sports wagering operators may use any data source for determining the results of the applicable tier two sports wager until such time as such a data feed becomes available from the sports governing body on commercially reasonable terms and conditions;

(b) A sports wagering operator can demonstrate to the Commission that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms and conditions; or

(c) The sports governing body or its designee does not obtain the necessary supplier approvals to provide official league data to sports wagering operators to determine the results of tier two sports wagers, if and to the extent required by law.

(3) The following is a non-exclusive list of factors that the Commission may consider in evaluating official league data is being offered on commercially reasonable terms and conditions for the purposes of paragraphs (a) and (b) of subsection (2):

(a) The availability of a sports governing body's tier two official league data to a sports wagering operator from more than one authorized source;

(b) Market information, including, but not limited to, price and other terms and conditions, regarding the purchase by sports wagering operators of comparable data for the purpose of settling sports wagers in this state and other jurisdictions;

(c) The nature and quantity of data, including the quality and complexity of the process utilized for collecting such data; and

(d) The extent to which sports governing bodies or their designees have made data used to settle tier two bets or wagers available to operators and any terms and conditions relating to the use of that data.

(4) Notwithstanding anything set forth to the contrary herein, including without limitation subparagraph (3), during the pendency of the Commission's determination as to whether a sports governing body or its designee will provide a feed of official league data on commercially reasonable terms, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers. The Commission's determination shall be made within 120 days of the sports wagering operator notifying the Commission that it desires to demonstrate that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms.

b. Standards concerning a licensee's books and financial records relating to sports wagering, including auditing requirements, standards for the daily counting of a licensee's gross receipts from sports wagering, and standards to ensure that internal controls are followed;

c. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to, research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

d. Standards concerning the detection and prevention of compulsive gaming including, but not limited to, requirements to prominently display information regarding compulsive gaming on all online sports wagering platforms and promotions;

e. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

f. Standards for licensees and sports wagering operators to report to the Commission and the sports governing bodies information related to: abnormal betting activity or patterns that may indicate a concern with the integrity of a sporting event or events; suspicious or illegal betting activities if known to the applicable licensee or sports wagering operator; and any other conduct that corrupts a betting outcome of a sporting event or events for purposes of financial gain, including match fixing;

g. Standards for any sports governing body to submit to the Commission a written request to restrict, limit, or exclude a certain type, form, or category of sports betting with respect to a sporting event of that sports governing body, if the applicable sports governing body believes that such type, form, or category of sports wagering with respect to the sporting event of the sports governing body may undermine the integrity or perceived integrity of the applicable sports governing body or sporting events of the applicable sports governing body.

These standards shall also require the Commission to request comment from sports wagering operators on all requests made pursuant to this paragraph and after giving due consideration to all comments received, the Commission shall, upon a demonstration of good cause from the applicable sports governing body that such type, form, or category of sports betting is likely to undermine the integrity or perceived integrity of such body or sporting events of the applicable sports governing body, grant the request.

These standards shall require the Commission to respond to a request concerning a sporting event before the start of the event, or, if it is not feasible to respond before the start of the event, no later than 7 days after the request is made, and if the Commission determines that the applicable sports governing body is more likely than not to prevail in successfully demonstrating good cause for its request, the Commission may provisionally grant the request of the applicable sports governing body pending the Commission's final determination thereon. Unless the Commission provisionally grants the request, sports wagering operators may continue to offer sports betting and accept bets on the covered sporting event pending a final determination by the Commission;

h. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

i. Standards for the regulation of suppliers of sports wagering goods, services, software, or any other components necessary for the creation of sports wagering markets and determination of wager outcomes;

j. Standards for the implementation of responsible gaming programs, including using commercially reasonable efforts to verify that a person placing a bet on a sporting event is of the legal minimum age for placing such bet, displaying a hyperlink on its online sports wagering platform to responsible gaming information, allowing individuals to voluntarily exclude themselves from placing bets with the operator through a process established by the Commission, and allowing persons to place limits on their time, deposit, or bet limits in a daily, weekly, or monthly manner;

k. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed \$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court;

l. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license.

10. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of "total state revenues" in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

11. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

12. All wagers authorized under this section must be initiated, made, or otherwise placed by a bettor while physically present within this state. The intermediate routing of electronic data related to lawful intrastate wagers authorized under this section shall not determine the location or locations in which the bet is initiated, transmitted, received, or otherwise made. Each online sports wagering operator shall use commercially reasonable geolocation and geofencing

technology to ensure that it accepts bets only from customers who, at the time of placing the bet, are physically present in this state.

13. a. An individual wagering in this state shall establish an online sports wagering account with an online sports wagering operator:

- (1) over the Internet;
- (2) through an online sports wagering platform; or
- (3) through other means approved by the Commission.

b. An individual wagering in this State shall not register more than one account with each online sports wagering platform. Mobile licensees shall use commercially reasonable means to ensure that each customer is limited to one account per platform.

c. Permissible methods of funding and withdrawal for accounts include, but are not limited to, credit cards, debit cards, gift cards, reloadable prepaid cards, free and promotional credit, automated clearing house transfers, online and mobile payment systems that support online money transfers, and wire transfers. The Commission may approve additional funding and withdrawal methods including, but not limited to, cash deposits at approved locations and secure cryptocurrencies.

14. a. A sports wagering operator shall use commercially and technologically reasonable means to ensure marketing and advertisements do not purposefully target individuals who have self-excluded from placing bets on sporting events.

b. A sports wagering operator shall employ commercially reasonable methods to ensure that advertisements for sports betting:

- (1) do not purposefully target minors;
- (2) are not false, misleading, or deceptive to a reasonable consumer; and
- (3) clearly and conspicuously disclose the material terms of any promotional offer in the advertisement. Any promotion or advertisement must provide the consumer with the full and complete terms of a promotion by providing a website, or other location, in the promotional advertisement, that directs the viewer to where the full and complete promotional terms can be viewed. This may be satisfied by the promotional advertisement containing a hyperlink that takes the viewer directly to the full and complete offer and terms.

15. There is hereby created in the state treasury the "Compulsive Gaming Prevention Fund", which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

- a. providing counseling and other support services for compulsive and problem gamblers;
- b. developing and implementing problem gaming treatment and prevention programs; and
- c. providing grants to supporting organizations that provide assistance to compulsive gamblers.

16. As used in this section the following terms shall mean:

a. "Adjusted gross revenue," the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

- (1) All cash and cash equivalents paid out as winnings to sports wagering customers
- (2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;
- (3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat," means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. "License," means any retail license or mobile license.

e. "Licensee," means the holder of any retail or mobile license.

f. "Mobile license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. "Online sports wagering platform," means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. "Professional sports team," means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women's National Basketball Association, or the National Women's Soccer League.

i. "Retail license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. "Sports district," means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. "Sports wagering," means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a "participant" for purposes of this section; and

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. "Sports wagering operator," means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. "Tier one sports wager," means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. "Tier two sports wager," means a sports wager that is not a tier one sports wager.

17. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

18. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

The Honorable Scott Fitzpatrick
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 7 (2024-152)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 3, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control. In the application, the Commission shall require applicants to disclose the identity of all of the following:

a. The applicant's principal owners who directly own 10% or more of the applicant;

b. Each holding, intermediary, or parent company that directly owns 15% or more of the applicant; and

c. The applicant's board appointed chief executive officer and chief financial officer, or the equivalent individuals, as determined by the Commission.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. a. A license for sports wagering shall not be assignable or transferable without approval of the Commission. Such approval shall not be unreasonably withheld.

b. A license shall authorize a licensee to offer sports wagering under not more than one sports wagering operator brand, provided, however, that such licensee shall also be permitted, but not required, to use the brand of a professional team or excursion gambling boat pursuant to a partnership with such entity. Notwithstanding any other provision of law to the contrary and subject to approval by the Commission, a person or entity may hold and operate more than one license under distinct sports wagering operator brands, regardless of whether multiple brands are owned by the same parent entity.

c. Commercial agreements between an excursion gambling boat or a professional sports team and a sports wagering operator shall be submitted to the Commission as agreed to by the contracting parties. The Commission shall not prescribe any terms or conditions that are required to be included into such commercial agreements. A sports governing body or professional sports team may enter into commercial agreements with sports wagering operators or other entities in which such sports governing body or professional sports team may share in the amount wagered on sporting events of such sports governing body or professional sports team. A professional sports team may grant any such rights provided under this paragraph to its affiliate. Neither a sports governing body nor a professional sports team, nor such team's affiliate, is required to obtain a license or any other approval from the Commission to lawfully accept such amounts.

d. Each mobile licensee shall determine, set, and display applicable lines, point spreads, odds, or other information pertaining to online sports wagering.

e. Any submission to the Commission under this section, including all documents, reports, and data submitted therewith, that contain proprietary information, trade secrets, financial information, or personal information about any person or entity shall be treated in the same confidential manner as submissions by other licensees of the Commission and shall not be subject to disclosure pursuant to Chapter 610 RSMo.

8. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

9. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data on the terms and conditions set forth below from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all

sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States.

(1) A sports governing body may notify the Commission that it desires sports wagering operators to use official league data to settle tier two sports wagers on sporting events of such sports governing body. Such notification shall be made in the form and manner the Commission may require. The Commission shall notify each sports wagering operator of a sports governing body's notification within five days of the Commission's receipt of such notification. If a sports governing body does not notify the Commission of its desire to supply official league data, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers on sporting events of such sports governing body.

(2) Within 60 days of the Commission notifying each sports wagering operator of a sports governing body's notification to the Commission, or such longer period as may be agreed between the sports governing body and the applicable sports wagering operator, sports wagering operators shall use only official league data to determine the results of tier two sports wagers on sporting events of that sports governing body, unless:

(a) The sports governing body or its designee cannot provide a feed of official league data to determine the results of a particular type of tier two sports wager, in which case sports wagering operators may use any data source for determining the results of the applicable tier two sports wager until such time as such a data feed becomes available from the sports governing body on commercially reasonable terms and conditions;

(b) A sports wagering operator can demonstrate to the Commission that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms and conditions; or

(c) The sports governing body or its designee does not obtain the necessary supplier approvals to provide official league data to sports wagering operators to determine the results of tier two sports wagers, if and to the extent required by law.

(3) The following is a non-exclusive list of factors that the Commission may consider in evaluating official league data is being offered on commercially reasonable terms and conditions for the purposes of paragraphs (a) and (b) of subsection (2):

(a) The availability of a sports governing body's tier two official league data to a sports wagering operator from more than one authorized source;

(b) Market information, including, but not limited to, price and other terms and conditions, regarding the purchase by sports wagering operators of comparable data for the purpose of settling sports wagers in this state and other jurisdictions;

(c) The nature and quantity of data, including the quality and complexity of the process utilized for collecting such data; and

(d) The extent to which sports governing bodies or their designees have made data used to settle tier two bets or wagers available to operators and any terms and conditions relating to the use of that data.

(4) Notwithstanding anything set forth to the contrary herein, including without limitation subparagraph (3), during the pendency of the Commission's determination as to whether a sports governing body or its designee will provide a feed of official league data on commercially reasonable terms, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers. The Commission's determination shall be made within 120 days of the sports wagering operator notifying the Commission that it desires to demonstrate that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms.

b. Standards concerning a licensee's books and financial records relating to sports wagering, including auditing requirements, standards for the daily counting of a licensee's gross receipts from sports wagering, and standards to ensure that internal controls are followed;

c. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to, research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

d. Standards concerning the detection and prevention of compulsive gaming including, but not limited to, requirements to prominently display information regarding compulsive gaming on all online sports wagering platforms and promotions;

e. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

f. Standards for licensees and sports wagering operators to report to the Commission and the sports governing bodies information related to: abnormal betting activity or patterns that may indicate a concern with the integrity of a sporting event or events; suspicious or illegal betting activities if known to the applicable licensee or sports wagering operator; and any other conduct that corrupts a betting outcome of a sporting event or events for purposes of financial gain, including match fixing;

g. Standards for any sports governing body to submit to the Commission a written request to restrict, limit, or exclude a certain type, form, or category of sports betting with respect to a sporting event of that sports governing body, if the applicable sports governing body believes that such type, form, or category of sports wagering with respect to the sporting event of the sports governing body may undermine the integrity or perceived integrity of the applicable sports governing body or sporting events of the applicable sports governing body.

These standards shall also require the Commission to request comment from sports wagering operators on all requests made pursuant to this paragraph and after giving due consideration to all comments received, the Commission shall, upon a demonstration of good cause from the applicable sports governing body that such type, form, or category of sports betting is likely to undermine the integrity or perceived integrity of such body or sporting events of the applicable sports governing body, grant the request.

These standards shall require the Commission to respond to a request concerning a sporting event before the start of the event, or, if it is not feasible to respond before the start of the event, no later than 7 days after the request is made, and if the Commission determines that the applicable sports governing body is more likely than not to prevail in successfully demonstrating good cause for its request, the Commission may provisionally grant the request of the applicable sports governing body pending the Commission's final determination thereon. Unless the Commission provisionally grants the request, sports wagering operators may continue to offer sports betting and accept bets on the covered sporting event pending a final determination by the Commission;

h. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

i. Standards for the regulation of suppliers of sports wagering goods, services, software, or any other components necessary for the creation of sports wagering markets and determination of wager outcomes;

j. Standards for the implementation of responsible gaming programs, including using commercially reasonable efforts to verify that a person placing a bet on a sporting event is of the legal minimum age for placing such bet, displaying a hyperlink on its online sports wagering platform to responsible gaming information, allowing individuals to voluntarily exclude themselves from placing bets with the operator through a process established by the Commission, and allowing persons to place limits on their time, deposit, or bet limits in a daily, weekly, or monthly manner;

k. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a

license or approval under this section or the rules subsequently adopted. Fines shall not exceed \$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court;

1. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license.

10. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of "total state revenues" in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

11. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

12. All wagers authorized under this section must be initiated, made, or otherwise placed by a bettor while physically present within this state. The intermediate routing of electronic data related to lawful intrastate wagers authorized under this section shall not determine the location or locations in which the bet is initiated, transmitted, received, or otherwise made. Each online sports wagering operator shall use commercially reasonable geolocation and geofencing technology to ensure that it accepts bets only from customers who, at the time of placing the bet, are physically present in this state.

13. a. An individual wagering in this state shall establish an online sports wagering account with an online sports wagering operator:

(1) over the Internet;

(2) through an online sports wagering platform; or

(3) through other means approved by the Commission.

b. An individual wagering in this State shall not register more than one account with each online sports wagering platform. Mobile licensees shall use commercially reasonable means to ensure that each customer is limited to one account per platform.

c. Permissible methods of funding and withdrawal for accounts include, but are not limited to, credit cards, debit cards, gift cards, reloadable prepaid cards, free and promotional credit, automated clearing house transfers, online and mobile payment systems that support online money transfers, and wire transfers. The Commission may approve additional funding and

withdrawal methods including, but not limited to, cash deposits at approved locations and secure cryptocurrencies.

14. a. A sports wagering operator shall use commercially and technologically reasonable means to ensure marketing and advertisements do not purposefully target individuals who have self-excluded from placing bets on sporting events.

b. A sports wagering operator shall employ commercially reasonable methods to ensure that advertisements for sports betting:

(1) do not purposefully target minors;

(2) are not false, misleading, or deceptive to a reasonable consumer; and

(3) clearly and conspicuously disclose the material terms of any promotional offer in the advertisement. Any promotion or advertisement must provide the consumer with the full and complete terms of a promotion by providing a website, or other location, in the promotional advertisement, that directs the viewer to where the full and complete promotional terms can be viewed. This may be satisfied by the promotional advertisement containing a hyperlink that takes the viewer directly to the full and complete offer and terms.

15. There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamers.

16. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee’s customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. “Commission,” means the Missouri Gaming Commission;

c. “Excursion gambling boat,” means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. “License,” means any retail license or mobile license.

e. “Licensee,” means the holder of any retail or mobile license.

f. “Mobile license,” means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. “Online sports wagering platform,” means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. “Professional sports team,” means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women’s National Basketball Association, or the National Women’s Soccer League.

i. “Retail license,” means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. “Sports district,” means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. “Sports wagering,” means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a “participant” for purposes of this section; and

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. “Sports wagering operator,” means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. “Tier one sports wager,” means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. “Tier two sports wager,” means a sports wager that is not a tier one sports wager.

17. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

18. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 6 (2024-151)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 3, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than four mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license per distinct sports wagering operator brand. For purposes of Article III, Section 39(g) brand shall refer to the name, trade name, licensed trademark, or assumed business name of the sports wagering operator. If there are more than four qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant for licensure based on the applicant's ability to satisfy the following criteria:

(1) Expertise in the business of online sports wagering;

(2) Integrity, sustainability, and safety of the applicant's online sports wagering platform;

(3) Past relevant experience of the applicant;

(4) Advertising and promotional plans to increase and sustain revenue;

(5) Ability to generate, maximize, and sustain revenues for the state;

(6) Demonstrated commitment to and plans for the promotion of responsible gaming; and

- (7) Capacity to increase the number of bettors on the applicant's online sports wagering platform.
5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control. In the application, the Commission shall require applicants to disclose the identity of all of the following:
- a. The applicant's principal owners who directly own 10% or more of the applicant;
 - b. Each holding, intermediary, or parent company that directly owns 15% or more of the applicant; and
 - c. The applicant's board appointed chief executive officer and chief financial officer, or the equivalent individuals, as determined by the Commission.
6. Retail and mobile license applicants shall be required to pay a license fee as follows:
- a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.
 - b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.
7. a. A license for sports wagering shall not be assignable or transferable without approval of the Commission. Such approval shall not be unreasonably withheld.
- b. A license shall authorize a licensee to offer sports wagering under not more than one sports wagering operator brand, provided, however, that such licensee shall also be permitted, but not required, to use the brand of a professional team or excursion gambling boat pursuant to a partnership with such entity. Notwithstanding any other provision of law to the contrary and subject to approval by the Commission, a person or entity may hold and operate more than one license under distinct sports wagering operator brands, regardless of whether multiple brands are owned by the same parent entity.
- c. Commercial agreements between an excursion gambling boat or a professional sports team and a sports wagering operator shall be submitted to the Commission as agreed to by the contracting parties. The Commission shall not prescribe any terms or conditions that are required to be included into such commercial agreements. A sports governing body or professional sports team may enter into commercial agreements with sports wagering operators or other entities in which such sports governing body or professional sports team may share in the amount wagered on sporting events of such sports governing body or professional sports team. A professional sports team may grant any such rights provided under this paragraph to its affiliate. Neither a sports governing body nor a professional sports team, nor such team's affiliate, is required to obtain a license or any other approval from the Commission to lawfully accept such amounts.
- d. Each mobile licensee shall determine, set, and display applicable lines, point spreads, odds, or other information pertaining to online sports wagering.
- e. Any submission to the Commission under this section, including all documents, reports, and data submitted therewith, that contain proprietary information, trade secrets, financial information, or personal information about any person or entity shall be treated in the same confidential manner as submissions by other licensees of the Commission and shall not be subject to disclosure pursuant to Chapter 610 RSMo.
8. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

9. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data on the terms and conditions set forth below from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States.

(1) A sports governing body may notify the Commission that it desires sports wagering operators to use official league data to settle tier two sports wagers on sporting events of such sports governing body. Such notification shall be made in the form and manner the Commission may require. The Commission shall notify each sports wagering operator of a sports governing body's notification within five days of the Commission's receipt of such notification. If a sports governing body does not notify the Commission of its desire to supply official league data, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers on sporting events of such sports governing body.

(2) Within 60 days of the Commission notifying each sports wagering operator of a sports governing body's notification to the Commission, or such longer period as may be agreed between the sports governing body and the applicable sports wagering operator, sports wagering operators shall use only official league data to determine the results of tier two sports wagers on sporting events of that sports governing body, unless:

(a) The sports governing body or its designee cannot provide a feed of official league data to determine the results of a particular type of tier two sports wager, in which case sports wagering operators may use any data source for determining the results of the applicable tier two sports wager until such time as such a data feed becomes available from the sports governing body on commercially reasonable terms and conditions;

(b) A sports wagering operator can demonstrate to the Commission that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms and conditions; or

(c) The sports governing body or its designee does not obtain the necessary supplier approvals to provide official league data to sports wagering operators to determine the results of tier two sports wagers, if and to the extent required by law.

(3) The following is a non-exclusive list of factors that the Commission may consider in evaluating official league data is being offered on commercially reasonable terms and conditions for the purposes of paragraphs (a) and (b) of subsection (2):

(a) The availability of a sports governing body's tier two official league data to a sports wagering operator from more than one authorized source;

(b) Market information, including, but not limited to, price and other terms and conditions, regarding the purchase by sports wagering operators of comparable data for the purpose of settling sports wagers in this state and other jurisdictions;

(c) The nature and quantity of data, including the quality and complexity of the process utilized for collecting such data; and

(d) The extent to which sports governing bodies or their designees have made data used to settle tier two bets or wagers available to operators and any terms and conditions relating to the use of that data.

(4) Notwithstanding anything set forth to the contrary herein, including without limitation subparagraph (3), during the pendency of the Commission's determination as to whether a sports governing body or its designee will provide a feed of official league data on commercially reasonable terms, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers. The Commission's determination shall be made within 120 days of the sports wagering operator notifying the Commission that it desires to demonstrate that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms.

b. Standards concerning a licensee's books and financial records relating to sports wagering, including auditing requirements, standards for the daily counting of a licensee's gross receipts from sports wagering, and standards to ensure that internal controls are followed;

c. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to, research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

d. Standards concerning the detection and prevention of compulsive gaming including, but not limited to, requirements to prominently display information regarding compulsive gaming on all online sports wagering platforms and promotions;

e. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

f. Standards for licensees and sports wagering operators to report to the Commission and the sports governing bodies information related to: abnormal betting activity or patterns that may indicate a concern with the integrity of a sporting event or events; suspicious or illegal betting activities if known to the applicable licensee or sports wagering operator; and any other conduct that corrupts a betting outcome of a sporting event or events for purposes of financial gain, including match fixing;

g. Standards for any sports governing body to submit to the Commission a written request to restrict, limit, or exclude a certain type, form, or category of sports betting with respect to a sporting event of that sports governing body, if the applicable sports governing body believes that such type, form, or category of sports wagering with respect to the sporting event of the sports governing body may undermine the integrity or perceived integrity of the applicable sports governing body or sporting events of the applicable sports governing body.

These standards shall also require the Commission to request comment from sports wagering operators on all requests made pursuant to this paragraph and after giving due consideration to all comments received, the Commission shall, upon a demonstration of good cause from the applicable sports governing body that such type, form, or category of sports betting is likely to undermine the integrity or perceived integrity of such body or sporting events of the applicable sports governing body, grant the request.

These standards shall require the Commission to respond to a request concerning a sporting event before the start of the event, or, if it is not feasible to respond before the start of the event, no later than 7 days after the request is made, and if the Commission determines that the applicable sports governing body is more likely than not to prevail in successfully demonstrating good cause for its request, the Commission may provisionally grant the request of the applicable sports governing body pending the Commission's final determination thereon. Unless the Commission provisionally grants the request, sports wagering operators may continue to offer sports betting and accept bets on the covered sporting event pending a final determination by the Commission;

h. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

i. Standards for the regulation of suppliers of sports wagering goods, services, software, or any other components necessary for the creation of sports wagering markets and determination of wager outcomes;

j. Standards for the implementation of responsible gaming programs, including using commercially reasonable efforts to verify that a person placing a bet on a sporting event is of the legal minimum age for placing such bet, displaying a hyperlink on its online sports wagering platform to responsible gaming information, allowing individuals to voluntarily exclude themselves from placing bets with the operator through a process established by the Commission, and allowing persons to place limits on their time, deposit, or bet limits in a daily, weekly, or monthly manner;

k. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed \$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court;

l. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license.

10. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

11. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

12. All wagers authorized under this section must be initiated, made, or otherwise placed by a bettor while physically present within this state. The intermediate routing of electronic data related to lawful intrastate wagers authorized under this section shall not determine the location or locations in which the bet is initiated, transmitted, received, or otherwise made. Each online sports wagering operator shall use commercially reasonable geolocation and geofencing

technology to ensure that it accepts bets only from customers who, at the time of placing the bet, are physically present in this state.

13. a. An individual wagering in this state shall establish an online sports wagering account with an online sports wagering operator:

(1) over the Internet;

(2) through an online sports wagering platform; or

(3) through other means approved by the Commission.

b. An individual wagering in this State shall not register more than one account with each online sports wagering platform. Mobile licensees shall use commercially reasonable means to ensure that each customer is limited to one account per platform.

c. Permissible methods of funding and withdrawal for accounts include, but are not limited to, credit cards, debit cards, gift cards, reloadable prepaid cards, free and promotional credit, automated clearing house transfers, online and mobile payment systems that support online money transfers, and wire transfers. The Commission may approve additional funding and withdrawal methods including, but not limited to, cash deposits at approved locations and secure cryptocurrencies.

14. a. A sports wagering operator shall use commercially and technologically reasonable means to ensure marketing and advertisements do not purposefully target individuals who have self-excluded from placing bets on sporting events.

b. A sports wagering operator shall employ commercially reasonable methods to ensure that advertisements for sports betting:

(1) do not purposefully target minors;

(2) are not false, misleading, or deceptive to a reasonable consumer; and

(3) clearly and conspicuously disclose the material terms of any promotional offer in the advertisement. Any promotion or advertisement must provide the consumer with the full and complete terms of a promotion by providing a website, or other location, in the promotional advertisement, that directs the viewer to where the full and complete promotional terms can be viewed. This may be satisfied by the promotional advertisement containing a hyperlink that takes the viewer directly to the full and complete offer and terms.

15. There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamers.

16. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat," means an excursion gambling boat or floating facility as described in Article III, Section 39(c);

d. "License," means any retail license or mobile license.

e. "Licensee," means the holder of any retail or mobile license.

f. "Mobile license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. "Online sports wagering platform," means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. "Professional sports team," means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women's National Basketball Association, or the National Women's Soccer League.

i. "Retail license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. "Sports district," means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. "Sports wagering," means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a "participant" for purposes of this section; and

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. "Sports wagering operator," means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. "Tier one sports wager," means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. "Tier two sports wager," means a sports wager that is not a tier one sports wager.

17. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

18. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 5 (2024-150)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 3, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than three mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license per distinct sports wagering operator brand. For purposes of Article III, Section 39(g) brand shall refer to the name, trade name, licensed trademark, or assumed business name of the sports wagering operator. If there are more than three qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant for licensure based on the applicant's ability to satisfy the following criteria:

(1) Expertise in the business of online sports wagering;

(2) Integrity, sustainability, and safety of the applicant's online sports wagering platform;

(3) Past relevant experience of the applicant;

(4) Advertising and promotional plans to increase and sustain revenue;

(5) Ability to generate, maximize, and sustain revenues for the state;

(6) Demonstrated commitment to and plans for the promotion of responsible gaming; and

(7) Capacity to increase the number of bettors on the applicant's online sports wagering platform.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control. In the application, the Commission shall require applicants to disclose the identity of all of the following:

a. The applicant's principal owners who directly own 10% or more of the applicant;

b. Each holding, intermediary, or parent company that directly owns 15% or more of the applicant; and

c. The applicant's board appointed chief executive officer and chief financial officer, or the equivalent individuals, as determined by the Commission.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. a. A license for sports wagering shall not be assignable or transferable without approval of the Commission. Such approval shall not be unreasonably withheld.

b. A license shall authorize a licensee to offer sports wagering under not more than one sports wagering operator brand, provided, however, that such licensee shall also be permitted, but not required, to use the brand of a professional team or excursion gambling boat pursuant to a partnership with such entity. Notwithstanding any other provision of law to the contrary and subject to approval by the Commission, a person or entity may hold and operate more than one license under distinct sports wagering operator brands, regardless of whether multiple brands are owned by the same parent entity.

c. Commercial agreements between an excursion gambling boat or a professional sports team and a sports wagering operator shall be submitted to the Commission as agreed to by the contracting parties. The Commission shall not prescribe any terms or conditions that are required to be included into such commercial agreements. A sports governing body or professional sports team may enter into commercial agreements with sports wagering operators or other entities in which such sports governing body or professional sports team may share in the amount wagered on sporting events of such sports governing body or professional sports team. A professional sports team may grant any such rights provided under this paragraph to its affiliate. Neither a sports governing body nor a professional sports team, nor such team's affiliate, is required to obtain a license or any other approval from the Commission to lawfully accept such amounts.

d. Each mobile licensee shall determine, set, and display applicable lines, point spreads, odds, or other information pertaining to online sports wagering.

e. Any submission to the Commission under this section, including all documents, reports, and data submitted therewith, that contain proprietary information, trade secrets, financial information, or personal information about any person or entity shall be treated in the same confidential manner as submissions by other licensees of the Commission and shall not be subject to disclosure pursuant to Chapter 610 RSMo.

8. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

9. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data on the terms and conditions set forth below from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States.

(1) A sports governing body may notify the Commission that it desires sports wagering operators to use official league data to settle tier two sports wagers on sporting events of such sports governing body. Such notification shall be made in the form and manner the Commission may require. The Commission shall notify each sports wagering operator of a sports governing body's notification within five days of the Commission's receipt of such notification. If a sports governing body does not notify the Commission of its desire to supply official league data, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers on sporting events of such sports governing body.

(2) Within 60 days of the Commission notifying each sports wagering operator of a sports governing body's notification to the Commission, or such longer period as may be agreed between the sports governing body and the applicable sports wagering operator, sports wagering operators shall use only official league data to determine the results of tier two sports wagers on sporting events of that sports governing body, unless:

(a) The sports governing body or its designee cannot provide a feed of official league data to determine the results of a particular type of tier two sports wager, in which case sports wagering operators may use any data source for determining the results of the applicable tier two sports wager until such time as such a data feed becomes available from the sports governing body on commercially reasonable terms and conditions;

(b) A sports wagering operator can demonstrate to the Commission that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms and conditions; or

(c) The sports governing body or its designee does not obtain the necessary supplier approvals to provide official league data to sports wagering operators to determine the results of tier two sports wagers, if and to the extent required by law.

(3) The following is a non-exclusive list of factors that the Commission may consider in evaluating official league data is being offered on commercially reasonable terms and conditions for the purposes of paragraphs (a) and (b) of subsection (2):

(a) The availability of a sports governing body's tier two official league data to a sports wagering operator from more than one authorized source;

(b) Market information, including, but not limited to, price and other terms and conditions, regarding the purchase by sports wagering operators of comparable data for the purpose of settling sports wagers in this state and other jurisdictions;

(c) The nature and quantity of data, including the quality and complexity of the process utilized for collecting such data; and

(d) The extent to which sports governing bodies or their designees have made data used to settle tier two bets or wagers available to operators and any terms and conditions relating to the use of that data.

(4) Notwithstanding anything set forth to the contrary herein, including without limitation subparagraph (3), during the pendency of the Commission's determination as to whether a sports governing body or its designee will provide a feed of official league data on commercially reasonable terms, a sports wagering operator may use any data source for determining the results of any and all tier two sports wagers. The Commission's determination shall be made within 120 days of the sports wagering operator notifying the Commission that it desires to demonstrate that the sports governing body or its designee will not provide a feed of official league data to the sports wagering operator on commercially reasonable terms.

b. Standards concerning a licensee's books and financial records relating to sports wagering, including auditing requirements, standards for the daily counting of a licensee's gross receipts from sports wagering, and standards to ensure that internal controls are followed;

c. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to, research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

d. Standards concerning the detection and prevention of compulsive gaming including, but not limited to, requirements to prominently display information regarding compulsive gaming on all online sports wagering platforms and promotions;

e. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

f. Standards for licensees and sports wagering operators to report to the Commission and the sports governing bodies information related to: abnormal betting activity or patterns that may indicate a concern with the integrity of a sporting event or events; suspicious or illegal betting activities if known to the applicable licensee or sports wagering operator; and any other conduct that corrupts a betting outcome of a sporting event or events for purposes of financial gain, including match fixing;

g. Standards for any sports governing body to submit to the Commission a written request to restrict, limit, or exclude a certain type, form, or category of sports betting with respect to a sporting event of that sports governing body, if the applicable sports governing body believes that such type, form, or category of sports wagering with respect to the sporting event of the sports governing body may undermine the integrity or perceived integrity of the applicable sports governing body or sporting events of the applicable sports governing body.

These standards shall also require the Commission to request comment from sports wagering operators on all requests made pursuant to this paragraph and after giving due consideration to all comments received, the Commission shall, upon a demonstration of good cause from the applicable sports governing body that such type, form, or category of sports betting is likely to undermine the integrity or perceived integrity of such body or sporting events of the applicable sports governing body, grant the request.

These standards shall require the Commission to respond to a request concerning a sporting event before the start of the event, or, if it is not feasible to respond before the start of the event, no later than 7 days after the request is made, and if the Commission determines that the applicable sports governing body is more likely than not to prevail in successfully demonstrating good cause for its request, the Commission may provisionally grant the request of the applicable sports governing body pending the Commission's final determination thereon. Unless the Commission provisionally grants the request, sports wagering operators may continue to offer sports betting and accept bets on the covered sporting event pending a final determination by the Commission;

h. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

i. Standards for the regulation of suppliers of sports wagering goods, services, software, or any other components necessary for the creation of sports wagering markets and determination of wager outcomes;

j. Standards for the implementation of responsible gaming programs, including using commercially reasonable efforts to verify that a person placing a bet on a sporting event is of the legal minimum age for placing such bet, displaying a hyperlink on its online sports wagering platform to responsible gaming information, allowing individuals to voluntarily exclude themselves from placing bets with the operator through a process established by the Commission, and allowing persons to place limits on their time, deposit, or bet limits in a daily, weekly, or monthly manner;

k. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed \$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court;

l. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license.

10. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

11. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

12. All wagers authorized under this section must be initiated, made, or otherwise placed by a bettor while physically present within this state. The intermediate routing of electronic data related to lawful intrastate wagers authorized under this section shall not determine the location or locations in which the bet is initiated, transmitted, received, or otherwise made. Each online sports wagering operator shall use commercially reasonable geolocation and geofencing

technology to ensure that it accepts bets only from customers who, at the time of placing the bet, are physically present in this state.

13. a. An individual wagering in this state shall establish an online sports wagering account with an online sports wagering operator:

(1) over the Internet;

(2) through an online sports wagering platform; or

(3) through other means approved by the Commission.

b. An individual wagering in this State shall not register more than one account with each online sports wagering platform. Mobile licensees shall use commercially reasonable means to ensure that each customer is limited to one account per platform.

c. Permissible methods of funding and withdrawal for accounts include, but are not limited to, credit cards, debit cards, gift cards, reloadable prepaid cards, free and promotional credit, automated clearing house transfers, online and mobile payment systems that support online money transfers, and wire transfers. The Commission may approve additional funding and withdrawal methods including, but not limited to, cash deposits at approved locations and secure cryptocurrencies.

14. a. A sports wagering operator shall use commercially and technologically reasonable means to ensure marketing and advertisements do not purposefully target individuals who have self-excluded from placing bets on sporting events.

b. A sports wagering operator shall employ commercially reasonable methods to ensure that advertisements for sports betting:

(1) do not purposefully target minors;

(2) are not false, misleading, or deceptive to a reasonable consumer; and

(3) clearly and conspicuously disclose the material terms of any promotional offer in the advertisement. Any promotion or advertisement must provide the consumer with the full and complete terms of a promotion by providing a website, or other location, in the promotional advertisement, that directs the viewer to where the full and complete promotional terms can be viewed. This may be satisfied by the promotional advertisement containing a hyperlink that takes the viewer directly to the full and complete offer and terms.

15. There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamers.

16. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat," means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. "License," means any retail license or mobile license.

e. "Licensee," means the holder of any retail or mobile license.

f. "Mobile license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. "Online sports wagering platform," means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. "Professional sports team," means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women's National Basketball Association, or the National Women's Soccer League.

i. "Retail license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. "Sports district," means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. "Sports wagering," means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a "participant" for purposes of this section; and

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. "Sports wagering operator," means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. "Tier one sports wager," means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. "Tier two sports wager," means a sports wager that is not a tier one sports wager.

17. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

18. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 4 (2024-149)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 3, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than three mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license per distinct sports wagering operator brand. For purposes of Article III, Section 39(g) brand shall refer to the name, trade name, licensed trademark, or assumed business name of the sports wagering operator. If there are more than three qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant for licensure based on the applicant's ability to satisfy the following criteria:

(1) Expertise in the business of online sports wagering;

(2) Integrity, sustainability, and safety of the applicant's online sports wagering platform;

(3) Past relevant experience of the applicant;

(4) Advertising and promotional plans to increase and sustain revenue;

(5) Ability to generate, maximize, and sustain revenues for the state;

(6) Demonstrated commitment to and plans for the promotion of responsible gaming; and

(7) Capacity to increase the number of bettors on the applicant's online sports wagering platform.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

8. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States.

b. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

c. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

d. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

e. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed

\$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court; and

f. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license.

9. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

10. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamers.

11. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers;

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers.

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat," means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. "License," means any retail license or mobile license.

e. "Licensee," means the holder of any retail or mobile license.

f. "Mobile license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. "Online sports wagering platform," means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. "Professional sports team," means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women's National Basketball Association, or the National Women's Soccer League.

i. "Retail license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. "Sports district," means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. "Sports wagering," means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a "participant" for purposes of this section;

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. “Sports wagering operator,” means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. “Tier one sports wager,” means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. “Tier two sports wager,” means a sports wager that is not a tier one sports wager.

12. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

13. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 3 (2024-148)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 3, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than four mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license per distinct sports wagering operator brand. For purposes of Article III, Section 39(g) brand shall refer to the name, trade name, licensed trademark, or assumed business name of the sports wagering operator. If there are more than four qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant for licensure based on the applicant's ability to satisfy the following criteria:

(1) Expertise in the business of online sports wagering;

(2) Integrity, sustainability, and safety of the applicant's online sports wagering platform;

(3) Past relevant experience of the applicant;

(4) Advertising and promotional plans to increase and sustain revenue;

(5) Ability to generate, maximize, and sustain revenues for the state;

(6) Demonstrated commitment to and plans for the promotion of responsible gaming; and

(7) Capacity to increase the number of bettors on the applicant's online sports wagering platform.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

8. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States.

b. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

c. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

d. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

e. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed

\$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court; and

f. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license.

9. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

10. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamers.

11. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers;

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers.

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat," means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. "License," means any retail license or mobile license.

e. "Licensee," means the holder of any retail or mobile license.

f. "Mobile license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. "Online sports wagering platform," means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. "Professional sports team," means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women's National Basketball Association, or the National Women's Soccer League.

i. "Retail license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. "Sports district," means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. "Sports wagering," means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a "participant" for purposes of this section;

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. "Sports wagering operator," means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. "Tier one sports wager," means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. "Tier two sports wager," means a sports wager that is not a tier one sports wager.

12. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

13. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 2 (2024-147)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 3, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

8. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States.

b. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

c. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

d. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

e. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed \$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court; and

f. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license.

9. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

10. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

- a. providing counseling and other support services for compulsive and problem gamers;
- b. developing and implementing problem gaming treatment and prevention programs; and
- c. providing grants to supporting organizations that provide assistance to compulsive gamers.

11. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers;

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee’s customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers.

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. “Commission,” means the Missouri Gaming Commission;

c. “Excursion gambling boat,” means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. “License,” means any retail license or mobile license.

e. “Licensee,” means the holder of any retail or mobile license.

f. “Mobile license,” means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. “Online sports wagering platform,” means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. “Professional sports team,” means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women’s National Basketball Association, or the National Women’s Soccer League.

i. “Retail license,” means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. “Sports district,” means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. “Sports wagering,” means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a “participant” for purposes of this section;

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. “Sports wagering operator,” means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. “Tier one sports wager,” means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. “Tier two sports wager,” means a sports wager that is not a tier one sports wager.

12. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

13. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 1 (2024-146)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on October 3, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission pursuant to Article III, Section 39(g) may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. A licensee shall not offer sports wagering to individuals who are under twenty-one years of age.

4. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than two mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license per distinct sports wagering operator brand. For purposes of Article III, Section 39(g) brand shall refer to the name, trade name, licensed trademark, or assumed business name of the sports wagering operator. If there are more than two qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant for licensure based on the applicant's ability to satisfy the following criteria:

(1) Expertise in the business of online sports wagering;

(2) Integrity, sustainability, and safety of the applicant's online sports wagering platform;

(3) Past relevant experience of the applicant;

(4) Advertising and promotional plans to increase and sustain revenue;

(5) Ability to generate, maximize, and sustain revenues for the state;

(6) Demonstrated commitment to and plans for the promotion of responsible gaming; and

(7) Capacity to increase the number of bettors on the applicant's online sports wagering platform.

5. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control.

6. Retail and mobile license applicants shall be required to pay a license fee as follows:

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gaming Prevention Fund.

8. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce commercially reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall examine the rules implemented in other states where sports wagering is conducted and shall, as far as practicable, adopt a similar regulatory framework, including, but not limited to:

a. Standards governing the security and integrity of sports wagering, including requiring the use of official league data from each applicable sports governing body headquartered in the United States solely for the purposes of determining the outcome of tier two sports wagers on a professional athlete or sporting event, but only if made available to licensees on commercially reasonable terms. Sports wagering operators may use any data source for determining the results of any and all tier one sports wagers on any and all sporting events, and the results of any and all tier two sports wagers on sporting events of an organization that is not headquartered in the United States.

b. Standards for the use and distribution of monies from the Compulsive Gaming Prevention Fund shall include, but not be limited to research, detection, and prevention of compulsive gaming, the implementation of treatment and recovery programs, or services related to compulsive gaming in this state;

c. Requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

d. Requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

e. Establishing fines, placing licensees on probation, and revoking licenses for violations of this section. The Commission may impose fines upon any person holding, or required to hold, a license or approval under this section or the rules subsequently adopted. Fines shall not exceed

\$50,000 per violation or \$100,000 resulting from violation of the same occurrence of events. The Commission shall promulgate rules relating to procedures for disciplinary hearings, including that any such decision may be appealed to circuit court; and

f. Establishing a start date for all sports wagering that is not later than December 1, 2025. No sports wagering, either retail or mobile, shall be offered in the state before such start date established by the Commission. No category of license shall be given an earlier launch date over any other category of license.

9. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in this state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(1) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(2) the greater of 10% of such annual tax revenues or \$5,000,000 to the Compulsive Gaming Fund.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

10. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

There is hereby created in the state treasury the “Compulsive Gaming Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall be utilized by the Commission for the purposes of:

a. providing counseling and other support services for compulsive and problem gamers;

b. developing and implementing problem gaming treatment and prevention programs; and

c. providing grants to supporting organizations that provide assistance to compulsive gamers.

11. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering customers;

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by customers, including merchandise or services distributed to sports wagering customers to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's customers, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering customers.

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the licensee shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat," means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. "License," means any retail license or mobile license.

e. "Licensee," means the holder of any retail or mobile license.

f. "Mobile license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. "Online sports wagering platform," means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate mobile sports wagering.

h. "Professional sports team," means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women's National Basketball Association, or the National Women's Soccer League.

i. "Retail license," means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. "Sports district," means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. "Sports wagering," means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or any other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events.

Sports wagering shall not include:

(1) a fantasy sports contest comprising multiple participants competing against one another in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. A fantasy sports contest operator shall not qualify as a "participant" for purposes of this section;

(2) wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant; and

(3) wagering on youth or high school events.

l. “Sports wagering operator,” means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

m. “Tier one sports wager,” means a sports wager that is determined solely by the final score or final outcome of the sporting event and is placed before the sporting event has begun.

n. “Tier two sports wager,” means a sports wager that is not a tier one sports wager.

12. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

13. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

NOTICE: The proposed amendment revises Article 1 of the Constitution by adopting one new Section to be known as Article I, section 36.

Be it resolved by the people of the state of Missouri that the Constitution be amended: Article I, section 36.1 of the Missouri Constitution to read as follows:

Section 36.1. This Section shall be known as "The Right to Informed Consent."

That individuals have a right to refuse interventions upon his or her person and that freedom from governmental interference with that right is a fundamental right. And that pursuant to that right, the state and any political subdivision of the state, including schools and institutions of higher education are obligated to ensure informed consent when promoting any medical intervention and shall be prohibited from passing or implementing any law, order, ordinance, regulation, or public policy that mandates, coerces, or infringes upon the individual right to refuse any medical treatment, technology, testing, facial coverings, medical devices and/or procedures, including but not limited to injections and vaccines.

Informed consent includes the right to be informed about exposure to mRNA and/or gene-altering therapies and medical technologies or treatments.

Equality of rights under the law shall not be denied or abridged to any person in this state because of the exercise of the rights ensured by this section. Nothing in this section shall be construed to secure or protect a right to abortion.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-145)**

Subject

Initiative petition from Byron Keelin regarding a proposed constitutional amendment to Article I. (Received October 03, 2023)

Date

October 23, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, and **St. Louis Community College**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-145 and determined there is no fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** (DOC) indicated unknown impact-this proposal seeks to prohibit DOC from implementing policy requiring injections. Currently this could affect the Department specifically as to tuberculosis testing that is required for all employees and incarcerated offenders. Assuming the language applies to the department it could have an unknown cost impact by limiting the DOC's ability to prevent infectious diseases.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-145 proposing to amend Article I.

Officials from the **Department of Revenue** indicated that after a thorough review, their department assumes this IP will not have a fiscal or administrative impact on their department or their operations.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to informed medical consent does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-145 will have no anticipated fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal relating to informed medical consent does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-145 a proposed constitutional amendment to Article I, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot

measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-145 has no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-145 proposing to amend Article I.

Officials from **St. Louis County** indicated although the language is vague, it appears that this proposed initiative petition would destroy public health authority in St. Louis County and the state by preempting the use of medical interventions including immunization requirements from the Department of Health and Human Services. The language of the initiative petition is too broad to identify a precise fiscal impact. However, if the state and local public health departments are prevented from implementing mandates to protect the public from disease, the resulting cost of treatment and hospitalization may be extremely high.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Jennings School District** indicated this proposed legislation could lead to significant unforeseen costs as a result of waiving any vaccine requirements for students to attend school. Measles, polio, and other vaccines are required for students to participate in school, per the MO Department of Health and Senior Services (DHSS). This proposed bill seems to eliminate such a requirement. Eliminating such a requirement could lead to serious outbreaks of deadly and contagious diseases in schools, leading to a worsening environment for teachers, further hurting teacher recruitment and retention. Costs for shutting down schools in the case of a measles outbreak could run to \$100,000+ per month per outbreak, in terms of transportation changes, substitute teachers, specialized cleaning, communication to families, etc. This does not include the long term effect on teacher and

administrator morale loss as a result of the fear of contracting measles, polio, or another typically-required shot.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **St. Louis Community College** indicated they have reviewed the petition initiative and do not see significant cost to obtaining informed consent. This opinion does not opine on the benefits or negative impact to individual students. In addition, age should be considered as it relates to emancipated individuals.

The State Auditor's office did not receive a response from the **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, and University of Missouri.**

Fiscal Note Summary

State and local governmental entities estimate no costs or savings.

STATE AUDITORS OFFICE

RE: Petition approval request from Greta Bax regarding a proposed constitutional amendment to Article I, version 6 (2024-144)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Greta Bax on September 12, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

FROM: Diana Haines

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article 1 (2024-144)

All six of the proposed amendments to Article I would place certain restrictions on Missouri's constitutional right to bear arms. The Attorney General's Office (AGO) expects that the enactment of any of these proposals would result in increased litigation challenging the constitutionality of the amendments, which the AGO would be responsible for defending and would likely have to hire conflict counsel to participate in given the AGO's publicly stated position strongly in favor of Second Amendment protections. Given the positional conflict that would require conflict counsel, the total cost to Missouri could exceed \$9 million by way of increased legal costs for the Attorney General's Office.

Analysis

There is one primary area where these initiative petitions would substantially increase costs to Missouri. The petitions would trigger significant legal costs because they will certainly give rise to legal challenges in which the Attorney General's Office would be involved and would have to retain conflict counsel.

I. The petitions will increase legal costs for the Attorney General's Office.

The AGO would incur substantial legal costs relating to the proposed petitions. First, the petitions involve a controversial topic that is sure to

motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting Second Amendment rights. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of Second Amendment protections, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

Even a cursory analysis of the proposed initiative petitions raise significant constitutional concerns. As such, the State of Missouri may be required to pay the attorneys' fees of parties that challenge the petitions and any resulting regulations approved by local governments.

All told, each lawsuit could cost approximately \$1.5 million based on the AGO's estimates of the additional personnel and resources needed. Challenges would likely be filed in multiple jurisdictions. The \$9 million estimate in additional legal costs is based on one jurisdictional challenge to each of the proposed amendments, meaning the likelihood of total costs exceeding the \$9 million estimate is highly likely as challenges to each petition could be filed in multiple jurisdictions.

Conclusion

These proposed initiative petitions would give the state unconstitutional control over Missourian's second amendment rights. Not only is that wrong-headed, it is expensive. If enacted, these proposed provisions would have a severe, negative economic impact on the State of Missouri. Resulting litigation would force the AGO to expend significant funds on anticipated litigation, likely including the hiring of outside counsel.

The AGO currently estimates the fiscal impact will be at least \$9 million, but it could be more. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-144 and determined there is no fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated Section 36 is proposed and outlines penalty provisions for knowingly selling a firearm to a person under eighteen years of age. These actions are considered nonviolent class E felony offenses; therefore, the intent of the bill is to create a new class E felony offense.

For each new nonviolent class E felony, their department estimates one person could be sentenced to prison and two to probation. The average sentence for a nonviolent class E felony offense is 3.4 years, of which 2.1 years will be served in prison with 1.4 years to first release. The remaining 1.3 years will be on parole. Probation sentences will be 3 years.

The cumulative impact on their department is estimated to be 2 additional offenders in prison and 7 additional offenders on field supervision by FY 2027.

Change in prison admissions and probation openings with legislation-Class E Felony (nonviolent)

The total estimated net effect on all state funds will be (\$4,750) in fiscal year 2025, (\$19,378) in fiscal year 2026, and (\$19,766) in fiscal year 2027.

The total estimated net effect on all federal funds will be \$0 in fiscal year 2025, 2026, and 2027.

The total estimated net effect on all local funds will be \$0 in fiscal year 2025, 2026, and 2027.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for initiative petition 24-144 proposing to amend Article I, version 6.

Officials from the **Department of Revenue** indicated after a thorough review, their department assumes this IP will not have a fiscal or administrative impact on their department or their operations.

Officials from the **Department of Public Safety** indicated no fiscal impact.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to firearms does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-144 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact is expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-144.

Officials from the **Office of Administration** indicated this proposal relating to firearms does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-144 a proposed constitutional amendment to Article I, version 6 (2024-144), there may be some impact but there is no way to quantify that currently. Any significant changes will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of

their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender (SPD)** indicated initiative petition 24-144 will have a fiscal impact on SPD. The creation of selling a firearm to a person under the age of 18 as a class E felony would create additional caseload for MSPD. A case of this type would require an average of 35 hours of casework per the National Public Defense Workload Study. A SPD attorney handling only these additional cases would be able to handle approximately 60 new cases per year. It is unknown how many additional cases will be charged if this initiative petition is passed, but if 1,000 new cases were charged statewide and those charged were eligible for SPD representation, sixteen additional attorneys would be needed. If 5,000 new cases were charged and those charged were eligible for SPD representation, eighty additional attorneys would be needed.

Officials from the **Office of the State Treasurer** indicated no identifiable fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-144 proposing to amend Article I, Version 6.

Officials from **St. Louis County** indicated this proposed constitutional amendment should have no fiscal impact on St. Louis County.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Jennings School District** indicated:

- While there does not appear to be a direct expense or revenue to school districts due to this legislation, any legislation that limits access to firearms can have an indirect positive effect on decreasing expenses for school districts if the legislation keeps more guns out of kids' hands and mitigates against unlawful use of firearms.
- School districts spend significant amounts on security due to threats and actual use of firearms on campus, especially in recent weeks at football games. Our district spends about \$750 per home football game and \$500 per home basketball game to hire off-duty police officers to mitigate against handguns. Over time, I believe districts can halve their expenses on this if we have a 50% reduction in gun displays/use on campus.

Officials from **Wellsville-Middletown R-1 School District** indicated unknown of the estimated cost or savings for the initiative petition.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated the University of Missouri System does not foresee any significant impact.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and determined it has no revenue or expense impact on their college.

Officials from the **Kansas City Board of Police Commissioners** indicated no fiscal impact.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, and the Metropolitan Police Department - City of St. Louis.**

Fiscal Note Summary

The Attorney General estimates increased legal costs of at least \$9 million. Other state entities estimate annual costs of at least \$20,000 by fiscal year 2027. Local governmental entities estimate no costs or savings.

RE: Petition approval request from Greta Bax regarding a proposed constitutional amendment to Article I, version 5 (2024-143)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Greta Bax on September 12, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment amends Article I by enacting one new section to be known as Section 36 of Article I.

Be it resolved by the people of the state of Missouri that the Constitution be amended.

Section A. Article I is hereby amended by enacting one new section to be known as Section 36 of Article I, to read as follows:

Section 36. 1. There is hereby established an “Extreme Risk Protection Order” which shall enjoin and prohibit a respondent from possessing, using, purchasing, manufacturing or otherwise receiving a firearm for as long as the order remains in effect.

2. (1) A petition for an extreme risk protection order may be made by the chief law enforcement officer, the chief law enforcement officer’s designee, a city or county attorney, a mental health professional, an official of a school or school system in which the respondent is enrolled or has been enrolled within the preceding one-year period, a family member of the respondent, which shall be understood to mean a parent, spouse, child, or sibling of the respondent, a household member of the respondent, a dating or intimate partner of the respondent, or a guardian of the respondent.

(2) A petition shall allege that the respondent poses a significant risk of causing personal injury or death to the respondent or another person. The petition shall be accompanied by an affidavit or sworn statement providing specific facts and circumstances forming the basis of allegations that an extreme risk protection order should be granted. The court shall take up and decide such application on the day it is submitted, or if review and decision of the application on the same day is not feasible, then as quickly as possible but in no case later than three business days.

(3) A petition for emergency relief shall additionally allege that the respondent presents an immediate and present risk of causing personal injury or death to the respondent or another person.

(4) A petition for relief must describe, to the best of the petitioner’s knowledge, the types and location of any firearms believed to be in the possession of the respondent.

3. An order issued under this section shall:

(1) Prohibit the respondent from possessing, using, purchasing, manufacturing, or otherwise receiving a firearm;

(2) Order the respondent to provisionally surrender any firearms in the respondent’s possession or control, and any license or permit allowing the respondent to possess or acquire a firearm, to any law enforcement officer presenting the order or to a law enforcement officer as directed by the officer or as stated in the order; and

(3) Inform the respondent of the time and place of any hearing to determine whether the respondent will be subject to a continuing prohibition on possessing and acquiring firearms.

4. Any extreme risk protection order or extension of such order shall be forwarded by the court within twenty-four hours to the local law enforcement agency with jurisdiction over the residence of the respondent. Upon receipt of the order, the law enforcement agency shall make the order available to the National Instant Criminal Background Check System and any state system used to identify person who are prohibited from possessing a firearm. When an order expires or is otherwise terminated by the court, the court must submit a request that the order be removed from the National Instant Background Check System. Each law enforcement agency shall make available to other law enforcement officers, through a system for verification, information as to the existence and status of any extreme risk protection order issued under this section.

5. (1) Any person filing an application under this section containing information the petitioner knows to be materially false or for the purpose of harassing the respondent is guilty of a class A misdemeanor.

(2) Any person who knowingly violates an order issued under this section, including by possessing or acquiring a firearm in violation of the order or failing to timely surrender a firearm as required by the order is guilty of a class A misdemeanor.

(3) Any person who knowingly provides the subject of an order issued under this section access to a firearm is guilty of a class A misdemeanor.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-143)**

Subject

Initiative petition from Greta Bax regarding a proposed constitutional amendment to Article I. (Received September 13, 2023)

Date

October 3, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **Kansas City Board of Police Commissioners**, and the **Metropolitan Police Department - City of St. Louis**.

Assumptions

Officials from the **Attorney General's office** indicated:

TO: Sheri Hoffman

DATE: September 21, 2023

FROM: Diana Haines

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article 1 (2024-143)

All six of the proposed amendments to Article I would place certain restrictions on Missouri's constitutional right to bear arms. The Attorney General's Office (AGO) expects that the enactment of any of these proposals would result in increased litigation challenging the constitutionality of the amendments, which the AGO would be responsible for defending and would likely have to hire conflict counsel to participate in given the AGO's publicly stated position strongly in favor of Second Amendment protections. Given the positional conflict that would require conflict counsel, the total cost to Missouri could exceed \$9 million by way of increased legal costs for the Attorney General's Office.

Analysis

There is one primary area where these initiative petitions would substantially increase costs to Missouri. The petitions would trigger significant legal costs because they will certainly give rise to legal challenges in which the Attorney General's Office would be involved and would have to retain conflict counsel.

I. The petitions will increase legal costs for the Attorney General's Office.

The AGO would incur substantial legal costs relating to the proposed petitions. First, the petitions involve a controversial topic that is sure to

motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting Second Amendment rights. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of Second Amendment protections, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

Even a cursory analysis of the proposed initiative petitions raise significant constitutional concerns. As such, the State of Missouri may be required to pay the attorneys' fees of parties that challenge the petitions and any resulting regulations approved by local governments.

All told, each lawsuit could cost approximately \$1.5 million based on the AGO's estimates of the additional personnel and resources needed. Challenges would likely be filed in multiple jurisdictions. The \$9 million estimate in additional legal costs is based on one jurisdictional challenge to each of the proposed amendments, meaning the likelihood of total costs exceeding the \$9 million estimate is highly likely as challenges to each petition could be filed in multiple jurisdictions.

Conclusion

These proposed initiative petitions would give the state unconstitutional control over Missourian's second amendment rights. Not only is that wrong-headed, it is expensive. If enacted, these proposed provisions would have a severe, negative economic impact on the State of Missouri. Resulting litigation would force the AGO to expend significant funds on anticipated litigation, likely including the hiring of outside counsel.

The AGO currently estimates the fiscal impact will be at least \$9 million, but it could be more. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-143 and determined there is no fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for initiative petition 24-143 proposing to amend Article I, version 5.

Officials from the **Department of Revenue** indicated after a thorough review, their department assumes this IP will not have a fiscal or administrative impact on their department or their operations.

Officials from the **Department of Public Safety** indicated that the Missouri State Highway Patrol is the only division of their department with an impact. This initiative petition would require the Office of State Court Administrators (OSCA) to add programming to the Justice Information System (JIS)/Show Me Courts System to support the protection order portion.

The petition requests the addition of an Extreme Risk Protection Order in the Missouri Uniform Law Enforcement System (MULES). If passed, an Extreme Risk Protection Order entry into MULES would require updates to the existing MULES database Protection Order File to separate Extreme Risk entries from standard protection order entries. NCIC recently activated a set of transactions for entry and maintenance of Extreme Risk Protection Orders; however, since no statutory basis for the entry of these records currently exists at the state level, no programming has been put in place to allow the MULES system

to interface with this new NCIC functionality. Development of this updated MULES functionality would be a fiscal impact to the Patrol.

Task:	Costs:
Program changes to MULES	
Management Cost	
(100 hours @ \$56.68)	\$5,668.00
Analyst/Developer Cost	
(1,500 hours @ \$50.02)	\$75,030.00
Total Fiscal Impact:	\$80,698.00

An "Extreme Risk Protection Order" is redundant given that firearms privileges are already restricted for respondents of full orders of protection under 18 USC 922 when the court finds that there is a credible threat to the petitioner/protected.

In situations where 18 U.S.C. §911 does not apply to the respondent of a protection order, such as in ex parte orders or in situations where the relationship between the petitioner and respondent is not intimate in nature, and the judge has the authority, if they deem it necessary, to remove the respondent's right to purchase, possess, or receive a firearm by using NCIC Protection Order Condition 07 which states:

The subject is prohibited from possessing and/or purchasing a firearm or other weapons as identified in the Miscellaneous Field.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to firearms does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-143 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact is expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-143.

Officials from the **Office of Administration** indicated this proposal relating to firearms does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-143 a proposed constitutional amendment to Article I, version 5 (2024-143), there may be some impact but there is no way to quantify that currently. Any significant changes will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender (SPD)** indicated initiative petition 24-143 will have a fiscal impact on SPD. The creation of the new offense of violating an Extreme Risk Order of Protection, as a class A misdemeanor would create additional caseload for MSPD. A case of this type would require an average of 13 hours of casework per the National Public Defense Workload Study. A SPD attorney handling only these additional cases would be able to handle approximately 160 new cases per year. It is unknown how many additional cases will be charged if this initiative petition is passed, but

if 1,000 new cases were charged statewide and those charged were eligible for SPD representation, six additional attorneys would be needed. If 5,000 new cases were charged and those charged were eligible for SPD representation, thirty additional attorneys would be needed. If, however, the punishment for this new offense did not involve jail time, the cases would not be eligible for SPD representation.

Officials from the **Office of the State Treasurer** indicated no identifiable fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-143 proposing to amend Article I, Version 5.

Officials from **St. Louis County** indicated this proposed constitutional amendment should have no fiscal impact on St. Louis County.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated unknown of the estimated cost or savings for the initiative petition.

Officials from **Jennings School District** indicated:

- While there does not appear to be a direct expense or revenue to school districts due to this legislation, any legislation that limits access to firearms can have an indirect positive effect on decreasing expenses for school districts if the legislation keeps more guns out of kids' hands and mitigates against unlawful use of firearms.
- School districts spend significant amounts on security due to threats and actual use of firearms on campus, especially in recent weeks at football games. Our district spends about \$750 per home football game and \$500 per home basketball game to hire off-duty police officers to mitigate against handguns. Over time, I believe districts can halve their expenses on this if we have a 50% reduction in gun displays/use on campus.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated the University of Missouri System does not foresee any significant impact.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and determined it has no revenue or expense impact on their college. They assume the petition would not affect their law enforcement personnel.

Officials from the **Kansas City Board of Police Commissioners** indicated no fiscal impact.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, and the Metropolitan Police Department - City of St. Louis.**

Fiscal Note Summary

The Attorney General estimates increased legal costs of at least \$9 million. Other state entities estimate a cost of \$81,000 for required computer system updates. Local governmental entities estimate no costs or savings.

STATE AUDITORS OFFICE

RE: Petition approval request from Greta Bax regarding a proposed constitutional amendment to Article I, version 4 (2024-142)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Greta Bax on September 12, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article I of the Constitution adopting one new section to be known as Article I, Section 36.

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article I of the Constitution is revised by adopting one new section to be known as Article I, Section 36, to read as follows:

Section 36. 1. No person shall conceal and carry a firearm without a conceal and carry permit issued by the sheriff of the county in which the person resides. All applicants for conceal and carry permits must be at least eighteen years of age and pass a background check using the National Instant Background Criminal Check System, as described in 18 U.S.C. § 922(t).

2. Any person who conceals and carries a firearm without the necessary permit is guilty of a class E felony.

3. Law enforcement agencies responsible for issuing conceal and carry permits may charge a fee to implement the provisions of this section in connection with the costs that may be associated with running the required background check. Such fee shall not exceed one hundred dollars per background check.

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article 1 (2024-142)

All six of the proposed amendments to Article I would place certain restrictions on Missouri's constitutional right to bear arms. The Attorney General's Office (AGO) expects that the enactment of any of these proposals would result in increased litigation challenging the constitutionality of the amendments, which the AGO would be responsible for defending and would likely have to hire conflict counsel to participate in given the AGO's publicly stated position strongly in favor of Second Amendment protections. Given the positional conflict that would require conflict counsel, the total cost to Missouri could exceed \$9 million by way of increased legal costs for the Attorney General's Office.

Analysis

There is one primary area where these initiative petitions would substantially increase costs to Missouri. The petitions would trigger significant legal costs because they will certainly give rise to legal challenges in which the Attorney General's Office would be involved and would have to retain conflict counsel.

I. The petitions will increase legal costs for the Attorney General's Office.

The AGO would incur substantial legal costs relating to the proposed petitions. First, the petitions involve a controversial topic that is sure to

motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting Second Amendment rights. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of Second Amendment protections, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

Even a cursory analysis of the proposed initiative petitions raise significant constitutional concerns. As such, the State of Missouri may be required to pay the attorneys' fees of parties that challenge the petitions and any resulting regulations approved by local governments.

All told, each lawsuit could cost approximately \$1.5 million based on the AGO's estimates of the additional personnel and resources needed. Challenges would likely be filed in multiple jurisdictions. The \$9 million estimate in additional legal costs is based on one jurisdictional challenge to each of the proposed amendments, meaning the likelihood of total costs exceeding the \$9 million estimate is highly likely as challenges to each petition could be filed in multiple jurisdictions.

Conclusion

These proposed initiative petitions would give the state unconstitutional control over Missourian's second amendment rights. Not only is that wrong-headed, it is expensive. If enacted, these proposed provisions would have a severe, negative economic impact on the State of Missouri. Resulting litigation would force the AGO to expend significant funds on anticipated litigation, likely including the hiring of outside counsel.

The AGO currently estimates the fiscal impact will be at least \$9 million, but it could be more. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-142 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated while most employed by their department are not required to carry a firearm, this proposal would likely affect those employed by their department in a specific unit of probation and parole who are required to carry a firearm. There may be an increased cost to their department should counties choose to charge for background checks.

Section 36 is proposed and outlines regulations for obtaining and presenting a conceal and carry permit and penalty provisions for concealing and carrying a firearm without the necessary permit issued by the sheriff of the county where the person resides. To conceal and carry a firearm without the necessary permit is considered a nonviolent class E felony offense; therefore, the intent of the bill is to create a new class E felony offense.

For each new nonviolent class E felony, their department estimates one person could be sentenced to prison and two to probation. The average sentence for a nonviolent class E felony offense is 3.4 years, of which 2.1 years will be served in prison with 1.4 years to first release. The remaining 1.3 years will be on parole. Probation sentences will be 3 years.

The cumulative impact on their department is estimated to be 2 additional offenders in prison and 7 additional offenders on field supervision by FY 2027.

Change in prison admissions and probation openings with legislation-Class E Felony (nonviolent)

The total estimated net effect on all state funds will be (\$4,750) in fiscal year 2025, (\$19,378) in fiscal year 2026, and (\$19,766) in fiscal year 2027.

The total estimated net effect on all federal funds will be \$0 in fiscal year 2025, 2026, and 2027.

The total estimated net effect on all local funds will be \$0 in fiscal year 2025, 2026, and 2027.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for initiative petition 24-142 proposing to amend Article I, version 4.

Officials from the **Department of Revenue** indicated after a thorough review, their department assumes this IP will not have a fiscal or administrative impact on their department or their operations.

Officials from the **Department of Public Safety** indicated that the Missouri State Highway Patrol is the only division of their department with an impact. This initiative petition would require an individual to obtain a permit to conceal and carry a firearm. This would require each applicant to pass a NICS check as well as a fingerprint criminal record check pursuant to 571.101 RSMo. Prior to 2017, these checks were required to carry a concealed firearm. Based upon an average of the previous four years (2013-2016), the Patrol conducted 39,318 fingerprint criminal record checks per year. Since 2017, the Patrol conducted an annual average of 12,360 fingerprint criminal record checks per year. The Patrol expects the initiative would increase the number of checks back to the pre-2017 average number of 39,318 checks per year. The state fee for a fingerprint based criminal record check is \$14.00 per request, which the Patrol maintains in Criminal Records System Fund. The federal fee for fingerprint based criminal records checks is \$13.25 per request, of which the Patrol retains \$2.00. A total of \$16.00 would be retained in the Criminal Record System Fund per

request. Based on the estimate of 39,318 fingerprint criminal records checks per year, the Criminal Record System Fund would realize \$629,088 in annual revenue.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to firearms does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-142 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact is expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-142.

Officials from the **Office of Administration** indicated this proposal relating to firearms does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-142 a proposed constitutional amendment to Article I, version 4 (2024-142), there may be some impact but there is no way to quantify that currently. Any significant changes will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri

Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender (SPD)** indicated initiative petition 24-142 will have a fiscal impact on SPD. The creation of carrying a concealed weapon without a permit as a class E felony would create additional caseload for MSPD. A case of this type would require an average of 35 hours of casework per the National Public Defense Workload Study. A SPD attorney handling only these additional cases would be able to handle approximately 60 new cases per year. It is unknown how many additional cases will be charged if this initiative petition is passed, but if 1,000 new cases were charged statewide and those charged were eligible for SPD representation, sixteen additional attorneys would be needed. If 5,000 new cases were charged and those charged were eligible for SPD representation, eighty additional attorneys would be needed.

Officials from the **Office of the State Treasurer** indicated no identifiable fiscal impact to their office.

Officials from **Clay County** indicated:

Based on history prior to open carry, they estimate the following impact from this petition:

- ~\$150,000 in additional revenues annually from CCW permits
- ~\$60,000 in expenditures annually for additional CCW Clerk staffing compensation costs
- ~\$90,000 in savings annually

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-142 proposing to amend Article I, Version 4.

Officials from **St. Louis County** indicated this proposed constitutional amendment should have no fiscal impact on St. Louis County.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Jennings School District** indicated:

- While there does not appear to be a direct expense or revenue to school districts due to this legislation, any legislation that limits access to firearms can have an indirect positive effect on decreasing expenses for school districts if the legislation keeps more guns out of kids' hands and mitigates against unlawful use of firearms.
- School districts spend significant amounts on security due to threats and actual use of firearms on campus, especially in recent weeks at football games. Our district spends about \$750 per home football game and \$500 per home basketball game to hire off-duty police officers to mitigate against handguns. Over time, I believe districts can halve their expenses on this if we have a 50% reduction in gun displays/use on campus.

Officials from **Wellsville-Middletown R-1 School District** indicated unknown of the estimated cost or savings for the initiative petition.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated the University of Missouri System does not foresee any significant impact.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and determined it has no revenue or expense impact on their college.

Officials from the **Kansas City Board of Police Commissioners** indicated no fiscal impact.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, and the Metropolitan Police Department - City of St. Louis.**

Fiscal Note Summary

The Attorney General estimates increased legal costs of at least \$9 million. Other state governmental entities estimate costs of at least \$19,000 beginning in the first full year of implementation and annual revenue of \$629,000. Local governmental entities estimate annual revenue of at least \$150,000 and annual costs of at least \$60,000.

STATE AUDITORS OFFICE

RE: Petition approval request from Greta Bax regarding a proposed constitutional amendment to Article I, version 3 (2024-141)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Greta Bax on September 12, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey

NOTICE: The proposed amendment revises Article I of the Constitution adopting one new section to be known as Article I, Section 36.

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article I of the Constitution is revised by adopting one new section to be known as Article I, Section 36, to read as follows:

Section 36. 1. No person shall conceal and carry a firearm without a conceal and carry permit issued by the sheriff of the county in which the person resides. All applicants for conceal and carry permits must be at least eighteen years of age, pass a background check using the National Instant Background Criminal Check System, as described in 18 U.S.C. § 922(t), and complete firearms safety training and submit a signed copy of a certificate of firearms safety training course completion. Such certificate must be signed by a qualified firearms safety instructor. Any person issued a conceal and carry permit under this section shall carry the permit at all times the person carries a concealed firearm and shall display the permit and a state or federal government-issued photo identification upon the request of any peace officer.

2. Any person who conceals and carries a firearm without the necessary permit is guilty of a class E felony.

3. Any person who fails to comply with the duty to carry and display a conceal and carry permit may be issued a citation for an amount not to exceed fifty dollars.

4. Law enforcement agencies responsible for issuing conceal and carry permits may charge a fee to implement the provisions of this section in connection with the costs that may be associated with running the required background check. Such fee shall not exceed one hundred dollars per background check.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-141)**

Subject

Initiative petition from Greta Bax regarding a proposed constitutional amendment to Article I. (Received September 13, 2023)

Date

October 3, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **Kansas City Board of Police Commissioners**, and the **Metropolitan Police Department - City of St. Louis**.

Assumptions

Officials from the **Attorney General's office** indicated:

TO: Sheri Hoffman

DATE: September 21, 2023

FROM: Diana Haines

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article 1 (2024-140)

All six of the proposed amendments to Article I would place certain restrictions on Missouri's constitutional right to bear arms. The Attorney General's Office (AGO) expects that the enactment of any of these proposals would result in increased litigation challenging the constitutionality of the amendments, which the AGO would be responsible for defending and would likely have to hire conflict counsel to participate in given the AGO's publicly stated position strongly in favor of Second Amendment protections. Given the positional conflict that would require conflict counsel, the total cost to Missouri could exceed \$9 million by way of increased legal costs for the Attorney General's Office.

Analysis

There is one primary area where these initiative petitions would substantially increase costs to Missouri. The petitions would trigger significant legal costs because they will certainly give rise to legal challenges in which the Attorney General's Office would be involved and would have to retain conflict counsel.

I. The petitions will increase legal costs for the Attorney General's Office.

The AGO would incur substantial legal costs relating to the proposed petitions. First, the petitions involve a controversial topic that is sure to

motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting Second Amendment rights. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of Second Amendment protections, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

Even a cursory analysis of the proposed initiative petitions raise significant constitutional concerns. As such, the State of Missouri may be required to pay the attorneys' fees of parties that challenge the petitions and any resulting regulations approved by local governments.

All told, each lawsuit could cost approximately \$1.5 million based on the AGO's estimates of the additional personnel and resources needed. Challenges would likely be filed in multiple jurisdictions. The \$9 million estimate in additional legal costs is based on one jurisdictional challenge to each of the proposed amendments, meaning the likelihood of total costs exceeding the \$9 million estimate is highly likely as challenges to each petition could be filed in multiple jurisdictions.

Conclusion

These proposed initiative petitions would give the state unconstitutional control over Missourian's second amendment rights. Not only is that wrong-headed, it is expensive. If enacted, these proposed provisions would have a severe, negative economic impact on the State of Missouri. Resulting litigation would force the AGO to expend significant funds on anticipated litigation, likely including the hiring of outside counsel.

The AGO currently estimates the fiscal impact will be at least \$9 million, but it could be more. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-141 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated this proposal would require individuals carrying a firearm to obtain a conceal and carry permit issued by the sheriff of the county in which the person resides, and the carrier must be at least 18, pass a background check, complete a safety course and carry a permit that must be displayed when requested by any peace officer. Law enforcement agencies issuing the permits may charge no more than \$100 per background check. There is no exception for state or other government employees required to carry as a condition of their employment.

Section 36 is proposed and outlines regulations for obtaining and presenting a conceal and carry permit and penalty provisions for concealing and carrying a firearm without the necessary permit issued by the sheriff of the county where the person resides. To conceal and carry a firearm without the necessary permit is considered a nonviolent class E felony offense; therefore, the intent of the bill is to create a new class E felony offense.

For each new nonviolent class E felony, the department estimates one person could be sentenced to prison and two to probation. The average sentence for a nonviolent class E felony offense is 3.4 years, of which 2.1 years will be served in prison with 1.4 years to first release. The remaining 1.3 years will be on parole. Probation sentences will be 3 years.

The cumulative impact on their department is estimated to be 2 additional offenders in prison and 7 additional offenders on field supervision by FY 2027.

Change in prison admissions and probation openings with legislation-Class E Felony (nonviolent)

The total estimated net effect on all state funds will be (\$4,750) in fiscal year 2025, (\$19,378) in fiscal year 2026, and (\$19,766) in fiscal year 2027.

The total estimated net effect on all federal funds will be \$0 in fiscal year 2025, 2026, and 2027.

The total estimated net effect on all local funds will be \$0 in fiscal year 2025, 2026, and 2027.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for initiative petition 24-141 proposing to amend Article I, version 3.

Officials from the **Department of Revenue** indicated after a thorough review, their department assumes this IP will not have a fiscal or administrative impact on their department or their operations.

Officials from the **Department of Public Safety** indicated that the Missouri State Highway Patrol is the only division of their department with an impact. This initiative petition would require an individual to obtain a permit to conceal and carry a firearm. This would require each applicant to pass a NICS check as well as a fingerprint criminal record check pursuant to 571.101 RSMo. Prior to 2017, these checks were required to carry a concealed firearm. Based upon an average of the previous four years (2013-2016), the Patrol conducted 39,318 fingerprint criminal record checks per year. Since 2017, the Patrol conducted an annual average of 12,360 fingerprint criminal record checks per year. The Patrol expects the initiative would increase the number of checks back to the pre-2017 average number of 39,318 checks per year. The state fee for a fingerprint based criminal record check is \$14.00 per request, which the Patrol maintains in Criminal Records System Fund. The federal fee for fingerprint based criminal records checks is \$13.25 per request, of which the Patrol retains \$2.00. A total of \$16.00 would be retained in the Criminal Record System Fund per

request. Based on the estimate of 39,318 fingerprint criminal records checks per year, the Criminal Record System Fund would realize \$629,088 in annual revenue.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to firearms does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-141 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact is expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-141.

Officials from the **Office of Administration** indicated this proposal relating to firearms does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-141 a proposed constitutional amendment to Article I, version 3 (2024-141), there may be some impact but there is no way to quantify that currently. Any significant changes will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri

Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender (SPD)** indicated initiative petition 24-141 will have a fiscal impact on SPD. The creation of carrying a concealed weapon without a permit as a class E felony would create additional caseload for MSPD. A case of this type would require an average of 35 hours of casework per the National Public Defense Workload Study. A SPD attorney handling only these additional cases would be able to handle approximately 60 new cases per year. It is unknown how many additional cases will be charged if this initiative petition is passed, but if 1,000 new cases were charged statewide and those charged were eligible for SPD representation, sixteen additional attorneys would be needed. If 5,000 new cases were charged and those charged were eligible for SPD representation, eighty additional attorneys would be needed.

Officials from the **Office of the State Treasurer** indicated no identifiable fiscal impact to their office.

Officials from **Clay County** indicated:

Based on history prior to open carry, they estimate the following impact from this petition:

- ~\$150,000 in additional revenues annually from CCW permits
- ~\$60,000 in expenditures annually for additional CCW Clerk staffing compensation costs
- ~\$90,000 in savings annually

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-141 proposing to amend Article I, Version 3.

Officials from **St. Louis County** indicated this proposed constitutional amendment should have no fiscal impact on St. Louis County.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Jennings School District** indicated:

- While there does not appear to be a direct expense or revenue to school districts due to this legislation, any legislation that limits access to firearms can have an indirect positive effect on decreasing expenses for school districts if the legislation keeps more guns out of kids' hands and mitigates against unlawful use of firearms.
- School districts spend significant amounts on security due to threats and actual use of firearms on campus, especially in recent weeks at football games. Our district spends about \$750 per home football game and \$500 per home basketball game to hire off-duty police officers to mitigate against handguns. Over time, I believe districts can halve their expenses on this if we have a 50% reduction in gun displays/use on campus.

Officials from **Wellsville-Middletown R-1 School District** indicated unknown of the estimated cost or savings for the initiative petition.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated the University of Missouri System does not foresee any significant impact.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and determined it has no revenue or expense impact on their college. They assume the petition would not affect their law enforcement personnel.

Officials from the **Kansas City Board of Police Commissioners** indicated no fiscal impact.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, and the Metropolitan Police Department - City of St. Louis.**

Fiscal Note Summary

The Attorney General estimates increased legal costs of at least \$9 million. Other state governmental entities estimate costs of at least \$19,000 beginning in the first full year of implementation and annual revenue of \$629,000. Local governmental entities estimate annual revenue of at least \$150,000 and annual costs of at least \$60,000.

RE: Petition approval request from Greta Bax regarding a proposed constitutional amendment to Article I, version 2 (2024-140)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Greta Bax on September 12, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article I of the Constitution adopting one new section to be known as Article I, Section 36.

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article I of the Constitution is revised by adopting one new section to be known as Article I, Section 36, to read as follows:

Section 36. 1. No person shall sell a firearm, including at gun shows and private sales, to another person unless a licensed firearms dealer first conducts a background check using the National Instant Background Criminal Check System, as described in 18 U.S.C. § 922(t), and the buyer passes such check. Both the buyer and seller of the firearm shall appear jointly with the firearm and request that a licensed firearms dealer conduct a background check on the buyer.

2. Any person who sells a firearm to another person in violation of this section:

(1) For the first violation, is guilty of a class A misdemeanor;

(2) For the second violation, is guilty of a class E felony;

(3) For the third and subsequent violations, is guilty of a class D felony.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-140)**

Subject

Initiative petition from Greta Bax regarding a proposed constitutional amendment to Article I. (Received September 13, 2023)

Date

October 3, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **Kansas City Board of Police Commissioners**, and the **Metropolitan Police Department - City of St. Louis**.

Assumptions

Officials from the **Attorney General's office** indicated:

TO: Sheri Hoffman

DATE: September 21, 2023

FROM: Diana Haines

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article 1 (2024-140)

All six of the proposed amendments to Article I would place certain restrictions on Missouri's constitutional right to bear arms. The Attorney General's Office (AGO) expects that the enactment of any of these proposals would result in increased litigation challenging the constitutionality of the amendments, which the AGO would be responsible for defending and would likely have to hire conflict counsel to participate in given the AGO's publicly stated position strongly in favor of Second Amendment protections. Given the positional conflict that would require conflict counsel, the total cost to Missouri could exceed \$9 million by way of increased legal costs for the Attorney General's Office.

Analysis

There is one primary area where these initiative petitions would substantially increase costs to Missouri. The petitions would trigger significant legal costs because they will certainly give rise to legal challenges in which the Attorney General's Office would be involved and would have to retain conflict counsel.

I. The petitions will increase legal costs for the Attorney General's Office.

The AGO would incur substantial legal costs relating to the proposed petitions. First, the petitions involve a controversial topic that is sure to

motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting Second Amendment rights. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of Second Amendment protections, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

Even a cursory analysis of the proposed initiative petitions raise significant constitutional concerns. As such, the State of Missouri may be required to pay the attorneys' fees of parties that challenge the petitions and any resulting regulations approved by local governments.

All told, each lawsuit could cost approximately \$1.5 million based on the AGO's estimates of the additional personnel and resources needed. Challenges would likely be filed in multiple jurisdictions. The \$9 million estimate in additional legal costs is based on one jurisdictional challenge to each of the proposed amendments, meaning the likelihood of total costs exceeding the \$9 million estimate is highly likely as challenges to each petition could be filed in multiple jurisdictions.

Conclusion

These proposed initiative petitions would give the state unconstitutional control over Missourian's second amendment rights. Not only is that wrong-headed, it is expensive. If enacted, these proposed provisions would have a severe, negative economic impact on the State of Missouri. Resulting litigation would force the AGO to expend significant funds on anticipated litigation, likely including the hiring of outside counsel.

The AGO currently estimates the fiscal impact will be at least \$9 million, but it could be more. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-140 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated Section 36 is proposed and outlines penalty provisions for selling a firearm without the proper background check. This section stipulates that a legal sale must be preceded by a licensed firearms dealer conducting, and the buyer passing, a background check using the National Instant Background Criminal Check System.

A first violation to this section is a class A misdemeanor. As misdemeanors fall outside the purview of the Department of Corrections, its impact will not be included in this response. A second violation is a class E felony, and any subsequent violations are class D felonies. Therefore, the intent of the bill, as it relates to the Department of Corrections, is to create a new class E felony offense and a new class D felony offense.

For each new nonviolent class E felony, their department estimates one person will be sentenced to prison and two to probation. The average sentence for a nonviolent class E felony offense is 3.4 years, of which 2.1 years will be served in prison with 1.4 years to first release. The remaining 1.3 years will be on parole. Probation sentences will be 3 years.

The combined cumulative impact of a new Class D felony and a new Class E felony on their department is estimated to be 10 additional offenders in prison and 29 additional offenders on field supervision by FY 2029.

Change in prison admissions and probation openings with legislation

The total estimated net effect on all state funds will be (\$18,998) in fiscal year 2025, (\$77,512) in fiscal year 2026, and (\$102,820) in fiscal year 2029.

The total estimated net effect on all federal funds will be \$0 in fiscal year 2025, 2026, and 2029.

The total estimated net effect on all local funds will be \$0 in fiscal year 2025, 2026, and 2029.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for initiative petition 24-140 proposing to amend Article I, version 2.

Officials from the **Department of Revenue** indicated after a thorough review, their department assumes this IP will not have a fiscal or administrative impact on their department or their operations.

Officials from the **Department of Public Safety** indicated that the Missouri State Highway Patrol is the only division of their department with an impact. The Patrol anticipates no fiscal impact. This initiative petition would prohibit the sale of a firearm, including at gun shows and private sales, to another person unless a licensed firearms dealer (FFL) conducts a National Instant Criminal Background Check (NICS check) on the buyer.

Prohibitions against firearms sales are governed by the federal government and determined by the Federal Bureau of Investigation (FBI), and the National Instant Criminal Background Check System (NICS). NICS checks contain information from the Interstate Identification Index (III), the National Crime Information Center (NCIC), and the NICS Indices, which is restricted from public access.

The Brady Act of 1993 established federal firearm prohibitions. Private citizens and companies are only authorized to receive Missouri open records for this purpose, which would not provide the required information needed to make the determination.

Additionally, the Patrol recommends adding exemption language for law enforcement personnel, as defined in Section 590.1040, or members of the United States Armed Forces, if acting in an official capacity.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to firearms does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-140 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact is expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-140.

Officials from the **Office of Administration** indicated this proposal relating to firearms does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-140 a proposed constitutional amendment to Article I, version 2 (2024-140), there may be some impact but there is no way to quantify that currently. Any significant changes will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo.

requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender (SPD)** indicated initiative petition 24-140 will have a fiscal impact on SPD. The creation of the new offense of selling a firearm without a background check, as a class A misdemeanor or a class D or E felony would create additional caseload for MSPD. A case of this type would require an average somewhere between 13 to 35 hours of casework per the National Public Defense Workload Study. A SPD attorney handling only these additional cases would be able to handle approximately 60 to 160 new cases per year. It is unknown how many additional cases will be charged if this initiative petition is passed, but if 1,000 new cases were charged statewide and those charged were eligible for SPD representation, six to sixteen additional attorneys would be needed. If 5,000 new cases were charged and those charged were eligible for SPD representation, thirty to eighty additional attorneys would be needed. If, however, the punishment for this new offense did not involve jail time, the cases would not be eligible for SPD representation.

Officials from the **Office of the State Treasurer** indicated no identifiable fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-140 proposing to amend Article I, Version 2.

Officials from **St. Louis County** indicated this proposed constitutional amendment should have no fiscal impact on St. Louis County.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Jennings School District** indicated:

- While there does not appear to be a direct expense or revenue to school districts due to this legislation, any legislation that limits access to firearms can have an indirect positive effect on decreasing expenses for school districts if the legislation keeps more guns out of kids' hands and mitigates against unlawful use of firearms.
- School districts spend significant amounts on security due to threats and actual use of firearms on campus, especially in recent weeks at football games. Our district spends about \$750 per home football game and \$500 per home basketball game to hire off-duty police officers to mitigate against handguns. Over time, I believe districts can halve their expenses on this if we have a 50% reduction in gun displays/use on campus.

Officials from **Wellsville-Middletown R-1 School District** indicated unknown of the estimated cost or savings for the initiative petition.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated the University of Missouri System does not foresee any significant impact.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and determined it has no revenue or expense impact on their college. They assume the petition would not affect their law enforcement personnel.

Officials from the **Kansas City Board of Police Commissioners** indicated no fiscal impact.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, and the Metropolitan Police Department - City of St. Louis.**

Fiscal Note Summary

The Attorney General estimates increased legal costs of at least \$9 million. Other state governmental entities estimate annual costs of at least \$103,000 by fiscal year 2029. Local governmental entities estimate no costs or savings.

NOTICE: The proposed amendment revises Article I of the Constitution adopting one new section to be known as Article I, Section 36.

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article I of the Constitution is revised by adopting one new section to be known as Article I, Section 36, to read as follows:

Section 36. 1. No person shall conceal and carry a firearm without a conceal and carry permit issued by the sheriff of the county in which the person resides. All applicants for conceal and carry permits must pass a background check using the National Instant Background Criminal Check System, as described in 18 U.S.C. § 922(t), and meet the permitting requirements as provided in sections 571.101 to 571.126, RSMo, as those provisions exist on January 1, 2023.

2. Any person who conceals and carries a firearm without the necessary permit is guilty of a class E felony.

3. Law enforcement agencies responsible for issuing conceal and carry permits may charge a fee to implement the provisions of this section in connection with the costs that may be associated with running the required background check. Such fee shall not exceed one hundred dollars per background check.

All told, each lawsuit could cost approximately \$1.5 million based on the AGO's estimates of the additional personnel and resources needed. Challenges would likely be filed in multiple jurisdictions. The \$9 million estimate in additional legal costs is based on one jurisdictional challenge to each of the proposed amendments, meaning the likelihood of total costs exceeding the \$9 million estimate is highly likely as challenges to each petition could be filed in multiple jurisdictions.

Conclusion

These proposed initiative petitions would give the state unconstitutional control over Missourian's second amendment rights. Not only is that wrong-headed, it is expensive. If enacted, these proposed provisions would have a severe, negative economic impact on the State of Missouri. Resulting litigation would force the AGO to expend significant funds on anticipated litigation, likely including the hiring of outside counsel.

The AGO currently estimates the fiscal impact will be at least \$9 million, but it could be more. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-139 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated while most employed by their department are not required to carry a firearm, this proposal would likely affect those employed by their department in a specific unit of probation and parole who are required to carry a firearm. There may be an increased cost to their department should counties choose to charge for background checks.

Section 36 is proposed and outlines penalty provisions for concealing and carrying a firearm without a conceal and carry permit issued by the sheriff of the county where the person resides. These actions are considered nonviolent class E felony offenses.

For each new nonviolent class E felony, their department estimates one person could be sentenced to prison and two to probation. The average sentence for a nonviolent class E felony offense is 3.4 years, of which 2.1 years will be served in prison with 1.4 years to first release. The remaining 1.3 years will be on parole. Probation sentences will be 3 years.

The cumulative impact on their department is estimated to be 2 additional offenders in prison and 7 additional offenders on field supervision by FY 2027.

Change in prison admissions and probation openings with legislation-Class E Felony (nonviolent)

The total estimated net effect on all state funds will be (\$4,750) in fiscal year 2025, (\$19,378) in fiscal year 2026, and (\$19,766) in fiscal year 2027.

The total estimated net effect on all federal funds will be \$0 in fiscal year 2025, 2026, and 2027.

The total estimated net effect on all local funds will be \$0 in fiscal year 2025, 2026, and 2027.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for initiative petition 24-139 proposing to amend Article I, version 1.

Officials from the **Department of Revenue** indicated after a thorough review, their department assumes this IP will not have a fiscal or administrative impact on their department or their operations.

Officials from the **Department of Public Safety** indicated that the Missouri State Highway Patrol is the only division of their department with an impact. This initiative petition would require an individual to obtain a permit to conceal and carry a firearm. This would require each applicant to pass a NICS check as well as a fingerprint criminal record check pursuant to 571.101 RSMo. Prior to 2017, these checks were required to carry a concealed firearm. Based upon an average of the previous four years (2013-2016), the Patrol conducted 39,318 fingerprint criminal record checks per year. Since 2017, the Patrol conducted an annual average of 12,360 fingerprint criminal record checks per year. The Patrol expects the initiative would increase the number of checks back to the pre-2017 average number of 39,318 checks per year. The state fee for a fingerprint based criminal record check is \$14.00 per request, which the Patrol maintains in Criminal Records System Fund. The federal fee for fingerprint based criminal records checks is \$13.25 per request, of which the Patrol retains \$2.00. A total of \$16.00 would be retained in the Criminal Record System Fund per

request. Based on the estimate of 39,318 fingerprint criminal records checks per year, the Criminal Record System Fund would realize \$629,088 in annual revenue.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to firearms does not directly financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-139 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact is expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-139.

Officials from the **Office of Administration** indicated this proposal relating to firearms does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-139 a proposed constitutional amendment to Article I, version 1 (2024-139), there may be some impact but there is no way to quantify that currently. Any significant changes will be reflected in future budget requests.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri

Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender (SPD)** indicated initiative petition 24-139 will have a fiscal impact on SPD. The creation of carrying a concealed weapon without a permit as a class E felony would create additional caseload for MSPD. A case of this type would require an average of 35 hours of casework per the National Public Defense Workload Study. A SPD attorney handling only these additional cases would be able to handle approximately 60 new cases per year. It is unknown how many additional cases will be charged if this initiative petition is passed, but if 1,000 new cases were charged statewide and those charged were eligible for SPD representation, sixteen additional attorneys would be needed. If 5,000 new cases were charged and those charged were eligible for SPD representation, eighty additional attorneys would be needed.

Officials from the **Office of the State Treasurer** indicated no identifiable fiscal impact to their office.

Officials from **Clay County** indicated:

Based on history prior to open carry, they estimate the following impact from this petition:

- ~\$150,000 in additional revenues annually from CCW permits
- ~\$60,000 in expenditures annually for additional CCW Clerk staffing compensation costs
- ~\$90,000 in savings annually

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-139 proposing to amend Article I, version 1.

Officials from **St. Louis County** indicated this proposed constitutional amendment should have no fiscal impact on St. Louis County.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Jennings School District** indicated:

- While there does not appear to be a direct expense or revenue to school districts due to this legislation, any legislation that limits access to firearms can have an indirect positive effect on decreasing expenses for school districts if the legislation keeps more guns out of kids' hands and mitigates against unlawful use of firearms.
- School districts spend significant amounts on security due to threats and actual use of firearms on campus, especially in recent weeks at football games. Our district spends about \$750 per home football game and \$500 per home basketball game to hire off-duty police officers to mitigate against handguns. Over time, I believe districts can halve their expenses on this if we have a 50% reduction in gun displays/use on campus.

Officials from **Wellsville-Middletown R-1 School District** indicated unknown of the estimated cost or savings for the initiative petition.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated the University of Missouri System does not foresee any significant impact.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and determined it has no revenue or expense impact on their college. They assume the petition would not affect their law enforcement personnel.

Officials from the **Kansas City Board of Police Commissioners** indicated no fiscal impact.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, and the Metropolitan Police Department - City of St. Louis.**

Fiscal Note Summary

The Attorney General estimates increased legal costs of at least \$9 million. Other state governmental entities estimate costs of at least \$19,000 beginning in the first full year of implementation and annual revenue of \$629,000. Local governmental entities estimate annual revenue of at least \$150,000 and annual costs of at least \$60,000.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 4 (2024-138)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on September 8, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

4. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control.

5. Retail and mobile license applicants shall be required to pay a license fee.

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses have been reimbursed, the remaining fees shall be deposited in the Compulsive Gambling Prevention Fund.

8. No licensee shall offer sports wagering to individuals in this state who are under twenty-one years of age.

9. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

10. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall promulgate reasonable rules including, but not limited to:

a. standards governing the security and integrity of sports wagering, including requiring the use of official league data from each applicable sports governing body headquartered in the United States to determine the outcome of in-play wagers on a professional athlete or sporting event if made available to licensees on commercially reasonable terms;

b. requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

c. prohibiting all sports wagering activity, including sports wagering promotional and advertising activity, within a sports district, unless approved by the professional sports team that plays its home games within the district, except such rules shall not prohibit any licensee from offering sports wagering through an online sports wagering platform to persons physically located within a sports district;

d. requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

e. standards for the use and distribution of monies from the Compulsive Gambling Prevention Fund to include, but not be limited to research, detection, and prevention of compulsive gambling in this state and the implementation of treatment and recovery programs or services related to compulsive gambling in this state;

f. establishing fines, placing licensees on probation, and revoking licenses for violations of this section; and

g. establishing a start date for all sports wagering that is not later than December 31, 2025. No sports wagering shall be offered in the state before such start date established by the Commission.

11. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in the state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(i) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(ii) to the Compulsive Gambling Prevention Fund until the Compulsive Gambling Prevention Fund has \$5,000,000 in total assets.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

12. There is hereby created in the state treasury the "Compulsive Gambling Prevention Fund", which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall stand appropriated without further legislative action.

13. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering patrons;

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee’s patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons.

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. “Commission,” means the Missouri Gaming Commission;

c. “Excursion gambling boat” means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. “License” means any retail license or mobile license.

e. “Licensee” means the holder of any license.

f. “Mobile license” means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. “Online sports wagering platform” means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate online sports wagering.

h. “Professional sports team” means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women’s National Basketball Association, or the National Women’s Soccer League.

i. “Retail license” means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. “Sports district,” means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. “Sports wagering,” means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events. Sports wagering shall not include a fantasy sports contest comprising multiple participants, not including a fantasy sports contest operator, in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. Sports wagering shall not include wagering on youth or high school events or wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant.

l. “Sports wagering operator,” means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

14. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

15. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-138)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article III. (Received September 11, 2023)

Date

September 29, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-138 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated there will be a fiscal impact for their department, but they are deferring to the Gaming Commission's revenue estimates.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(g) of the Missouri Constitution legalizing sports wagering in Missouri. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for this initiative petition proposing to amend Article III, version 4.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP 24-138 attempts to create a sports wagering program in the state of Missouri. For Sections 39(g)1- Section 39(g)4 the Department of Revenue (DOR) defers to the Missouri Gaming Commission for impact.

Section 39(g)5 requires retail and mobile license applicants to pay license fees. The amount of the fees are to be set by "the Commission". It is unclear the amount of fee that will be assessed or what criteria to use to set the fee.

Additionally, Section 39(g)5 says the fees will be "collected by the state". However, it does not indicate which Department or Commission will receive the fees for deposit. Additionally, it does not indicate which fund the fees are to be deposited into while waiting on the appropriation authority to make the transfers to the designated programs outlined in this proposal. DOR cannot collect or deposit revenue without constitutional or statutory authority and cannot transfer funds to a program without appropriation transfer authority.

DOR is unable to calculate the amount of the potential fees collected without knowing the number of eligible entities to receive the retail license or the amount of the fee set. DOR notes it cannot collect the fees the way the proposal is currently written.

DOR notes this proposal does not have a Section 39(g)6. It goes from Section 39(g)5 to Section 39(g)7.

Section 39(g)11 imposes a 10% wagering tax on the adjusted gross revenue of the licensee. Once again this proposal does not designate to whom the tax is to be paid. Additionally, it does not indicate how often the tax is to be remitted. It also fails to indicate where the tax is to be deposited while it is awaiting transfer to designated activities outlined in this proposal. DOR cannot collect or deposit revenue without constitutional or statutory authority and cannot transfer funds to a program without appropriation transfer authority.

For informational purposes, DOR notes that excursion gambling boats currently remit their gambling taxes they collect nightly. Should DOR be given responsibility for the collection of this sports wagering tax they would need to set up a computer system similar to the existing gambling tax system. DOR would need \$100,415 (\$95 per hour * 1,057 hours work) for creation of the new computer sports wagering tax system. Their department would also need 1 ACSR with an annual salary of \$36,628 to process payments and reports, and they will need regulatory authority to implement and to impose rules for the collection of any non-filed or late taxes.

DOR is unable to calculate the amount of the potential tax collected without knowing the number of eligible licensees. DOR defers to the MO Gaming Commission for the estimate of potential tax collected.

Comments

Sports districts may include more than intended.

Section 13(j) explains that "sports district" includes any Missouri stadium with a capacity over 11,500 that operates as home for one or more "professional sports team". It also extends to the surrounding area within 400 yards of such premises.

Section 13(h) which defines "professional sports team" includes both Major League Soccer (MLS) and National Women's Soccer League (NWSL).

CITYPARK, which is home to the MLS team the St. Louis City SC is in downtown St. Louis. The 400 yard extension will potentially cover multiple streets with private retail and residential locations.

Soon the planned KC Current Stadium, home to the NWSL team the Kansas City Current will also be located in close proximity to private locations. Built within the Berkley Riverfront Park, the stadium will also be next to a public park.

Promotional and advertising activity may include more than intended.

While not defined, the "promotional and advertising activity" prohibited could include lawful commercial speech. This could trigger first amendment issues as it regulates lawful commercial advertisements that are not misleading nor deceptive. Based on the four-part test of Central Hudson, this restriction could face problems as advertisements are allowed within the area if approved by the professional sports team that plays in the district. Part 2 of the test asks if the government has a substantial interest in the restriction and part 3 asks if the restriction directly and materially advances the interest. It will be difficult to advance an interest that allows certain wagering advertisements and not others. Further, under Section 10(c) the sport teams themselves approve the messages, therefore the government has no oversight on what is approved or rejected. Also, certain government policies utilizing an unrestricted discretionary approval process have been found to be unconstitutional restrictions on speech.

Further, as it regulates only sports wagering it is a content-based restriction, and it could be suggested that as it only restricts the promotion or advertising of sports wagering and not anything related to advocating against sports wagering, it is a viewpoint-based restriction. This could increase the scrutiny the restriction would have to overcome past that of normal commercial speech regulations.

Finally, the restriction, depending on the government interest, may not be reasonable as the amendment includes the Compulsive Gambling Prevention Fund ("fund") discussed in 7(b) and 10(e). This would hinder part four of the test which asks if the restriction is no more restrictive than necessary. The fund could be seen as enough to satisfy the governmental interest. Section 10(d) could also be used to satisfy the interest as it prohibits certain

advertisements and promotions including misleading advertisements and marketing directed to minors.

Compulsive Gambling Prevention Fund

This proposal in Section 39(g)12 creates the Compulsive Gambling Prevention Fund which says it is to receive the "taxes and fees collected under this section". However, in Section 39(g)11 it caps the amount the Fund can receive at \$5 million. Therefore it is possible that Fund could not receive additional revenue coming into the state in one year and no other fund is designated to hold the revenue. Additionally, this Fund is not given responsibility for transferring to the other designated programs listed in the proposal.

Officials from the **Department of Public Safety - Office of the Director** indicated there is no impact for their department, Director's Office.

The Missouri State Highway Patrol will have an impact.

Response from the Missouri State Highway Patrol:

The Missouri State Highway Patrol anticipates the need for two (2) additional full-time employees (FTE) to conduct background investigations and the subsequent renewals for sports wagering vendors. Expenses related to the two (2) FTE would be paid for from the Gaming Fund (0286). These one-time and ongoing expenses would include salary, fringe, vehicles, gasoline, and related equipment. The Patrol's response below would be applicable for each of the initiative petitions.

Salary:

Position Title: Sergeant (V07005)
Annual Salary: \$99,648
Total Cost for Salaries: \$199,296

Fringe:

Annual Cost per Position: \$85,637
Total Fringe Amount: \$171,275

Expense & Equipment:

Initial Costs: \$167,110
Ongoing Costs: \$43,652

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$537,681
Ongoing Costs: \$414,223

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gambling does not directly finally impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-138 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-138.

Officials from the **Office of Administration** indicated this proposal relating to gambling does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-138 a proposed constitutional amendment to Article III, version 4 (2024-138), there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions

certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-138 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no identifiable fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-138 proposing to amend Article III, version 4.

Officials from **St. Louis County** indicated this proposed constitutional amendment should have no fiscal impact to their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city unless a sports wagering operator paid the city a business license fee.

Officials from **Jennings School District** indicated this proposal, if passed, would generate additional revenue for school districts, including Jennings School District. An initial analysis indicated that more data is needed before an estimated amount can be calculated.

Officials from **Wellsville-Middletown R-1 School District** indicated it is unknown of the estimated cost or savings this measure would have.

Officials from **Metropolitan Community College** indicated will have a fiscal impact to their college. Unknown what that impact will be due to unknown revenue and expenses generated.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and cannot quantify the revenue impact from such legislation if passed. Of particular concern is that there is no basis in the initiative for allocation to individual institutions. They presume this could be left to State agencies responsible for the allocation of revenue to institutions; however, that may be problematic since different agencies and legislative processes may be involved in the allocation of funds.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Home Dock Cities/Counties, "sports districts" located in St. Louis and Kansas City, as that term is defined in the proposal.

It may have an impact on local jurisdictions and businesses surrounding and in close proximity to the "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal.

The MGC anticipates licensees to pay license fees and renewal fees to the MGC in order to regulate and manage sports wagering in Missouri. It also imposes certain taxes be paid by licensees based on their adjusted gross revenue.

If this initiative petition passes, the Missouri Gaming Commission (MGC) estimates needing fifteen new FTE positions, which would result in an initial cost to the MGC of \$1,786,582.86 (including salary, fringe, supplies, equipment, and travel/lodging related to job performance of those additional employees), in addition to approximately \$2,182,431.33, which represents 7.7% of the MGC existing budget each year (to cover the costs of MGC and MSHP Gaming Division staff plus expenses needed to license and regulate sports wagering) for a total initial cost of \$3,969,014.17. Additional costs included in this estimate may also encompass those associated with the development and implementation of responsible gambling programs. The total annual ongoing personnel cost, after the first year, is estimated to be \$3,910,738.87.

The MGC and the Missouri State Highway Patrol (MSHP) currently have a Memorandum of Understanding (MOU) in place which states that the MSHP will provide background and criminal and regulatory investigation and enforcement support to the MGC to assist it in carrying out its duties, which results in these additional costs.

The MGC estimates a total of 19 applicants for retail sports wagering licenses, to include the 13 current excursion gambling boats, plus 6 "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal. Initiative 24-138, Article III,

Section 39(g).3, allows up to 12 mobile licenses to sports wagering operators (one to each owner of an excursion gambling boat and one to each professional sports team).

Based on the number of sports wagering licenses, the MGC estimates collection of fees approximately \$10,750,000 million the first year and every fifth year of operation. Pursuant to Section 39(g).7 the fees would be utilized for reimbursement of expenses incurred by the MGC to regulate sports wagering. Any remaining fees will be deposited into the Compulsive Gambling Prevention Fund. Pursuant to Section 39(g).11 a wagering tax of 10% is imposed based on adjusted gross revenue. Annual revenues will be appropriated to elementary, secondary and higher education only after the annual tax revenues are used to reimburse expenses incurred by MGC and to fund the Compulsive Gambling Prevention Fund until it has \$5,000,000 in total assets.

In calculating tax revenue estimates, the Missouri Gaming Commission used the sports wagering data from a comparable state, Indiana, due to it having similar population, number of casinos, geographical proximity and other demographics as Missouri. Indiana's total adjusted receipts from sports wagering, which includes both retail (in-person) and online, was \$84,969,839 for 2020, \$240,503,973 for 2021, and \$328,639,984 for 2022. Assuming that the total adjusted gross revenue for sports wagering in Missouri will be comparable to that of Indiana, the Gaming Commission estimates that total adjusted gross revenue for sports wagering in Missouri will be \$63,514,955 for the first year, \$179,776,720 for the second year, \$245,658,388 for the third year, and \$266,539,351 for the fourth year (fourth year estimate is based on 8.5% growth from the previous year per a study completed by Eilers & Krejcik). In determining the aforementioned estimates, a .25% deduction for excise tax and a 25% deduction for promotional wagering were made to Missouri's total adjusted gross revenue from sports wagering due to the initiative's definition of adjusted gross revenue including such deductions for sports wagering, whereas Indiana's definition does not. In addition, the term of adjusted gross revenue includes deducting voided or cancelled wagers, uncollectible receivables, and actual costs for anything of value provided to the patron, but such deduction was not made in determining the aforementioned tax revenue estimates, because Indiana's adjusted gross receipts already include a 2% deduction for such, which the Missouri Gaming Commission estimates will be a similar amount in Missouri. Thus, using the total adjusted gross revenue for sports wagering in Missouri estimates, the Missouri Gaming Commission estimates that the revenue from the Gaming Tax (10% of Adjusted Gross Receipts) on sports wagering will be \$6,351,495.47 for the first year, \$17,977,671.98 for the second year, \$24,565,838.80 for the third year, and \$26,653,935.10 for the fourth year.

Based on the licensing and renewal fees for sports wagering applicants and the taxes on the adjusted gross revenue the total amount of fees and taxes collected may be sufficient to cover the Missouri Gaming Commission's costs to license and regulate sports wagering, however, that is dependent on the total amount of deductions applied to the adjusted gross revenue.

Technical Notes:

Section 5(a) and 5(b) – These sections specify the fees for both (a) retail and (b) mobile licenses. Retail license applicants shall be required to pay a license fee of \$250,000 with a license renewal fee of \$250,000 every five (5) years. Mobile license applicants shall be required to pay a license fee of \$500,000 with a license renewal fee of \$500,000 every five (5) years. To the extent that other language in the petition proscribes allocation of the fees, there is concern that the licensing fees will not cover the expenses of the Missouri Gaming Commission (the “Commission”) during years in which licensing fees or renewals are not collected (i.e., years two, three, and four).

Section 7 – This section describes appropriation for the fees collected by the Commission. Section 7(a) requires that the fees first be used to reimburse the Commission for their reasonable expenses incurred to regulate sports wagering with the remaining fees being deposited into the Compulsive Gambling Prevention Fund. This section raises the question of where the fee monies are being deposited in the first instance if the language requires reimbursement to the Commission. Currently, fees for licensees are deposited with the Missouri Gaming Commission Fund and appropriated accordingly after the Commission’s reasonable expenses have been satisfied. The process by which the Commission is reimbursed is not clear in the current petition, nor is it clear in general how the funds will be dispersed. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 9 – This section requires that licensees maintain in the state, or other location approved by the Commission and consistent with federal law, a computer server or servers used to receive transmissions of requests to place wagers and that transmit acceptance of those requests. Under current federal law, the servers would only be intrastate. The Commission is also aware of a potential conflict between the petition and Article III, Section 39 regarding the location of the servers within the state.

Section 11 – This section requires that a 10% tax be imposed upon the adjusted gross revenue received from sports wagering by each licensee, to be appropriated for elementary, secondary, and higher education, and to be paid after appropriations for the Commission’s reasonable expenses and contributions the Compulsive Gambling Prevention Fund until such fund has \$5,000,000. In years where the Commission does not collect renewal fees, licensing fees will be insufficient to meet the Commission’s reasonable expenses and would thus require the Commission to rely upon tax funds that would otherwise be appropriated to education in the state of Missouri. Section 11 also raises the question of what happens when the Compulsive Gambling Prevention Fund reaches \$5,000,000 and whether in subsequent years the Fund is required to be maintained at \$5,000,000.

Section 12 – This section requires that there will be the Compulsive Gambling Prevention Fund created in the state treasury which shall consist of the taxes and fees collected pursuant to the petition. The section is not clear if the Compulsive Gambling Prevention Fund shall contain only the funds specifically directed to the Fund, up to \$5,000,000, or if

the entirety of fees and taxes will be deposited into this fund in the first instance for later reimbursement and appropriation. This concern mirrors the notes related to Section 7.

Section 13(a) – This section states that the definition of adjusted gross revenue (as related to the wagering tax of 10% imposed in Section 11) is the total of all cash or cash equivalents received by a licensee from sports wagering minus (1) all cash and cash equivalents paid out as winnings to patrons, (2) the actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering, (3) voided or cancelled wagers, (4) the costs of free play or promotional credits provided to and redeemed by the applicable licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month, (5) any sums paid as a result of any federal tax, including federal excise tax, and (6) uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons. Section 13(a) also states in (7) that if the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month and any negative receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

1. There is a question as to Section 13(a)(4) as to whether the twenty-five percent figure is related to gross amounts or gross amounts less any winnings paid out to patrons.
2. There is a question as to Section 13(a)(5) as to whether "any federal tax" includes taxes from any jurisdiction or just federal taxes imposed from business in the State of Missouri.
3. Section 13(a)(7) appears as if it needs to be its own separate section independent from Sections 13(a)(1) through (6), as it does not define or identify deductions from gross revenue. Section 13(a)(7) also includes the term "certificate holder," which is not defined in the petition, nor is it used elsewhere.
4. There is also a question as to whether the totality of the deductions identified in Sections 13(a)(1) through (6) will result in sports wagering licensees showing negative adjusted gross revenues and therefore paying no sports wagering tax. This would in turn impact the ability of the Commission to meet its reasonable expenses as well as limit or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri. Additionally, the carryover provisions in Section 13(a)(7) would further impact the ability of the Commission to meet its reasonable expenses and further impact or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri.

They also provided the following information.

Initiative Petition 24-138
Sports Wagering Summary Financial Summary Sheet

	1st Year	2nd Year	3rd Year	4th Year	5th Year
Tax Revenue Estimate	\$ 6,351,495.47	\$ 17,977,671.98	\$ 24,565,838.80	\$ 26,653,935.10	\$ 28,919,519.62
Fee Revenue Estimate	\$ 10,750,000.00	\$ -	\$ -	\$ -	\$ 10,750,000.00
Salary Expense Estimates	\$ (1,786,582.84)	\$ (1,728,307.54)	\$ (1,728,307.54)	\$ (1,728,307.54)	\$ (1,728,307.54)
E&E Expense Estimates	\$ (2,182,431.33)	\$ (2,182,431.33)	\$ (2,182,431.33)	\$ (2,182,431.33)	\$ (2,182,431.33)
Remaining Balance	\$ 13,132,481.30	\$ 14,066,933.11	\$ 20,655,099.94	\$ 22,743,196.23	\$ 35,758,780.75
To Compulsive Gambling	\$ 5,000,000.00	\$ 5,000,000.00	\$ 5,000,000.00	\$ 5,000,000.00	\$ 5,000,000.00
To Education	\$ 8,132,481.30	\$ 9,066,933.11	\$ 15,655,099.94	\$ 17,743,196.23	\$ 30,758,780.75

Explanation:

Revenue minus Expense equals Remaining Balance. The first \$5M of the Remaining Balance go to the Compulsive Gaming Fund. The remaining funds go to institutions of elementary, secondary, and higher education.

The above summary assumes that all funds deposited to the Compulsive Gambling Fund are spent each year. While this is unlikely, we are unable to determine how much of the funds will be spent because the rules regarding the Compulsive Gambling Fund expenditures will need to be written.

Estimate of Missouri's Sports Betting Revenue based on Indiana's Sports Betting Experience

Indiana Sports Betting Total Adjusted Gross Receipts From Regulated Sports Betting, First Three Full Years of Operation

	Retail Gross Receipts	Online Gross Receipts	Total Gross Receipts	Excise Tax of .25% ***	Promotional Wagering est. 25% ****	Grand Total (Total minus Excise Tax and Promotional Wagering)
Year 1 (2020)*	\$ 36,450,058	\$ 48,519,781	\$ 84,969,839	\$ 212,425	\$ 21,242,460	\$ 63,514,955
Year 2 (2021)	\$ 48,766,484	\$ 191,737,489	\$ 240,503,973	\$ 601,260	\$ 60,125,993	\$ 179,776,720
Year 3 (2022)	\$ 40,292,892	\$ 288,347,092	\$ 328,639,984	\$ 821,600	\$ 82,159,996	\$ 245,658,388
Year 4 (2023)**	\$ 43,717,788	\$ 312,856,595	\$ 356,574,383	\$ 891,436	\$ 89,143,596	\$ 266,539,351
Year 5 (2024)**	\$ 47,433,800	\$ 339,449,406	\$ 386,883,206	\$ 967,208	\$ 96,720,801	\$ 289,195,196

Annualized Indiana Data for 2020 (Revenue/10 months) x 12 months

Retail	\$ 30,375,048	\$ 36,450,058
Online	\$ 48,766,484	\$ 58,519,781

* Indiana only had sports betting for 10 months of 2020. Therefore, the 2020 figures have been annualized. Adjusted gross receipts were obtained from Indiana Gaming Commission's 2022 Annual Report (see link below). Indiana's adjusted gross receipts includes a 2% deduction for estimated voided or cancelled wagers and uncollectible receivables, similar to what is done in Missouri.

<https://www.in.gov/igc/files/FY2022-Annual.pdf>

NOTE: Indiana was chosen for comparison due to their similar population, number of casinos, geographical proximity and other demographics (see Census link below).

<https://www.census.gov/quickfacts/fact/table/MO,IN,US/HSG445220>

** Per a study completed by Eilers & Krejciek for the state of Indiana, forecasts reflect a baseline maturity state at Year 3, and they estimated an 8.5% growth for Year 4 and 5.

<https://www.in.gov/igc/files/Indiana-SportsBettingReport-Final-Oct18-1.pdf>

*** Section 39(g) 13. a. (5) of the proposed petition states that a licensee can deduct "any sums paid as a result of ANY federal tax, including federal excise tax." We are unable to discern what is included in "any federal tax", however we have used the federal excise tax (.25%) in our calculation.

**** Section 39(g) 13. a. (4) of the proposed petition states that a licensee can deduct "twenty-five percent of the total of all cash and cash equivalents received" for the costs of free play or promotional credits. However, our data is from Indiana and they do not allow for such deductions. Although we are unable to determine how much of a deduction a licensee would take, we have applied the 25% to the adjusted gross receipts.

Fee Calculations

Revenue Streams¹	Number of Applicants or Holders of Sports Wagering	Fee Amount	1st Year	2nd Year	3rd Year	4th Year	5th Year
Retail License - Boats	13	\$ 250,000.00	\$ 3,250,000.00	\$ -	\$ -	\$ -	\$ 3,250,000.00

The approximate \$2.1M represents the current MGC and MSHP Gaming Division staff and expenses. The fees received from sports wagering licensing would cover the expenses related to sports wagering regulation for years 1 and 5. However, since no licensing fees would likely be received in years 2, 3, and 4, the expenses related to sports wagering regulation would need to come from tax collected per Section 39(g) 11. a. of the petition.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, and State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate one-time costs of \$326,000, ongoing costs of \$4.4 million annually, initial license fee revenue of \$10.75 million, and ongoing annual tax revenue ranging from \$6.4 million to \$26.7 million by the fourth year of implementation. Local governments estimate unknown revenue.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 3 (2024-137)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on September 8, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than two mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license. If there are more than two qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant based on the applicant's demonstrable history as one of the top two licensed sports wagering operators in the United States, as determined by aggregate tax revenue generation across all jurisdictions in the past three years.

4. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control.

5. Retail and mobile license applicants shall be required to pay a license fee.

- a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.
- b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.
7. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:
- a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and
- b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gambling Prevention Fund.
8. No licensee shall offer sports wagering to individuals in this state who are under twenty-one years of age.
9. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.
10. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall promulgate reasonable rules including, but not limited to:
- a. standards governing the security and integrity of sports wagering, including requiring the use of official league data from each applicable sports governing body headquartered in the United States to determine the outcome of in-play wagers on a professional athlete or sporting event if made available to licensees on commercially reasonable terms;
- b. requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;
- c. prohibiting all sports wagering activity, including sports wagering promotional and advertising activity, within a sports district, unless approved by the professional sports team that plays its home games within the district, except such rules shall not prohibit any licensee from offering sports wagering through an online sports wagering platform to persons physically located within a sports district;
- d. requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;
- e. standards for the use and distribution of monies from the Compulsive Gambling Prevention Fund to include, but not be limited to research, detection and prevention of compulsive gambling in this state and the implementation of treatment, and recovery programs or services related to compulsive gambling in this state;
- f. establishing fines, placing licensees on probation, and revoking licenses for violations of this section; and
- g. establishing a start date for all sports wagering that is not later than December 31, 2025. No sports wagering shall be offered in the state before such start date established by the Commission.
11. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports

wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in the state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(i) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(ii) to the Compulsive Gambling Prevention Fund until the Compulsive Gambling Prevention Fund has \$5,000,000 in total assets.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

12. There is hereby created in the state treasury the “Compulsive Gambling Prevention Fund”, which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall stand appropriated without further legislative action.

13. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering patrons;

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee’s patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons.

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. “Commission,” means the Missouri Gaming Commission;

c. “Excursion gambling boat” means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. “License” means any retail license or mobile license.

e. “Licensee” means the holder of any license.

f. “Mobile license” means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. “Online sports wagering platform” means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate online sports wagering.

h. “Professional sports team” means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women’s National Basketball Association, or the National Women’s Soccer League.

i. “Retail license” means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. “Sports district,” means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. “Sports wagering,” means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events. Sports wagering shall not include a fantasy sports contest comprising multiple participants, not including a fantasy sports contest operator, in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. Sports wagering shall not include wagering on youth or high school events or wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant.

l. “Sports wagering operator,” means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

14. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

15. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

FISCAL NOTE (24-137)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article III. (Received September 11, 2023)

Date

September 29, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-137 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated there will be a fiscal impact for their department, but they are deferring to the Gaming Commission's revenue estimates.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(g) of the Missouri Constitution legalizing sports wagering in Missouri. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for this initiative petition proposing to amend Article III, version 3.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP 24-137 attempts to create a sports wagering program in the state of Missouri. For Sections 39(g)1- Section 39(g)4 the Department of Revenue (DOR) defers to the Missouri Gaming Commission for impact.

Section 39(g)5 requires retail and mobile license applicants to pay license fees. The amount of the fees are to be set by "the Commission". It is unclear the amount of fee that will be assessed or what criteria to use to set the fee.

Additionally, Section 39(g)5 says the fees will be "collected by the state". However, it does not indicate which Department or Commission will receive the fees for deposit. Additionally, it does not indicate which fund the fees are to be deposited into while waiting on the appropriation authority to make the transfers to the designated programs outlined in this proposal. DOR cannot collect or deposit revenue without constitutional or statutory authority and cannot transfer funds to a program without appropriation transfer authority.

DOR is unable to calculate the amount of the potential fees collected without knowing the number of eligible entities to receive the retail license or the amount of the fee set. DOR notes it cannot collect the fees the way the proposal is currently written.

DOR notes this proposal does not have a Section 39(g)6. It goes from Section 39(g)5 to Section 39(g)7.

Section 39(g)11 imposes a 10% wagering tax on the adjusted gross revenue of the licensee. Once again this proposal does not designate to whom the tax is to be paid. Additionally, it does not indicate how often the tax is to be remitted. It also fails to indicate where the tax is to be deposited while it is awaiting transfer to designated activities outlined in this proposal. DOR cannot collect or deposit revenue without constitutional or statutory authority and cannot transfer funds to a program without appropriation transfer authority.

For informational purposes, DOR notes that excursion gambling boats currently remit their gambling taxes they collect nightly. Should DOR be given responsibility for the collection of this sports wagering tax they would need to set up a computer system similar to the existing gambling tax system. DOR would need \$100,415 (\$95 per hour * 1,057 hours work) for creation of the new computer sports wagering tax system. Their department would also need 1 ACSR with an annual salary of \$36,628 to process payments and reports, and they will need regulatory authority to implement and to impose rules for the collection of any non-filed or late taxes.

DOR is unable to calculate the amount of the potential tax collected without knowing the number of eligible licensees. DOR defers to the MO Gaming Commission for the estimate of potential tax collected.

Comments

Sports districts may include more than intended.

Section 13(j) explains that "sports district" includes any Missouri stadium with a capacity over 11,500 that operates as home for one or more "professional sports team". It also extends to the surrounding area within 400 yards of such premises.

Section 13(h) which defines "professional sports team" includes both Major League Soccer (MLS) and National Women's Soccer League (NWSL).

CITYPARK, which is home to the MLS team the St. Louis City SC is in downtown St. Louis. The 400 yard extension will potentially cover multiple streets with private retail and residential locations.

Soon the planned KC Current Stadium, home to the NWSL team the Kansas City Current will also be located in close proximity to private locations. Built within the Berkley Riverfront Park, the stadium will also be next to a public park.

Promotional and advertising activity may include more than intended.

While not defined, the "promotional and advertising activity" prohibited could include lawful commercial speech. This could trigger first amendment issues as it regulates lawful commercial advertisements that are not misleading nor deceptive. Based on the four-part test of Central Hudson, this restriction could face problems as advertisements are allowed within the area if approved by the professional sports team that plays in the district. Part 2 of the test asks if the government has a substantial interest in the restriction and part 3 asks if the restriction directly and materially advances the interest. It will be difficult to advance an interest that allows certain wagering advertisements and not others. Further, under Section 10(c) the sport teams themselves approve the messages, therefore the government has no oversight on what is approved or rejected. Also, certain government policies utilizing an unrestricted discretionary approval process have been found to be unconstitutional restrictions on speech.

Further, as it regulates only sports wagering it is a content-based restriction, and it could be suggested that as it only restricts the promotion or advertising of sports wagering and not anything related to advocating against sports wagering, it is a viewpoint-based restriction. This could increase the scrutiny the restriction would have to overcome past that of normal commercial speech regulations.

Finally, the restriction, depending on the government interest, may not be reasonable as the amendment includes the Compulsive Gambling Prevention Fund ("fund") discussed in 7(b) and 10(e). This would hinder part four of the test which asks if the restriction is no more restrictive than necessary. The fund could be seen as enough to satisfy the governmental interest. Section 10(d) could also be used to satisfy the interest as it prohibits certain

advertisements and promotions including misleading advertisements and marketing directed to minors.

Compulsive Gambling Prevention Fund

This proposal in Section 39(g)12 creates the Compulsive Gambling Prevention Fund which says it is to receive the "taxes and fees collected under this section". However, in Section 39(g)11 it caps the amount the Fund can receive at \$5 million. Therefore it is possible that Fund could not receive additional revenue coming into the state in one year and no other fund is designated to hold the revenue. Additionally, this Fund is not given responsibility for transferring to the other designated programs listed in the proposal.

Officials from the **Department of Public Safety - Office of the Director** indicated there is no impact for their department, Director's Office.

The Missouri State Highway Patrol will have an impact.

Response from the Missouri State Highway Patrol:

The Missouri State Highway Patrol anticipates the need for two (2) additional full-time employees (FTE) to conduct background investigations and the subsequent renewals for sports wagering vendors. Expenses related to the two (2) FTE would be paid for from the Gaming Fund (0286). These one-time and ongoing expenses would include salary, fringe, vehicles, gasoline, and related equipment. The Patrol's response below would be applicable for each of the initiative petitions.

Salary:

Position Title: Sergeant (V07005)
Annual Salary: \$99,648
Total Cost for Salaries: \$199,296

Fringe:

Annual Cost per Position: \$85,637
Total Fringe Amount: \$171,275

Expense & Equipment:

Initial Costs: \$167,110
Ongoing Costs: \$43,652

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$537,681
Ongoing Costs: \$414,223

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gambling does not directly finally impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-137 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-137.

Officials from the **Office of Administration** indicated this proposal relating to gambling does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-137 a proposed constitutional amendment to Article III, version 3 (2024-137), there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions

certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-137 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no identifiable fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-137 proposing to amend Article III, version 3.

Officials from **St. Louis County** indicated this proposed constitutional amendment should have no fiscal impact to their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city unless a sports wagering operator paid the city a business license fee.

Officials from **Jennings School District** indicated this proposal, if passed, would generate additional revenue for school districts, including Jennings School District. An initial analysis indicated that more data is needed before an estimated amount can be calculated.

Officials from **Wellsville-Middletown R-1 School District** indicated it is unknown of the estimated cost or savings this measure would have.

Officials from **Metropolitan Community College** indicated will have a fiscal impact to their college. Unknown what that impact will be due to unknown revenue and expenses generated.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and cannot quantify the revenue impact from such legislation if passed. Of particular concern is that there is no basis in the initiative for allocation to individual institutions. They presume this could be left to State agencies responsible for the allocation of revenue to institutions; however, that may be problematic since different agencies and legislative processes may be involved in the allocation of funds.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Home Dock Cities/Counties, "sports districts" located in St. Louis and Kansas City, as that term is defined in the proposal.

It may have an impact on local jurisdictions and businesses surrounding and in close proximity to the "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal.

The MGC anticipates licensees to pay license fees and renewal fees to the MGC in order to regulate and manage sports wagering in Missouri. It also imposes certain taxes be paid by licensees based on their adjusted gross revenue.

If this initiative petition passes, the Missouri Gaming Commission (MGC) estimates needing fifteen new FTE positions, which would result in an initial cost to the MGC of \$1,786,582.86 (including salary, fringe, supplies, equipment, and travel/lodging related to job performance of those additional employees), in addition to approximately \$2,182,431.33, which represents 7.7% of the MGC existing budget each year (to cover the costs of MGC and MSHP Gaming Division staff plus expenses needed to license and regulate sports wagering) for a total initial cost of \$3,969,014.17. Additional costs included in this estimate may also encompass those associated with the development and implementation of responsible gambling programs. The total annual ongoing personnel cost, after the first year, is estimated to be \$3,910,738.87.

The MGC and the Missouri State Highway Patrol (MSHP) currently have a Memorandum of Understanding (MOU) in place which states that the MSHP will provide background and criminal and regulatory investigation and enforcement support to the MGC to assist it in carrying out its duties, which results in these additional costs.

The MGC estimates a total of 19 applicants for retail sports wagering licenses, to include the 13 current excursion gambling boats, plus 6 "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal. Initiative 24-137, Article III, Section 39(g).3, c, allows only 2 mobile licenses to sports wagering operators which would

require the excursion gambling boats and sports districts or their designated sports wagering operator to utilize one of the 2 mobile licenses.

Based on the number of sports wagering licenses, the MGC estimates collection of fees approximately \$5.750 million the first year and every fifth year of operation. Pursuant to Section 39(g).7 the fees would be utilized for reimbursement of expenses incurred by the MGC to regulate sports wagering. Any remaining fees will be deposited into the Compulsive Gambling Prevention Fund. Pursuant to Section 39(g).11 a wagering tax of 10% is imposed based on adjusted gross revenue. Annual revenues will be appropriated to elementary, secondary and higher education only after the annual tax revenues are used to reimburse expenses incurred by MGC and to fund the Compulsive Gambling Prevention Fund until it has \$5,000,000 in total assets.

In calculating tax revenue estimates, the Missouri Gaming Commission used the sports wagering data from a comparable state, Indiana, due to it having similar population, number of casinos, geographical proximity and other demographics as Missouri. Indiana's total adjusted receipts from sports wagering, which includes both retail (in-person) and online, was \$84,969,839 for 2020, \$240,503,973 for 2021, and \$328,639,984 for 2022. Assuming that the total adjusted gross revenue for sports wagering in Missouri will be comparable to that of Indiana, the Gaming Commission estimates that total adjusted gross revenue for sports wagering in Missouri will be \$63,514,955 for the first year, \$179,776,720 for the second year, \$245,658,388 for the third year, and \$266,539,351 for the fourth year (fourth year estimate is based on 8.5% growth from the previous year per a study completed by Eilers & Krejcik). In determining the aforementioned estimates, a .25% deduction for excise tax and a 25% deduction for promotional wagering were made to Missouri's total adjusted gross revenue from sports wagering due to the initiative's definition of adjusted gross revenue including such deductions for sports wagering, whereas Indiana's definition does not. In addition, the term of adjusted gross revenue includes deducting voided or cancelled wagers, uncollectible receivables, and actual costs for anything of value provided to the patron, but such deduction was not made in determining the aforementioned tax revenue estimates, because Indiana's adjusted gross receipts already include a 2% deduction for such, which the Missouri Gaming Commission estimates will be a similar amount in Missouri. Thus, using the total adjusted gross revenue for sports wagering in Missouri estimates, the Missouri Gaming Commission estimates that the revenue from the Gaming Tax (10% of Adjusted Gross Receipts) on sports wagering will be \$6,351,495.47 for the first year, \$17,977,671.98 for the second year, \$24,565,838.80 for the third year, and \$26,653,935.10 for the fourth year.

Based on the licensing and renewal fees for sports wagering applicants and the taxes on the adjusted gross revenue the total amount of fees and taxes collected may be sufficient to cover the Missouri Gaming Commission's costs to license and regulate sports wagering, however, that is dependent on the total amount of deductions applied to the adjusted gross revenue.

Technical Notes:

Section 5(a) and 5(b) – These sections specify the fees for both (a) retail and (b) mobile licenses. Retail license applicants shall be required to pay a license fee of \$250,000 with a license renewal fee of \$250,000 every five (5) years. Mobile license applicants shall be required to pay a license fee of \$500,000 with a license renewal fee of \$500,000 every five (5) years. To the extent that other language in the petition proscribes allocation of the fees, there is concern that the licensing fees will not cover the expenses of the Missouri Gaming Commission (the “Commission”) during years in which licensing fees or renewals are not collected (i.e., years two, three, and four).

Section 7 – This section describes appropriation for the fees collected by the Commission. Section 7(a) requires that the fees first be used to reimburse the Commission for their reasonable expenses incurred to regulate sports wagering with the remaining fees being deposited into the Compulsive Gambling Prevention Fund. This section raises the question of where the fee monies are being deposited in the first instance if the language requires reimbursement to the Commission. Currently, fees for licensees are deposited with the Missouri Gaming Commission Fund and appropriated accordingly after the Commission’s reasonable expenses have been satisfied. The process by which the Commission is reimbursed is not clear in the current petition, nor is it clear in general how the funds will be dispersed. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 9 – This section requires that licensees maintain in the state, or other location approved by the Commission and consistent with federal law, a computer server or servers used to receive transmissions of requests to place wagers and that transmit acceptance of those requests. Under current federal law, the servers would only be intrastate. The Commission is also aware of a potential conflict between the petition and Article III, Section 39 regarding the location of the servers within the state.

Section 11 – This section requires that a 10% tax be imposed upon the adjusted gross revenue received from sports wagering by each licensee, to be appropriated for elementary, secondary, and higher education, and to be paid after appropriations for the Commission’s reasonable expenses and contributions the Compulsive Gambling Prevention Fund until such fund has \$5,000,000. In years where the Commission does not collect renewal fees, licensing fees will be insufficient to meet the Commission’s reasonable expenses and would thus require the Commission to rely upon tax funds that would otherwise be appropriated to education in the state of Missouri. Section 11 also raises the question of what happens when the Compulsive Gambling Prevention Fund reaches \$5,000,000 and whether in subsequent years the Fund is required to be maintained at \$5,000,000.

Section 12 – This section requires that there will be the Compulsive Gambling Prevention Fund created in the state treasury which shall consist of the taxes and fees collected pursuant to the petition. The section is not clear if the Compulsive Gambling Prevention Fund shall contain only the funds specifically directed to the Fund, up to \$5,000,000, or if

the entirety of fees and taxes will be deposited into this fund in the first instance for later reimbursement and appropriation. This concern mirrors the notes related to Section 7.

Section 13(a) – This section states that the definition of adjusted gross revenue (as related to the wagering tax of 10% imposed in Section 11) is the total of all cash or cash equivalents received by a licensee from sports wagering minus (1) all cash and cash equivalents paid out as winnings to patrons, (2) the actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering, (3) voided or cancelled wagers, (4) the costs of free play or promotional credits provided to and redeemed by the applicable licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month, (5) any sums paid as a result of any federal tax, including federal excise tax, and (6) uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons. Section 13(a) also states in (7) that if the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month and any negative receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

1. There is a question as to Section 13(a)(4) as to whether the twenty-five percent figure is related to gross amounts or gross amounts less any winnings paid out to patrons.
2. There is a question as to Section 13(a)(5) as to whether "any federal tax" includes taxes from any jurisdiction or just federal taxes imposed from business in the State of Missouri.
3. Section 13(a)(7) appears as if it needs to be its own separate section independent from Sections 13(a)(1) through (6), as it does not define or identify deductions from gross revenue. Section 13(a)(7) also includes the term "certificate holder," which is not defined in the petition, nor is it used elsewhere.
4. There is also a question as to whether the totality of the deductions identified in Sections 13(a)(1) through (6) will result in sports wagering licensees showing negative adjusted gross revenues and therefore paying no sports wagering tax. This would in turn impact the ability of the Commission to meet its reasonable expenses as well as limit or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri. Additionally, the carryover provisions in Section 13(a)(7) would further impact the ability of the Commission to meet its reasonable expenses and further impact or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri.

They also provided the following information.

Initiative Petition 24-137
Sports Wagering Summary Financial Summary Sheet

	1st Year	2nd Year	3rd Year	4th Year	5th Year
Tax Revenue Estimate	\$ 6,351,495.47	\$ 17,977,671.98	\$ 24,565,838.80	\$ 26,653,935.10	\$ 28,919,519.62
Fee Revenue Estimate	\$ 5,750,000.00	\$ -	\$ -	\$ -	\$ 5,750,000.00
Salary Expense Estimates	\$ (1,786,582.84)	\$ (1,728,307.54)	\$ (1,728,307.54)	\$ (1,728,307.54)	\$ (1,728,307.54)
E&E Expense Estimates	\$ (2,182,431.33)	\$ (2,182,431.33)	\$ (2,182,431.33)	\$ (2,182,431.33)	\$ (2,182,431.33)
Remaining Balance	\$ 8,132,481.30	\$ 14,066,933.11	\$ 20,655,099.94	\$ 22,743,196.23	\$ 30,758,780.75
To Compulsive Gambling	\$ 5,000,000.00	\$ 5,000,000.00	\$ 5,000,000.00	\$ 5,000,000.00	\$ 5,000,000.00
To Education	\$ 3,132,481.30	\$ 9,066,933.11	\$ 15,655,099.94	\$ 17,743,196.23	\$ 25,758,780.75

Explanation:

Revenue minus Expense equals Remaining Balance. The first \$5M of the Remaining Balance go to the Compulsive Gaming Fund. The remaining funds go to institutions of elementary, secondary, and higher education.

The above summary assumes that all funds deposited to the Compulsive Gambling Fund are spent each year. While this is unlikely, we are unable to determine how much of the funds will be spent because the rules regarding the Compulsive Gambling Fund expenditures will need to be written.

Estimate of Missouri's Sports Betting Revenue based on Indiana's Sports Betting Experience

Indiana Sports Betting Total Adjusted Gross Receipts From Regulated Sports Betting, First Three Full Years of Operation

	Retail Gross Receipts	Online Gross Receipts	Total Gross Receipts	Excise Tax of .25% ***	Promotional Wagering est. 25% ****	Grand Total (Total minus Excise Tax and Promotional Wagering)
Year 1 (2020)*	\$ 36,450,058	\$ 48,519,781	\$ 84,969,839	\$ 212,425	\$ 21,242,460	\$ 63,514,955
Year 2 (2021)	\$ 48,766,484	\$ 191,737,489	\$ 240,503,973	\$ 601,260	\$ 60,125,993	\$ 179,776,720
Year 3 (2022)	\$ 40,292,892	\$ 288,347,092	\$ 328,639,984	\$ 821,600	\$ 82,159,996	\$ 245,658,388

Annualized Indiana Data for 2020 (Revenue/10 months) x 12 months

Retail	\$ 30,375,048	\$ 36,450,058
Online	\$ 48,766,484	\$ 58,519,781

* Indiana only had sports betting for 10 months of 2020. Therefore, the 2020 figures have been annualized. Adjusted gross receipts were obtained from Indiana Gaming Commission's 2022 Annual Report (see link below). Indiana's adjusted gross receipts includes a 2% deduction for estimated voided or cancelled wagers and uncollectible receivables, similar to what is done in Missouri.

<https://www.in.gov/igc/files/FY2022-Annual.pdf>

NOTE: Indiana was chosen for comparison due to their similar population, number of casinos, geographical proximity and other demographics (see Census link below).

<https://www.census.gov/quickfacts/fact/table/MO,IN,US/HSG445220>

** Per a study completed by Eilers & Krejciek for the state of Indiana, forecasts reflect a baseline maturity state at Year 3, and they estimated an 8.5% growth for Year 4 and 5.

<https://www.in.gov/igc/files/Indiana-SportsBettingReport-Final-Oct18-1.pdf>

*** Section 39(g) 13. a. (5) of the proposed petition states that a licensee can deduct "any sums paid as a result of ANY federal tax, including federal excise tax." We are unable to discern what is included in "any federal tax", however we have used the federal excise tax (.25%) in our calculation.

**** Section 39(g) 13. a. (4) of the proposed petition states that a licensee can deduct "twenty-five percent of the total of all cash and cash equivalents received" for the costs of free play or promotional credits. However, our data is from Indiana and they do not allow for such deductions. Although we are unable to determine how much of a deduction a licensee would take, we have applied the 25% to the adjusted gross receipts.

Fee Calculations

Revenue Streams¹	Number of Applicants or Holders of Sports Wagering	Fee Amount	1st Year	2nd Year	3rd Year	4th Year	5th Year
Retail License - Boats	13	\$ 250,000.00	\$ 3,250,000.00	\$ -	\$ -	\$ -	\$ 3,250,000.00

The approximate \$2.1M represents the current MGC and MSHP Gaming Division staff and expenses. The fees received from sports wagering licensing would cover the expenses related to sports wagering regulation for years 1 and 5. However, since no licensing fees would likely be received in years 2, 3, and 4, the expenses related to sports wagering regulation would need to come from tax collected per Section 39(g) 11. a. of the petition.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, and State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate one-time costs of \$326,000, ongoing costs of \$4.4 million annually, initial license fee revenue of \$5.75 million, and ongoing annual tax revenue ranging from \$6.4 million to \$26.7 million by the fourth year of implementation. Local governments estimate unknown revenue.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 2 (2024-136)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on September 8, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than three mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license. If there are more than three qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant based on the applicant's demonstrable history of generating tax revenue as a licensed sports wagering operator in at least ten comparable jurisdictions as of November 5, 2024.

4. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control.

5. Retail and mobile license applicants shall be required to pay a license fee.

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gambling Prevention Fund.

8. No licensee shall offer sports wagering to individuals in this state who are under twenty-one years of age.

9. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

10. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall promulgate reasonable rules including, but not limited to:

a. standards governing the security and integrity of sports wagering, including requiring the use of official league data from each applicable sports governing body headquartered in the United States to determine the outcome of in-play wagers on a professional athlete or sporting event if made available to licensees on commercially reasonable terms;

b. requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

c. prohibiting all sports wagering activity, including sports wagering promotional and advertising activity, within a sports district, unless approved by the professional sports team that plays its home games within the district, except such rules shall not prohibit any licensee from offering sports wagering through an online sports wagering platform to persons physically located within a sports district;

d. requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

e. standards for the use and distribution of monies from the Compulsive Gambling Prevention Fund to include, but not be limited to research, detection, and prevention of compulsive gambling in this state and the implementation of treatment and recovery programs or services related to compulsive gambling in this state;

f. establishing fines, placing licensees on probation, and revoking licenses for violations of this section; and

g. establishing a start date for all sports wagering that is not later than December 31, 2025. No sports wagering shall be offered in the state before such start date established by the Commission.

11. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports

wagering conducted by each licensee and each sports wagering operator acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in the state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(i) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(ii) to the Compulsive Gambling Prevention Fund until the Compulsive Gambling Prevention Fund has \$5,000,000 in total assets.

c. Such revenues shall not be included within the definition of "total state revenues" in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

12. There is hereby created in the state treasury the "Compulsive Gambling Prevention Fund", which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall stand appropriated without further legislative action.

13. As used in this section the following terms shall mean:

a. "Adjusted gross revenue," the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering patrons;

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons.

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. "Commission," means the Missouri Gaming Commission;

c. "Excursion gambling boat" means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. "License" means any retail license or mobile license.

e. “Licensee” means the holder of any license.

f. “Mobile license” means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. “Online sports wagering platform” means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate online sports wagering.

h. “Professional sports team” means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women’s National Basketball Association, or the National Women’s Soccer League.

i. “Retail license” means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. “Sports district,” means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. “Sports wagering,” means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events. Sports wagering shall not include a fantasy sports contest comprising multiple participants, not including a fantasy sports contest operator, in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. Sports wagering shall not include wagering on youth or high school events or wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant.

l. “Sports wagering operator,” means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

14. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

15. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-136)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article III. (Received September 11, 2023)

Date

September 29, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-136 and determined there is no measurable impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated there will be a fiscal impact for their department, but they are deferring to the Gaming Commission's revenue estimates.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(g) of the Missouri Constitution legalizing sports wagering in Missouri. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for this initiative petition proposing to amend Article III, version 2.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP 24-136 attempts to create a sports wagering program in the state of Missouri. For Sections 39(g)1- Section 39(g)4 the Department of Revenue (DOR) defers to the Missouri Gaming Commission for impact.

Section 39(g)5 requires retail and mobile license applicants to pay license fees. The amount of the fees are to be set by "the Commission". It is unclear the amount of fee that will be assessed or what criteria to use to set the fee.

Additionally, Section 39(g)5 says the fees will be "collected by the state". However, it does not indicate which Department or Commission will receive the fees for deposit. Additionally, it does not indicate which fund the fees are to be deposited into while waiting on the appropriation authority to make the transfers to the designated programs outlined in this proposal. DOR cannot collect or deposit revenue without constitutional or statutory authority and cannot transfer funds to a program without appropriation transfer authority.

DOR is unable to calculate the amount of the potential fees collected without knowing the number of eligible entities to receive the retail license or the amount of the fee set. DOR notes it cannot collect the fees the way the proposal is currently written.

DOR notes this proposal does not have a Section 39(g)6. It goes from Section 39(g)5 to Section 39(g)7.

Section 39(g)11 imposes a 10% wagering tax on the adjusted gross revenue of the licensee. Once again this proposal does not designate to whom the tax is to be paid. Additionally, it does not indicate how often the tax is to be remitted. It also fails to indicate where the tax is to be deposited while it is awaiting transfer to designated activities outlined in this proposal. DOR cannot collect or deposit revenue without constitutional or statutory authority and cannot transfer funds to a program without appropriation transfer authority.

For informational purposes, DOR notes that excursion gambling boats currently remit their gambling taxes they collect nightly. Should DOR be given responsibility for the collection of this sports wagering tax they would need to set up a computer system similar to the existing gambling tax system. DOR would need \$100,415 (\$95 per hour * 1,057 hours work) for creation of the new computer sports wagering tax system. Their department would also need 1 ACSR with an annual salary of \$36,628 to process payments and reports, and they will need regulatory authority to implement and to impose rules for the collection of any non-filed or late taxes.

DOR is unable to calculate the amount of the potential tax collected without knowing the number of eligible licensees. DOR defers to the MO Gaming Commission for the estimate of potential tax collected.

Comments

Sports districts may include more than intended.

Section 13(j) explains that "sports district" includes any Missouri stadium with a capacity over 11,500 that operates as home for one or more "professional sports team". It also extends to the surrounding area within 400 yards of such premises.

Section 13(h) which defines "professional sports team" includes both Major League Soccer (MLS) and National Women's Soccer League (NWSL).

CITYPARK, which is home to the MLS team the St. Louis City SC is in downtown St. Louis. The 400 yard extension will potentially cover multiple streets with private retail and residential locations.

Soon the planned KC Current Stadium, home to the NWSL team the Kansas City Current will also be located in close proximity to private locations. Built within the Berkley Riverfront Park, the stadium will also be next to a public park.

Promotional and advertising activity may include more than intended.

While not defined, the "promotional and advertising activity" prohibited could include lawful commercial speech. This could trigger first amendment issues as it regulates lawful commercial advertisements that are not misleading nor deceptive. Based on the four-part test of Central Hudson, this restriction could face problems as advertisements are allowed within the area if approved by the professional sports team that plays in the district. Part 2 of the test asks if the government has a substantial interest in the restriction and part 3 asks if the restriction directly and materially advances the interest. It will be difficult to advance an interest that allows certain wagering advertisements and not others. Further, under Section 10(c) the sport teams themselves approve the messages, therefore the government has no oversight on what is approved or rejected. Also, certain government policies utilizing an unrestricted discretionary approval process have been found to be unconstitutional restrictions on speech.

Further, as it regulates only sports wagering it is a content-based restriction, and it could be suggested that as it only restricts the promotion or advertising of sports wagering and not anything related to advocating against sports wagering, it is a viewpoint-based restriction. This could increase the scrutiny the restriction would have to overcome past that of normal commercial speech regulations.

Finally, the restriction, depending on the government interest, may not be reasonable as the amendment includes the Compulsive Gambling Prevention Fund ("fund") discussed in 7(b) and 10(e). This would hinder part four of the test which asks if the restriction is no more restrictive than necessary. The fund could be seen as enough to satisfy the governmental interest. Section 10(d) could also be used to satisfy the interest as it prohibits certain

advertisements and promotions including misleading advertisements and marketing directed to minors.

Compulsive Gambling Prevention Fund

This proposal in Section 39(g)12 creates the Compulsive Gambling Prevention Fund which says it is to receive the "taxes and fees collected under this section". However, in Section 39(g)11 it caps the amount the Fund can receive at \$5 million. Therefore it is possible that Fund could not receive additional revenue coming into the state in one year and no other fund is designated to hold the revenue. Additionally, this Fund is not given responsibility for transferring to the other designated programs listed in the proposal.

Officials from the **Department of Public Safety - Office of the Director** indicated there is no impact for their department, Director's Office.

The Missouri State Highway Patrol will have an impact.

Response from the Missouri State Highway Patrol:

The Missouri State Highway Patrol anticipates the need for two (2) additional full-time employees (FTE) to conduct background investigations and the subsequent renewals for sports wagering vendors. Expenses related to the two (2) FTE would be paid for from the Gaming Fund (0286). These one-time and ongoing expenses would include salary, fringe, vehicles, gasoline, and related equipment. The Patrol's response below would be applicable for each of the initiative petitions.

Salary:

Position Title: Sergeant (V07005)
Annual Salary: \$99,648
Total Cost for Salaries: \$199,296

Fringe:

Annual Cost per Position: \$85,637
Total Fringe Amount: \$171,275

Expense & Equipment:

Initial Costs: \$167,110
Ongoing Costs: \$43,652

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$537,681
Ongoing Costs: \$414,223

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gambling does not directly finally impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-136 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-136.

Officials from the **Office of Administration** indicated this proposal relating to gambling does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-136 a proposed constitutional amendment to Article III, version 2 (2024-136), there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions

certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-136 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no identifiable fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-136 proposing to amend Article III, version 2.

Officials from **St. Louis County** indicated this proposed constitutional amendment should have no fiscal impact to their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city unless a sports wagering operator paid the city a business license fee.

Officials from **Jennings School District** indicated this proposal, if passed, would generate additional revenue for school districts, including Jennings School District. An initial analysis indicated that more data is needed before an estimated amount can be calculated.

Officials from **Wellsville-Middletown R-1 School District** indicated it is unknown of the estimated cost or savings this measure would have.

Officials from **Metropolitan Community College** indicated will have a fiscal impact to their college. Unknown what that impact will be due to unknown revenue and expenses generated.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and cannot quantify the revenue impact from such legislation if passed. Of particular concern is that there is no basis in the initiative for allocation to individual institutions. They presume this could be left to State agencies responsible for the allocation of revenue to institutions; however, that may be problematic since different agencies and legislative processes may be involved in the allocation of funds.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Home Dock Cities/Counties, "sports districts" located in St. Louis and Kansas City, as that term is defined in the proposal.

It may have an impact on local jurisdictions and businesses surrounding and in close proximity to the "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal.

The MGC anticipates licensees to pay license fees and renewal fees to the MGC in order to regulate and manage sports wagering in Missouri. It also imposes certain taxes be paid by licensees based on their adjusted gross revenue.

If this initiative petition passes, the Missouri Gaming Commission (MGC) estimates needing fifteen new FTE positions, which would result in an initial cost to the MGC of \$1,786,582.86 (including salary, fringe, supplies, equipment, and travel/lodging related to job performance of those additional employees), in addition to approximately \$2,182,431.33, which represents 7.7% of the MGC existing budget each year (to cover the costs of MGC and MSHP Gaming Division staff plus expenses needed to license and regulate sports wagering) for a total initial cost of \$3,969,014.17. Additional costs included in this estimate may also encompass those associated with the development and implementation of responsible gambling programs. The total annual ongoing personnel cost, after the first year, is estimated to be \$3,910,738.87.

The MGC and the Missouri State Highway Patrol (MSHP) currently have a Memorandum of Understanding (MOU) in place which states that the MSHP will provide background and criminal and regulatory investigation and enforcement support to the MGC to assist it in carrying out its duties, which results in these additional costs.

The MGC estimates a total of 19 applicants for retail sports wagering licenses, to include the 13 current excursion gambling boats, plus 6 "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal. Initiative 24-136, Article III, Section 39(g).3, c, allows only 3 mobile licenses to sports wagering operators which would

require the excursion gambling boats and sports districts or their designated sports wagering operator to utilize one of the 3 mobile licenses.

Based on the number of sports wagering licenses, the MGC estimates collection of fees approximately \$6.250 million the first year and every fifth year of operation. Pursuant to Section 39(g).7 the fees would be utilized for reimbursement of expenses incurred by the MGC to regulate sports wagering. Any remaining fees will be deposited into the Compulsive Gambling Prevention Fund. Pursuant to Section 39(g).11 a wagering tax of 10% is imposed based on adjusted gross revenue. Annual revenues will be appropriated to elementary, secondary and higher education only after the annual tax revenues are used to reimburse expenses incurred by MGC and to fund the Compulsive Gambling Prevention Fund until it has \$5,000,000 in total assets.

In calculating tax revenue estimates, the Missouri Gaming Commission used the sports wagering data from a comparable state, Indiana, due to it having similar population, number of casinos, geographical proximity and other demographics as Missouri. Indiana's total adjusted receipts from sports wagering, which includes both retail (in-person) and online, was \$84,969,839 for 2020, \$240,503,973 for 2021, and \$328,639,984 for 2022. Assuming that the total adjusted gross revenue for sports wagering in Missouri will be comparable to that of Indiana, the Gaming Commission estimates that total adjusted gross revenue for sports wagering in Missouri will be \$63,514,955 for the first year, \$179,776,720 for the second year, \$245,658,388 for the third year, and \$266,539,351 for the fourth year (fourth year estimate is based on 8.5% growth from the previous year per a study completed by Eilers & Krejcik). In determining the aforementioned estimates, a .25% deduction for excise tax and a 25% deduction for promotional wagering were made to Missouri's total adjusted gross revenue from sports wagering due to the initiative's definition of adjusted gross revenue including such deductions for sports wagering, whereas Indiana's definition does not. In addition, the term of adjusted gross revenue includes deducting voided or cancelled wagers, uncollectible receivables, and actual costs for anything of value provided to the patron, but such deduction was not made in determining the aforementioned tax revenue estimates, because Indiana's adjusted gross receipts already include a 2% deduction for such, which the Missouri Gaming Commission estimates will be a similar amount in Missouri. Thus, using the total adjusted gross revenue for sports wagering in Missouri estimates, the Missouri Gaming Commission estimates that the revenue from the Gaming Tax (10% of Adjusted Gross Receipts) on sports wagering will be \$6,351,495.47 for the first year, \$17,977,671.98 for the second year, \$24,565,838.80 for the third year, and \$26,653,935.10 for the fourth year.

Based on the licensing and renewal fees for sports wagering applicants and the taxes on the adjusted gross revenue the total amount of fees and taxes collected may be sufficient to cover the Missouri Gaming Commission's costs to license and regulate sports wagering, however, that is dependent on the total amount of deductions applied to the adjusted gross revenue.

Technical Notes:

Section 5(a) and 5(b) – These sections specify the fees for both (a) retail and (b) mobile licenses. Retail license applicants shall be required to pay a license fee of \$250,000 with a license renewal fee of \$250,000 every five (5) years. Mobile license applicants shall be required to pay a license fee of \$500,000 with a license renewal fee of \$500,000 every five (5) years. To the extent that other language in the petition proscribes allocation of the fees, there is concern that the licensing fees will not cover the expenses of the Missouri Gaming Commission (the “Commission”) during years in which licensing fees or renewals are not collected (i.e., years two, three, and four).

Section 7 – This section describes appropriation for the fees collected by the Commission. Section 7(a) requires that the fees first be used to reimburse the Commission for their reasonable expenses incurred to regulate sports wagering with the remaining fees being deposited into the Compulsive Gambling Prevention Fund. This section raises the question of where the fee monies are being deposited in the first instance if the language requires reimbursement to the Commission. Currently, fees for licensees are deposited with the Missouri Gaming Commission Fund and appropriated accordingly after the Commission’s reasonable expenses have been satisfied. The process by which the Commission is reimbursed is not clear in the current petition, nor is it clear in general how the funds will be dispersed. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 9 – This section requires that licensees maintain in the state, or other location approved by the Commission and consistent with federal law, a computer server or servers used to receive transmissions of requests to place wagers and that transmit acceptance of those requests. Under current federal law, the servers would only be intrastate. The Commission is also aware of a potential conflict between the petition and Article III, Section 39 regarding the location of the servers within the state.

Section 11 – This section requires that a 10% tax be imposed upon the adjusted gross revenue received from sports wagering by each licensee, to be appropriated for elementary, secondary, and higher education, and to be paid after appropriations for the Commission’s reasonable expenses and contributions the Compulsive Gambling Prevention Fund until such fund has \$5,000,000. In years where the Commission does not collect renewal fees, licensing fees will be insufficient to meet the Commission’s reasonable expenses and would thus require the Commission to rely upon tax funds that would otherwise be appropriated to education in the state of Missouri. Section 11 also raises the question of what happens when the Compulsive Gambling Prevention Fund reaches \$5,000,000 and whether in subsequent years the Fund is required to be maintained at \$5,000,000.

Section 12 – This section requires that there will be the Compulsive Gambling Prevention Fund created in the state treasury which shall consist of the taxes and fees collected pursuant to the petition. The section is not clear if the Compulsive Gambling Prevention Fund shall contain only the funds specifically directed to the Fund, up to \$5,000,000, or if

the entirety of fees and taxes will be deposited into this fund in the first instance for later reimbursement and appropriation. This concern mirrors the notes related to Section 7.

Section 13(a) – This section states that the definition of adjusted gross revenue (as related to the wagering tax of 10% imposed in Section 11) is the total of all cash or cash equivalents received by a licensee from sports wagering minus (1) all cash and cash equivalents paid out as winnings to patrons, (2) the actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering, (3) voided or cancelled wagers, (4) the costs of free play or promotional credits provided to and redeemed by the applicable licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month, (5) any sums paid as a result of any federal tax, including federal excise tax, and (6) uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons. Section 13(a) also states in (7) that if the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month and any negative receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

1. There is a question as to Section 13(a)(4) as to whether the twenty-five percent figure is related to gross amounts or gross amounts less any winnings paid out to patrons.
2. There is a question as to Section 13(a)(5) as to whether "any federal tax" includes taxes from any jurisdiction or just federal taxes imposed from business in the State of Missouri.
3. Section 13(a)(7) appears as if it needs to be its own separate section independent from Sections 13(a)(1) through (6), as it does not define or identify deductions from gross revenue. Section 13(a)(7) also includes the term "certificate holder," which is not defined in the petition, nor is it used elsewhere.
4. There is also a question as to whether the totality of the deductions identified in Sections 13(a)(1) through (6) will result in sports wagering licensees showing negative adjusted gross revenues and therefore paying no sports wagering tax. This would in turn impact the ability of the Commission to meet its reasonable expenses as well as limit or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri. Additionally, the carryover provisions in Section 13(a)(7) would further impact the ability of the Commission to meet its reasonable expenses and further impact or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri.

They also provided the following information.

Initiative Petition 24-136
Sports Wagering Summary Financial Summary Sheet

	1st Year	2nd Year	3rd Year	4th Year	5th Year
Tax Revenue Estimate	\$ 6,351,495.47	\$ 17,977,671.98	\$ 24,565,838.80	\$ 26,653,935.10	\$ 28,919,519.62
Fee Revenue Estimate	\$ 6,250,000.00	\$ -	\$ -	\$ -	\$ 6,250,000.00
Salary Expense Estimates	\$ (1,786,582.84)	\$ (1,728,307.54)	\$ (1,728,307.54)	\$ (1,728,307.54)	\$ (1,728,307.54)
E&E Expense Estimates	\$ (2,182,431.33)	\$ (2,182,431.33)	\$ (2,182,431.33)	\$ (2,182,431.33)	\$ (2,182,431.33)
Remaining Balance	\$ 8,632,481.30	\$ 14,066,933.11	\$ 20,655,099.94	\$ 22,743,196.23	\$ 31,258,780.75
To Compulsive Gambling	\$ 5,000,000.00	\$ 5,000,000.00	\$ 5,000,000.00	\$ 5,000,000.00	\$ 5,000,000.00
To Education	\$ 3,632,481.30	\$ 9,066,933.11	\$ 15,655,099.94	\$ 17,743,196.23	\$ 26,258,780.75

Explanation:

Revenue minus Expense equals Remaining Balance. The first \$5M of the Remaining Balance go to the Compulsive Gaming Fund. The remaining funds go to institutions of elementary, secondary, and higher education.

The above summary assumes that all funds deposited to the Compulsive Gambling Fund are spent each year. While this is unlikely, we are unable to determine how much of the funds will be spent because the rules regarding the Compulsive Gambling Fund expenditures will need to be written.

Estimate of Missouri's Sports Betting Revenue based on Indiana's Sports Betting Experience

Indiana Sports Betting Total Adjusted Gross Receipts From Regulated Sports Betting, First Three Full Years of Operation

	Retail Gross Receipts	Online Gross Receipts	Total Gross Receipts	Excise Tax of .25% ***	Promotional Wagering est. 25% ****	Grand Total (Total minus Excise Tax and Promotional Wagering)
Year 1 (2020)*	\$ 36,450,058	\$ 48,519,781	\$ 84,969,839	\$ 212,425	\$ 21,242,460	\$ 63,514,955

Annualized Indiana Data for 2020 (Revenue/10 months) x 12 months

Retail	\$ 30,375,048	\$ 36,450,058
Online	\$ 48,766,484	\$ 58,519,781

* Indiana only had sports betting for 10 months of 2020. Therefore, the 2020 figures have been annualized. Adjusted gross receipts were obtained from Indiana Gaming Commission's 2022 Annual Report (see link below). Indiana's adjusted gross receipts includes a 2% deduction for estimated voided or cancelled wagers and uncollectible receivables, similar to what is done in Missouri.

<https://www.in.gov/igc/files/FY2022-Annual.pdf>

NOTE: Indiana was chosen for comparison due to their similar population, number of casinos, geographical proximity and other demographics (see Census link below).

<https://www.census.gov/quickfacts/fact/table/MO,IN,US/HSG445220>

** Per a study completed by Eilers & Krejciek for the state of Indiana, forecasts reflect a baseline maturity state at Year 3, and they estimated an 8.5% growth for Year 4 and 5.

<https://www.in.gov/igc/files/Indiana-SportsBettingReport-Final-Oct18-1.pdf>

*** Section 39(g) 13. a. (5) of the proposed petition states that a licensee can deduct "any sums paid as a result of ANY federal tax, including federal excise tax." We are unable to discern what is included in "any federal tax", however we have used the federal excise tax (.25%) in our calculation.

**** Section 39(g) 13. a. (4) of the proposed petition states that a licensee can deduct "twenty-five percent of the total of all cash and cash equivalents received" for the costs of free play or promotional credits. However, our data is from Indiana and they do not allow for such deductions. Although we are unable to determine how much of a deduction a licensee would take, we have applied the 25% to the adjusted gross receipts.

Fee Calculations

Revenue Streams¹	Number of Applicants or Holders of Sports Wagering	Fee Amount	1st Year	2nd Year	3rd Year	4th Year	5th Year
Retail License - Boats	13	\$ 250,000.00	\$ 3,250,000.00	\$ -	\$ -	\$ -	\$ 3,250,000.00

The approximate \$2.1M represents the current MGC and MSHP Gaming Division staff and expenses. The fees received from sports wagering licensing would cover the expenses related to sports wagering regulation for years 1 and 5. However, since no licensing fees would likely be received in years 2, 3, and 4, the expenses related to sports wagering regulation would need to come from tax collected per Section 39(g) 11. a. of the petition.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, and State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate one-time costs of \$326,000, ongoing costs of \$4.4 million annually, initial license fee revenue of \$6.25 million, and ongoing annual tax revenue ranging from \$6.4 million to \$26.7 million by the fourth year of implementation. Local governments estimate unknown revenue.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article III, version 1 (2024-135)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on September 8, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey

NOTICE: The proposed amendment revises Article III of the Constitution by adopting one new section to be known as Article III, Section 39(g).

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article III of the Constitution is revised by adopting one new Section to be known as Article III, Section 39(g) to read as follows:

Section 39(g) 1. The people of the state of Missouri hereby find and declare that the interests of the public are best served by a well-regulated sports wagering industry that will provide substantial tax revenue to support educational institutions in Missouri.

2. Notwithstanding any other provision of law to the contrary, any entity licensed by the Commission may offer sports wagering:

a. through an online sports wagering platform to individuals physically located in this state;

b. at excursion gambling boats; and

c. at any location within each sports district, as approved by each applicable professional sports team that plays its home games in such sports district.

3. a. The Commission shall issue not more than one retail license to operate sports wagering in this state to each qualified applicant that is:

(1) an excursion gambling boat or a sports wagering operator operating on behalf of each such excursion gambling boat that has applied for a retail license to offer sports wagering at such excursion gambling boat; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team that has applied for a retail license to offer sports wagering within the applicable sports district in which such professional sports team plays its home games.

b. The Commission shall issue not more than one mobile license to operate sports wagering in this state to each qualified applicant that is:

(1) an owner of an excursion gambling boat located in this state or a sports wagering operator operating on behalf of each such owner, provided, however, that not more than one sports wagering operator shall be permitted to operate under such mobile license; on behalf of any entity, or group of commonly owned or controlled entities, which owns, directly or indirectly, more than one excursion gambling boat located in this state; or

(2) a professional sports team or a sports wagering operator designated by each such professional sports team.

c. The Commission shall issue not more than four mobile licenses to operate sports wagering in this state directly to qualified applicants that are sports wagering operators. Each sports wagering operator shall only be eligible for one mobile license. If there are more than four qualified applicants for a mobile license to be issued by the Commission directly to a sports wagering operator under this section, the Commission shall select the applicant based on the applicant's demonstrable history of generating tax revenue as a licensed sports wagering operator in at least ten comparable jurisdictions as of November 5, 2024.

4. An applicant for a license to conduct sports wagering shall apply to the Commission on a form and in the manner prescribed by the Commission. The Commission shall conduct background checks of each applicant or key persons of such applicant and shall not award a license to any applicant if such applicant or key person of such applicant has been convicted of a felony or any gambling offense in any state or federal court of the United States. If a professional sports team designates a sports wagering operator to operate on its behalf, then that sports wagering operator, rather than the professional sports team, shall submit to the Commission for licensure and shall be considered the licensee for all aspects of Commission oversight and regulatory control.

5. Retail and mobile license applicants shall be required to pay a license fee.

a. An applicant for a retail license shall be required to pay a license fee prescribed by the Commission, not to exceed \$250,000. Retail licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$250,000.

b. An applicant for a mobile license shall be required to pay a license fee prescribed by the Commission, not to exceed \$500,000. Mobile licensees shall be required to pay a license renewal fee every five years, as prescribed by the Commission, not to exceed \$500,000.

7. All sports wagering fees prescribed by the Commission and collected by the state shall be appropriated as follows:

a. to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering; and

b. to the extent all reasonable expenses incurred by the Commission have been reimbursed, the remaining fees shall be deposited in the Compulsive Gambling Prevention Fund.

8. No licensee shall offer sports wagering to individuals in this state who are under twenty-one years of age.

9. A mobile licensee shall maintain in this state, or any other location approved by the Commission and consistent with federal law, the computer server or servers used to receive transmissions of requests to place wagers and that transmit confirmation of acceptance of wagers on sports events placed by customers physically present in this state.

10. Subject to and consistent with the terms of this section, the Commission shall have the power to adopt and enforce reasonable rules, including emergency rules, to implement the provisions of this section. No rule or portion of a rule promulgated under the authority of this section shall become effective unless it has been promulgated pursuant to the provisions of Chapter 536. The Commission shall promulgate reasonable rules including, but not limited to:

a. standards governing the security and integrity of sports wagering, including requiring the use of official league data from each applicable sports governing body headquartered in the United States to determine the outcome of in-play wagers on a professional athlete or sporting event if made available to licensees on commercially reasonable terms;

b. requiring licensees to cooperate with investigations conducted by law enforcement agencies, regulatory bodies, and sports governing bodies;

c. prohibiting all sports wagering activity, including sports wagering promotional and advertising activity, within a sports district, unless approved by the professional sports team that plays its home games within the district, except such rules shall not prohibit any licensee from offering sports wagering through an online sports wagering platform to persons physically located within a sports district;

d. requiring licensees and sports wagering operators to use commercially and technologically reasonable means to ensure that marketing and advertisements do not purposefully target minors or individuals who have self-excluded from sports wagering, are not false, misleading or deceptive, and clearly disclose the material terms of any offer included in any promotion or advertisement;

e. standards for the use and distribution of monies from the Compulsive Gambling Prevention Fund to include, but not be limited to research, detection, and prevention of compulsive gambling in this state and the implementation of treatment and recovery programs or services related to compulsive gambling in this state;

f. establishing fines, placing licensees on probation, and revoking licenses for violations of this section; and

g. establishing a start date for all sports wagering that is not later than December 31, 2025. No sports wagering shall be offered in the state before such start date established by the Commission.

11. a. Notwithstanding any other provision of law, including Article III Section 39(d), to the contrary, a wagering tax of 10% is imposed on the adjusted gross revenue received from sports

wagering conducted by each licensee and each sports wagering operating acting on behalf of a licensee.

b. The annual revenues received from such tax shall be appropriated for institutions of elementary, secondary, and higher education in the state; provided, however, that an appropriation to such educational institutions shall be made only after such annual wagering tax revenues are appropriated as follows:

(i) to reimburse the reasonable expenses incurred by the Commission to regulate sports wagering in the state to the extent that the Commission has not been fully reimbursed for such expenses from the sports wagering fees collected by the state; and

(ii) to the Compulsive Gambling Prevention Fund until the Compulsive Gambling Prevention Fund has \$5,000,000 in total assets.

c. Such revenues shall not be included within the definition of “total state revenues” in Section 17 of Article X of this Constitution.

d. The state auditor shall perform an annual audit of the revenues received and appropriated pursuant to this section to ensure they are being used only for authorized purposes. The state auditor shall make such audit available to the public, the governor, and the general assembly.

12. There is hereby created in the state treasury the "Compulsive Gambling Prevention Fund", which shall consist of taxes and fees collected under this section. The state treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law to the contrary, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The fund shall be a dedicated fund and shall stand appropriated without further legislative action.

13. As used in this section the following terms shall mean:

a. “Adjusted gross revenue,” the total of all cash and cash equivalents received by a licensee from sports wagering minus the total of:

(1) All cash and cash equivalents paid out as winnings to sports wagering patrons;

(2) The actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering;

(3) Voided or cancelled wagers;

(4) The costs of free play or promotional credits provided to and redeemed by the applicable licensee’s patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month;

(5) Any sums paid as a result of any federal tax, including federal excise tax; and

(6) Uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons.

(7) If the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month. Any negative adjusted gross receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

b. “Commission,” means the Missouri Gaming Commission;

c. “Excursion gambling boat” means an excursion gambling boat or floating facility as described in Article III, Section 39(e);

d. “License” means any retail license or mobile license.

e. “Licensee” means the holder of any license.

f. “Mobile license” means a license, granted by the Commission, authorizing the licensee to offer sports wagering, through an online sports wagering platform, to individuals physically located in this state.

g. “Online sports wagering platform” means an online-enabled application, Internet website, or other electronic or digital technology used to offer, conduct, or operate online sports wagering.

h. “Professional sports team” means a team located in this state that is a member of the National Football League, Major League Baseball, the National Hockey League, the National Basketball Association, Major League Soccer, the Women’s National Basketball Association, or the National Women’s Soccer League.

i. “Retail license” means a license, granted by the Commission, authorizing the licensee to offer sports wagering in person to individuals at such locations described in paragraphs (b) and (c) of Article III, Section 39(g)(2), as applicable.

j. “Sports district,” means the premises of a facility located in this state with a capacity of 11,500 people or more, at which one or more professional sports teams plays its home games, and the surrounding area within 400 yards of such premises;

k. “Sports wagering,” means wagering on professional or collegiate athletic, sporting, and other competitive events and awards involving human participants including, but not limited to, esports, or other events as approved by the Commission. The term sports wagering shall include, but not be limited to, bets or wagers made on: portions of athletic and sporting events or on the individual statistics of professional or collegiate athletes in a sporting event or compilation of sporting events. Sports wagering shall not include a fantasy sports contest comprising multiple participants, not including a fantasy sports contest operator, in which winning outcomes reflect the relative knowledge and skill of the participants and are predominantly determined by the accumulated statistical performance of athletes or individuals. Sports wagering shall not include wagering on youth or high school events or wagering on the performance or nonperformance of any individual athlete participating in a single game or match of a collegiate sporting event in which a collegiate team from this state is a participant.

l. “Sports wagering operator,” means an entity that offers sports wagering or has been organized for the purpose of offering sports wagering.

14. Notwithstanding any other provision of law, including Article III, Section 39(9), to the contrary, the general assembly may enact laws consistent with this section.

15. All provisions of this section are severable. If any provision of this section is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this section shall be and remain valid.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-135)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article III. (Received September 11, 2023)

Date

September 29, 2023

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **State Auditor's office**, and the **Missouri Gaming Commission**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-135 and determined there is no impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated there will be a fiscal impact for their department, but they are deferring to the Gaming Commission's revenue estimates.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health (DMH)** indicated this petition would modify Article III, Section 39(g) of the Missouri Constitution legalizing sports wagering in Missouri. Implementation of the initiative petition may result in increased demand for DMH services due to increased access to gambling opportunities but does not appear to mandate any individual to receive treatment which will remain voluntary.

The initiative petition does not appear to create an additional fiscal impact to DMH unless the number of consumers increases and requires additional services to be provided by DMH.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for this initiative petition proposing to amend Article III, version 1.

Officials from the **Department of Revenue** indicated after thorough review, the Department's response to this initiative petition:

IP 24-135 attempts to create a sports wagering program in the state of Missouri. For Sections 39(g)1- Section 39(g)4 the Department of Revenue (DOR) defers to the Missouri Gaming Commission for impact.

Section 39(g)5 requires retail and mobile license applicants to pay license fees. The amount of the fees are to be set by "the Commission". It is unclear the amount of fee that will be assessed or what criteria to use to set the fee.

Additionally, Section 39(g)5 says the fees will be "collected by the state". However, it does not indicate which Department or Commission will receive the fees for deposit. Additionally, it does not indicate which fund the fees are to be deposited into while waiting on the appropriation authority to make the transfers to the designated programs outlined in this proposal. DOR cannot collect or deposit revenue without constitutional or statutory authority and cannot transfer funds to a program without appropriation transfer authority.

DOR is unable to calculate the amount of the potential fees collected without knowing the number of eligible entities to receive the retail license or the amount of the fee set. DOR notes it cannot collect the fees the way the proposal is currently written.

DOR notes this proposal does not have a Section 39(g)6. It goes from Section 39(g)5 to Section 39(g)7.

Section 39(g)11 imposes a 10% wagering tax on the adjusted gross revenue of the licensee. Once again this proposal does not designate to whom the tax is to be paid. Additionally, it does not indicate how often the tax is to be remitted. It also fails to indicate where the tax is to be deposited while it is awaiting transfer to designated activities outlined in this proposal. DOR cannot collect or deposit revenue without constitutional or statutory authority and cannot transfer funds to a program without appropriation transfer authority.

For informational purposes, DOR notes that excursion gambling boats currently remit their gambling taxes they collect nightly. Should DOR be given responsibility for the collection of this sports wagering tax they would need to set up a computer system similar to the existing gambling tax system. DOR would need \$100,415 (\$95 per hour * 1,057 hours work) for creation of the new computer sports wagering tax system. Their department would also need 1 ACSR with an annual salary of \$36,628 to process payments and reports, and they will need regulatory authority to implement and to impose rules for the collection of any non-filed or late taxes.

DOR is unable to calculate the amount of the potential tax collected without knowing the number of eligible licensees. DOR defers to the MO Gaming Commission for the estimate of potential tax collected.

Comments

Sports districts may include more than intended.

Section 13(j) explains that "sports district" includes any Missouri stadium with a capacity over 11,500 that operates as home for one or more "professional sports team". It also extends to the surrounding area within 400 yards of such premises.

Section 13(h) which defines "professional sports team" includes both Major League Soccer (MLS) and National Women's Soccer League (NWSL).

CITYPARK, which is home to the MLS team the St. Louis City SC is in downtown St. Louis. The 400 yard extension will potentially cover multiple streets with private retail and residential locations.

Soon the planned KC Current Stadium, home to the NWSL team the Kansas City Current will also be located in close proximity to private locations. Built within the Berkley Riverfront Park, the stadium will also be next to a public park.

Promotional and advertising activity may include more than intended.

While not defined, the "promotional and advertising activity" prohibited could include lawful commercial speech. This could trigger first amendment issues as it regulates lawful commercial advertisements that are not misleading nor deceptive. Based on the four-part test of Central Hudson, this restriction could face problems as advertisements are allowed within the area if approved by the professional sports team that plays in the district. Part 2 of the test asks if the government has a substantial interest in the restriction and part 3 asks if the restriction directly and materially advances the interest. It will be difficult to advance an interest that allows certain wagering advertisements and not others. Further, under Section 10(c) the sport teams themselves approve the messages, therefore the government has no oversight on what is approved or rejected. Also, certain government policies utilizing an unrestricted discretionary approval process have been found to be unconstitutional restrictions on speech.

Further, as it regulates only sports wagering it is a content-based restriction, and it could be suggested that as it only restricts the promotion or advertising of sports wagering and not anything related to advocating against sports wagering, it is a viewpoint-based restriction. This could increase the scrutiny the restriction would have to overcome past that of normal commercial speech regulations.

Finally, the restriction, depending on the government interest, may not be reasonable as the amendment includes the Compulsive Gambling Prevention Fund ("fund") discussed in 7(b) and 10(e). This would hinder part four of the test which asks if the restriction is no more restrictive than necessary. The fund could be seen as enough to satisfy the governmental interest. Section 10(d) could also be used to satisfy the interest as it prohibits certain

advertisements and promotions including misleading advertisements and marketing directed to minors.

Compulsive Gambling Prevention Fund

This proposal in Section 39(g)12 creates the Compulsive Gambling Prevention Fund which says it is to receive the "taxes and fees collected under this section". However, in Section 39(g)11 it caps the amount the Fund can receive at \$5 million. Therefore it is possible that Fund could not receive additional revenue coming into the state in one year and no other fund is designated to hold the revenue. Additionally, this Fund is not given responsibility for transferring to the other designated programs listed in the proposal.

Officials from the **Department of Public Safety - Office of the Director** indicated there is no impact for their department, Director's Office.

The Missouri State Highway Patrol will have an impact.

Response from the Missouri State Highway Patrol:

The Missouri State Highway Patrol anticipates the need for two (2) additional full-time employees (FTE) to conduct background investigations and the subsequent renewals for sports wagering vendors. Expenses related to the two (2) FTE would be paid for from the Gaming Fund (0286). These one-time and ongoing expenses would include salary, fringe, vehicles, gasoline, and related equipment. The Patrol's response below would be applicable for each of the initiative petitions.

Salary:

Position Title: Sergeant (V07005)
Annual Salary: \$99,648
Total Cost for Salaries: \$199,296

Fringe:

Annual Cost per Position: \$85,637
Total Fringe Amount: \$171,275

Expense & Equipment:

Initial Costs: \$167,110
Ongoing Costs: \$43,652

Total Cost for Salaries, Fringe, & Associated Equipment:

Initial Cost: \$537,681
Ongoing Costs: \$414,223

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate any fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to gambling does not directly finally impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-135 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-135.

Officials from the **Office of Administration** indicated this proposal relating to gambling does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-135 a proposed constitutional amendment to Article III, version 1 (2024-135), there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions

certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-135 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no identifiable fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-135 proposing to amend Article III, version 1.

Officials from **St. Louis County** indicated this proposed constitutional amendment should have no fiscal impact to their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city unless a sports wagering operator paid the city a business license fee.

Officials from **Jennings School District** indicated this proposal, if passed, would generate additional revenue for school districts, including Jennings School District. An initial analysis indicated that more data is needed before an estimated amount can be calculated.

Officials from **Wellsville-Middletown R-1 School District** indicated it is unknown of the estimated cost or savings this measure would have.

Officials from **Metropolitan Community College** indicated will have a fiscal impact to their college. Unknown what that impact will be due to unknown revenue and expenses generated.

Officials from **University of Missouri** indicated the University of Missouri System does not expect cost to exceed \$100,000.

Official from **St. Louis Community College** indicated they have reviewed the petition initiative and cannot quantify the revenue impact from such legislation if passed. Of particular concern is that there is no basis in the initiative for allocation to individual institutions. They presume this could be left to State agencies responsible for the allocation of revenue to institutions; however, that may be problematic since different agencies and legislative processes may be involved in the allocation of funds.

Officials from the **State Auditor's office** (SAO) indicated there would be a fiscal impact on the SAO. They believe this would create the need for a stand-alone performance audit consisting of 500 hours. 500 hours multiplied by \$90.00 per hour (current average audit cost per staff hour) equals a \$45,000 impact.

Officials from the **Missouri Gaming Commission** (MGC) indicated:

This proposal will affect the Missouri State Highway Patrol, Missouri Dept. of Revenue, Missouri Dept. of Mental Health, Home Dock Cities/Counties, "sports districts" located in St. Louis and Kansas City, as that term is defined in the proposal.

It may have an impact on local jurisdictions and businesses surrounding and in close proximity to the "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal.

The MGC anticipates licensees to pay license fees and renewal fees to the MGC in order to regulate and manage sports wagering in Missouri. It also imposes certain taxes be paid by licensees based on their adjusted gross revenue.

If this initiative petition passes, the Missouri Gaming Commission (MGC) estimates needing fifteen new FTE positions, which would result in an initial cost to the MGC of \$1,786,582.86 (including salary, fringe, supplies, equipment, and travel/lodging related to job performance of those additional employees), in addition to approximately \$2,182,431.33, which represents 7.7% of the MGC existing budget each year (to cover the costs of MGC and MSHP Gaming Division staff plus expenses needed to license and regulate sports wagering) for a total initial cost of \$3,969,014.17. Additional costs included in this estimate may also encompass those associated with the development and implementation of responsible gambling programs. The total annual ongoing personnel cost, after the first year, is estimated to be \$3,910,738.87.

The MGC and the Missouri State Highway Patrol (MSHP) currently have a Memorandum of Understanding (MOU) in place which states that the MSHP will provide background and criminal and regulatory investigation and enforcement support to the MGC to assist it in carrying out its duties, which results in these additional costs.

The MGC estimates a total of 19 applicants for retail sports wagering licenses, to include the 13 current excursion gambling boats, plus 6 "sports districts" located in St. Louis and Kansas City areas, as that term is defined in the proposal. Initiative 24-135, Article III, Section 39(g).3, c, allows only 4 mobile licenses to sports wagering operators which would

require the excursion gambling boats and sports districts or their designated sports wagering operator to utilize one of the 4 mobile licenses.

Based on the number of sports wagering licenses, the MGC estimates collection of fees approximately \$6.75 million the first year and every fifth year of operation. Pursuant to Section 39(g).7 the fees would be utilized for reimbursement of expenses incurred by the MGC to regulate sports wagering. Any remaining fees will be deposited into the Compulsive Gambling Prevention Fund. Pursuant to Section 39(g).11 a wagering tax of 10% is imposed based on adjusted gross revenue. Annual revenues will be appropriated to elementary, secondary and higher education only after the annual tax revenues are used to reimburse expenses incurred by MGC and to fund the Compulsive Gambling Prevention Fund until it has \$5,000,000 in total assets.

In calculating tax revenue estimates, the Missouri Gaming Commission used the sports wagering data from a comparable state, Indiana, due to it having similar population, number of casinos, geographical proximity and other demographics as Missouri. Indiana's total adjusted receipts from sports wagering, which includes both retail (in-person) and online, was \$84,969,839 for 2020, \$240,503,973 for 2021, and \$328,639,984 for 2022. Assuming that the total adjusted gross revenue for sports wagering in Missouri will be comparable to that of Indiana, the Gaming Commission estimates that total adjusted gross revenue for sports wagering in Missouri will be \$63,514,955 for the first year, \$179,776,720 for the second year, \$245,658,388 for the third year, and \$266,539,351 for the fourth year (fourth year estimate is based on 8.5% growth from the previous year per a study completed by Eilers & Krejcik). In determining the aforementioned estimates, a .25% deduction for excise tax and a 25% deduction for promotional wagering were made to Missouri's total adjusted gross revenue from sports wagering due to the initiative's definition of adjusted gross revenue including such deductions for sports wagering, whereas Indiana's definition does not. In addition, the term of adjusted gross revenue includes deducting voided or cancelled wagers, uncollectible receivables, and actual costs for anything of value provided to the patron, but such deduction was not made in determining the aforementioned tax revenue estimates, because Indiana's adjusted gross receipts already include a 2% deduction for such, which the Missouri Gaming Commission estimates will be a similar amount in Missouri. Thus, using the total adjusted gross revenue for sports wagering in Missouri estimates, the Missouri Gaming Commission estimates that the revenue from the Gaming Tax (10% of Adjusted Gross Receipts) on sports wagering will be \$6,351,495.47 for the first year, \$17,977,671.98 for the second year, \$24,565,838.80 for the third year, and \$26,653,935.10 for the fourth year.

Based on the licensing and renewal fees for sports wagering applicants and the taxes on the adjusted gross revenue the total amount of fees and taxes collected may be sufficient to cover the Missouri Gaming Commission's costs to license and regulate sports wagering, however, that is dependent on the total amount of deductions applied to the adjusted gross revenue.

Technical Notes:

Section 5(a) and 5(b) – These sections specify the fees for both (a) retail and (b) mobile licenses. Retail license applicants shall be required to pay a license fee of \$250,000 with a license renewal fee of \$250,000 every five (5) years. Mobile license applicants shall be required to pay a license fee of \$500,000 with a license renewal fee of \$500,000 every five (5) years. To the extent that other language in the petition proscribes allocation of the fees, there is concern that the licensing fees will not cover the expenses of the Missouri Gaming Commission (the “Commission”) during years in which licensing fees or renewals are not collected (i.e., years two, three, and four).

Section 7 – This section describes appropriation for the fees collected by the Commission. Section 7(a) requires that the fees first be used to reimburse the Commission for their reasonable expenses incurred to regulate sports wagering with the remaining fees being deposited into the Compulsive Gambling Prevention Fund. This section raises the question of where the fee monies are being deposited in the first instance if the language requires reimbursement to the Commission. Currently, fees for licensees are deposited with the Missouri Gaming Commission Fund and appropriated accordingly after the Commission’s reasonable expenses have been satisfied. The process by which the Commission is reimbursed is not clear in the current petition, nor is it clear in general how the funds will be dispersed. The Commission suggests explicitly requiring fees to be deposited into the Gaming Commission Fund established under Section 313.835, RSMo.

Section 9 – This section requires that licensees maintain in the state, or other location approved by the Commission and consistent with federal law, a computer server or servers used to receive transmissions of requests to place wagers and that transmit acceptance of those requests. Under current federal law, the servers would only be intrastate. The Commission is also aware of a potential conflict between the petition and Article III, Section 39 regarding the location of the servers within the state.

Section 11 – This section requires that a 10% tax be imposed upon the adjusted gross revenue received from sports wagering by each licensee, to be appropriated for elementary, secondary, and higher education, and to be paid after appropriations for the Commission’s reasonable expenses and contributions the Compulsive Gambling Prevention Fund until such fund has \$5,000,000. In years where the Commission does not collect renewal fees, licensing fees will be insufficient to meet the Commission’s reasonable expenses and would thus require the Commission to rely upon tax funds that would otherwise be appropriated to education in the state of Missouri. Section 11 also raises the question of what happens when the Compulsive Gambling Prevention Fund reaches \$5,000,000 and whether in subsequent years the Fund is required to be maintained at \$5,000,000.

Section 12 – This section requires that there will be the Compulsive Gambling Prevention Fund created in the state treasury which shall consist of the taxes and fees collected pursuant to the petition. The section is not clear if the Compulsive Gambling Prevention Fund shall contain only the funds specifically directed to the Fund, up to \$5,000,000, or if

the entirety of fees and taxes will be deposited into this fund in the first instance for later reimbursement and appropriation. This concern mirrors the notes related to Section 7.

Section 13(a) – This section states that the definition of adjusted gross revenue (as related to the wagering tax of 10% imposed in Section 11) is the total of all cash or cash equivalents received by a licensee from sports wagering minus (1) all cash and cash equivalents paid out as winnings to patrons, (2) the actual costs paid by a licensee for anything of value provided to and redeemed by patrons, including merchandise or services distributed to sports wagering patrons to incentivize sports wagering, (3) voided or cancelled wagers, (4) the costs of free play or promotional credits provided to and redeemed by the applicable licensee's patrons, provided that the aggregate amount of such costs of free play or promotional credits that may be deducted under this paragraph in any calendar month shall not exceed twenty-five percent of the total of all cash and cash equivalents received by the applicable licensee for such calendar month, (5) any sums paid as a result of any federal tax, including federal excise tax, and (6) uncollectible sports wagering receivables, not to exceed two percent of the total of all sums, less the amount paid out as winnings to sports wagering patrons. Section 13(a) also states in (7) that if the amount of adjusted gross receipts in a calendar month is a negative figure, the certificate holder shall remit no sports wagering tax for that calendar month and any negative receipts shall be carried over and calculated as a deduction in the subsequent calendar months until the negative figure has been brought to a zero balance.

1. There is a question as to Section 13(a)(4) as to whether the twenty-five percent figure is related to gross amounts or gross amounts less any winnings paid out to patrons.
2. There is a question as to Section 13(a)(5) as to whether "any federal tax" includes taxes from any jurisdiction or just federal taxes imposed from business in the State of Missouri.
3. Section 13(a)(7) appears as if it needs to be its own separate section independent from Sections 13(a)(1) through (6), as it does not define or identify deductions from gross revenue. Section 13(a)(7) also includes the term "certificate holder," which is not defined in the petition, nor is it used elsewhere.
4. There is also a question as to whether the totality of the deductions identified in Sections 13(a)(1) through (6) will result in sports wagering licensees showing negative adjusted gross revenues and therefore paying no sports wagering tax. This would in turn impact the ability of the Commission to meet its reasonable expenses as well as limit or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri. Additionally, the carryover provisions in Section 13(a)(7) would further impact the ability of the Commission to meet its reasonable expenses and further impact or eliminate contributions to the Compulsive Gambling Fund and education in the State of Missouri.

They also provided the following information.

Initiative Petition 24-135
Sports Wagering Summary Financial Summary Sheet

	1st Year	2nd Year	3rd Year	4th Year	5th Year
Tax Revenue Estimate	\$ 6,351,495.47	\$ 17,977,671.98	\$ 24,565,838.80	\$ 26,653,935.10	\$ 28,919,519.62
Fee Revenue Estimate	\$ 6,750,000.00	\$ -	\$ -	\$ -	\$ 6,750,000.00
Salary Expense Estimates	\$ (1,786,582.84)	\$ (1,728,307.54)	\$ (1,728,307.54)	\$ (1,728,307.54)	\$ (1,728,307.54)
E&E Expense Estimates	\$ (2,182,431.33)	\$ (2,182,431.33)	\$ (2,182,431.33)	\$ (2,182,431.33)	\$ (2,182,431.33)
Remaining Balance	\$ 9,132,481.30	\$ 14,066,933.11	\$ 20,655,099.94	\$ 22,743,196.23	\$ 31,758,780.75
To Compulsive Gambling	\$ 5,000,000.00	\$ 5,000,000.00	\$ 5,000,000.00	\$ 5,000,000.00	\$ 5,000,000.00
To Education	\$ 4,132,481.30	\$ 9,066,933.11	\$ 15,655,099.94	\$ 17,743,196.23	\$ 26,758,780.75

Explanation:

Revenue minus Expense equals Remaining Balance. The first \$5M of the Remaining Balance go to the Compulsive Gaming Fund. The remaining funds go to institutions of elementary, secondary, and higher education.

The above summary assumes that all funds deposited to the Compulsive Gambling Fund are spent each year. While this is unlikely, we are unable to determine how much of the funds will be spent because the rules regarding the Compulsive Gambling Fund expenditures will need to be written.

Estimate of Missouri's Sports Betting Revenue based on Indiana's Sports Betting Experience

Indiana Sports Betting Total Adjusted Gross Receipts From Regulated Sports Betting, First Three Full Years of Operation

	Retail Gross Receipts	Online Gross Receipts	Total Gross Receipts	Excise Tax of .25% ***	Promotional Wagering est. 25% ****	Grand Total (Total minus Excise Tax and Promotional Wagering)

Annualized Indiana Data for 2020 (Revenue/10 months) x 12 months

Retail	\$ 30,375,048	\$ 36,450,058
Online	\$ 48,766,484	\$ 58,519,781

* Indiana only had sports betting for 10 months of 2020. Therefore, the 2020 figures have been annualized. Adjusted gross receipts were obtained from Indiana Gaming Commission's 2022 Annual Report (see link below). Indiana's adjusted gross receipts includes a 2% deduction for estimated voided or cancelled wagers and uncollectible receivables, similar to what is done in Missouri.

<https://www.in.gov/igc/files/FY2022-Annual.pdf>

NOTE: Indiana was chosen for comparison due to their similar population, number of casinos, geographical proximity and other demographics (see Census link below).

<https://www.census.gov/quickfacts/fact/table/MO,IN,US/HSG445220>

** Per a study completed by Eilers & Krejciek for the state of Indiana, forecasts reflect a baseline maturity state at Year 3, and they estimated an 8.5% growth for Year 4 and 5.

<https://www.in.gov/igc/files/Indiana-SportsBettingReport-Final-Oct18-1.pdf>

*** Section 39(g) 13. a. (5) of the proposed petition states that a licensee can deduct "any sums paid as a result of ANY federal tax, including federal excise tax." We are unable to discern what is included in "any federal tax", however we have used the federal excise tax (.25%) in our calculation.

**** Section 39(g) 13. a. (4) of the proposed petition states that a licensee can deduct "twenty-five percent of the total of all cash and cash equivalents received" for the costs of free play or promotional credits. However, our data is from Indiana and they do not allow for such deductions. Although we are unable to determine how much of a deduction a licensee would take, we have applied the 25% to the adjusted gross receipts.

Fee Calculations

Revenue Streams¹	Number of Applicants or Holders of Sports Wagering	Fee Amount	1st Year	2nd Year	3rd Year	4th Year	5th Year
Retail License - Boats	13	\$ 250,000.00	\$ 3,250,000.00	\$ -	\$ -	\$ -	\$ 3,250,000.00

The approximate \$2.1M represents the current MGC and MSHP Gaming Division staff and expenses. The fees received from sports wagering licensing would cover the expenses related to sports wagering regulation for years 1 and 5. However, since no licensing fees would likely be received in years 2, 3, and 4, the expenses related to sports wagering regulation would need to come from tax collected per Section 39(g) 11. a. of the petition.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, and State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities estimate one-time costs of \$326,000, ongoing costs of \$4.4 million annually, initial license fee revenue of \$6.75 million, and ongoing annual tax revenue ranging from \$6.4 million to \$26.7 million by the fourth year of implementation. Local governments estimate unknown revenue.

STATE AUDITORS OFFICE

RE: Petition approval request from Jamie Corley regarding a proposed constitutional amendment to Article I, version 6 (2024-134)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Jamie Corley on August 30, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

NOTICE: The proposed amendment revises Article I of the Constitution by adopting one new section to be known as Article I, Section 36.

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article I of the Constitution is revised by adopting one new Section to be known as Article I, Section 36 to read as follows:

Section 36. 1. The state shall not deny or interfere with the fundamental right to refuse to have an abortion.

2. The state shall not deny or interfere with the fundamental right to refuse contraceptives.

3. Notwithstanding any other provision of law to the contrary, no taxpayer funds shall be directed, appropriated, or used in support of the provision of abortion in this state. This subsection does not authorize the general assembly to refuse to appropriate funds to a health care provider in this state if such health care provider performs abortions.

4. The state shall not deny or interfere with the fundamental right to choose to have an abortion before fetal viability, in the case of rape or sexual assault, incest, fatal fetal abnormality, or risk to the health or safety of the female seeking an abortion.

a. In the event of a rape or sexual assault, no abortion shall be performed unless the alleged rape or sexual assault has been reported to a rape or sexual assault crisis hotline.

5. Notwithstanding subsection 4 of this section, the state shall not deny or interfere with the fundamental right to choose to have an abortion through a gestational age of twelve weeks.

6. The state shall not deny or interfere with the fundamental right to choose contraceptives.

7. Nothing in this section shall be construed to repeal any law existing at the time of its passage unless such existing law directly conflicts with any provision of this section.

8. Notwithstanding any other provision of law to the contrary, no person may be subject to any criminal prosecution or civil penalty:

a. if such person is a pregnant female and induces, seeks, or obtains an abortion in this or any state;

b. if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section; or

c. if such person assists or provides support to a pregnant female in obtaining an abortion in this or any state.

9. Notwithstanding any other provision of law to the contrary, no taxpayer funds shall be directed, appropriated, or used in support of the criminal prosecution of:

a. any pregnant female for inducing, seeking, or obtaining an abortion;

b. any health care provider for performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section; or

c. any person for assisting or providing support to a pregnant female in obtaining an abortion.

10. The rights guaranteed by this section shall be unalienable. Any restriction on these rights shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-134)**

Subject

Initiative petition from Jamie Corley regarding a proposed constitutional amendment to Article I. (Received August 30, 2023)

Date

September 19, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article I (2024-134)

The proposed amendment to Article I would add the “fundamental right to choose to have an abortion” to Missouri’s constitution. It would abrogate Missouri’s recently enacted Right to Life of the Unborn Child Act and enshrine in our state constitution the right to terminate the lives of unborn Missourians. The Missouri Attorney General’s Office expects that the enactment of this proposal would result in a significant fiscal impact to the state.

Analysis

Enshrining abortion rights in our state constitution will have an adverse fiscal impact on Missouri as a whole, and on the state’s political subdivisions. Additionally, the proposed petitions would also trigger significant additional legal costs because they will certainly give rise to legal challenges in which the Attorney General’s Office would be involved.

I. The proposed petitions will have an adverse fiscal impact on Missouri and its political subdivisions

This ballot measure will affect the present and future population of all of Missouri’s 114 counties, and her hundreds of cities, townships and villages. For example, in commenting on the fiscal impact of a similar initiative petition, Greene County recognized the adverse fiscal impact of abortion as it relates to a decreased population. Greene County estimated that 135 future citizens would be lost annually due to legalizing abortion. Greene County’s estimates were supported by fertility rates and the number of

abortions recorded in 2020 by the Missouri Department of Health and Senior Services. Greene County estimated nearly \$51,000 in lost revenue annually to that county based on the reduction in population base. Moreover, this annual dollar amount necessarily increases cumulatively in successive years. (e.g., \$102,000 in year 2, \$153,000 in year 3, \$204,000 in year 4, etc.).

The economic loss to Missouri is not limited to Greene County. The widespread economic devastation created by abortion is supported by a nationwide study published by the United States Senate Joint Economic Committee. See

<https://www.jec.senate.gov/public/index.cfm/republicans/2022/6/the-economic-cost-of-abortion>. It reports an estimated economic cost of abortion in 2019 alone, due to nearly 630,000 unborn lives – was at least \$6.9 trillion, or 32 percent of the GDP. A fiscal note must “state the measure’s estimated cost or savings, if any, to state or local governmental entities.” § 116.175, RSMo. The budget for “state [and] local governmental entities” is 11% of the total Missouri economy, according to a 2021 report by the Missouri Economic Research and Information Center. Based on the Senate study and 4,660 abortions in Missouri in 2019,¹ the total economic loss to Missouri from these measures could be as high as \$51 billion, meaning loss to “state or local government entities” would be as high as \$5.61 billion.

That magnitude of economic loss will adversely impact every political subdivision in the state. Indeed, the more populous a region, the greater the economic harm from an aborted population will be. St. Louis City, Jackson County, St. Louis County and Kansas City will be hit hardest of all. These four geographic areas account for approximately one-third of Missouri’s total population.² Based on the numbers cited above, the economic harm to Missouri’s most populous areas is expected to be close to \$17 billion. This type of substantial economic loss attributable to aborting unborn lives cannot be denied and must be included in any fiscal analysis informing voters of the true impact of this proposed initiative petition.

II. The proposed petitions will increase legal costs for the Attorney General’s Office

The Attorney General’s Office (AGO) would also incur substantial legal costs relating to the proposed petitions, including additional costs to general

¹ <https://health.mo.gov/data/vitalstatistics/mvs19/Table12ab.pdf>.

² See <https://www.missouri-demographics.com/cities by population>

operating expenses. First, the petitions involve a controversial topic that is sure to motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting the sanctity of life in Missouri. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of protecting the unborn, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

All told, any single lawsuit challenging the validity or application of these proposed amendments would cost as much as \$1.5 million based on the AGO's estimates. Even if validity was only challenged in a few cases, that would still amount to as much as \$6 million in additional legal costs in the first few years. Over the course of 10 years, the office estimates general increased litigation costs and costs associated with conflict counsel to be as much as \$15 million.

The Attorney General's Office also estimates substantial sums in attorney's fees and costs because these proposed amendments would violate fundamental conscience protections guaranteed by federal law if applied to certain Missouri workers. Private and public employees in Missouri are guaranteed conscience protections by many federal laws, such as RLUIPA and § 401(b) of the Health Programs Extension Act of 1973. The proposed amendment would violate these conscience protections with respect to certain Missouri workers, forcing the office to pay not only for conflict counsel, but also attorney's fees to lawyers asserting the federal conscience rights of individual Missourians. The office anticipates up to \$6 million in additional costs for that reason.

Conclusion

These proposed initiative petitions would subvert current state law and enshrine in Missouri's constitution the right to abort unborn children. Not only is that morally repugnant, it is fiscally irresponsible. If enacted, these proposed petitions would have a severe, negative economic impact on the State of Missouri and its political subdivisions. The lost revenue from aborting so many unborn Missourians could be as high as \$51 billion, including \$5.61 billion to "state or local governmental entities." § 116.175. Moreover, additional litigation costs for the AGO and mandatory attorney's fees could run as high as \$21 million. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-134 and determined there is no impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated they have reviewed Draft No. 24-130 IP through 24-134 IP and has determined that the initiative petitions, with changes, results in the same zero impact as were stated in response to initiative petition 24-129.

Changes to the bill are as follows:

The language in IP 24-130 through IP 24-134 has the same sections similar to those in IP 24-129 as it creates provisions relating to a constitutional amendment that would allow abortions under certain circumstances, reinstating the possibility of abortion facilities being allowed to operate in Missouri.

Comments:

The initiative petition for IP 24-130 through IP 24-134 is the same zero impact for IP 24-129.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-134 proposing to amend Article I.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-134, their department assumes this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to abortion does not directly financially impact their office.

Section 36.3 undermines the General Assembly's appropriation power. The constitution specifies the limitations on the General Assembly's power and that section does not specify other feasible limits upon adoption of new sections, creating a conflict with the proposed language here. Section 36.4 does not define "right to choose" as though that creates an affirmative requirement on the state to allow or perform an abortion, or to make services accessible. Section 36.4.a conflicts with free speech principles. The proposed section compels speech in order to effectuate another (proposed) constitutional right. Section 36.8 and its subsections are vague. The language is not limited explicitly limited to Missouri. This State cannot control criminal proceedings in another jurisdiction for alleged violations of the other state's law. Further, the language reads that "no person may be subject to *any* criminal prosecution" if such person performs one of the enumerated actions. One interpretation is that one may avoid criminal liability for any possible crime after having sought an abortion, regardless of other context. Due the vagueness throughout the proposal, Section 36.7 also will require interpretation to understand its full effect.

Each provision noted above creates potential litigation costs to the state through declaratory judgement actions to understand the meaning of terms, criminal proceedings (including post-trial), and civil litigation about actions taken when attempting to balance (proposed) constitutional rights. These costs will ultimately burden taxpayers.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated Initiative Petition 24-134 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-134.

Officials from the **Office of Administration** indicated this proposal relating to abortion does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-134 a proposed constitutional amendment to Article I, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-134 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated in reviewing initiative petition 24-134 it has been determined there will be an increased cost to the County of Greene due to loss of tax revenue if voters vote to amend Article I.

The Missouri Department of Health & Senior Services recorded 135 "resident abortions" for Greene County in 2020 and 118 in 2021. The population of Greene County per the 2020 United States census was 298,915.

(<https://www.census.gov/quickfacts/fact/table/greencountymissouri/PST045221>)

In terms of economic impact, Greene County received \$112,673,249 in sales and property taxes for calendar year 2022 (**\$376.94** per capita based on **2020** census data). Accordingly, calculations from these figures indicate an annual loss in population of **135** represents a cost to the County of **\$50,886.90**; an increase in abortion statistics could reasonably be extrapolated to illustrate less tax collections and revenues over the years of potential working lifetimes.

Please see the attached table demonstrating the anticipated yearly on per capita basis and the overall fiscal impact on Greene County tax collections and revenues based on the recorded abortions in 2020 by Missouri Department of Health and Senior Services.

Additional research regarding the broader fiscal impact of lower fertility rates on local and state communities and government budgets may be found here:

- <https://www.pewtrusts.org/en/research-and-analysis/issue-briefs/2022/12/the-long-term-decline-in-fertility-and-what-it-means-for-state-budgets>

Greene County Collections in 2022

Annual Cost	50,886.90

Officials from **St. Louis County** indicated there would be no fiscal impact to their county as a result of this initiative petition.

Officials from the **City of Kansas City** indicated this proposed amendment has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated it is unknown the estimated cost or savings this petition would have.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and do not see an impact on revenue or expense to their college.

Samuel H. Lee, Campaign Life Missouri provided the following information:

Samuel Lee
Director

September 9, 2023

State Auditor's Office
State Capitol
201 West Capitol Ave.
Jefferson City, MO 65101

Dear Auditor Fitzpatrick,

In accordance with the provisions of [section 116.175](#), this is a proposed statement of the fiscal impact of the six initiative petitions numbered 2024-129 through 2024-134 submitted by Jamie Corley with the Missouri Women and Family Research Fund, which your office received on August 30, 2023.

To summarize, the proposed six ballot measures – all of which would amend the Missouri Constitution – could result in:

- A decrease in federal Medicaid revenues by an unknown amount, up to \$12.5 billion annually.
- Increased costs to taxpayers of unknown amounts, because of medical treatment of, or other services for, children or adults injured by abortions performed by unlicensed or untrained persons.
- Increased costs of an unknown amount to the Department of Health and Senior Services for the inspection and licensing of thousands of abortion facilities.
- Loss of revenue of unknown amounts to the state and its political subdivisions, because of boycotts of businesses, shopping, tourism or other revenue-generating activities, as a result of Missouri becoming a Midwest “abortion destination” state.
- Long-term loss of revenues of unknown amounts to the state and its political subdivisions, because of a decrease in the workforce due to the number of children who are aborted, as well as because of individuals who can no longer work after they become disabled because of unsafe abortions. But more important than fiscal costs, the human cost to Missouri’s citizens is unimaginable.

Former-Auditor Galloway made a comparable analysis of the fiscal impacts when she issued her fiscal note and fiscal note summary on [HB 126 \(20-R001 on June 19, 2019\)](#) – the subject of a referendum that year. Her fiscal note summary became part of the [official ballot title certified by Secretary of State on August 14, 2019](#), for the referendum on HB 126.

Supporting Information on Fiscal Impact of the Six Initiative Petitions:

- The loss of federal Medicaid matching dollars, which in the fiscal year 2024 budget **could be a loss of nearly \$12.5 billion.**
 - In FY 2023, Missouri lawmakers appropriated about \$16.9 billion for Medicaid (MO HealthNet) across state agencies. [The majority of Medicaid financing in 2023 – \\$10.6 billion – came from federal matching funds.](#) The governor’s budget for MO HealthNet for FY 2024 is nearly \$19.3 billion – [almost \\$12.5 billion which comes from federal funds.](#)
 - The loss of federal Medicaid matching funds could occur if Missouri is out of compliance with federal Medicaid requirements, for example:
 - If the state cuts off Medicaid reimbursements to Catholic hospitals or other pro-life health care providers. This could result from the requirement found in all six initiative petitions that there is a “fundamental right to choose to have an abortion ... in the case of ... risk to the health or safety of the female seeking an abortion.” And each of the six declares this “fundamental right” is “unalienable” and that “the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.”
 - These provisions could be interpreted to “obligate[]” the state to require Medicaid providers (including Catholic hospitals and other pro-life or faith-based health care providers) to perform or induce abortions at any time during pregnancy where there is the mere assertion (by anyone) that the abortion is necessary for “health or safety.”
 - Thus, because the right to a “health or safety” abortion is “unalienable” ([not transferable to another; not capable of being taken away or denied](#)), state government could compel recipients of public funds (e.g., Medicaid providers) to protect such a “right” as a condition of receiving public funds.
 - However, for the state government to require Catholic or other pro-life health care providers (or others) to offer, pay for or refer for abortions, would be a violation of their conscience rights – for which the federal government could withhold from the state, Medicaid matching dollars.
 - For example, in California in 2020, [HHS disallowed \\$200 million in federal Medicaid matching funds per quarter due to the state’s unlawful abortion insurance mandate](#), which forced a Catholic order of religious sisters and a non-profit Christian Church to provide abortion health insurance coverage. See also:
 - [“The Fight Over California’s Abortion Coverage Mandate,”](#) *Regulatory Review*, February 3, 2021 (“Can a state require that all health plans offered to its residents cover elective abortions? The federal government thinks not, and the state of California is poised to lose at least \$200 million in Medicaid dollars because it insists that health plans in its state cover abortion services.”)
 - [“Federal agency says UVM Med Center forced nurse to assist in abortion,”](#) *VT Digger*, August 28, 2019 (“The U.S. Department of Health and Human Services has accused the University of Vermont Medical Center of forcing a nurse to assist in an abortion procedure despite the nurse’s religious objections. ... The [letter from Roger Severino](#), the director of HHS’ Office for

Civil Rights, asks the hospital to adjust its policies or face losing the federal funding it receives from HHS.”)

- There might be additional circumstances where state compliance with at least some of the proposed constitutional amendments would force the state to be out of compliance with federal Medicaid law, such as the state paying for abortions with federal funds that are not permitted to be reimbursed under federal law. For example, the state might be compelled by the terms of some of the initiative petitions to pay for all abortions for all Medicaid-eligible females, because failing to do so might be construed as the state “deny[ing] or interfere[ing] with the fundamental right to choose to have an abortion” when the state is paying for the labor and delivery of children for all Medicaid-eligible females. In other words, under an amended state constitution, Missouri might no longer be “permitted to enact persuasive measures which favor childbirth over abortion” (*Planned Parenthood v. Casey*, 505 U.S. 833, 886 (1992)).
- Under the six initiative petitions, “no person may be subject to any criminal prosecution or civil penalty ... if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section”. Thus, ANY person claiming to be a “health care provider” – licensed or unlicensed, trained or untrained – could legally perform, induce or assist in an abortion **with no penalties whatsoever**. **This could result in numerous, life-altering medical complications for the child or adult who underwent the abortion.** And because no civil penalties could be imposed (e.g., no payments for medical care, no recovery for economic or non-economic damages in a malpractice action, etc.), this could result in huge medical costs for the female and her child – **that would ultimately be paid for by taxpayers.**
 - Regarding abortion, in Missouri, the cost of inpatient medical procedures and emergency department services for treating “issues before childbirth with complications” is a **median charge per person of \$11,977** – with a minimum charges of \$4,140 and a **maximum charge of \$35,345**.
 - And the cost could be even higher for an abortion-related ER visit. One recent study found that a “[p]atient concealment and/or physician failure to identify a prior abortion during an ER visit is a significant risk factor for a subsequent hospital admission.” In fact, “[c]hemical abortion patients whose abortions are misclassified as miscarriages during an ER visit subsequently experience on average 3.2 hospital admissions within 30 days. 86% of the patients ultimately have surgical removal of retained products of conception (RPOC).”
 - According to the CDC, in 2020, nearly 10,000 Missouri residents obtained abortions (9,980 total, but only 167 within the state). Having unlicensed, non-medical personnel permitted to perform or induce abortions within the state on even a fraction of these 10,000 girls or women could result in untold harm to them now – and harm to their future health and fertility.
 - And there might be additional costs to the state, local governments, school districts, etc., beyond treating the complications to girls or women from having abortions performed, induced or “assisted” on them by non-physicians or by a broad range of undefined or self-described “health care providers.” Any low-birthweight infant born

- alive after a late-term abortion could need long-term NICU care and possibly permanent assistance throughout childhood and during his or her adult life.
- According to a [2020 New York Times story](#): “The March of Dimes estimates that the average societal cost of each preterm birth, which includes medical care, early intervention services and lost productivity, is \$65,000.”
 - That same story reported on a cost of \$4 million in NICU costs for triplets who were born prematurely.
 - [Preterm birth lifetime costs in the United States](#) (as of 2016) were “estimated to be \$25.2 billion: \$17.1 billion for medical care of persons born preterm, \$2.0 billion for delivery care, \$1.3 billion for early intervention and special education, and \$4.8 billion in lost productivity due to associated disabilities in adults.”
- **Other costs could be the licensing and inspection of multiple locations (potentially thousands of sites) as “abortion facilities,” as required under Missouri law.** [Section 197.205](#) requires that no person or governmental unit shall establish, conduct or maintain an abortion facility in the state without a license issued by the Missouri Department of Health and Senior Services (DHSS). And because each of the six initiative petitions state that “[n]othing in this section [36 of Article I] shall be construed to repeal any law existing at the time of its passage unless such existing law directly conflicts with any provision of this section,” then DHSS would be obligated to enforce section 197.205 – while no longer being permitted to enforce the “directly conflict[ing]” “existing law[s]” requiring that an abortion can only be performed or induced by a physician.
 - [Section 188.015](#) defines an “abortion facility” as “a clinic, physician’s office, or any other place or facility in which abortions are performed or induced other than a hospital”.
 - [Section 197.230](#) states that “[i]n the case of any abortion facility, the department [of health and senior services (DHSS)] shall make or cause to be made an unannounced on-site inspection and investigation at least annually.” Such on-site inspections and investigations must include a variety of areas relating to staffing and equipment to respond to medical emergencies, compliance with Missouri’s abortion laws and the requirement that continuous physician services or registered professional nursing services are to be provided whenever a patient is in the facility.
 - There are [more than 7,000 licensed pharmacists in Missouri](#), and under the proposed constitutional amendments, any pharmacy (or other place) where a pharmacist provides abortion pills, DHSS would be required to inspect and license. **This would be an enormous cost to the department and to taxpayers.** And any other place where abortion pills would be provided (homes, schools, vending machines, clinics, etc.) would also have to be inspected at least once a year and licensed.
 - **Economic boycotts of Missouri and its businesses could result if the “Show-Me” state becomes the “Abort-Me” state, once it is transformed into a Midwest “abortion destination” – a distinct possibility since Missouri is [“within a day’s reach of half of U.S. households”](#).**

- Just as [some pro-abortion advocates in other states are promoting boycotts of states like Missouri that currently protect unborn children from abortion](#), pro-life advocates in other states might boycott by no longer purchasing from Missouri businesses, or engaging in travel, tourism or shopping in Missouri. How tragic that would be for Missouri, which has been described as [one of the top pro-life states in the country](#).
 - Some “red” states have been prohibiting or attempting to prohibit their [governmental entities from doing business with financial firms in other states that take environmental, social and corporate governance \(ESG\) into consideration](#), and those same states and additional ones might extend that to any “abortion destination” state – which is what Missouri could become if any one of the six initiative petitions is enacted into law.
 - “[Missouri tourism provides a \\$13.5 billion economic impact that creates more than 257,000 jobs in the state](#),” according to the [Missouri Division of Tourism](#). It could be a devastating loss to the state and its residents if Missouri became the abortion capital of the Midwest.
- By some estimates, the economic cost to the U.S. of abortion in 2019 – due to the loss of nearly 630,000 unborn lives – was at least \$6.9 trillion, or 32 percent of GDP. **Missouri could experience increased economic loss if the number of abortions increases in the state.** And unsafe, legal abortions in the state could result in the disability of countless women who – perhaps permanently – would be unable to enter or remain in the workforce.
 - According to a June 15, 2022, report of the [Joint Economic Committee](#) (JEC) Republicans – [The Economic Cost of Abortion](#) – “the economic cost of abortion due the loss of unborn lives is 425 times larger than the earnings loss mothers would be expected to incur when having a child.”
 - According to a key finding in the report: “In the long run, abortion shrinks the labor force, stunts innovation, and limits economic growth. It also weakens the solvency of social insurance programs like Social Security and Medicare that rely on workers to support a growing elderly population.”
 - And as the [International Planned Parenthood Federation has noted](#): “**Unsafe abortions** are performed by un- or under-trained providers ... It is possible to have an unsafe, legal abortion.” (underlining added)
 - Under all six initiative petitions, “[n]otwithstanding any other provision of law to the contrary, no person may be subject to any criminal prosecution or civil penalty ... if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section”.
 - Thus, an unlicensed, untrained, undefined or otherwise self-described “health care provider” of ANY age would have the right to perform or induce unsafe, legal abortions (or assist in them) “and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.” While the economic cost of such a policy is incalculable, more important and horrifying, the human cost to Missouri’s citizens – born and unborn – is unimaginable.

Auditor Fitzpatrick, if we can be of further assistance, please do not hesitate to contact us.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, and University of Missouri.**

Fiscal Note Summary

The Attorney General's office and opponents estimate a potentially significant loss to state and local revenue. The Attorney General's office estimates increased state litigation costs of up to \$21 million. Other state governmental entities estimate no costs or savings. Local governments estimate reduced revenue of at least \$51,000 annually.

RE: Petition approval request from Jamie Corley regarding a proposed constitutional amendment to Article I, version 5 (2024-133)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Jamie Corley on August 30, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

County: _____

INITIATIVE PETITION

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 5th day of November, 2024, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

[OFFICIAL BALLOT TITLE]

NOTICE: The proposed amendment revises Article I of the Constitution by adopting one new section to be known as Article I, Section 36.

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article I of the Constitution is revised by adopting one new Section to be known as Article I, Section 36 to read as follows:

Section 36. 1. The state shall not deny or interfere with the fundamental right to refuse to have an abortion.

2. The state shall not deny or interfere with the fundamental right to refuse contraceptives.

3. Notwithstanding any other provision of law to the contrary, no taxpayer funds shall be directed, appropriated, or used in support of the provision of abortion in this state. This subsection does not authorize the general assembly to refuse to appropriate funds to a health care provider in this state if such health care provider performs abortions.

4. The state shall not deny or interfere with the fundamental right to choose to have an abortion, before fetal viability, in the case of rape or sexual assault, incest, fatal fetal abnormality, or risk to the health or safety of the female seeking an abortion.

a. In the event of a rape or sexual assault, no abortion shall be performed unless the alleged rape or sexual assault has been reported to a rape or sexual assault crisis hotline.

5. The state shall not deny or interfere with the fundamental right to choose contraceptives.

6. Nothing in this section shall be construed to repeal any law existing at the time of its passage unless such existing law directly conflicts with any provision of this section.

7. Notwithstanding any other provision of law to the contrary, no person may be subject to any criminal prosecution or civil penalty:

a. if such person is a pregnant female and induces, seeks, or obtains an abortion in this or any state;

b. if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section; or

c. if such person assists or provides support to a pregnant female in obtaining an abortion in this or any state.

8. Notwithstanding any other provision of law to the contrary, no taxpayer funds shall be directed, appropriated, or used in support of the criminal prosecution of:

a. any pregnant female for inducing, seeking, or obtaining an abortion;

b. any health care provider for performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section; or

c. any person for assisting or providing support to a pregnant female in obtaining an abortion.

9. The rights guaranteed by this section shall be unalienable. Any restriction on these rights shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-133)**

Subject

Initiative petition from Jamie Corley regarding a proposed constitutional amendment to Article I. (Received August 30, 2023)

Date

September 19, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, and **St. Louis Community College**.

Samuel H. Lee, Campaign Life Missouri provided information to the State Auditor's office.

DATE: September 8, 2023

FROM: Diana Haines

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article I (2024-133)

The proposed amendment to Article I would add the “fundamental right to choose to have an abortion” to Missouri’s constitution. It would abrogate Missouri’s recently enacted Right to Life of the Unborn Child Act and enshrine in our state constitution the right to terminate the lives of unborn Missourians. The Missouri Attorney General’s Office expects that the enactment of this proposal would result in a significant fiscal impact to the state.

Analysis

Enshrining abortion rights in our state constitution will have an adverse fiscal impact on Missouri as a whole, and on the state’s political subdivisions. Additionally, the proposed petitions would also trigger significant additional legal costs because they will certainly give rise to legal challenges in which the Attorney General’s Office would be involved.

I. The proposed petitions will have an adverse fiscal impact on Missouri and its political subdivisions

This ballot measure will affect the present and future population of all of Missouri’s 114 counties, and her hundreds of cities, townships and villages. For example, in commenting on the fiscal impact of a similar initiative petition, Greene County recognized the adverse fiscal impact of abortion as it relates to a decreased population. Greene County estimated that 135 future citizens would be lost annually due to legalizing abortion. Greene County’s estimates were supported by fertility rates and the number of

abortions recorded in 2020 by the Missouri Department of Health and Senior Services. Greene County estimated nearly \$51,000 in lost revenue annually to that county based on the reduction in population base. Moreover, this annual dollar amount necessarily increases cumulatively in successive years. (e.g., \$102,000 in year 2, \$153,000 in year 3, \$204,000 in year 4, etc.).

The economic loss to Missouri is not limited to Greene County. The widespread economic devastation created by abortion is supported by a nationwide study published by the United States Senate Joint Economic Committee. See

<https://www.jec.senate.gov/public/index.cfm/republicans/2022/6/the-economic-cost-of-abortion>. It reports an estimated economic cost of abortion in 2019 alone, due to nearly 630,000 unborn lives – was at least \$6.9 trillion, or 32 percent of the GDP. A fiscal note must “state the measure’s estimated cost or savings, if any, to state or local governmental entities.” § 116.175, RSMo. The budget for “state [and] local governmental entities” is 11% of the total Missouri economy, according to a 2021 report by the Missouri Economic Research and Information Center. Based on the Senate study and 4,660 abortions in Missouri in 2019,¹ the total economic loss to Missouri from these measures could be as high as \$51 billion, meaning loss to “state or local government entities” would be as high as \$5.61 billion.

That magnitude of economic loss will adversely impact every political subdivision in the state. Indeed, the more populous a region, the greater the economic harm from an aborted population will be. St. Louis City, Jackson County, St. Louis County and Kansas City will be hit hardest of all. These four geographic areas account for approximately one-third of Missouri’s total population.² Based on the numbers cited above, the economic harm to Missouri’s most populous areas is expected to be close to \$17 billion. This type of substantial economic loss attributable to aborting unborn lives cannot be denied and must be included in any fiscal analysis informing voters of the true impact of this proposed initiative petition.

II. The proposed petitions will increase legal costs for the Attorney General’s Office

The Attorney General’s Office (AGO) would also incur substantial legal costs relating to the proposed petitions, including additional costs to general

¹ <https://health.mo.gov/data/vitalstatistics/mvs19/Table12ab.pdf>.

² See <https://www.missouri-demographics.com/cities by population>

operating expenses. First, the petitions involve a controversial topic that is sure to motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting the sanctity of life in Missouri. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of protecting the unborn, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

All told, any single lawsuit challenging the validity or application of these proposed amendments would cost as much as \$1.5 million based on the AGO's estimates. Even if validity was only challenged in a few cases, that would still amount to as much as \$6 million in additional legal costs in the first few years. Over the course of 10 years, the office estimates general increased litigation costs and costs associated with conflict counsel to be as much as \$15 million.

The Attorney General's Office also estimates substantial sums in attorney's fees and costs because these proposed amendments would violate fundamental conscience protections guaranteed by federal law if applied to certain Missouri workers. Private and public employees in Missouri are guaranteed conscience protections by many federal laws, such as RLUIPA and § 401(b) of the Health Programs Extension Act of 1973. The proposed amendment would violate these conscience protections with respect to certain Missouri workers, forcing the office to pay not only for conflict counsel, but also attorney's fees to lawyers asserting the federal conscience rights of individual Missourians. The office anticipates up to \$6 million in additional costs for that reason.

Conclusion

These proposed initiative petitions would subvert current state law and enshrine in Missouri's constitution the right to abort unborn children. Not only is that morally repugnant, it is fiscally irresponsible. If enacted, these proposed petitions would have a severe, negative economic impact on the State of Missouri and its political subdivisions. The lost revenue from aborting so many unborn Missourians could be as high as \$51 billion, including \$5.61 billion to "state or local governmental entities." § 116.175. Moreover, additional litigation costs for the AGO and mandatory attorney's fees could run as high as \$21 million. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-133 and determined there is no impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated they have reviewed Draft No. 24-130 IP through 24-134 IP and has determined that the initiative petitions, with changes, results in the same zero impact as were stated in response to initiative petition 24-129.

Changes to the bill are as follows:

The language in IP 24-130 through IP 24-134 has the same sections similar to those in IP 24-129 as it creates provisions relating to a constitutional amendment that would allow abortions under certain circumstances, reinstating the possibility of abortion facilities being allowed to operate in Missouri.

Comments:

The initiative petition for IP 24-130 through IP 24-134 is the same zero impact for IP 24-129.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-133 proposing to amend Article I.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-133, their department assumes this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to abortion does not directly financially impact their office.

Section 36.3 undermines the General Assembly's appropriation power. The constitution specifies the limitations on the General Assembly's power and that section does not specify other feasible limits upon adoption of new sections, creating a conflict with the proposed language here. Section 36.4 does not define "right to choose" as though that creates an affirmative requirement on the state to allow or perform an abortion, or to make services accessible. Section 36.4.a conflicts with free speech principles. The proposed section compels speech in order to effectuate another (proposed) constitutional right. Section 36.7 and its subsections are vague. The language is not limited explicitly limited to Missouri. This State cannot control criminal proceedings in another jurisdiction for alleged violations of the other state's law. Further, the language reads that "no person may be subject to *any* criminal prosecution" if such person performs one of the enumerated actions. One interpretation is that one may avoid criminal liability for any possible crime after having sought an abortion, regardless of other context. Due the vagueness throughout the proposal, Section 36.6 also will require interpretation to understand its full effect.

Each provision noted above creates potential litigation costs to the state through declaratory judgement actions to understand the meaning of terms, criminal proceedings (including post-trial), and civil litigation about actions taken when attempting to balance (proposed) constitutional rights. These costs will ultimately burden taxpayers.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated Initiative Petition 24-133 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-133.

Officials from the **Office of Administration** indicated this proposal relating to abortion does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-133 a proposed constitutional amendment to Article I, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-133 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated in reviewing initiative petition 24-133 it has been determined there will be an increased cost to the County of Greene due to loss of tax revenue if voters vote to amend Article I.

The Missouri Department of Health & Senior Services recorded 135 "resident abortions" for Greene County in 2020 and 118 in 2021. The population of Greene County per the 2020 United States census was 298,915.

(<https://www.census.gov/quickfacts/fact/table/greene-county-missouri/PST045221>)

In terms of economic impact, Greene County received \$112,673,249 in sales and property taxes for calendar year 2022 (**\$376.94** per capita based on **2020** census data). Accordingly, calculations from these figures indicate an annual loss in population of **135** represents a cost to the County of **\$50,886.90**; an increase in abortion statistics could reasonably be extrapolated to illustrate less tax collections and revenues over the years of potential working lifetimes.

Please see the attached table demonstrating the anticipated yearly on per capita basis and the overall fiscal impact on Greene County tax collections and revenues based on the recorded abortions in 2020 by Missouri Department of Health and Senior Services.

Additional research regarding the broader fiscal impact of lower fertility rates on local and state communities and government budgets may be found here:

Property Tax SubTotal	15,068,364.57
Total Taxes	112,673,249.02
Per Capita	376.94
Annual lost population	135
Annual Cost	50,886.90

Officials from **St. Louis County** indicated there would be no fiscal impact to their county as a result of this initiative petition.

Officials from the **City of Kansas City** indicated this proposed amendment has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated it is unknown the estimated cost or savings this petition would have.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and do not see an impact on revenue or expense to their college.

Samuel H. Lee, Campaign Life Missouri provided the following information:

Samuel Lee
Director

September 9, 2023

State Auditor's Office
State Capitol
201 West Capitol Ave.
Jefferson City, MO 65101

Dear Auditor Fitzpatrick,

In accordance with the provisions of [section 116.175](#), this is a proposed statement of the fiscal impact of the six initiative petitions numbered 2024-129 through 2024-134 submitted by Jamie Corley with the Missouri Women and Family Research Fund, which your office received on August 30, 2023.

To summarize, the proposed six ballot measures – all of which would amend the Missouri Constitution – could result in:

- A decrease in federal Medicaid revenues by an unknown amount, up to \$12.5 billion annually.
- Increased costs to taxpayers of unknown amounts, because of medical treatment of, or other services for, children or adults injured by abortions performed by unlicensed or untrained persons.
- Increased costs of an unknown amount to the Department of Health and Senior Services for the inspection and licensing of thousands of abortion facilities.
- Loss of revenue of unknown amounts to the state and its political subdivisions, because of boycotts of businesses, shopping, tourism or other revenue-generating activities, as a result of Missouri becoming a Midwest “abortion destination” state.
- Long-term loss of revenues of unknown amounts to the state and its political subdivisions, because of a decrease in the workforce due to the number of children who are aborted, as well as because of individuals who can no longer work after they become disabled because of unsafe abortions. But more important than fiscal costs, the human cost to Missouri’s citizens is unimaginable.

Former-Auditor Galloway made a comparable analysis of the fiscal impacts when she issued her fiscal note and fiscal note summary on [HB 126 \(20-R001 on June 19, 2019\)](#) – the subject of a referendum that year. Her fiscal note summary became part of the [official ballot title certified by Secretary of State on August 14, 2019](#), for the referendum on HB 126.

Supporting Information on Fiscal Impact of the Six Initiative Petitions:

- The loss of federal Medicaid matching dollars, which in the fiscal year 2024 budget **could be a loss of nearly \$12.5 billion.**
 - In FY 2023, Missouri lawmakers appropriated about \$16.9 billion for Medicaid (MO HealthNet) across state agencies. [The majority of Medicaid financing in 2023 – \\$10.6 billion – came from federal matching funds.](#) The governor’s budget for MO HealthNet for FY 2024 is nearly \$19.3 billion – [almost \\$12.5 billion which comes from federal funds.](#)
 - The loss of federal Medicaid matching funds could occur if Missouri is out of compliance with federal Medicaid requirements, for example:
 - If the state cuts off Medicaid reimbursements to Catholic hospitals or other pro-life health care providers. This could result from the requirement found in all six initiative petitions that there is a “fundamental right to choose to have an abortion ... in the case of ... risk to the health or safety of the female seeking an abortion.” And each of the six declares this “fundamental right” is “unalienable” and that “the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.”
 - These provisions could be interpreted to “obligate[]” the state to require Medicaid providers (including Catholic hospitals and other pro-life or faith-based health care providers) to perform or induce abortions at any time during pregnancy where there is the mere assertion (by anyone) that the abortion is necessary for “health or safety.”
 - Thus, because the right to a “health or safety” abortion is “unalienable” ([not transferable to another; not capable of being taken away or denied](#)), state government could compel recipients of public funds (e.g., Medicaid providers) to protect such a “right” as a condition of receiving public funds.
 - However, for the state government to require Catholic or other pro-life health care providers (or others) to offer, pay for or refer for abortions, would be a violation of their conscience rights – for which the federal government could withhold from the state, Medicaid matching dollars.
 - For example, in California in 2020, [HHS disallowed \\$200 million in federal Medicaid matching funds per quarter due to the state’s unlawful abortion insurance mandate](#), which forced a Catholic order of religious sisters and a non-profit Christian Church to provide abortion health insurance coverage. See also:
 - [“The Fight Over California’s Abortion Coverage Mandate,”](#) *Regulatory Review*, February 3, 2021 (“Can a state require that all health plans offered to its residents cover elective abortions? The federal government thinks not, and the state of California is poised to lose at least \$200 million in Medicaid dollars because it insists that health plans in its state cover abortion services.”)
 - [“Federal agency says UVM Med Center forced nurse to assist in abortion,”](#) *VT Digger*, August 28, 2019 (“The U.S. Department of Health and Human Services has accused the University of Vermont Medical Center of forcing a nurse to assist in an abortion procedure despite the nurse’s religious objections. ... The [letter from Roger Severino](#), the director of HHS’ Office for

Civil Rights, asks the hospital to adjust its policies or face losing the federal funding it receives from HHS.”)

- There might be additional circumstances where state compliance with at least some of the proposed constitutional amendments would force the state to be out of compliance with federal Medicaid law, such as the state paying for abortions with federal funds that are not permitted to be reimbursed under federal law. For example, the state might be compelled by the terms of some of the initiative petitions to pay for all abortions for all Medicaid-eligible females, because failing to do so might be construed as the state “deny[ing] or interfere[ing] with the fundamental right to choose to have an abortion” when the state is paying for the labor and delivery of children for all Medicaid-eligible females. In other words, under an amended state constitution, Missouri might no longer be “permitted to enact persuasive measures which favor childbirth over abortion” (*Planned Parenthood v. Casey*, 505 U.S. 833, 886 (1992)).
- Under the six initiative petitions, “no person may be subject to any criminal prosecution or civil penalty ... if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section”. Thus, ANY person claiming to be a “health care provider” – licensed or unlicensed, trained or untrained – could legally perform, induce or assist in an abortion **with no penalties whatsoever**. **This could result in numerous, life-altering medical complications for the child or adult who underwent the abortion.** And because no civil penalties could be imposed (e.g., no payments for medical care, no recovery for economic or non-economic damages in a malpractice action, etc.), this could result in huge medical costs for the female and her child – **that would ultimately be paid for by taxpayers.**
 - Regarding abortion, in Missouri, the cost of inpatient medical procedures and emergency department services for treating “issues before childbirth with complications” is a **median charge per person of \$11,977** – with a minimum charges of \$4,140 and a **maximum charge of \$35,345**.
 - And the cost could be even higher for an abortion-related ER visit. One recent study found that a “[p]atient concealment and/or physician failure to identify a prior abortion during an ER visit is a significant risk factor for a subsequent hospital admission.” In fact, “[c]hemical abortion patients whose abortions are misclassified as miscarriages during an ER visit subsequently experience on average 3.2 hospital admissions within 30 days. 86% of the patients ultimately have surgical removal of retained products of conception (RPOC).”
 - According to the CDC, in 2020, nearly 10,000 Missouri residents obtained abortions (9,980 total, but only 167 within the state). Having unlicensed, non-medical personnel permitted to perform or induce abortions within the state on even a fraction of these 10,000 girls or women could result in untold harm to them now – and harm to their future health and fertility.
 - And there might be additional costs to the state, local governments, school districts, etc., beyond treating the complications to girls or women from having abortions performed, induced or “assisted” on them by non-physicians or by a broad range of undefined or self-described “health care providers.” Any low-birthweight infant born

- alive after a late-term abortion could need long-term NICU care and possibly permanent assistance throughout childhood and during his or her adult life.
- According to a [2020 New York Times story](#): “The March of Dimes estimates that the average societal cost of each preterm birth, which includes medical care, early intervention services and lost productivity, is \$65,000.”
 - That same story reported on a cost of \$4 million in NICU costs for triplets who were born prematurely.
 - [Preterm birth lifetime costs in the United States](#) (as of 2016) were “estimated to be \$25.2 billion: \$17.1 billion for medical care of persons born preterm, \$2.0 billion for delivery care, \$1.3 billion for early intervention and special education, and \$4.8 billion in lost productivity due to associated disabilities in adults.”
- **Other costs could be the licensing and inspection of multiple locations (potentially thousands of sites) as “abortion facilities,” as required under Missouri law.** [Section 197.205](#) requires that no person or governmental unit shall establish, conduct or maintain an abortion facility in the state without a license issued by the Missouri Department of Health and Senior Services (DHSS). And because each of the six initiative petitions state that “[n]othing in this section [36 of Article I] shall be construed to repeal any law existing at the time of its passage unless such existing law directly conflicts with any provision of this section,” then DHSS would be obligated to enforce section 197.205 – while no longer being permitted to enforce the “directly conflict[ing]” “existing law[s]” requiring that an abortion can only be performed or induced by a physician.
 - [Section 188.015](#) defines an “abortion facility” as “a clinic, physician’s office, or any other place or facility in which abortions are performed or induced other than a hospital”.
 - [Section 197.230](#) states that “[i]n the case of any abortion facility, the department [of health and senior services (DHSS)] shall make or cause to be made an unannounced on-site inspection and investigation at least annually.” Such on-site inspections and investigations must include a variety of areas relating to staffing and equipment to respond to medical emergencies, compliance with Missouri’s abortion laws and the requirement that continuous physician services or registered professional nursing services are to be provided whenever a patient is in the facility.
 - There are [more than 7,000 licensed pharmacists in Missouri](#), and under the proposed constitutional amendments, any pharmacy (or other place) where a pharmacist provides abortion pills, DHSS would be required to inspect and license. **This would be an enormous cost to the department and to taxpayers.** And any other place where abortion pills would be provided (homes, schools, vending machines, clinics, etc.) would also have to be inspected at least once a year and licensed.
 - **Economic boycotts of Missouri and its businesses could result if the “Show-Me” state becomes the “Abort-Me” state, once it is transformed into a Midwest “abortion destination” – a distinct possibility since Missouri is [“within a day’s reach of half of U.S. households”](#).**

- Just as [some pro-abortion advocates in other states are promoting boycotts of states like Missouri that currently protect unborn children from abortion](#), pro-life advocates in other states might boycott by no longer purchasing from Missouri businesses, or engaging in travel, tourism or shopping in Missouri. How tragic that would be for Missouri, which has been described as [one of the top pro-life states in the country](#).
 - Some “red” states have been prohibiting or attempting to prohibit their [governmental entities from doing business with financial firms in other states that take environmental, social and corporate governance \(ESG\) into consideration](#), and those same states and additional ones might extend that to any “abortion destination” state – which is what Missouri could become if any one of the six initiative petitions is enacted into law.
 - “[Missouri tourism provides a \\$13.5 billion economic impact that creates more than 257,000 jobs in the state](#),” according to the [Missouri Division of Tourism](#). It could be a devastating loss to the state and its residents if Missouri became the abortion capital of the Midwest.
- By some estimates, the economic cost to the U.S. of abortion in 2019 – due to the loss of nearly 630,000 unborn lives – was at least \$6.9 trillion, or 32 percent of GDP. **Missouri could experience increased economic loss if the number of abortions increases in the state.** And unsafe, legal abortions in the state could result in the disability of countless women who – perhaps permanently – would be unable to enter or remain in the workforce.
 - According to a June 15, 2022, report of the [Joint Economic Committee](#) (JEC) Republicans – [The Economic Cost of Abortion](#) – “the economic cost of abortion due to the loss of unborn lives is 425 times larger than the earnings loss mothers would be expected to incur when having a child.”
 - According to a key finding in the report: “In the long run, abortion shrinks the labor force, stunts innovation, and limits economic growth. It also weakens the solvency of social insurance programs like Social Security and Medicare that rely on workers to support a growing elderly population.”
 - And as the [International Planned Parenthood Federation has noted](#): “**Unsafe abortions** are performed by un- or under-trained providers ... It is possible to have an unsafe, legal abortion.” (underlining added)
 - Under all six initiative petitions, “[n]otwithstanding any other provision of law to the contrary, no person may be subject to any criminal prosecution or civil penalty ... if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section”.
 - Thus, an unlicensed, untrained, undefined or otherwise self-described “health care provider” of ANY age would have the right to perform or induce unsafe, legal abortions (or assist in them) “and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.” While the economic cost of such a policy is incalculable, more important and horrifying, the human cost to Missouri’s citizens – born and unborn – is unimaginable.

Auditor Fitzpatrick, if we can be of further assistance, please do not hesitate to contact us.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, and University of Missouri.**

Fiscal Note Summary

The Attorney General's office and opponents estimate a potentially significant loss to state and local revenue. The Attorney General's office estimates increased state litigation costs of up to \$21 million. Other state governmental entities estimate no costs or savings. Local governments estimate reduced revenue of at least \$51,000 annually.

STATE AUDITORS OFFICE

RE: Petition approval request from Jamie Corley regarding a proposed constitutional amendment to Article I, version 4 (2024-132)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Jamie Corley on August 30, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

NOTICE: The proposed amendment revises Article I of the Constitution by adopting one new section to be known as Article I, Section 36.

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article I of the Constitution is revised by adopting one new Section to be known as Article I, Section 36 to read as follows:

Section 36. 1. The state shall not deny or interfere with the fundamental right to refuse to have an abortion.

2. The state shall not deny or interfere with the fundamental right to refuse contraceptives.

3. Notwithstanding any other provision of law to the contrary, no taxpayer funds shall be directed, appropriated, or used in support of the provision of abortion in this state. This subsection does not authorize the general assembly to refuse to appropriate funds to a health care provider in this state if such health care provider performs abortions.

4. The state shall not deny or interfere with the fundamental right to choose to have an abortion in the case of rape or sexual assault, incest, fatal fetal abnormality, or risk to the health or safety of the female seeking an abortion.

a. In the event of a rape or sexual assault, no abortion shall be performed unless the alleged rape or sexual assault has been reported to a rape or sexual assault crisis hotline.

5. Notwithstanding subsection 4 of this section, the state shall not deny or interfere with the fundamental right to choose to have an abortion through a gestational age of twelve weeks.

6. The state shall not deny or interfere with the fundamental right to choose contraceptives.

7. Nothing in this section shall be construed to repeal any law existing at the time of its passage unless such existing law directly conflicts with any provision of this section.

8. Notwithstanding any other provision of law to the contrary, no person may be subject to any criminal prosecution or civil penalty:

a. if such person is a pregnant female and induces, seeks, or obtains an abortion in this or any state;

b. if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section; or

c. if such person assists or provides support to a pregnant female in obtaining an abortion in this or any state.

9. Notwithstanding any other provision of law to the contrary, no taxpayer funds shall be directed, appropriated, or used in support of the criminal prosecution of:

a. any pregnant female for inducing, seeking, or obtaining an abortion;

b. any health care provider for performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section; or

c. any person for assisting or providing support to a pregnant female in obtaining an abortion.

10. The rights guaranteed by this section shall be unalienable. Any restriction on these rights shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-132)**

Subject

Initiative petition from Jamie Corley regarding a proposed constitutional amendment to Article I. (Received August 30, 2023)

Date

September 19, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, and **St. Louis Community College**.

Samuel H. Lee, Campaign Life Missouri provided information to the State Auditor's office.

FROM: Diana Haines

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article I (2024-132)

The proposed amendment to Article I would add the “fundamental right to choose to have an abortion” to Missouri’s constitution. It would abrogate Missouri’s recently enacted Right to Life of the Unborn Child Act and enshrine in our state constitution the right to terminate the lives of unborn Missourians. The Missouri Attorney General’s Office expects that the enactment of this proposal would result in a significant fiscal impact to the state.

Analysis

Enshrining abortion rights in our state constitution will have an adverse fiscal impact on Missouri as a whole, and on the state’s political subdivisions. Additionally, the proposed petitions would also trigger significant additional legal costs because they will certainly give rise to legal challenges in which the Attorney General’s Office would be involved.

I. The proposed petitions will have an adverse fiscal impact on Missouri and its political subdivisions

This ballot measure will affect the present and future population of all of Missouri’s 114 counties, and her hundreds of cities, townships and villages. For example, in commenting on the fiscal impact of a similar initiative petition, Greene County recognized the adverse fiscal impact of abortion as it relates to a decreased population. Greene County estimated that 135 future citizens would be lost annually due to legalizing abortion. Greene County’s estimates were supported by fertility rates and the number of

abortions recorded in 2020 by the Missouri Department of Health and Senior Services. Greene County estimated nearly \$51,000 in lost revenue annually to that county based on the reduction in population base. Moreover, this annual dollar amount necessarily increases cumulatively in successive years. (e.g., \$102,000 in year 2, \$153,000 in year 3, \$204,000 in year 4, etc.).

The economic loss to Missouri is not limited to Greene County. The widespread economic devastation created by abortion is supported by a nationwide study published by the United States Senate Joint Economic Committee. See

<https://www.jec.senate.gov/public/index.cfm/republicans/2022/6/the-economic-cost-of-abortion>. It reports an estimated economic cost of abortion in 2019 alone, due to nearly 630,000 unborn lives – was at least \$6.9 trillion, or 32 percent of the GDP. A fiscal note must “state the measure’s estimated cost or savings, if any, to state or local governmental entities.” § 116.175, RSMo. The budget for “state [and] local governmental entities” is 11% of the total Missouri economy, according to a 2021 report by the Missouri Economic Research and Information Center. Based on the Senate study and 4,660 abortions in Missouri in 2019,¹ the total economic loss to Missouri from these measures could be as high as \$51 billion, meaning loss to “state or local government entities” would be as high as \$5.61 billion.

That magnitude of economic loss will adversely impact every political subdivision in the state. Indeed, the more populous a region, the greater the economic harm from an aborted population will be. St. Louis City, Jackson County, St. Louis County and Kansas City will be hit hardest of all. These four geographic areas account for approximately one-third of Missouri’s total population.² Based on the numbers cited above, the economic harm to Missouri’s most populous areas is expected to be close to \$17 billion. This type of substantial economic loss attributable to aborting unborn lives cannot be denied and must be included in any fiscal analysis informing voters of the true impact of this proposed initiative petition.

II. The proposed petitions will increase legal costs for the Attorney General’s Office

The Attorney General’s Office (AGO) would also incur substantial legal costs relating to the proposed petitions, including additional costs to general

¹ <https://health.mo.gov/data/vitalstatistics/mvs19/Table12ab.pdf>.

² See <https://www.missouri-demographics.com/cities by population>

operating expenses. First, the petitions involve a controversial topic that is sure to motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting the sanctity of life in Missouri. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of protecting the unborn, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

All told, any single lawsuit challenging the validity or application of these proposed amendments would cost as much as \$1.5 million based on the AGO's estimates. Even if validity was only challenged in a few cases, that would still amount to as much as \$6 million in additional legal costs in the first few years. Over the course of 10 years, the office estimates general increased litigation costs and costs associated with conflict counsel to be as much as \$15 million.

The Attorney General's Office also estimates substantial sums in attorney's fees and costs because these proposed amendments would violate fundamental conscience protections guaranteed by federal law if applied to certain Missouri workers. Private and public employees in Missouri are guaranteed conscience protections by many federal laws, such as RLUIPA and § 401(b) of the Health Programs Extension Act of 1973. The proposed amendment would violate these conscience protections with respect to certain Missouri workers, forcing the office to pay not only for conflict counsel, but also attorney's fees to lawyers asserting the federal conscience rights of individual Missourians. The office anticipates up to \$6 million in additional costs for that reason.

Conclusion

These proposed initiative petitions would subvert current state law and enshrine in Missouri's constitution the right to abort unborn children. Not only is that morally repugnant, it is fiscally irresponsible. If enacted, these proposed petitions would have a severe, negative economic impact on the State of Missouri and its political subdivisions. The lost revenue from aborting so many unborn Missourians could be as high as \$51 billion, including \$5.61 billion to "state or local governmental entities." § 116.175. Moreover, additional litigation costs for the AGO and mandatory attorney's fees could run as high as \$21 million. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-132 and determined there is no impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated they have reviewed Draft No. 24-130 IP through 24-134 IP and has determined that the initiative petitions, with changes, results in the same zero impact as were stated in response to initiative petition 24-129.

Changes to the bill are as follows:

The language in IP 24-130 through IP 24-134 has the same sections similar to those in IP 24-129 as it creates provisions relating to a constitutional amendment that would allow abortions under certain circumstances, reinstating the possibility of abortion facilities being allowed to operate in Missouri.

Comments:

The initiative petition for IP 24-130 through IP 24-134 is the same zero impact for IP 24-129.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-132 proposing to amend Article I.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-132, their department assumes this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to abortion does not directly finally impact their office.

Section 36.3 undermines the General Assembly's appropriation power. The constitution specifies the limitations on the General Assembly's power and that section does not specify other feasible limits upon adoption of new sections, creating a conflict with the proposed language here. Section 36.4 does not define "right to choose" as though that creates an affirmative requirement on the state to allow or perform an abortion, or to make services accessible. Section 36.4.a conflicts with free speech principles. The proposed section compels speech in order to effectuate another (proposed) constitutional right. Section 36.8 and its subsections are vague. The language is not limited explicitly limited to Missouri. This State cannot control criminal proceedings in another jurisdiction for alleged violations of the other state's law. Further, the language reads that "no person may be subject to *any* criminal prosecution" if such person performs one of the enumerated actions. One interpretation is that one may avoid criminal liability for any possible crime after having sought an abortion, regardless of other context. Due the vagueness throughout the proposal, Section 36.7 also will require interpretation to understand its full effect.

Each provision noted above creates potential litigation costs to the state through declaratory judgement actions to understand the meaning of terms, criminal proceedings (including post-trial), and civil litigation about actions taken when attempting to balance (proposed) constitutional rights. These costs will ultimately burden taxpayers.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated Initiative Petition 24-132 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-132.

Officials from the **Office of Administration** indicated this proposal relating to abortion does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-132 a proposed constitutional amendment to Article I, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-132 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated in reviewing initiative petition 24-132 it has been determined there will be an increased cost to the County of Greene due to loss of tax revenue if voters vote to amend Article I.

The Missouri Department of Health & Senior Services recorded 135 "resident abortions" for Greene County in 2020 and 118 in 2021. The population of Greene County per the 2020 United States census was 298,915.

(<https://www.census.gov/quickfacts/fact/table/greencountymissouri/PST045221>)

In terms of economic impact, Greene County received \$112,673,249 in sales and property taxes for calendar year 2022 (**\$376.94** per capita based on **2020** census data). Accordingly, calculations from these figures indicate an annual loss in population of **135** represents a cost to the County of **\$50,886.90**; an increase in abortion statistics could reasonably be extrapolated to illustrate less tax collections and revenues over the years of potential working lifetimes.

Please see the attached table demonstrating the anticipated yearly on per capita basis and the overall fiscal impact on Greene County tax collections and revenues based on the recorded abortions in 2020 by Missouri Department of Health and Senior Services.

Additional research regarding the broader fiscal impact of lower fertility rates on local and state communities and government budgets may be found here:

- <https://www.pewtrusts.org/en/research-and-analysis/issue-briefs/2022/12/the-long-term-decline-in-fertility-and-what-it-means-for-state-budgets>

Officials from **St. Louis County** indicated there would be no fiscal impact to their county as a result of this initiative petition.

Officials from the **City of Kansas City** indicated this proposed amendment has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated it is unknown the estimated cost or savings this petition would have.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and do not see an impact on revenue or expense to their college.

Samuel H. Lee, Campaign Life Missouri provided the following information:

Samuel Lee
Director

September 9, 2023

State Auditor's Office
State Capitol
201 West Capitol Ave.
Jefferson City, MO 65101

Dear Auditor Fitzpatrick,

In accordance with the provisions of [section 116.175](#), this is a proposed statement of the fiscal impact of the six initiative petitions numbered 2024-129 through 2024-134 submitted by Jamie Corley with the Missouri Women and Family Research Fund, which your office received on August 30, 2023.

To summarize, the proposed six ballot measures – all of which would amend the Missouri Constitution – could result in:

- A decrease in federal Medicaid revenues by an unknown amount, up to \$12.5 billion annually.
- Increased costs to taxpayers of unknown amounts, because of medical treatment of, or other services for, children or adults injured by abortions performed by unlicensed or untrained persons.
- Increased costs of an unknown amount to the Department of Health and Senior Services for the inspection and licensing of thousands of abortion facilities.
- Loss of revenue of unknown amounts to the state and its political subdivisions, because of boycotts of businesses, shopping, tourism or other revenue-generating activities, as a result of Missouri becoming a Midwest “abortion destination” state.
- Long-term loss of revenues of unknown amounts to the state and its political subdivisions, because of a decrease in the workforce due to the number of children who are aborted, as well as because of individuals who can no longer work after they become disabled because of unsafe abortions. But more important than fiscal costs, the human cost to Missouri’s citizens is unimaginable.

Former-Auditor Galloway made a comparable analysis of the fiscal impacts when she issued her fiscal note and fiscal note summary on [HB 126 \(20-R001 on June 19, 2019\)](#) – the subject of a referendum that year. Her fiscal note summary became part of the [official ballot title certified by Secretary of State on August 14, 2019](#), for the referendum on HB 126.

Supporting Information on Fiscal Impact of the Six Initiative Petitions:

- The loss of federal Medicaid matching dollars, which in the fiscal year 2024 budget **could be a loss of nearly \$12.5 billion.**
 - In FY 2023, Missouri lawmakers appropriated about \$16.9 billion for Medicaid (MO HealthNet) across state agencies. [The majority of Medicaid financing in 2023 – \\$10.6 billion – came from federal matching funds.](#) The governor’s budget for MO HealthNet for FY 2024 is nearly \$19.3 billion – [almost \\$12.5 billion which comes from federal funds.](#)
 - The loss of federal Medicaid matching funds could occur if Missouri is out of compliance with federal Medicaid requirements, for example:
 - If the state cuts off Medicaid reimbursements to Catholic hospitals or other pro-life health care providers. This could result from the requirement found in all six initiative petitions that there is a “fundamental right to choose to have an abortion ... in the case of ... risk to the health or safety of the female seeking an abortion.” And each of the six declares this “fundamental right” is “unalienable” and that “the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.”
 - These provisions could be interpreted to “obligate[]” the state to require Medicaid providers (including Catholic hospitals and other pro-life or faith-based health care providers) to perform or induce abortions at any time during pregnancy where there is the mere assertion (by anyone) that the abortion is necessary for “health or safety.”
 - Thus, because the right to a “health or safety” abortion is “unalienable” ([not transferable to another; not capable of being taken away or denied](#)), state government could compel recipients of public funds (e.g., Medicaid providers) to protect such a “right” as a condition of receiving public funds.
 - However, for the state government to require Catholic or other pro-life health care providers (or others) to offer, pay for or refer for abortions, would be a violation of their conscience rights – for which the federal government could withhold from the state, Medicaid matching dollars.
 - For example, in California in 2020, [HHS disallowed \\$200 million in federal Medicaid matching funds per quarter due to the state’s unlawful abortion insurance mandate](#), which forced a Catholic order of religious sisters and a non-profit Christian Church to provide abortion health insurance coverage. See also:
 - [“The Fight Over California’s Abortion Coverage Mandate,”](#) *Regulatory Review*, February 3, 2021 (“Can a state require that all health plans offered to its residents cover elective abortions? The federal government thinks not, and the state of California is poised to lose at least \$200 million in Medicaid dollars because it insists that health plans in its state cover abortion services.”)
 - [“Federal agency says UVM Med Center forced nurse to assist in abortion,”](#) *VT Digger*, August 28, 2019 (“The U.S. Department of Health and Human Services has accused the University of Vermont Medical Center of forcing a nurse to assist in an abortion procedure despite the nurse’s religious objections. ... The [letter from Roger Severino](#), the director of HHS’ Office for

Civil Rights, asks the hospital to adjust its policies or face losing the federal funding it receives from HHS.”)

- There might be additional circumstances where state compliance with at least some of the proposed constitutional amendments would force the state to be out of compliance with federal Medicaid law, such as the state paying for abortions with federal funds that are not permitted to be reimbursed under federal law. For example, the state might be compelled by the terms of some of the initiative petitions to pay for all abortions for all Medicaid-eligible females, because failing to do so might be construed as the state “deny[ing] or interfere[ing] with the fundamental right to choose to have an abortion” when the state is paying for the labor and delivery of children for all Medicaid-eligible females. In other words, under an amended state constitution, Missouri might no longer be “permitted to enact persuasive measures which favor childbirth over abortion” (*Planned Parenthood v. Casey*, 505 U.S. 833, 886 (1992)).
- Under the six initiative petitions, “no person may be subject to any criminal prosecution or civil penalty ... if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section”. Thus, ANY person claiming to be a “health care provider” – licensed or unlicensed, trained or untrained – could legally perform, induce or assist in an abortion **with no penalties whatsoever**. **This could result in numerous, life-altering medical complications for the child or adult who underwent the abortion.** And because no civil penalties could be imposed (e.g., no payments for medical care, no recovery for economic or non-economic damages in a malpractice action, etc.), this could result in huge medical costs for the female and her child – **that would ultimately be paid for by taxpayers.**
 - Regarding abortion, in Missouri, the cost of inpatient medical procedures and emergency department services for treating “issues before childbirth with complications” is a **median charge per person of \$11,977** – with a minimum charges of \$4,140 and a **maximum charge of \$35,345**.
 - And the cost could be even higher for an abortion-related ER visit. One recent study found that a “[p]atient concealment and/or physician failure to identify a prior abortion during an ER visit is a significant risk factor for a subsequent hospital admission.” In fact, “[c]hemical abortion patients whose abortions are misclassified as miscarriages during an ER visit subsequently experience on average 3.2 hospital admissions within 30 days. 86% of the patients ultimately have surgical removal of retained products of conception (RPOC).”
 - According to the CDC, in 2020, nearly 10,000 Missouri residents obtained abortions (9,980 total, but only 167 within the state). Having unlicensed, non-medical personnel permitted to perform or induce abortions within the state on even a fraction of these 10,000 girls or women could result in untold harm to them now – and harm to their future health and fertility.
 - And there might be additional costs to the state, local governments, school districts, etc., beyond treating the complications to girls or women from having abortions performed, induced or “assisted” on them by non-physicians or by a broad range of undefined or self-described “health care providers.” Any low-birthweight infant born

- alive after a late-term abortion could need long-term NICU care and possibly permanent assistance throughout childhood and during his or her adult life.
- According to a [2020 New York Times story](#): “The March of Dimes estimates that the average societal cost of each preterm birth, which includes medical care, early intervention services and lost productivity, is \$65,000.”
 - That same story reported on a cost of \$4 million in NICU costs for triplets who were born prematurely.
 - [Preterm birth lifetime costs in the United States](#) (as of 2016) were “estimated to be \$25.2 billion: \$17.1 billion for medical care of persons born preterm, \$2.0 billion for delivery care, \$1.3 billion for early intervention and special education, and \$4.8 billion in lost productivity due to associated disabilities in adults.”
- **Other costs could be the licensing and inspection of multiple locations (potentially thousands of sites) as “abortion facilities,” as required under Missouri law.** [Section 197.205](#) requires that no person or governmental unit shall establish, conduct or maintain an abortion facility in the state without a license issued by the Missouri Department of Health and Senior Services (DHSS). And because each of the six initiative petitions state that “[n]othing in this section [36 of Article I] shall be construed to repeal any law existing at the time of its passage unless such existing law directly conflicts with any provision of this section,” then DHSS would be obligated to enforce section 197.205 – while no longer being permitted to enforce the “directly conflict[ing]” “existing law[s]” requiring that an abortion can only be performed or induced by a physician.
 - [Section 188.015](#) defines an “abortion facility” as “a clinic, physician’s office, or any other place or facility in which abortions are performed or induced other than a hospital”.
 - [Section 197.230](#) states that “[i]n the case of any abortion facility, the department [of health and senior services (DHSS)] shall make or cause to be made an unannounced on-site inspection and investigation at least annually.” Such on-site inspections and investigations must include a variety of areas relating to staffing and equipment to respond to medical emergencies, compliance with Missouri’s abortion laws and the requirement that continuous physician services or registered professional nursing services are to be provided whenever a patient is in the facility.
 - There are [more than 7,000 licensed pharmacists in Missouri](#), and under the proposed constitutional amendments, any pharmacy (or other place) where a pharmacist provides abortion pills, DHSS would be required to inspect and license. **This would be an enormous cost to the department and to taxpayers.** And any other place where abortion pills would be provided (homes, schools, vending machines, clinics, etc.) would also have to be inspected at least once a year and licensed.
 - **Economic boycotts of Missouri and its businesses could result if the “Show-Me” state becomes the “Abort-Me” state, once it is transformed into a Midwest “abortion destination” – a distinct possibility since Missouri is [“within a day’s reach of half of U.S. households”](#).**

- Just as [some pro-abortion advocates in other states are promoting boycotts of states like Missouri that currently protect unborn children from abortion](#), pro-life advocates in other states might boycott by no longer purchasing from Missouri businesses, or engaging in travel, tourism or shopping in Missouri. How tragic that would be for Missouri, which has been described as [one of the top pro-life states in the country](#).
 - Some “red” states have been prohibiting or attempting to prohibit their [governmental entities from doing business with financial firms in other states that take environmental, social and corporate governance \(ESG\) into consideration](#), and those same states and additional ones might extend that to any “abortion destination” state – which is what Missouri could become if any one of the six initiative petitions is enacted into law.
 - “[Missouri tourism provides a \\$13.5 billion economic impact that creates more than 257,000 jobs in the state](#),” according to the [Missouri Division of Tourism](#). It could be a devastating loss to the state and its residents if Missouri became the abortion capital of the Midwest.
- By some estimates, the economic cost to the U.S. of abortion in 2019 – due to the loss of nearly 630,000 unborn lives – was at least \$6.9 trillion, or 32 percent of GDP. **Missouri could experience increased economic loss if the number of abortions increases in the state.** And unsafe, legal abortions in the state could result in the disability of countless women who – perhaps permanently – would be unable to enter or remain in the workforce.
 - According to a June 15, 2022, report of the [Joint Economic Committee](#) (JEC) Republicans – [The Economic Cost of Abortion](#) – “the economic cost of abortion due the loss of unborn lives is 425 times larger than the earnings loss mothers would be expected to incur when having a child.”
 - According to a key finding in the report: “In the long run, abortion shrinks the labor force, stunts innovation, and limits economic growth. It also weakens the solvency of social insurance programs like Social Security and Medicare that rely on workers to support a growing elderly population.”
 - And as the [International Planned Parenthood Federation has noted](#): “**Unsafe abortions** are performed by un- or under-trained providers ... It is possible to have an unsafe, legal abortion.” (underlining added)
 - Under all six initiative petitions, “[n]otwithstanding any other provision of law to the contrary, no person may be subject to any criminal prosecution or civil penalty ... if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section”.
 - Thus, an unlicensed, untrained, undefined or otherwise self-described “health care provider” of ANY age would have the right to perform or induce unsafe, legal abortions (or assist in them) “and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.” While the economic cost of such a policy is incalculable, more important and horrifying, the human cost to Missouri’s citizens – born and unborn – is unimaginable.

Auditor Fitzpatrick, if we can be of further assistance, please do not hesitate to contact us.

Fiscal Note Summary

The Attorney General's office and opponents estimate a potentially significant loss to state and local revenue. The Attorney General's office estimates increased state litigation costs of up to \$21 million. Other state governmental entities estimate no costs or savings. Local governments estimate reduced revenue of at least \$51,000 annually.

STATE AUDITORS OFFICE

RE: Petition approval request from Jamie Corley regarding a proposed constitutional amendment to Article I, version 3 (2024-131)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Jamie Corley on August 30, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

County: _____

INITIATIVE PETITION

Page No: _____

To the Honorable John R. Ashcroft, Secretary of State for the state of Missouri:
We, the undersigned, registered voters of the state of Missouri and _____ County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 5th day of November, 2024, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

NOTICE: The proposed amendment revises Article I of the Constitution by adopting one new section to be known as Article I, Section 36.

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article I of the Constitution is revised by adopting one new Section to be known as Article I, Section 36 to read as follows:

Section 36. 1. The state shall not deny or interfere with the fundamental right to refuse to have an abortion.

2. The state shall not deny or interfere with the fundamental right to refuse contraceptives.

3. Notwithstanding any other provision of law to the contrary, no taxpayer funds shall be directed, appropriated, or used in support of the provision of abortion in this state. This subsection does not authorize the general assembly to refuse to appropriate funds to a health care provider in this state if such health care provider performs abortions.

4. The state shall not deny or interfere with the fundamental right to choose to have an abortion in the case of rape or sexual assault, incest, fatal fetal abnormality, or risk to the health or safety of the female seeking an abortion.

a. In the event of a rape or sexual assault, no abortion shall be performed unless the alleged rape or sexual assault has been reported to a rape or sexual assault crisis hotline.

5. The state shall not deny or interfere with the fundamental right to choose contraceptives.

6. Nothing in this section shall be construed to repeal any law existing at the time of its passage unless such existing law directly conflicts with any provision of this section.

7. Notwithstanding any other provision of law to the contrary, no person may be subject to any criminal prosecution or civil penalty:

a. if such person is a pregnant female and induces, seeks, or obtains an abortion in this or any state;

b. if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section; or

c. if such person assists or provides support to a pregnant female in obtaining an abortion in this or any state.

8. Notwithstanding any other provision of law to the contrary, no taxpayer funds shall be directed, appropriated, or used in support of the criminal prosecution of:

a. any pregnant female for inducing, seeking, or obtaining an abortion;

b. any health care provider for performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section; or

c. any person for assisting or providing support to a pregnant female in obtaining an abortion.

9. The rights guaranteed by this section shall be unalienable. Any restriction on these rights shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-131)**

Subject

Initiative petition from Jamie Corley regarding a proposed constitutional amendment to Article I. (Received August 30, 2023)

Date

September 19, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

FROM: Diana Haines

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article I (2024-131)

The proposed amendment to Article I would add the “fundamental right to choose to have an abortion” to Missouri’s constitution. It would abrogate Missouri’s recently enacted Right to Life of the Unborn Child Act and enshrine in our state constitution the right to terminate the lives of unborn Missourians. The Missouri Attorney General’s Office expects that the enactment of this proposal would result in a significant fiscal impact to the state.

Analysis

Enshrining abortion rights in our state constitution will have an adverse fiscal impact on Missouri as a whole, and on the state’s political subdivisions. Additionally, the proposed petitions would also trigger significant additional legal costs because they will certainly give rise to legal challenges in which the Attorney General’s Office would be involved.

I. The proposed petitions will have an adverse fiscal impact on Missouri and its political subdivisions

This ballot measure will affect the present and future population of all of Missouri’s 114 counties, and her hundreds of cities, townships and villages. For example, in commenting on the fiscal impact of a similar initiative petition, Greene County recognized the adverse fiscal impact of abortion as it relates to a decreased population. Greene County estimated that 135 future citizens would be lost annually due to legalizing abortion. Greene County’s estimates were supported by fertility rates and the number of

abortions recorded in 2020 by the Missouri Department of Health and Senior Services. Greene County estimated nearly \$51,000 in lost revenue annually to that county based on the reduction in population base. Moreover, this annual dollar amount necessarily increases cumulatively in successive years. (e.g., \$102,000 in year 2, \$153,000 in year 3, \$204,000 in year 4, etc.).

The economic loss to Missouri is not limited to Greene County. The widespread economic devastation created by abortion is supported by a nationwide study published by the United States Senate Joint Economic Committee. See

<https://www.jec.senate.gov/public/index.cfm/republicans/2022/6/the-economic-cost-of-abortion>. It reports an estimated economic cost of abortion in 2019 alone, due to nearly 630,000 unborn lives – was at least \$6.9 trillion, or 32 percent of the GDP. A fiscal note must “state the measure’s estimated cost or savings, if any, to state or local governmental entities.” § 116.175, RSMo. The budget for “state [and] local governmental entities” is 11% of the total Missouri economy, according to a 2021 report by the Missouri Economic Research and Information Center. Based on the Senate study and 4,660 abortions in Missouri in 2019,¹ the total economic loss to Missouri from these measures could be as high as \$51 billion, meaning loss to “state or local government entities” would be as high as \$5.61 billion.

That magnitude of economic loss will adversely impact every political subdivision in the state. Indeed, the more populous a region, the greater the economic harm from an aborted population will be. St. Louis City, Jackson County, St. Louis County and Kansas City will be hit hardest of all. These four geographic areas account for approximately one-third of Missouri’s total population.² Based on the numbers cited above, the economic harm to Missouri’s most populous areas is expected to be close to \$17 billion. This type of substantial economic loss attributable to aborting unborn lives cannot be denied and must be included in any fiscal analysis informing voters of the true impact of this proposed initiative petition.

II. The proposed petitions will increase legal costs for the Attorney General’s Office

The Attorney General’s Office (AGO) would also incur substantial legal costs relating to the proposed petitions, including additional costs to general

¹ <https://health.mo.gov/data/vitalstatistics/mvs19/Table12ab.pdf>.

² See <https://www.missouri-demographics.com/cities by population>

operating expenses. First, the petitions involve a controversial topic that is sure to motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting the sanctity of life in Missouri. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of protecting the unborn, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

All told, any single lawsuit challenging the validity or application of these proposed amendments would cost as much as \$1.5 million based on the AGO's estimates. Even if validity was only challenged in a few cases, that would still amount to as much as \$6 million in additional legal costs in the first few years. Over the course of 10 years, the office estimates general increased litigation costs and costs associated with conflict counsel to be as much as \$15 million.

The Attorney General's Office also estimates substantial sums in attorney's fees and costs because these proposed amendments would violate fundamental conscience protections guaranteed by federal law if applied to certain Missouri workers. Private and public employees in Missouri are guaranteed conscience protections by many federal laws, such as RLUIPA and § 401(b) of the Health Programs Extension Act of 1973. The proposed amendment would violate these conscience protections with respect to certain Missouri workers, forcing the office to pay not only for conflict counsel, but also attorney's fees to lawyers asserting the federal conscience rights of individual Missourians. The office anticipates up to \$6 million in additional costs for that reason.

Conclusion

These proposed initiative petitions would subvert current state law and enshrine in Missouri's constitution the right to abort unborn children. Not only is that morally repugnant, it is fiscally irresponsible. If enacted, these proposed petitions would have a severe, negative economic impact on the State of Missouri and its political subdivisions. The lost revenue from aborting so many unborn Missourians could be as high as \$51 billion, including \$5.61 billion to "state or local governmental entities." § 116.175. Moreover, additional litigation costs for the AGO and mandatory attorney's fees could run as high as \$21 million. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-131 and determined there is no impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated they have reviewed Draft No. 24-130 IP through 24-134 IP and have determined that the initiative petitions, with changes, results in the same zero impact as were stated in response to initiative petition 24-129.

Changes to the bill are as follows:

The language in IP 24-130 through IP 24-134 has the same sections similar to those in IP 24-129 as it creates provisions relating to a constitutional amendment that would allow abortions under certain circumstances, reinstating the possibility of abortion facilities being allowed to operate in Missouri.

Comments:

The initiative petition for IP 24-130 through IP 24-134 is the same zero impact for IP 24-129.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-131 proposing to amend Article I.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-131, their department assumes this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to abortion does not directly financially impact their office.

Section 36.3 undermines the General Assembly's appropriation power. The constitution specifies the limitations on the General Assembly's power and that section does not specify other feasible limits upon adoption of new sections, creating a conflict with the proposed language here. Section 36.4 does not define "right to choose" as though that creates an affirmative requirement on the state to allow or perform an abortion, or to make services accessible. Section 36.4.a conflicts with free speech principles. The proposed section compels speech in order to effectuate another (proposed) constitutional right. Section 36.7 and its subsections are vague. The language is not limited explicitly limited to Missouri. This State cannot control criminal proceedings in another jurisdiction for alleged violations of the other state's law. Further, the language reads that "no person may be subject to *any* criminal prosecution" if such person performs one of the enumerated actions. One interpretation is that one may avoid criminal liability for any possible crime after having sought an abortion, regardless of other context. Due the vagueness throughout the proposal, Section 36.6 also will require interpretation to understand its full effect.

Each provision noted above creates potential litigation costs to the state through declaratory judgement actions to understand the meaning of terms, criminal proceedings (including post-trial), and civil litigation about actions taken when attempting to balance (proposed) constitutional rights. These costs will ultimately burden taxpayers.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated Initiative Petition 24-131 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-131.

Officials from the **Office of Administration** indicated this proposal relating to abortion does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-131 a proposed constitutional amendment to Article I, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-131 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated in reviewing initiative petition 24-131 it has been determined there will be an increased cost to the County of Greene due to loss of tax revenue if voters vote to amend Article I.

The Missouri Department of Health & Senior Services recorded 135 "resident abortions" for Greene County in 2020 and 118 in 2021. The population of Greene County per the 2020 United States census was 298,915.

(<https://www.census.gov/quickfacts/fact/table/greenecountymissouri/PST045221>)

In terms of economic impact, Greene County received \$112,673,249 in sales and property taxes for calendar year 2022 (**\$376.94** per capita based on **2020** census data). Accordingly, calculations from these figures indicate an annual loss in population of **135** represents a cost to the County of **\$50,886.90**; an increase in abortion statistics could reasonably be extrapolated to illustrate less tax collections and revenues over the years of potential working lifetimes.

Please see the attached table demonstrating the anticipated yearly on per capita basis and the overall fiscal impact on Greene County tax collections and revenues based on the recorded abortions in 2020 by Missouri Department of Health and Senior Services.

Additional research regarding the broader fiscal impact of lower fertility rates on local and state communities and government budgets may be found here:

Officials from **St. Louis County** indicated there would be no fiscal impact to their county as a result of this initiative petition.

Officials from the **City of Kansas City** indicated this proposed amendment has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated it is unknown the estimated cost or savings this petition would have.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and do not see an impact on revenue or expense to their college.

Samuel H. Lee, Campaign Life Missouri provided the following information:

Samuel Lee
Director

September 9, 2023

State Auditor's Office
State Capitol
201 West Capitol Ave.
Jefferson City, MO 65101

Dear Auditor Fitzpatrick,

In accordance with the provisions of [section 116.175](#), this is a proposed statement of the fiscal impact of the six initiative petitions numbered 2024-129 through 2024-134 submitted by Jamie Corley with the Missouri Women and Family Research Fund, which your office received on August 30, 2023.

To summarize, the proposed six ballot measures – all of which would amend the Missouri Constitution – could result in:

- A decrease in federal Medicaid revenues by an unknown amount, up to \$12.5 billion annually.
- Increased costs to taxpayers of unknown amounts, because of medical treatment of, or other services for, children or adults injured by abortions performed by unlicensed or untrained persons.
- Increased costs of an unknown amount to the Department of Health and Senior Services for the inspection and licensing of thousands of abortion facilities.
- Loss of revenue of unknown amounts to the state and its political subdivisions, because of boycotts of businesses, shopping, tourism or other revenue-generating activities, as a result of Missouri becoming a Midwest “abortion destination” state.
- Long-term loss of revenues of unknown amounts to the state and its political subdivisions, because of a decrease in the workforce due to the number of children who are aborted, as well as because of individuals who can no longer work after they become disabled because of unsafe abortions. But more important than fiscal costs, the human cost to Missouri’s citizens is unimaginable.

Former-Auditor Galloway made a comparable analysis of the fiscal impacts when she issued her fiscal note and fiscal note summary on [HB 126 \(20-R001 on June 19, 2019\)](#) – the subject of a referendum that year. Her fiscal note summary became part of the [official ballot title certified by Secretary of State on August 14, 2019](#), for the referendum on HB 126.

Supporting Information on Fiscal Impact of the Six Initiative Petitions:

- The loss of federal Medicaid matching dollars, which in the fiscal year 2024 budget **could be a loss of nearly \$12.5 billion.**
 - In FY 2023, Missouri lawmakers appropriated about \$16.9 billion for Medicaid (MO HealthNet) across state agencies. [The majority of Medicaid financing in 2023 – \\$10.6 billion – came from federal matching funds.](#) The governor’s budget for MO HealthNet for FY 2024 is nearly \$19.3 billion – [almost \\$12.5 billion which comes from federal funds.](#)
 - The loss of federal Medicaid matching funds could occur if Missouri is out of compliance with federal Medicaid requirements, for example:
 - If the state cuts off Medicaid reimbursements to Catholic hospitals or other pro-life health care providers. This could result from the requirement found in all six initiative petitions that there is a “fundamental right to choose to have an abortion ... in the case of ... risk to the health or safety of the female seeking an abortion.” And each of the six declares this “fundamental right” is “unalienable” and that “the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.”
 - These provisions could be interpreted to “obligate[]” the state to require Medicaid providers (including Catholic hospitals and other pro-life or faith-based health care providers) to perform or induce abortions at any time during pregnancy where there is the mere assertion (by anyone) that the abortion is necessary for “health or safety.”
 - Thus, because the right to a “health or safety” abortion is “unalienable” ([not transferable to another; not capable of being taken away or denied](#)), state government could compel recipients of public funds (e.g., Medicaid providers) to protect such a “right” as a condition of receiving public funds.
 - However, for the state government to require Catholic or other pro-life health care providers (or others) to offer, pay for or refer for abortions, would be a violation of their conscience rights – for which the federal government could withhold from the state, Medicaid matching dollars.
 - For example, in California in 2020, [HHS disallowed \\$200 million in federal Medicaid matching funds per quarter due to the state’s unlawful abortion insurance mandate](#), which forced a Catholic order of religious sisters and a non-profit Christian Church to provide abortion health insurance coverage. See also:
 - [“The Fight Over California’s Abortion Coverage Mandate,”](#) *Regulatory Review*, February 3, 2021 (“Can a state require that all health plans offered to its residents cover elective abortions? The federal government thinks not, and the state of California is poised to lose at least \$200 million in Medicaid dollars because it insists that health plans in its state cover abortion services.”)
 - [“Federal agency says UVM Med Center forced nurse to assist in abortion,”](#) *VT Digger*, August 28, 2019 (“The U.S. Department of Health and Human Services has accused the University of Vermont Medical Center of forcing a nurse to assist in an abortion procedure despite the nurse’s religious objections. ... The [letter from Roger Severino](#), the director of HHS’ Office for

Civil Rights, asks the hospital to adjust its policies or face losing the federal funding it receives from HHS.”)

- There might be additional circumstances where state compliance with at least some of the proposed constitutional amendments would force the state to be out of compliance with federal Medicaid law, such as the state paying for abortions with federal funds that are not permitted to be reimbursed under federal law. For example, the state might be compelled by the terms of some of the initiative petitions to pay for all abortions for all Medicaid-eligible females, because failing to do so might be construed as the state “deny[ing] or interfere[ing] with the fundamental right to choose to have an abortion” when the state is paying for the labor and delivery of children for all Medicaid-eligible females. In other words, under an amended state constitution, Missouri might no longer be “permitted to enact persuasive measures which favor childbirth over abortion” (*Planned Parenthood v. Casey*, 505 U.S. 833, 886 (1992)).
- Under the six initiative petitions, “no person may be subject to any criminal prosecution or civil penalty ... if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section”. Thus, ANY person claiming to be a “health care provider” – licensed or unlicensed, trained or untrained – could legally perform, induce or assist in an abortion **with no penalties whatsoever**. **This could result in numerous, life-altering medical complications for the child or adult who underwent the abortion.** And because no civil penalties could be imposed (e.g., no payments for medical care, no recovery for economic or non-economic damages in a malpractice action, etc.), this could result in huge medical costs for the female and her child – **that would ultimately be paid for by taxpayers.**
 - Regarding abortion, in Missouri, the cost of inpatient medical procedures and emergency department services for treating “issues before childbirth with complications” is a **median charge per person of \$11,977** – with a minimum charges of \$4,140 and a **maximum charge of \$35,345**.
 - And the cost could be even higher for an abortion-related ER visit. One recent study found that a “[p]atient concealment and/or physician failure to identify a prior abortion during an ER visit is a significant risk factor for a subsequent hospital admission.” In fact, “[c]hemical abortion patients whose abortions are misclassified as miscarriages during an ER visit subsequently experience on average 3.2 hospital admissions within 30 days. 86% of the patients ultimately have surgical removal of retained products of conception (RPOC).”
 - According to the CDC, in 2020, nearly 10,000 Missouri residents obtained abortions (9,980 total, but only 167 within the state). Having unlicensed, non-medical personnel permitted to perform or induce abortions within the state on even a fraction of these 10,000 girls or women could result in untold harm to them now – and harm to their future health and fertility.
 - And there might be additional costs to the state, local governments, school districts, etc., beyond treating the complications to girls or women from having abortions performed, induced or “assisted” on them by non-physicians or by a broad range of undefined or self-described “health care providers.” Any low-birthweight infant born

- alive after a late-term abortion could need long-term NICU care and possibly permanent assistance throughout childhood and during his or her adult life.
- According to a [2020 New York Times story](#): “The March of Dimes estimates that the average societal cost of each preterm birth, which includes medical care, early intervention services and lost productivity, is \$65,000.”
 - That same story reported on a cost of \$4 million in NICU costs for triplets who were born prematurely.
 - [Preterm birth lifetime costs in the United States](#) (as of 2016) were “estimated to be \$25.2 billion: \$17.1 billion for medical care of persons born preterm, \$2.0 billion for delivery care, \$1.3 billion for early intervention and special education, and \$4.8 billion in lost productivity due to associated disabilities in adults.”
- **Other costs could be the licensing and inspection of multiple locations (potentially thousands of sites) as “abortion facilities,” as required under Missouri law.** [Section 197.205](#) requires that no person or governmental unit shall establish, conduct or maintain an abortion facility in the state without a license issued by the Missouri Department of Health and Senior Services (DHSS). And because each of the six initiative petitions state that “[n]othing in this section [36 of Article I] shall be construed to repeal any law existing at the time of its passage unless such existing law directly conflicts with any provision of this section,” then DHSS would be obligated to enforce section 197.205 – while no longer being permitted to enforce the “directly conflict[ing]” “existing law[s]” requiring that an abortion can only be performed or induced by a physician.
 - [Section 188.015](#) defines an “abortion facility” as “a clinic, physician’s office, or any other place or facility in which abortions are performed or induced other than a hospital”.
 - [Section 197.230](#) states that “[i]n the case of any abortion facility, the department [of health and senior services (DHSS)] shall make or cause to be made an unannounced on-site inspection and investigation at least annually.” Such on-site inspections and investigations must include a variety of areas relating to staffing and equipment to respond to medical emergencies, compliance with Missouri’s abortion laws and the requirement that continuous physician services or registered professional nursing services are to be provided whenever a patient is in the facility.
 - There are [more than 7,000 licensed pharmacists in Missouri](#), and under the proposed constitutional amendments, any pharmacy (or other place) where a pharmacist provides abortion pills, DHSS would be required to inspect and license. **This would be an enormous cost to the department and to taxpayers.** And any other place where abortion pills would be provided (homes, schools, vending machines, clinics, etc.) would also have to be inspected at least once a year and licensed.
 - **Economic boycotts of Missouri and its businesses could result if the “Show-Me” state becomes the “Abort-Me” state, once it is transformed into a Midwest “abortion destination” – a distinct possibility since Missouri is [“within a day’s reach of half of U.S. households”](#).**

- Just as [some pro-abortion advocates in other states are promoting boycotts of states like Missouri that currently protect unborn children from abortion](#), pro-life advocates in other states might boycott by no longer purchasing from Missouri businesses, or engaging in travel, tourism or shopping in Missouri. How tragic that would be for Missouri, which has been described as [one of the top pro-life states in the country](#).
 - Some “red” states have been prohibiting or attempting to prohibit their [governmental entities from doing business with financial firms in other states that take environmental, social and corporate governance \(ESG\) into consideration](#), and those same states and additional ones might extend that to any “abortion destination” state – which is what Missouri could become if any one of the six initiative petitions is enacted into law.
 - “[Missouri tourism provides a \\$13.5 billion economic impact that creates more than 257,000 jobs in the state](#),” according to the [Missouri Division of Tourism](#). It could be a devastating loss to the state and its residents if Missouri became the abortion capital of the Midwest.
- By some estimates, the economic cost to the U.S. of abortion in 2019 – due to the loss of nearly 630,000 unborn lives – was at least \$6.9 trillion, or 32 percent of GDP. **Missouri could experience increased economic loss if the number of abortions increases in the state.** And unsafe, legal abortions in the state could result in the disability of countless women who – perhaps permanently – would be unable to enter or remain in the workforce.
 - According to a June 15, 2022, report of the [Joint Economic Committee](#) (JEC) Republicans – [The Economic Cost of Abortion](#) – “the economic cost of abortion due to the loss of unborn lives is 425 times larger than the earnings loss mothers would be expected to incur when having a child.”
 - According to a key finding in the report: “In the long run, abortion shrinks the labor force, stunts innovation, and limits economic growth. It also weakens the solvency of social insurance programs like Social Security and Medicare that rely on workers to support a growing elderly population.”
 - And as the [International Planned Parenthood Federation has noted](#): “**Unsafe abortions** are performed by un- or under-trained providers ... It is possible to have an unsafe, legal abortion.” (underlining added)
 - Under all six initiative petitions, “[n]otwithstanding any other provision of law to the contrary, no person may be subject to any criminal prosecution or civil penalty ... if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section”.
 - Thus, an unlicensed, untrained, undefined or otherwise self-described “health care provider” of ANY age would have the right to perform or induce unsafe, legal abortions (or assist in them) “and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.” While the economic cost of such a policy is incalculable, more important and horrifying, the human cost to Missouri’s citizens – born and unborn – is unimaginable.

Auditor Fitzpatrick, if we can be of further assistance, please do not hesitate to contact us.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, and University of Missouri.**

Fiscal Note Summary

The Attorney General's office and opponents estimate a potentially significant loss to state and local revenue. The Attorney General's office estimates increased state litigation costs of up to \$21 million. Other state governmental entities estimate no costs or savings. Local governments estimate reduced revenue of at least \$51,000 annually.

RE: Petition approval request from Jamie Corley regarding a proposed constitutional amendment to Article I, version 2 (2024-130)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Jamie Corley on August 30, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

NOTICE: The proposed amendment revises Article I of the Constitution by adopting one new section to be known as Article I, Section 36.

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows:

Section A. Article I of the Constitution is revised by adopting one new Section to be known as Article I, Section 36 to read as follows:

Section 36. 1. The state shall not deny or interfere with the fundamental right to refuse to have an abortion.

2. The state shall not deny or interfere with the fundamental right to choose to have an abortion, through a gestational age of twelve weeks, in the case of rape or sexual assault, incest, fatal fetal abnormality, or risk to the health or safety of the female seeking an abortion.

a. In the event of a rape or sexual assault, no abortion shall be performed unless the alleged rape or sexual assault has been reported to a rape or sexual assault crisis hotline.

3. Nothing in this section shall be construed to repeal any law existing at the time of its passage unless such existing law directly conflicts with any provision of this section.

4. Notwithstanding any other provision of law to the contrary, no person may be subject to any criminal prosecution or civil penalty:

a. if such person is a pregnant female and induces, seeks, or obtains an abortion in this or any state;

b. if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section; or

c. if such person assists or provides support to a pregnant female in obtaining an abortion in this or any state.

5. The rights guaranteed by this section shall be unalienable. Any restriction on these rights shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-130)**

Subject

Initiative petition from Jamie Corley regarding a proposed constitutional amendment to Article I. (Received August 30, 2023)

Date

September 19, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

FROM: Diana Haines

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article I (2024-130)

The proposed amendment to Article I would add the “fundamental right to choose to have an abortion” to Missouri’s constitution. It would abrogate Missouri’s recently enacted Right to Life of the Unborn Child Act and enshrine in our state constitution the right to terminate the lives of unborn Missourians. The Missouri Attorney General’s Office expects that the enactment of this proposal would result in a significant fiscal impact to the state.

Analysis

Enshrining abortion rights in our state constitution will have an adverse fiscal impact on Missouri as a whole, and on the state’s political subdivisions. Additionally, the proposed petitions would also trigger significant additional legal costs because they will certainly give rise to legal challenges in which the Attorney General’s Office would be involved.

I. The proposed petitions will have an adverse fiscal impact on Missouri and its political subdivisions

This ballot measure will affect the present and future population of all of Missouri’s 114 counties, and her hundreds of cities, townships and villages. For example, in commenting on the fiscal impact of a similar initiative petition, Greene County recognized the adverse fiscal impact of abortion as it relates to a decreased population. Greene County estimated that 135 future citizens would be lost annually due to legalizing abortion. Greene County’s estimates were supported by fertility rates and the number of

abortions recorded in 2020 by the Missouri Department of Health and Senior Services. Greene County estimated nearly \$51,000 in lost revenue annually to that county based on the reduction in population base. Moreover, this annual dollar amount necessarily increases cumulatively in successive years. (e.g., \$102,000 in year 2, \$153,000 in year 3, \$204,000 in year 4, etc.).

The economic loss to Missouri is not limited to Greene County. The widespread economic devastation created by abortion is supported by a nationwide study published by the United States Senate Joint Economic Committee. See

<https://www.jec.senate.gov/public/index.cfm/republicans/2022/6/the-economic-cost-of-abortion>. It reports an estimated economic cost of abortion in 2019 alone, due to nearly 630,000 unborn lives – was at least \$6.9 trillion, or 32 percent of the GDP. A fiscal note must “state the measure’s estimated cost or savings, if any, to state or local governmental entities.” § 116.175, RSMo. The budget for “state [and] local governmental entities” is 11% of the total Missouri economy, according to a 2021 report by the Missouri Economic Research and Information Center. Based on the Senate study and 4,660 abortions in Missouri in 2019,¹ the total economic loss to Missouri from these measures could be as high as \$51 billion, meaning loss to “state or local government entities” would be as high as \$5.61 billion.

That magnitude of economic loss will adversely impact every political subdivision in the state. Indeed, the more populous a region, the greater the economic harm from an aborted population will be. St. Louis City, Jackson County, St. Louis County and Kansas City will be hit hardest of all. These four geographic areas account for approximately one-third of Missouri’s total population.² Based on the numbers cited above, the economic harm to Missouri’s most populous areas is expected to be close to \$17 billion. This type of substantial economic loss attributable to aborting unborn lives cannot be denied and must be included in any fiscal analysis informing voters of the true impact of this proposed initiative petition.

II. The proposed petitions will increase legal costs for the Attorney General’s Office

The Attorney General’s Office (AGO) would also incur substantial legal costs relating to the proposed petitions, including additional costs to general

¹ <https://health.mo.gov/data/vitalstatistics/mvs19/Table12ab.pdf>.

² See <https://www.missouri-demographics.com/cities by population>

operating expenses. First, the petitions involve a controversial topic that is sure to motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting the sanctity of life in Missouri. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of protecting the unborn, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

All told, any single lawsuit challenging the validity or application of these proposed amendments would cost as much as \$1.5 million based on the AGO's estimates. Even if validity was only challenged in a few cases, that would still amount to as much as \$6 million in additional legal costs in the first few years. Over the course of 10 years, the office estimates general increased litigation costs and costs associated with conflict counsel to be as much as \$15 million.

The Attorney General's Office also estimates substantial sums in attorney's fees and costs because these proposed amendments would violate fundamental conscience protections guaranteed by federal law if applied to certain Missouri workers. Private and public employees in Missouri are guaranteed conscience protections by many federal laws, such as RLUIPA and § 401(b) of the Health Programs Extension Act of 1973. The proposed amendment would violate these conscience protections with respect to certain Missouri workers, forcing the office to pay not only for conflict counsel, but also attorney's fees to lawyers asserting the federal conscience rights of individual Missourians. The office anticipates up to \$6 million in additional costs for that reason.

Conclusion

These proposed initiative petitions would subvert current state law and enshrine in Missouri's constitution the right to abort unborn children. Not only is that morally repugnant, it is fiscally irresponsible. If enacted, these proposed petitions would have a severe, negative economic impact on the State of Missouri and its political subdivisions. The lost revenue from aborting so many unborn Missourians could be as high as \$51 billion, including \$5.61 billion to "state or local governmental entities." § 116.175. Moreover, additional litigation costs for the AGO and mandatory attorney's fees could run as high as \$21 million. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-130 and determined there is no impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated they have reviewed Draft No. 24-130 IP through 24-134 IP and have determined that the initiative petitions, with changes, results in the same zero impact as were stated in response to initiative petition 24-129.

Changes to the bill are as follows:

The language in IP 24-130 through IP 24-134 has the same sections similar to those in IP 24-129 as it creates provisions relating to a constitutional amendment that would allow abortions under certain circumstances, reinstating the possibility of abortion facilities being allowed to operate in Missouri.

Comments:

The initiative petition for IP 24-130 through IP 24-134 is the same zero impact for IP 24-129.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-130 proposing to amend Article I.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-130, their department assumes this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to abortion does not directly financially impact their office.

Section 36.2 does not define "right to choose" as though that creates an affirmative requirement on the state to allow or perform an abortion, or to make services accessible. Section 36.2.a conflicts with free speech principles. The proposed section compels speech in order to effectuate another (proposed) constitutional right. Section 36.4 and its subsections are vague. The language is not limited explicitly limited to Missouri. This State cannot control criminal proceedings in another jurisdiction for alleged violations of the other state's law. Further, the language reads that "no person may be subject to *any* criminal prosecution" if such person performs one of the enumerated actions. One interpretation is that one may avoid criminal liability for any possible crime after having sought an abortion, regardless of other context. Due the vagueness throughout the proposal, Section 36.3 also will require interpretation to understand its full effect.

Each provision noted above creates potential litigation costs to the state through declaratory judgement actions to understand the meaning of terms, criminal proceedings (including post-trial), and civil litigation about actions taken when attempting to balance (proposed) constitutional rights. These costs will ultimately burden taxpayers.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated Initiative Petition 24-130 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-130.

Officials from the **Office of Administration** indicated this proposal relating to abortion does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-130 a proposed constitutional amendment to Article I, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-130 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated in reviewing initiative petition 24-130 it has been determined there will be an increased cost to the County of Greene due to loss of tax revenue if voters vote to amend Article I.

The Missouri Department of Health & Senior Services recorded 135 "resident abortions" for Greene County in 2020 and 118 in 2021. The population of Greene County per the 2020 United States census was 298,915.

(<https://www.census.gov/quickfacts/fact/table/greenecountymissouri/PST045221>)

In terms of economic impact, Greene County received \$112,673,249 in sales and property taxes for calendar year 2022 (**\$376.94** per capita based on **2020** census data). Accordingly, calculations from these figures indicate an annual loss in population of **135** represents a cost to the County of **\$50,886.90**; an increase in abortion statistics could reasonably be extrapolated to illustrate less tax collections and revenues over the years of potential working lifetimes.

Please see the attached table demonstrating the anticipated yearly on per capita basis and the overall fiscal impact on Greene County tax collections and revenues based on the recorded abortions in 2020 by Missouri Department of Health and Senior Services.

Additional research regarding the broader fiscal impact of lower fertility rates on local and state communities and government budgets may be found here:

Annual Cost	50,886.90

Officials from **St. Louis County** indicated there would be no fiscal impact to their county as a result of this initiative petition.

Officials from the **City of Kansas City** indicated this proposed amendment has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated it is unknown the estimated cost or savings this petition would have.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and do not see an impact on revenue or expense to their college.

Samuel H. Lee, Campaign Life Missouri provided the following information:

Samuel Lee
Director

September 9, 2023

State Auditor's Office
State Capitol
201 West Capitol Ave.
Jefferson City, MO 65101

Dear Auditor Fitzpatrick,

In accordance with the provisions of [section 116.175](#), this is a proposed statement of the fiscal impact of the six initiative petitions numbered 2024-129 through 2024-134 submitted by Jamie Corley with the Missouri Women and Family Research Fund, which your office received on August 30, 2023.

To summarize, the proposed six ballot measures – all of which would amend the Missouri Constitution – could result in:

- A decrease in federal Medicaid revenues by an unknown amount, up to \$12.5 billion annually.
- Increased costs to taxpayers of unknown amounts, because of medical treatment of, or other services for, children or adults injured by abortions performed by unlicensed or untrained persons.
- Increased costs of an unknown amount to the Department of Health and Senior Services for the inspection and licensing of thousands of abortion facilities.
- Loss of revenue of unknown amounts to the state and its political subdivisions, because of boycotts of businesses, shopping, tourism or other revenue-generating activities, as a result of Missouri becoming a Midwest “abortion destination” state.
- Long-term loss of revenues of unknown amounts to the state and its political subdivisions, because of a decrease in the workforce due to the number of children who are aborted, as well as because of individuals who can no longer work after they become disabled because of unsafe abortions. But more important than fiscal costs, the human cost to Missouri’s citizens is unimaginable.

Former-Auditor Galloway made a comparable analysis of the fiscal impacts when she issued her fiscal note and fiscal note summary on [HB 126 \(20-R001 on June 19, 2019\)](#) – the subject of a referendum that year. Her fiscal note summary became part of the [official ballot title certified by Secretary of State on August 14, 2019](#), for the referendum on HB 126.

Supporting Information on Fiscal Impact of the Six Initiative Petitions:

- The loss of federal Medicaid matching dollars, which in the fiscal year 2024 budget **could be a loss of nearly \$12.5 billion.**
 - In FY 2023, Missouri lawmakers appropriated about \$16.9 billion for Medicaid (MO HealthNet) across state agencies. [The majority of Medicaid financing in 2023 – \\$10.6 billion – came from federal matching funds.](#) The governor’s budget for MO HealthNet for FY 2024 is nearly \$19.3 billion – [almost \\$12.5 billion which comes from federal funds.](#)
 - The loss of federal Medicaid matching funds could occur if Missouri is out of compliance with federal Medicaid requirements, for example:
 - If the state cuts off Medicaid reimbursements to Catholic hospitals or other pro-life health care providers. This could result from the requirement found in all six initiative petitions that there is a “fundamental right to choose to have an abortion ... in the case of ... risk to the health or safety of the female seeking an abortion.” And each of the six declares this “fundamental right” is “unalienable” and that “the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.”
 - These provisions could be interpreted to “obligate[]” the state to require Medicaid providers (including Catholic hospitals and other pro-life or faith-based health care providers) to perform or induce abortions at any time during pregnancy where there is the mere assertion (by anyone) that the abortion is necessary for “health or safety.”
 - Thus, because the right to a “health or safety” abortion is “unalienable” ([not transferable to another; not capable of being taken away or denied](#)), state government could compel recipients of public funds (e.g., Medicaid providers) to protect such a “right” as a condition of receiving public funds.
 - However, for the state government to require Catholic or other pro-life health care providers (or others) to offer, pay for or refer for abortions, would be a violation of their conscience rights – for which the federal government could withhold from the state, Medicaid matching dollars.
 - For example, in California in 2020, [HHS disallowed \\$200 million in federal Medicaid matching funds per quarter due to the state’s unlawful abortion insurance mandate](#), which forced a Catholic order of religious sisters and a non-profit Christian Church to provide abortion health insurance coverage. See also:
 - [“The Fight Over California’s Abortion Coverage Mandate,”](#) *Regulatory Review*, February 3, 2021 (“Can a state require that all health plans offered to its residents cover elective abortions? The federal government thinks not, and the state of California is poised to lose at least \$200 million in Medicaid dollars because it insists that health plans in its state cover abortion services.”)
 - [“Federal agency says UVM Med Center forced nurse to assist in abortion,”](#) *VT Digger*, August 28, 2019 (“The U.S. Department of Health and Human Services has accused the University of Vermont Medical Center of forcing a nurse to assist in an abortion procedure despite the nurse’s religious objections. ... The [letter from Roger Severino](#), the director of HHS’ Office for

Civil Rights, asks the hospital to adjust its policies or face losing the federal funding it receives from HHS.”)

- There might be additional circumstances where state compliance with at least some of the proposed constitutional amendments would force the state to be out of compliance with federal Medicaid law, such as the state paying for abortions with federal funds that are not permitted to be reimbursed under federal law. For example, the state might be compelled by the terms of some of the initiative petitions to pay for all abortions for all Medicaid-eligible females, because failing to do so might be construed as the state “deny[ing] or interfere[ing] with the fundamental right to choose to have an abortion” when the state is paying for the labor and delivery of children for all Medicaid-eligible females. In other words, under an amended state constitution, Missouri might no longer be “permitted to enact persuasive measures which favor childbirth over abortion” (*Planned Parenthood v. Casey*, 505 U.S. 833, 886 (1992)).
- Under the six initiative petitions, “no person may be subject to any criminal prosecution or civil penalty ... if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section”. Thus, ANY person claiming to be a “health care provider” – licensed or unlicensed, trained or untrained – could legally perform, induce or assist in an abortion **with no penalties whatsoever**. **This could result in numerous, life-altering medical complications for the child or adult who underwent the abortion.** And because no civil penalties could be imposed (e.g., no payments for medical care, no recovery for economic or non-economic damages in a malpractice action, etc.), this could result in huge medical costs for the female and her child – **that would ultimately be paid for by taxpayers.**
 - Regarding abortion, in Missouri, the cost of inpatient medical procedures and emergency department services for treating “issues before childbirth with complications” is a **median charge per person of \$11,977** – with a minimum charges of \$4,140 and a **maximum charge of \$35,345**.
 - And the cost could be even higher for an abortion-related ER visit. One recent study found that a “[p]atient concealment and/or physician failure to identify a prior abortion during an ER visit is a significant risk factor for a subsequent hospital admission.” In fact, “[c]hemical abortion patients whose abortions are misclassified as miscarriages during an ER visit subsequently experience on average 3.2 hospital admissions within 30 days. 86% of the patients ultimately have surgical removal of retained products of conception (RPOC).”
 - According to the CDC, in 2020, nearly 10,000 Missouri residents obtained abortions (9,980 total, but only 167 within the state). Having unlicensed, non-medical personnel permitted to perform or induce abortions within the state on even a fraction of these 10,000 girls or women could result in untold harm to them now – and harm to their future health and fertility.
 - And there might be additional costs to the state, local governments, school districts, etc., beyond treating the complications to girls or women from having abortions performed, induced or “assisted” on them by non-physicians or by a broad range of undefined or self-described “health care providers.” Any low-birthweight infant born

- alive after a late-term abortion could need long-term NICU care and possibly permanent assistance throughout childhood and during his or her adult life.
- According to a [2020 New York Times story](#): “The March of Dimes estimates that the average societal cost of each preterm birth, which includes medical care, early intervention services and lost productivity, is \$65,000.”
 - That same story reported on a cost of \$4 million in NICU costs for triplets who were born prematurely.
 - [Preterm birth lifetime costs in the United States](#) (as of 2016) were “estimated to be \$25.2 billion: \$17.1 billion for medical care of persons born preterm, \$2.0 billion for delivery care, \$1.3 billion for early intervention and special education, and \$4.8 billion in lost productivity due to associated disabilities in adults.”
- **Other costs could be the licensing and inspection of multiple locations (potentially thousands of sites) as “abortion facilities,” as required under Missouri law.** [Section 197.205](#) requires that no person or governmental unit shall establish, conduct or maintain an abortion facility in the state without a license issued by the Missouri Department of Health and Senior Services (DHSS). And because each of the six initiative petitions state that “[n]othing in this section [36 of Article I] shall be construed to repeal any law existing at the time of its passage unless such existing law directly conflicts with any provision of this section,” then DHSS would be obligated to enforce section 197.205 – while no longer being permitted to enforce the “directly conflict[ing]” “existing law[s]” requiring that an abortion can only be performed or induced by a physician.
 - [Section 188.015](#) defines an “abortion facility” as “a clinic, physician’s office, or any other place or facility in which abortions are performed or induced other than a hospital”.
 - [Section 197.230](#) states that “[i]n the case of any abortion facility, the department [of health and senior services (DHSS)] shall make or cause to be made an unannounced on-site inspection and investigation at least annually.” Such on-site inspections and investigations must include a variety of areas relating to staffing and equipment to respond to medical emergencies, compliance with Missouri’s abortion laws and the requirement that continuous physician services or registered professional nursing services are to be provided whenever a patient is in the facility.
 - There are [more than 7,000 licensed pharmacists in Missouri](#), and under the proposed constitutional amendments, any pharmacy (or other place) where a pharmacist provides abortion pills, DHSS would be required to inspect and license. **This would be an enormous cost to the department and to taxpayers.** And any other place where abortion pills would be provided (homes, schools, vending machines, clinics, etc.) would also have to be inspected at least once a year and licensed.
 - **Economic boycotts of Missouri and its businesses could result if the “Show-Me” state becomes the “Abort-Me” state, once it is transformed into a Midwest “abortion destination” – a distinct possibility since Missouri is [“within a day’s reach of half of U.S. households”](#).**

- Just as [some pro-abortion advocates in other states are promoting boycotts of states like Missouri that currently protect unborn children from abortion](#), pro-life advocates in other states might boycott by no longer purchasing from Missouri businesses, or engaging in travel, tourism or shopping in Missouri. How tragic that would be for Missouri, which has been described as [one of the top pro-life states in the country](#).
 - Some “red” states have been prohibiting or attempting to prohibit their [governmental entities from doing business with financial firms in other states that take environmental, social and corporate governance \(ESG\) into consideration](#), and those same states and additional ones might extend that to any “abortion destination” state – which is what Missouri could become if any one of the six initiative petitions is enacted into law.
 - “[Missouri tourism provides a \\$13.5 billion economic impact that creates more than 257,000 jobs in the state](#),” according to the [Missouri Division of Tourism](#). It could be a devastating loss to the state and its residents if Missouri became the abortion capital of the Midwest.
- By some estimates, the economic cost to the U.S. of abortion in 2019 – due to the loss of nearly 630,000 unborn lives – was at least \$6.9 trillion, or 32 percent of GDP. **Missouri could experience increased economic loss if the number of abortions increases in the state.** And unsafe, legal abortions in the state could result in the disability of countless women who – perhaps permanently – would be unable to enter or remain in the workforce.
 - According to a June 15, 2022, report of the [Joint Economic Committee](#) (JEC) Republicans – [The Economic Cost of Abortion](#) – “the economic cost of abortion due to the loss of unborn lives is 425 times larger than the earnings loss mothers would be expected to incur when having a child.”
 - According to a key finding in the report: “In the long run, abortion shrinks the labor force, stunts innovation, and limits economic growth. It also weakens the solvency of social insurance programs like Social Security and Medicare that rely on workers to support a growing elderly population.”
 - And as the [International Planned Parenthood Federation has noted](#): “**Unsafe abortions** are performed by un- or under-trained providers ... It is possible to have an unsafe, legal abortion.” (underlining added)
 - Under all six initiative petitions, “[n]otwithstanding any other provision of law to the contrary, no person may be subject to any criminal prosecution or civil penalty ... if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section”.
 - Thus, an unlicensed, untrained, undefined or otherwise self-described “health care provider” of ANY age would have the right to perform or induce unsafe, legal abortions (or assist in them) “and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.” While the economic cost of such a policy is incalculable, more important and horrifying, the human cost to Missouri’s citizens – born and unborn – is unimaginable.

Auditor Fitzpatrick, if we can be of further assistance, please do not hesitate to contact us.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, and University of Missouri.**

Fiscal Note Summary

The Attorney General's office and opponents estimate a potentially significant loss to state and local revenue. The Attorney General's office estimates increased state litigation costs of up to \$21 million. Other state governmental entities estimate no costs or savings. Local governments estimate reduced revenue of at least \$51,000 annually.

STATE AUDITORS OFFICE

RE: Petition approval request from Jamie Corley regarding a proposed constitutional amendment to Article I, version 1 (2024-129)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Jamie Corley on August 30, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

NOTICE: The proposed amendment revises Article I of the Constitution by adopting one new section to be known as Article I, Section 36.

Be it resolved by the people of the state of Missouri that the Constitution be amended as follows: ✓

Section A. Article I of the Constitution is revised by adopting one new Section to be known as Article I, Section 36 to read as follows:

Section 36. 1. The state shall not deny or interfere with the fundamental right to refuse to have an abortion.

2. The state shall not deny or interfere with the fundamental right to choose to have an abortion in the case of rape or sexual assault, incest, fatal fetal abnormality, or risk to the health or safety of the female seeking an abortion.

a. No abortion shall be performed in the event of a rape or sexual assault unless the alleged rape or sexual assault has been reported to a rape or sexual assault crisis hotline.

3. Nothing in this section shall be construed to repeal any law existing at the time of its passage unless such existing law directly conflicts with any provision of this section.

4. Notwithstanding any other provision of law to the contrary, no person may be subject to any criminal prosecution or civil penalty:

a. if such person is a pregnant female and induces, seeks, or obtains an abortion in this or any state;

b. if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section; or

c. if such person assists or provides support to a pregnant female in obtaining an abortion in this or any state.

5. The rights guaranteed by this section shall be unalienable. Any restriction on these rights shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-129)**

Subject

Initiative petition from Jamie Corley regarding a proposed constitutional amendment to Article I. (Received August 30, 2023)

Date

September 19, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

FROM: Diana Haines

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article I (2024-129)

The proposed amendment to Article I would add the “fundamental right to choose to have an abortion” to Missouri’s constitution. It would abrogate Missouri’s recently enacted Right to Life of the Unborn Child Act and enshrine in our state constitution the right to terminate the lives of unborn Missourians. The Missouri Attorney General’s Office expects that the enactment of this proposal would result in a significant fiscal impact to the state.

Analysis

Enshrining abortion rights in our state constitution will have an adverse fiscal impact on Missouri as a whole, and on the state’s political subdivisions. Additionally, the proposed petitions would also trigger significant additional legal costs because they will certainly give rise to legal challenges in which the Attorney General’s Office would be involved.

I. The proposed petitions will have an adverse fiscal impact on Missouri and its political subdivisions

This ballot measure will affect the present and future population of all of Missouri’s 114 counties, and her hundreds of cities, townships and villages. For example, in commenting on the fiscal impact of a similar initiative petition, Greene County recognized the adverse fiscal impact of abortion as it relates to a decreased population. Greene County estimated that 135 future citizens would be lost annually due to legalizing abortion. Greene County’s estimates were supported by fertility rates and the number of

abortions recorded in 2020 by the Missouri Department of Health and Senior Services. Greene County estimated nearly \$51,000 in lost revenue annually to that county based on the reduction in population base. Moreover, this annual dollar amount necessarily increases cumulatively in successive years. (e.g., \$102,000 in year 2, \$153,000 in year 3, \$204,000 in year 4, etc.).

The economic loss to Missouri is not limited to Greene County. The widespread economic devastation created by abortion is supported by a nationwide study published by the United States Senate Joint Economic Committee. See

<https://www.jec.senate.gov/public/index.cfm/republicans/2022/6/the-economic-cost-of-abortion>. It reports an estimated economic cost of abortion in 2019 alone, due to nearly 630,000 unborn lives – was at least \$6.9 trillion, or 32 percent of the GDP. A fiscal note must “state the measure’s estimated cost or savings, if any, to state or local governmental entities.” § 116.175, RSMo. The budget for “state [and] local governmental entities” is 11% of the total Missouri economy, according to a 2021 report by the Missouri Economic Research and Information Center. Based on the Senate study and 4,660 abortions in Missouri in 2019,¹ the total economic loss to Missouri from these measures could be as high as \$51 billion, meaning loss to “state or local government entities” would be as high as \$5.61 billion.

That magnitude of economic loss will adversely impact every political subdivision in the state. Indeed, the more populous a region, the greater the economic harm from an aborted population will be. St. Louis City, Jackson County, St. Louis County and Kansas City will be hit hardest of all. These four geographic areas account for approximately one-third of Missouri’s total population.² Based on the numbers cited above, the economic harm to Missouri’s most populous areas is expected to be close to \$17 billion. This type of substantial economic loss attributable to aborting unborn lives cannot be denied and must be included in any fiscal analysis informing voters of the true impact of this proposed initiative petition.

II. The proposed petitions will increase legal costs for the Attorney General’s Office

The Attorney General’s Office (AGO) would also incur substantial legal costs relating to the proposed petitions, including additional costs to general

¹ <https://health.mo.gov/data/vitalstatistics/mvs19/Table12ab.pdf>.

² See <https://www.missouri-demographics.com/cities by population>

operating expenses. First, the petitions involve a controversial topic that is sure to motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting the sanctity of life in Missouri. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of protecting the unborn, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

All told, any single lawsuit challenging the validity or application of these proposed amendments would cost as much as \$1.5 million based on the AGO's estimates. Even if validity was only challenged in a few cases, that would still amount to as much as \$6 million in additional legal costs in the first few years. Over the course of 10 years, the office estimates general increased litigation costs and costs associated with conflict counsel to be as much as \$15 million.

The Attorney General's Office also estimates substantial sums in attorney's fees and costs because these proposed amendments would violate fundamental conscience protections guaranteed by federal law if applied to certain Missouri workers. Private and public employees in Missouri are guaranteed conscience protections by many federal laws, such as RLUIPA and § 401(b) of the Health Programs Extension Act of 1973. The proposed amendment would violate these conscience protections with respect to certain Missouri workers, forcing the office to pay not only for conflict counsel, but also attorney's fees to lawyers asserting the federal conscience rights of individual Missourians. The office anticipates up to \$6 million in additional costs for that reason.

Conclusion

These proposed initiative petitions would subvert current state law and enshrine in Missouri's constitution the right to abort unborn children. Not only is that morally repugnant, it is fiscally irresponsible. If enacted, these proposed petitions would have a severe, negative economic impact on the State of Missouri and its political subdivisions. The lost revenue from aborting so many unborn Missourians could be as high as \$51 billion, including \$5.61 billion to "state or local governmental entities." § 116.175. Moreover, additional litigation costs for the AGO and mandatory attorney's fees could run as high as \$21 million. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-129 and determined there is no impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition will have zero impact.

The initiative petition proposes a constitutional amendment that would allow abortions under certain circumstances, reinstating the possibility of abortion facilities being allowed to operate in Missouri. There is a possibility of new or reopened facilities; however the permissible allowance of abortion would be limited in scope. As such, the Division of Regulation and Licensure does not anticipate any additional abortion facilities in a greater number than what existed prior to the overturning of Roe v Wade. Because the Section for Health Standards and Licensure (HSL) regulated abortion providers in the past with existing staff levels, any providers that become operational would be absorbed in the normal ebb and flow of routine regulatory oversight.

It is assumed that the Department can absorb the costs of this bill with current resources. However, if the workload significantly increased or other legislation was enacted, additional resources would be requested through the appropriation process.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-129 proposing to amend Article I.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-129, their department assumes this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to abortion does not directly financially impact their office.

Section 36.2 does not define "right to choose" as though that creates an affirmative requirement on the state to allow or perform an abortion, or to make services accessible. Section 36.2.a conflicts with free speech principles. The proposed section compels speech in order to effectuate another (proposed) constitutional right. Section 36.4 and its subsections are vague. The language is not limited explicitly limited to Missouri. This State cannot control criminal proceedings in another jurisdiction for alleged violations of the other state's law. Further, the language reads that "no person may be subject to *any* criminal prosecution" if such person performs one of the enumerated actions. One interpretation is that one may avoid criminal liability for any possible crime after having sought an abortion, regardless of other context. Due the vagueness throughout the proposal, Section 36.3 also will require interpretation to understand its full effect.

Each provision noted above creates potential litigation costs to the state through declaratory judgement actions to understand the meaning of terms, criminal proceedings (including post-trial), and civil litigation about actions taken when attempting to balance (proposed) constitutional rights. These costs will ultimately burden taxpayers.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated Initiative Petition 24-129 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission on initiative petition 24-129.

Officials from the **Office of Administration** indicated this proposal relating to abortion does not directly financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-129 a proposed constitutional amendment to Article I, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Joint Resolutions proposing a constitutional amendment are submitted to a vote of the people at the next general election. Article XII section 2(b) of the Missouri Constitution authorizes the governor to order a special election for constitutional amendments referred to the people. If a special election is called to submit a Joint Resolution to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-129 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated in reviewing initiative petition 24-29 it has been determined there will be an increased cost to the County of Greene due to loss of tax revenue if voters vote to amend Article I.

The Missouri Department of Health & Senior Services recorded 135 "resident abortions" for Greene County in 2020 and 118 in 2021. The population of Greene County per the 2020 United States census was 298,915.

(<https://www.census.gov/quickfacts/fact/table/greencountymissouri/PST045221>)

In terms of economic impact, Greene County received \$112,673,249 in sales and property taxes for calendar year 2022 (**\$376.94** per capita based on **2020** census data). Accordingly, calculations from these figures indicate an annual loss in population of **135** represents a cost to the County of **\$50,886.90**; an increase in abortion statistics could reasonably be extrapolated to illustrate less tax collections and revenues over the years of potential working lifetimes.

Please see the attached table demonstrating the anticipated yearly on per capita basis and the overall fiscal impact on Greene County tax collections and revenues based on the recorded abortions in 2020 by Missouri Department of Health and Senior Services.

Additional research regarding the broader fiscal impact of lower fertility rates on local and state communities and government budgets may be found here:

- <https://www.pewtrusts.org/en/research-and-analysis/issue-briefs/2022/12/the-long-term-decline-in-fertility-and-what-it-means-for-state-budgets>

Greene County Collections in 2022	
2020 Population	298,915
Total Sales Tax Collected	126,986,094.91

Per Capita	376.94
Annual lost population	135
Annual Cost	50,886.90

Officials from **St. Louis County** indicated there would be no fiscal impact to their county as a result of this initiative petition.

Officials from the **City of Kansas City** indicated this proposed amendment has no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated it is unknown the estimated cost or savings this petition would have.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and do not see an impact on revenue or expense to their college.

Samuel H. Lee, Campaign Life Missouri provided the following information:

Samuel Lee
Director

September 9, 2023

State Auditor's Office
State Capitol
201 West Capitol Ave.
Jefferson City, MO 65101

Dear Auditor Fitzpatrick,

In accordance with the provisions of [section 116.175](#), this is a proposed statement of the fiscal impact of the six initiative petitions numbered 2024-129 through 2024-134 submitted by Jamie Corley with the Missouri Women and Family Research Fund, which your office received on August 30, 2023.

To summarize, the proposed six ballot measures – all of which would amend the Missouri Constitution – could result in:

- A decrease in federal Medicaid revenues by an unknown amount, up to \$12.5 billion annually.
- Increased costs to taxpayers of unknown amounts, because of medical treatment of, or other services for, children or adults injured by abortions performed by unlicensed or untrained persons.
- Increased costs of an unknown amount to the Department of Health and Senior Services for the inspection and licensing of thousands of abortion facilities.
- Loss of revenue of unknown amounts to the state and its political subdivisions, because of boycotts of businesses, shopping, tourism or other revenue-generating activities, as a result of Missouri becoming a Midwest “abortion destination” state.
- Long-term loss of revenues of unknown amounts to the state and its political subdivisions, because of a decrease in the workforce due to the number of children who are aborted, as well as because of individuals who can no longer work after they become disabled because of unsafe abortions. But more important than fiscal costs, the human cost to Missouri’s citizens is unimaginable.

Former-Auditor Galloway made a comparable analysis of the fiscal impacts when she issued her fiscal note and fiscal note summary on [HB 126 \(20-R001 on June 19, 2019\)](#) – the subject of a referendum that year. Her fiscal note summary became part of the [official ballot title certified by Secretary of State on August 14, 2019](#), for the referendum on HB 126.

Supporting Information on Fiscal Impact of the Six Initiative Petitions:

- The loss of federal Medicaid matching dollars, which in the fiscal year 2024 budget **could be a loss of nearly \$12.5 billion.**
 - In FY 2023, Missouri lawmakers appropriated about \$16.9 billion for Medicaid (MO HealthNet) across state agencies. [The majority of Medicaid financing in 2023 – \\$10.6 billion – came from federal matching funds.](#) The governor’s budget for MO HealthNet for FY 2024 is nearly \$19.3 billion – [almost \\$12.5 billion which comes from federal funds.](#)
 - The loss of federal Medicaid matching funds could occur if Missouri is out of compliance with federal Medicaid requirements, for example:
 - If the state cuts off Medicaid reimbursements to Catholic hospitals or other pro-life health care providers. This could result from the requirement found in all six initiative petitions that there is a “fundamental right to choose to have an abortion ... in the case of ... risk to the health or safety of the female seeking an abortion.” And each of the six declares this “fundamental right” is “unalienable” and that “the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.”
 - These provisions could be interpreted to “obligate[]” the state to require Medicaid providers (including Catholic hospitals and other pro-life or faith-based health care providers) to perform or induce abortions at any time during pregnancy where there is the mere assertion (by anyone) that the abortion is necessary for “health or safety.”
 - Thus, because the right to a “health or safety” abortion is “unalienable” ([not transferable to another; not capable of being taken away or denied](#)), state government could compel recipients of public funds (e.g., Medicaid providers) to protect such a “right” as a condition of receiving public funds.
 - However, for the state government to require Catholic or other pro-life health care providers (or others) to offer, pay for or refer for abortions, would be a violation of their conscience rights – for which the federal government could withhold from the state, Medicaid matching dollars.
 - For example, in California in 2020, [HHS disallowed \\$200 million in federal Medicaid matching funds per quarter due to the state’s unlawful abortion insurance mandate](#), which forced a Catholic order of religious sisters and a non-profit Christian Church to provide abortion health insurance coverage. See also:
 - [“The Fight Over California’s Abortion Coverage Mandate,”](#) *Regulatory Review*, February 3, 2021 (“Can a state require that all health plans offered to its residents cover elective abortions? The federal government thinks not, and the state of California is poised to lose at least \$200 million in Medicaid dollars because it insists that health plans in its state cover abortion services.”)
 - [“Federal agency says UVM Med Center forced nurse to assist in abortion,”](#) *VT Digger*, August 28, 2019 (“The U.S. Department of Health and Human Services has accused the University of Vermont Medical Center of forcing a nurse to assist in an abortion procedure despite the nurse’s religious objections. ... The [letter from Roger Severino](#), the director of HHS’ Office for

Civil Rights, asks the hospital to adjust its policies or face losing the federal funding it receives from HHS.”)

- There might be additional circumstances where state compliance with at least some of the proposed constitutional amendments would force the state to be out of compliance with federal Medicaid law, such as the state paying for abortions with federal funds that are not permitted to be reimbursed under federal law. For example, the state might be compelled by the terms of some of the initiative petitions to pay for all abortions for all Medicaid-eligible females, because failing to do so might be construed as the state “deny[ing] or interfere[ing] with the fundamental right to choose to have an abortion” when the state is paying for the labor and delivery of children for all Medicaid-eligible females. In other words, under an amended state constitution, Missouri might no longer be “permitted to enact persuasive measures which favor childbirth over abortion” (*Planned Parenthood v. Casey*, 505 U.S. 833, 886 (1992)).
- Under the six initiative petitions, “no person may be subject to any criminal prosecution or civil penalty ... if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section”. Thus, ANY person claiming to be a “health care provider” – licensed or unlicensed, trained or untrained – could legally perform, induce or assist in an abortion **with no penalties whatsoever**. **This could result in numerous, life-altering medical complications for the child or adult who underwent the abortion.** And because no civil penalties could be imposed (e.g., no payments for medical care, no recovery for economic or non-economic damages in a malpractice action, etc.), this could result in huge medical costs for the female and her child – **that would ultimately be paid for by taxpayers.**
 - Regarding abortion, in Missouri, the cost of inpatient medical procedures and emergency department services for treating “issues before childbirth with complications” is a **median charge per person of \$11,977** – with a minimum charges of \$4,140 and a **maximum charge of \$35,345**.
 - And the cost could be even higher for an abortion-related ER visit. One recent study found that a “[p]atient concealment and/or physician failure to identify a prior abortion during an ER visit is a significant risk factor for a subsequent hospital admission.” In fact, “[c]hemical abortion patients whose abortions are misclassified as miscarriages during an ER visit subsequently experience on average 3.2 hospital admissions within 30 days. 86% of the patients ultimately have surgical removal of retained products of conception (RPOC).”
 - According to the CDC, in 2020, nearly 10,000 Missouri residents obtained abortions (9,980 total, but only 167 within the state). Having unlicensed, non-medical personnel permitted to perform or induce abortions within the state on even a fraction of these 10,000 girls or women could result in untold harm to them now – and harm to their future health and fertility.
 - And there might be additional costs to the state, local governments, school districts, etc., beyond treating the complications to girls or women from having abortions performed, induced or “assisted” on them by non-physicians or by a broad range of undefined or self-described “health care providers.” Any low-birthweight infant born

- alive after a late-term abortion could need long-term NICU care and possibly permanent assistance throughout childhood and during his or her adult life.
- According to a [2020 New York Times story](#): “The March of Dimes estimates that the average societal cost of each preterm birth, which includes medical care, early intervention services and lost productivity, is \$65,000.”
 - That same story reported on a cost of \$4 million in NICU costs for triplets who were born prematurely.
 - [Preterm birth lifetime costs in the United States](#) (as of 2016) were “estimated to be \$25.2 billion: \$17.1 billion for medical care of persons born preterm, \$2.0 billion for delivery care, \$1.3 billion for early intervention and special education, and \$4.8 billion in lost productivity due to associated disabilities in adults.”
- **Other costs could be the licensing and inspection of multiple locations (potentially thousands of sites) as “abortion facilities,” as required under Missouri law.** [Section 197.205](#) requires that no person or governmental unit shall establish, conduct or maintain an abortion facility in the state without a license issued by the Missouri Department of Health and Senior Services (DHSS). And because each of the six initiative petitions state that “[n]othing in this section [36 of Article I] shall be construed to repeal any law existing at the time of its passage unless such existing law directly conflicts with any provision of this section,” then DHSS would be obligated to enforce section 197.205 – while no longer being permitted to enforce the “directly conflict[ing]” “existing law[s]” requiring that an abortion can only be performed or induced by a physician.
 - [Section 188.015](#) defines an “abortion facility” as “a clinic, physician’s office, or any other place or facility in which abortions are performed or induced other than a hospital”.
 - [Section 197.230](#) states that “[i]n the case of any abortion facility, the department [of health and senior services (DHSS)] shall make or cause to be made an unannounced on-site inspection and investigation at least annually.” Such on-site inspections and investigations must include a variety of areas relating to staffing and equipment to respond to medical emergencies, compliance with Missouri’s abortion laws and the requirement that continuous physician services or registered professional nursing services are to be provided whenever a patient is in the facility.
 - There are [more than 7,000 licensed pharmacists in Missouri](#), and under the proposed constitutional amendments, any pharmacy (or other place) where a pharmacist provides abortion pills, DHSS would be required to inspect and license. **This would be an enormous cost to the department and to taxpayers.** And any other place where abortion pills would be provided (homes, schools, vending machines, clinics, etc.) would also have to be inspected at least once a year and licensed.
 - **Economic boycotts of Missouri and its businesses could result if the “Show-Me” state becomes the “Abort-Me” state, once it is transformed into a Midwest “abortion destination” – a distinct possibility since Missouri is [“within a day’s reach of half of U.S. households”](#).**

- Just as [some pro-abortion advocates in other states are promoting boycotts of states like Missouri that currently protect unborn children from abortion](#), pro-life advocates in other states might boycott by no longer purchasing from Missouri businesses, or engaging in travel, tourism or shopping in Missouri. How tragic that would be for Missouri, which has been described as [one of the top pro-life states in the country](#).
 - Some “red” states have been prohibiting or attempting to prohibit their [governmental entities from doing business with financial firms in other states that take environmental, social and corporate governance \(ESG\) into consideration](#), and those same states and additional ones might extend that to any “abortion destination” state – which is what Missouri could become if any one of the six initiative petitions is enacted into law.
 - “[Missouri tourism provides a \\$13.5 billion economic impact that creates more than 257,000 jobs in the state](#),” according to the [Missouri Division of Tourism](#). It could be a devastating loss to the state and its residents if Missouri became the abortion capital of the Midwest.
- By some estimates, the economic cost to the U.S. of abortion in 2019 – due to the loss of nearly 630,000 unborn lives – was at least \$6.9 trillion, or 32 percent of GDP. **Missouri could experience increased economic loss if the number of abortions increases in the state.** And unsafe, legal abortions in the state could result in the disability of countless women who – perhaps permanently – would be unable to enter or remain in the workforce.
 - According to a June 15, 2022, report of the [Joint Economic Committee](#) (JEC) Republicans – [The Economic Cost of Abortion](#) – “the economic cost of abortion due to the loss of unborn lives is 425 times larger than the earnings loss mothers would be expected to incur when having a child.”
 - According to a key finding in the report: “In the long run, abortion shrinks the labor force, stunts innovation, and limits economic growth. It also weakens the solvency of social insurance programs like Social Security and Medicare that rely on workers to support a growing elderly population.”
 - And as the [International Planned Parenthood Federation has noted](#): “**Unsafe abortions** are performed by un- or under-trained providers ... It is possible to have an unsafe, legal abortion.” (underlining added)
 - Under all six initiative petitions, “[n]otwithstanding any other provision of law to the contrary, no person may be subject to any criminal prosecution or civil penalty ... if such person is a health care provider performing, inducing, or assisting in the performance or induction of an abortion as provided for in this section”.
 - Thus, an unlicensed, untrained, undefined or otherwise self-described “health care provider” of ANY age would have the right to perform or induce unsafe, legal abortions (or assist in them) “and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.” While the economic cost of such a policy is incalculable, more important and horrifying, the human cost to Missouri’s citizens – born and unborn – is unimaginable.

Auditor Fitzpatrick, if we can be of further assistance, please do not hesitate to contact us.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, State Technical College of Missouri, and University of Missouri.**

Fiscal Note Summary

The Attorney General's office and opponents estimate a potentially significant loss to state and local revenue. The Attorney General's office estimates increased state litigation costs of up to \$21 million. Other state governmental entities estimate no costs or savings. Local governments estimate reduced revenue of at least \$51,000 annually.

RECEIVED

AUG 14 2023

STATE AUDITORS OFFICE

RE: Petition approval request from Paul Berry III regarding a proposed constitutional amendment to Article IX (2024-128)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Paul Berry III on August 11, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

Page Number:

INITIATIVE PETITION

We, the undersigned, registered voters of the state of Missouri and _____ County (or the City of St. Louis), respectfully order the following proposed constitutional amendment shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 5th day of November, 2024, and each for himself or herself says: I have personally signed this petition; I am a registered voter in the State of Missouri and _____ County (or the City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

CIRCULATOR'S AFFIDAVIT

I, _____, being first duly sworn, (print or type the names of signers)

[illegible]

If paid, list the payer:

Address of Notary (Street, City, State and Zip Code)

My commission expires _____

NOTICE: the proposed amendment revises Article IX, section 8 of the Missouri Constitution by adopting additional language to Article IX, section 8 of the Missouri Constitution.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article IX, section 8 of the Missouri Constitution is revised to remove the following language in brackets and add the following underlined language:

Section 8. [Neither the general assembly, nor any county, city, town, township, school district or other municipal corporation, shall ever make an appropriation or pay from any public fund whatever, anything in aid of any religious creed, church or sectarian purpose, or to help to support or sustain any private or public school, academy, seminary, college, university, or other institution of learning controlled by any religious creed, church or sectarian denomination whatever; nor shall any grant or donation of personal property or real estate ever be made by the state, or any county, city, town, or other municipal corporation, for any religious creed, church, or sectarian purpose whatever.] 1. Except as may be limited by Federal law and the United States Constitution, the State of Missouri shall make available to parents and students of this state all available quality K-12 educational opportunities for each student in Missouri, with the purpose of reducing economic disparities that do not support self-sufficiency, nor promote the pursuit of life, liberty and happiness for all Missourians. Notwithstanding any provision of this section to the contrary, no student of this state shall be required as a function of law or government authority to attend any Missouri school that requires the participation in any religious creed, church or sectarian denomination whatsoever.

2. Subject to the qualifications and procedures set by this section, any K-12 student in the State of Missouri may attend any Missouri charter, private or public school in the State of Missouri outside of the school district boundaries of their home residence, when such K-12 transfer student maintains:

(1) an unexcused attendance record of at least ninety percent (90%) during each semester enrolled at the transfer school;
and

(2) a prior school disciplinary record free of any pattern of bullying or property damage and has not been found to have committed any drug distribution, sexual offense, theft or serious violent offense.

3. Transfer schools, including any transfer school district when such transfer school is a public school, that accepts enrollment of any K-12 transfer student pursuant to this section shall receive from the home school district of such K-12 transfer student the sum amount of the per pupil expenditures that would otherwise be allocated by the student's home school district towards the education of such K-12 transfer student, provided no additional per pupil expenditures or tuition may be charged by the transfer school or transfer school district to any K-12 transfer student or such K-12 student's home school district. The Missouri treasurer shall be responsible for the collection of all per pupil

expenditures from the student's home school district pursuant to this section and transfer such pupil expenditures to the transfer school on behalf of K-12 transfer students.

4. Transfer schools who seek to enroll any K-12 transfer student pursuant to this section shall abide by the following procedures:

(1) each transfer school shall submit to the Missouri department of elementary and secondary education no later than February 1st of each year the number of new transfer students such transfer school seeks to enroll during the following school year;

(2) the Missouri department of elementary and secondary education shall no later than March 1st of each year distribute a public list containing each transfer school who pledges to enroll transfer students during the following school year;

(3) on March 1st of each year, transfer schools may begin accepting student transfer admission applications for transfer student enrollment during the following school year, which shall be accepted and considered by transfer schools with no application fee charged to any party related to any student transfer application;

(4) transfer student candidates may not maintain more than two (2) active transfer student admission applications filed with transfer schools at the same time, except any transfer student candidate may apply to more than two (2) transfer schools operated by the same public school district, which shall count as one (1) student transfer admission application;

(5) no later than April 15th of each year, transfer schools shall issue award notifications to transfer student candidates for each student transfer allotment pledged to the Missouri department of elementary and secondary education for the following school year;

(6) once a transfer student candidate is accepted by a transfer school for student enrollment, such transfer student (a) shall not be required to reapply to continue attendance at such transfer school, which shall also include attendance at any other school operated by a public school district under the authority of such transfer school, and (b) shall be entitled to all rights, privileges and services provided to any student who resides within the residential boundaries of the transfer school; and

(7) the Missouri treasurer and Missouri department of elementary and secondary education shall each create and maintain uniform forms and procedures set by rule for use by home school districts, transfer schools, transfer school districts and transfer student candidates related to this section.

5. When considering student transfer applications from any prospective transfer student currently enrolled in grades 6-12 pursuant to this section, the transfer school shall grant transfer student enrollment priority based upon the following criteria:

(1) transfer student candidates who have a sibling attending any school within transfer school or transfer school district at the time of student transfer application, which shall also include any child raised in the same household as student and/or parent, and maintained an unexcused attendance record of at least 90% during the previous full semester prior to student transfer application shall receive first transfer school admission priority;

(2) transfer student candidates who maintained a minimum 3.0 grade point average and an unexcused attendance record of at least 90% during the previous full semester enrolled at the home school district prior to student transfer application shall receive second transfer school admission priority;

(3) transfer student candidates who maintained (a) a minimum 3.0 grade point average or (b) an unexcused attendance record of at least 90% during the previous full semester enrolled at the home school district prior to student transfer application shall receive third transfer admission priority;

(4) transfer student candidates who are enrolled in a home school district that (a) maintains an average high school graduation rate less than Missouri's average high school graduation rate during the previous school year prior to student transfer application or (b) is under probation or suspended from education accreditation issued by the Missouri department of elementary and secondary education shall receive fourth transfer admission priority;

(5) when any transfer school, or any transfer school district when such transfer school is a public school, receives more student transfer applications from transfer student candidates enrolled in grades 6-12 than the student allotments made available by transfer school or transfer school district for admission of transfer student candidates, such transfer school or transfer school district shall grant the issuance of student transfer enrollment by lottery draw process approved by the Missouri department of elementary and secondary education;

(6) notwithstanding any provision of this subsection, transfer school or transfer school district may at its discretion reject any transfer student from continuing to attend transfer school who does not meet the transfer student requirements set by subsection 2 of this section; and

(7) notwithstanding any provision of this subsection, any private high school that enrolls over seventy-five percent (75%) of their student graduates in a two-year or four-year institution the previous school year may waive the aforementioned student transfer application process requirements pursuant to this subsection and grant admissions to such private school under the same enrollment requirements generally provided by such private high school, provided no application fee may be charged to any party related to any student transfer application.

6. When considering student transfer applications from any prospective transfer student currently enrolled in grades K-5 pursuant to this section, the transfer school shall grant transfer student enrollment priority based upon the following criteria:

(1) transfer student candidates who have a sibling attending any school within transfer school or transfer school district at the time of student transfer application, which shall also include any child raised in the same household as student and/or parent, shall receive first transfer admission priority;

(2) when any transfer school, or any transfer school district when such transfer school is a public school, (a) receives more student transfer applications from transfer student candidates enrolled in grades 1-5 than the student allotments made available by transfer school or transfer school district for admission of transfer student candidates or (b) transfer student candidate is of age to enroll in kindergarten the following school year, such transfer school or transfer school district shall grant the issuance of student transfer enrollment by lottery draw process approved by the Missouri department of elementary and secondary education; and

(3) notwithstanding any provision of this subsection, transfer school or transfer school district may at its discretion reject any transfer student from continuing to attend transfer school who does not meet the transfer student requirements set by subsection 2 of this section.

7. Notwithstanding any provision of this section, each transfer school, or any transfer school district when such transfer school is a public school, that participates in student transfer pursuant to this section is charged with the responsibility to consider any request to waive any attendance, pending application limit or grade point average requirement mandated by this section, which may be requested by the proposed transfer student prior to and/or after the initial or amended application has been filed with transfer school or transfer school district.

8. Notwithstanding any provision of this section, no home school district, transfer school, transfer school district or any other government entity within the state of Missouri shall charge any transfer student for transportation to or from their home residence or for any other transportation provided to any other student attending transfer school.

9. Notwithstanding any provision of this section, transfer schools may provide transportation to or from the home residence of a transfer student when authorized by:

(1) transfer school or transfer school district;

(2) authorized by statute enacted by the Missouri general assembly;

(3) as may be required by Federal law; or

(4) as otherwise required by a Federal or Missouri court order of competent jurisdiction.

10. Notwithstanding any other provision of the Missouri constitution, statute, ordinance, rule, regulation, order or other legal authority to the contrary may the state of Missouri require:

(1) any public school, charter school or private school to serve as transfer school pursuant to this section, except transfer schools and transfer school district shall maintain the sum amount of new transfer student enrollment population voluntarily pledged by such transfer school or transfer school district to the Missouri department of elementary and secondary education for the following school year;

(2) any private school who does not designate itself as a transfer school, which shall only exclude any public or charter school, to participate in any accreditation or standardized testing requirement set or enforced by the Missouri department of elementary and secondary education or any other local or state government entity located within the state of Missouri; or

(3) any student of the state of Missouri to attend any transfer school or be assigned to any transfer school district, in lieu of such student attending the public school assigned by their home school district.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-128)**

Subject

Initiative petition from Paul Berry III regarding a proposed constitutional amendment to Article IX. (Received August 14, 2023)

Date

September 1, 2023

Description

This proposal would amend Article IX of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, and **St. Louis Community College**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education (DESE)** indicated:

Article IX Section 8.

The changes required would require changes to data reporting to ensure that state aid is paid to the correct district. It may require multiple modifications to the Missouri Student Information System (MOSIS) files, and ETL changes for attendance hours to flow into core data etc. Also depending what is determined to be the amount of the per pupil expenditures there may need to be modifications to the Annual Secretary of the Board Report (ASBR) to show the calculation. See below for total Information Technology Services Division (ITSD) estimate. Year one ITSD cost: \$395,010.

DESE would be required to work with the State Treasurer's Office to ensure payments were transferred correctly, manage school lists, create policy and all other work associated with the tracking and monitoring required. These additional duties would require the addition of three full-time employees (FTE) for DESE. The added cost of 3 FTE for DESE is below:

1 director level	\$74,808
1 supervisor level	\$58,680
1 program specialist	\$64,704

3 x \$17,695 for Equipment and Expenses = \$53,085

Benefits for 3 FTE = \$118,923

Total cost year 1 of proposed amendment = \$765,210

The changes, as written, has potential for impacts to the Foundation Formula (School Finance) application/calculations. It's unsure if these modification would be able to be handled appropriately by the current/existing application in place today.

ITSD assumed the Foundation Formula is where these changes would be needed, in order to provide proper funding per provisions for transporting pupils, and state aid for such.

Assumed these changes/modifications are able to be programmed into the existing school finance/foundation formula application/code.

ITSD estimates year one costs of \$395,010, year two \$80,977 and ongoing of \$83,001.

Costs for FTE would be ongoing and would increase with any future salary or expense increases. \$12,613 would be the ongoing expense and equipment costs beginning in year two.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated no impact to their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-128 proposing to amend Article IX.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-128, their department assumes this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department, Director's office.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to school districts does not financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated they do not anticipate any fiscal impact with Initiative Petition 24-128.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal relating to school districts does not financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-128 a proposed constitutional amendment to Article IX, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated the initiative petition 24-128 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated while the exact fiscal impact is difficult to estimate, their office would expect the initiative proposal to cost the public \$81,155. This calculation consists of a reasonable estimate of the staff resources (\$76,155) and materials (\$5,000) required to "create and maintain uniform forms and procedures set by rule for use by home school districts, transfer schools, transfer school districts and transfer student candidates related to this section." [The costs are annual costs.](#)

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-128 proposing to amend Article IX.

Officials from **St. Louis County** indicated this proposed amendment will have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Jennings School District** indicated this proposed initiative petition could have devastating effects on school districts, including their district. Prior proposed legislation had caps of 3% or 5% of a district's population could transfer out in a given year. Those proposed transfer bills could lead to a 5% reduction in state and federal funds, or, for them, about \$800,000 lost per year. There is no such cap for this proposal. As such, the infrastructure and support that they provide for their community could be severely undercut. They could lose \$7,000 or more per student who transfers out. With 2,400 students, this proposal would be financially perilous for their district and similar districts.

Officials from **Wellsville-Middletown R-1 School District** indicated they are opposed to this as it could affect their district in a number of ways, such as a drop in enrollment, putting a financial burden on their small rural district, taxpayers having to pay for students not living in the district, possibly increasing their enrollment over the 350 Average Daily Attendance (ADA) causing them to lose their small school funding, and could possibly lead to segregation.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated there will be no fiscal impact for the University of Missouri System from this proposed amendment to Article IX.

Officials from the **St. Louis Community College** indicated they have reviewed the proposed initiative and do not believe it financially impacts their college. However, they are concerned that the issue of dual credit and dual enrollment are not addressed. Both programs affect K-12 students and they have assumed it would not affect those programs.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, and State Technical College of Missouri.**

Fiscal Note Summary

State governmental entities expect increased costs of \$846,000 in the first year of implementation and annual costs thereafter of at least \$491,000. Public school districts expect an unknown fiscal impact that could be significantly negative for any district that experiences a large decrease in enrollment.

STATE AUDITORS OFFICE

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article XII, version 4 (2024-127)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on August 8, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article XII of the Constitution by amending Section 2(a) and Section 2(b) and adopting four new Sections to be known as Article XII, Sections 7, 8, 9, and 10.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article XII of the Constitution is revised by amending Section 2(a) and Section 2(b) and adopting four new Sections to be known as Article XII, Sections 7, 8, 9, and 10 to read as follows:

Section 2(a). Constitutional amendments may be proposed at any time by a [majority] seventy percent vote of the members-elect of each house of the general assembly, the vote to be taken by yeas and nays and entered on the journal.

Section 2(b). All amendments proposed by the general assembly or by the initiative shall be submitted to the electors for their approval or rejection by official ballot title as may be provided by law, on a separate ballot without party designation, at the next even-numbered year November general election [, or at a special election called by the governor prior thereto, at which he may submit any of the amendments]. No such proposed amendment shall contain more than one amended and revised article of this constitution, or one new article which shall not contain more than one subject and matters properly connected therewith. If possible, each proposed amendment shall be published once a week for two consecutive weeks in two newspapers of different political faith in each county, the last publication to be not more than thirty nor less than fifteen days next preceding the election. If there be but one newspaper in any county, publication for four consecutive weeks shall be made. If a majority of the votes cast thereon is in favor of any amendment, the same shall take effect at the end of thirty days after the election. More than one amendment at the same election shall be so submitted as to enable the electors to vote on each amendment separately.

Section 7. Notwithstanding any other provision of law to the contrary, any constitutional amendment referred to voters shall be adopted when approved by a majority of the votes cast thereon, and not otherwise.

Section 8. Official ballot titles for any constitutional amendment referred to voters shall correctly and fairly express the true intent and meaning thereof and shall unambiguously state the principle of the provision sought to be added, amended, or repealed. An official ballot title shall use language from the full text of the proposed amendment when possible.

Section 9. Any registered voter of the state of Missouri has a right to propose amendments to this constitution via initiative petition, sign petitions proposing changes to this constitution, and vote on questions proposing changes to this constitution. Any restriction on these rights shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.

Section 10. a. Notwithstanding any other provision of law to the contrary, a petition proposing changes to this constitution that has been approved for circulation in accordance with the law may be circulated by petition circulators and signed by any registered voter in the state of Missouri using the ballot title language that is certified for use at that time.

b. Notwithstanding any other provision of law to the contrary, if a ballot title has not been certified in the time required by law, a petition may be circulated by petition circulators and signed by any registered voter in the state of Missouri using the full language of the initiative petition in lieu of a ballot title.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-127)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article XII. (Received August 8, 2023)

Date

August 28, 2023

Description

This proposal would amend Article XII of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **St. Charles County Election Authority**, the **St. Louis County Board of Elections**, the **Board of Election Commissioners City of St. Louis**, the **Kansas City Board of Election Commissioners**, the **Platte County Board of Elections**, the **Jackson**

County Election Board, Clay County Board of Election Commissioners, and the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-127 and determined there is no impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated no impact to their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-127 proposing to amend Article XII.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-127, their department assumes this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to initiative petitions does not financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated they do not anticipate any fiscal impact from Initiative Petition 24-127.

Officials from the **Department of Transportation** indicated this proposal would have no impact on their department.

Officials from the **Office of Administration** indicated this proposal relating to initiative petitions does not financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-127 a proposed constitutional amendment to Article XII, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions

certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, they estimate publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-127 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for initiative petition, 24-127 proposing to amend Article XII.

Officials from **St. Louis County** indicated this proposed amendment will have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated this amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated they do not see any fiscal impact from this amendment.

Officials from **St. Louis Community College** indicated they have reviewed the initiative petition and deemed it does not have a financial impact to the College.

Officials from the **St. Charles County Election Authority** indicated they have reviewed the initiative petition. This petition will not have a fiscal impact for St. Charles County Election Authority.

Officials from the **St. Louis County Board of Elections** indicated they see no impact from petition 2024-127 on their Board.

Officials from the **Board of Election Commissioners City of St. Louis** indicated this IP has no perceived impact on their organization.

Officials from the **Kansas City Board of Election Commissioners** indicated if the election is held in an even-numbered November election year, the additional costs to conduct that election would increase by \$10,000 (posting legal notices). If a separate ballot is needed, the cost for a second ballot to be printed is roughly \$100,000 (44 cents times 225,000 ballots). If the amendment(s) were run on a special election date, the State would pay their pro-rata share, based on voter registration, of conducting a jurisdiction-wide election (\$650,000).

Officials from **Platte County Board of Elections** indicated no fiscal impact.

Officials from the **Jackson County Election Board** indicated assuming the Jackson County Board of Election Commissioners is NOT responsible for the publication costs in the newspapers, this petition has no fiscal impact to the Board.

Officials from the **State Auditor's office** indicated no fiscal impact.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, and the Clay County Board of Election Commissioners.**

Fiscal Note Summary

State and local governmental entities estimate no costs or savings.

RE: Petition approval request from Alixandra Cossette regarding a proposed constitutional amendment to Article XII, version 3 (2024-126)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Alixandra Cossette on August 8, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment revises Article XII of the Constitution by amending Section 2(a) and Section 2(b) and adopting four new Sections to be known as Article XII, Sections 7, 8, 9, and 10.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article XII of the Constitution is revised by amending Section 2(a) and Section 2(b) and adopting four new Sections to be known as Article XII, Sections 7, 8, 9, and 10 to read as follows:

Section 2(a). Constitutional amendments may be proposed at any time by a [majority] seventy percent vote of the members-elect of each house of the general assembly, the vote to be taken by yeas and nays and entered on the journal.

Section 2(b). All amendments proposed by the general assembly or by the initiative shall be submitted to the electors for their approval or rejection by official ballot title as may be provided by law, on a separate ballot without party designation, at the next even-numbered year November general election [, or at a special election called by the governor prior thereto, at which he may submit any of the amendments]. No such proposed amendment shall contain more than one amended and revised article of this constitution, or one new article which shall not contain more than one subject and matters properly connected therewith. If possible, each proposed amendment shall be published once a week for two consecutive weeks in two newspapers of different political faith in each county, the last publication to be not more than thirty nor less than fifteen days next preceding the election. If there be but one newspaper in any county, publication for four consecutive weeks shall be made. If a majority of the votes cast thereon is in favor of any amendment, the same shall take effect at the end of thirty days after the election. More than one amendment at the same election shall be so submitted as to enable the electors to vote on each amendment separately.

Section 7. Notwithstanding any other provision of law to the contrary, any constitutional amendment referred to voters shall be adopted when approved by a majority of the votes cast thereon, and not otherwise.

Section 8. Official ballot titles for any constitutional amendment referred to voters shall correctly and fairly express the true intent and meaning thereof and shall unambiguously state the principle of the provision sought to be added, amended, or repealed. An official ballot title shall use language from the full text of the proposed amendment when possible.

Section 9. a. Any registered voter of the state of Missouri has a right to propose amendments to this constitution via initiative petition, sign petitions proposing changes to this constitution, and vote on questions proposing changes to this constitution. Any restriction on these rights shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.

b. Any citizen of the United States has a right to act as a petition circulator in the state of Missouri. Any restriction on an individual acting as a petition circulator shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold this right and under no circumstances decline to protect against its infringement.

Section 10. a. Notwithstanding any other provision of law to the contrary, a petition proposing changes to this constitution that has been approved for circulation in accordance with the law may be circulated by petition circulators and signed by any registered voter in the state of Missouri using the ballot title language that is certified for use at that time.

b. Notwithstanding any other provision of law to the contrary, if a ballot title has not been certified in the time required by law, a petition may be circulated by petition circulators and signed by any registered voter in the state of Missouri using the full language of the initiative petition in lieu of a ballot title.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-126)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article XII. (Received August 8, 2023)

Date

August 28, 2023

Description

This proposal would amend Article XII of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **St. Charles County Election Authority**, the **St. Louis County Board of Elections**, the **Board of Election Commissioners City of St. Louis**, the **Kansas City Board of Election Commissioners**, the **Platte County Board of Elections**, the **Jackson**

County Election Board, Clay County Board of Election Commissioners, and the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-126 and determined there is no impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated no impact to their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-126 proposing to amend Article XII.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-126, their department assumes this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to initiative petitions does not financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated they do not anticipate any fiscal impact from Initiative Petition 24-126.

Officials from the **Department of Transportation** indicated this proposal would have no impact on their department.

Officials from the **Office of Administration** indicated this proposal relating to initiative petitions does not financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-126 a proposed constitutional amendment to Article XII, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions

certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, they estimate publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-126 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for initiative petition, 24-126 proposing to amend Article XII.

Officials from **St. Louis County** indicated this proposed amendment will have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated this amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated they do not see any fiscal impact from this amendment.

Officials from **St. Louis Community College** indicated they have reviewed the initiative petition and deemed it does not have a financial impact to the College.

Officials from the **St. Charles County Election Authority** indicated they have reviewed the initiative petition. This petition will not have a fiscal impact for St. Charles County Election Authority.

Officials from the **St. Louis County Board of Elections** indicated they see no impact from petition 2024-126 on their Board.

Officials from the **Board of Election Commissioners City of St. Louis** indicated this IP has no perceived impact on their organization.

Officials from the **Kansas City Board of Election Commissioners** indicated if the election is held in an even-numbered November election year, the additional costs to conduct that election would increase by \$10,000 (posting legal notices). If a separate ballot is needed, the cost for a second ballot to be printed is roughly \$100,000 (44 cents times 225,000 ballots). If the amendment(s) were run on a special election date, the State would pay their pro-rata share, based on voter registration, of conducting a jurisdiction-wide election (\$650,000).

Officials from **Platte County Board of Elections** indicated no fiscal impact.

Officials from the **Jackson County Election Board** indicated assuming the Jackson County Board of Election Commissioners is NOT responsible for the publication costs in the newspapers, this petition has no fiscal impact to the Board.

Officials from the **State Auditor's office** indicated no fiscal impact.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, and the Clay County Board of Election Commissioners.**

Fiscal Note Summary

State and local governmental entities estimate no costs or savings.

NOTICE: The proposed amendment revises Article XII of the Constitution by amending Section 2(b) and adopting four new Sections to be known as Article XII, Sections 7, 8, 9, and 10.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article XII of the Constitution is revised by amending Section 2(b) and adopting four new Sections to be known as Article XII, Sections 7, 8, 9, and 10 to read as follows:

Section 2(b). All amendments proposed by the general assembly or by the initiative shall be submitted to the electors for their approval or rejection by official ballot title as may be provided by law, on a separate ballot without party designation, at the next even-numbered year November general election [, or at a special election called by the governor prior thereto, at which he may submit any of the amendments]. No such proposed amendment shall contain more than one amended and revised article of this constitution, or one new article which shall not contain more than one subject and matters properly connected therewith. If possible, each proposed amendment shall be published once a week for two consecutive weeks in two newspapers of different political faith in each county, the last publication to be not more than thirty nor less than fifteen days next preceding the election. If there be but one newspaper in any county, publication for four consecutive weeks shall be made. If a majority of the votes cast thereon is in favor of any amendment, the same shall take effect at the end of thirty days after the election. More than one amendment at the same election shall be so submitted as to enable the electors to vote on each amendment separately.

Section 7. Notwithstanding any other provision of law to the contrary, any constitutional amendment referred to voters shall be adopted when approved by a majority of the votes cast thereon, and not otherwise.

Section 8. Official ballot titles for any constitutional amendment referred to voters shall correctly and fairly express the true intent and meaning thereof and shall unambiguously state the principle of the provision sought to be added, amended, or repealed. An official ballot title shall use language from the full text of the proposed amendment when possible.

Section 9. Any registered voter of the state of Missouri has a right to propose amendments to this constitution via initiative petition, sign petitions proposing changes to this constitution, and vote on questions proposing changes to this constitution. Any restriction on these rights shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.

Section 10. a. Notwithstanding any other provision of law to the contrary, a petition proposing changes to this constitution that has been approved for circulation in accordance with the law may be circulated by petition circulators and signed by any registered voter in the state of Missouri using the ballot title language that is certified for use at that time.

b. Notwithstanding any other provision of law to the contrary, if a ballot title has not been certified in the time required by law, a petition may be circulated by petition circulators and signed by any registered voter in the state of Missouri using the full language of the initiative petition in lieu of a ballot title.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-125 proposing to amend Article XII.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-125, their department assumes this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to initiative petitions does not financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated they do not anticipate any fiscal impact from Initiative Petition 24-125.

Officials from the **Department of Transportation** indicated this proposal would have no impact on their department.

Officials from the **Office of Administration** indicated this proposal relating to initiative petitions does not financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-125 a proposed constitutional amendment to Article XII, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions

certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, they estimate publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-125 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for initiative petition, 24-125 proposing to amend Article XII.

Officials from **St. Louis County** indicated this proposed amendment will have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated this amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated they do not see any fiscal impact from this amendment.

Officials from **St. Louis Community College** indicated they have reviewed the initiative petition and deemed it does not have a financial impact to the College.

Officials from the **St. Charles County Election Authority** indicated they have reviewed the initiative petition. This petition will not have a fiscal impact for St. Charles County Election Authority.

Officials from the **St. Louis County Board of Elections** indicated they see no impact from petition 2024-125 on their Board.

Officials from the **Board of Election Commissioners City of St. Louis** indicated this IP has no perceived impact on their organization.

Officials from the **Kansas City Board of Election Commissioners** indicated if the election is held in an even-numbered November election year, the additional costs to conduct that election would increase by \$10,000 (posting legal notices). If a separate ballot is needed, the cost for a second ballot to be printed is roughly \$100,000 (44 cents times 225,000 ballots). If the amendment(s) were run on a special election date, the State would pay their pro-rata share, based on voter registration, of conducting a jurisdiction-wide election (\$650,000).

Officials from **Platte County Board of Elections** indicated no fiscal impact.

Officials from the **Jackson County Election Board** indicated assuming the Jackson County Board of Election Commissioners is NOT responsible for the publication costs in the newspapers, this petition has no fiscal impact to the Board.

Officials from the **State Auditor's office** indicated no fiscal impact.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, and the Clay County Board of Election Commissioners.**

Fiscal Note Summary

State and local governmental entities estimate no costs or savings.

NOTICE: The proposed amendment revises Article XII of the Constitution by amending Section 2(b) and adopting four new Sections to be known as Article XII, Sections 7, 8, 9, and 10.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Section A. Article XII of the Constitution is revised by amending Section 2(b) and adopting four new Sections to be known as Article XII, Sections 7, 8, 9, and 10 to read as follows:

Section 2(b). All amendments proposed by the general assembly or by the initiative shall be submitted to the electors for their approval or rejection by official ballot title as may be provided by law, on a separate ballot without party designation, at the next even-numbered year November general election [, or at a special election called by the governor prior thereto, at which he may submit any of the amendments]. No such proposed amendment shall contain more than one amended and revised article of this constitution, or one new article which shall not contain more than one subject and matters properly connected therewith. If possible, each proposed amendment shall be published once a week for two consecutive weeks in two newspapers of different political faith in each county, the last publication to be not more than thirty nor less than fifteen days next preceding the election. If there be but one newspaper in any county, publication for four consecutive weeks shall be made. If a majority of the votes cast thereon is in favor of any amendment, the same shall take effect at the end of thirty days after the election. More than one amendment at the same election shall be so submitted as to enable the electors to vote on each amendment separately.

Section 7. Notwithstanding any other provision of law to the contrary, any constitutional amendment referred to voters shall be adopted when approved by a majority of the votes cast thereon, and not otherwise.

Section 8. Official ballot titles for any constitutional amendment referred to voters shall correctly and fairly express the true intent and meaning thereof and shall unambiguously state the principle of the provision sought to be added, amended, or repealed. An official ballot title shall use language from the full text of the proposed amendment when possible.

Section 9. a. Any registered voter of the state of Missouri has a right to propose amendments to this constitution via initiative petition, sign petitions proposing changes to this constitution, and vote on questions proposing changes to this constitution. Any restriction on these rights shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement.

b. Any citizen of the United States has a right to act as a petition circulator in the state of Missouri. Any restriction on an individual acting as a petition circulator shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold this right and under no circumstances decline to protect against its infringement.

Section 10. a. Notwithstanding any other provision of law to the contrary, a petition proposing changes to this constitution that has been approved for circulation in accordance with the law may be circulated by petition circulators and signed by any registered voter in the state of Missouri using the ballot title language that is certified for use at that time.

b. Notwithstanding any other provision of law to the contrary, if a ballot title has not been certified in the time required by law, a petition may be circulated by petition circulators and signed by any registered voter in the state of Missouri using the full language of the initiative petition in lieu of a ballot title.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-124)**

Subject

Initiative petition from Alixandra Cossette regarding a proposed constitutional amendment to Article XII. (Received August 8, 2023)

Date

August 28, 2023

Description

This proposal would amend Article XII of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, **St. Louis Community College**, the **St. Charles County Election Authority**, the **St. Louis County Board of Elections**, the **Board of Election Commissioners City of St. Louis**, the **Kansas City Board of Election Commissioners**, the **Platte County Board of Elections**, the **Jackson**

County Election Board, Clay County Board of Election Commissioners, and the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-124 and determined there is no impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated no impact to their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-124 proposing to amend Article XII.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-124, their department assumes this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to initiative petitions does not financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated they do not anticipate any fiscal impact from Initiative Petition 24-124.

Officials from the **Department of Transportation** indicated no impact.

Officials from the **Office of Administration** indicated this proposal relating to initiative petitions does not financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-124 a proposed constitutional amendment to Article XII, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, they estimate publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-124 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for initiative petition, 24-124 proposing to amend Article XII.

Officials from **St. Louis County** indicated this proposed amendment will have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated this amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated the University of Missouri System does not see any fiscal impact from this amendment.

Officials from **St. Louis Community College** indicated they have reviewed the initiative petition and deemed it does not have a financial impact to the College.

Officials from the **St. Charles County Election Authority** indicated they have reviewed this initiative petition. This petition will not have a fiscal impact for St. Charles County Election Authority.

Officials from the **St. Louis County Board of Elections** indicated they see no impact from petition 2024-124 on their Board.

Officials from the **Board of Election Commissioners City of St. Louis** indicated this petition has no fiscal impact on their organization.

Officials from the **Kansas City Board of Election Commissioners** indicated if the election is held in an even-numbered November election year, the additional costs to conduct that election would increase by \$10,000 (posting legal notices). If a separate ballot is needed, the cost for a second ballot to be printed is roughly \$100,000 (44 cents times 225,000 ballots). If the amendment(s) were run on a special election date, the State would pay their pro-rata share, based on voter registration, of conducting a jurisdiction-wide election (\$650,000).

Officials from **Platte County Board of Elections** indicated no fiscal impact.

Officials from the **Jackson County Election Board** indicated assuming the Jackson County Board of Election Commissioners is NOT responsible for the publication costs in the newspapers, this petition has no fiscal impact to the Board.

Officials from the **State Auditor's office** indicated no fiscal impact.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, and the Clay County Board of Election Commissioners.**

Fiscal Note Summary

State and local governmental entities estimate no costs or savings.

NOTICE: The proposed amendment revises Article 1 of the Constitution by adopting one new Section to be known as Article I, section 36.

Be it resolved by the people of the state of Missouri that the Constitution be amended: Article I, section 36.1 of the Missouri Constitution to read as follows:

Section 36.1. This Section shall be known as "The Right to Informed Consent."

That individuals have fundamental rights to informed consent and to refuse any medical technologies, procedures, or treatment, including, but not limited to injections, vaccines, or prophylactics. No law, rule, order, ordinance, or regulation shall require, mandate, or coerce any person to receive or use a medical procedure, treatment, vaccine, prophylactic, pharmaceutical, or medical device nor discriminate against the individual who exercises this right. Informed consent includes the right to be informed about exposure to mRNA and/or gene-altering therapies and medical technologies or treatment.

August 24, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Jennings School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, and **St. Louis Community College**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-123 and determined there is no impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no fiscal impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition is a no impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-123 proposing to amend Article I.

Officials from the **Department of Revenue** indicated that after a thorough review of IP 24-123, their department assumes this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department, Director's office.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to medical interventions and informed consent does not financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-123 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal relating to medical interventions and informed consent does not financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-123 a proposed constitutional amendment to Article I (2024-123), there is no fiscal impact on the Courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated initiative petition 24-123 will have no fiscal impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-123 proposing to amend Article I.

Officials from the **City of Kansas City** indicated the proposed amendment would have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated as no federal mandate is presently being enforced for contractors or as a condition for participation in Medicare/Medicaid, no fiscal impact is anticipated. If such mandates were established and enforced, and if providing exemptions based on philosophical objection (in addition to religious objection) were deemed not to be compliant with the federal mandate, the University of Missouri System could potentially be subject to loss of in excess of \$1 million.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative and determined it has no financial impact on the College.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Jennings School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and State Technical College of Missouri.**

Fiscal Note Summary

State and local governmental entities estimate no costs or savings.

RE: Petition approval request from Paul Berry III regarding a proposed constitutional amendment to Article IX (2024-122)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Paul Berry III on July 28, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: the proposed amendment revises Article IX, section 8 of the Missouri Constitution by adopting additional language to Article IX, section 8 of the Missouri Constitution.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article IX, section 8 of the Missouri Constitution is revised to remove the following language in brackets and add the following underlined language:

Section 8. [Neither the general assembly, nor any county, city, town, township, school district or other municipal corporation, shall ever make an appropriation or pay from any public fund whatever, anything in aid of any religious creed, church or sectarian purpose, or to help to support or sustain any private or public school, academy, seminary, college, university, or other institution of learning controlled by any religious creed, church or sectarian denomination whatever; nor shall any grant or donation of personal property or real estate ever be made by the state, or any county, city, town, or other municipal corporation, for any religious creed, church, or sectarian purpose whatever.] 1. Except as may be limited by Federal law and the United States Constitution, the State of Missouri seeks to make available to parents and students of this state all available quality K-12 educational opportunities for each student in Missouri, with the purpose of reducing economic disparities that do not support self-sufficiency, nor promote the pursuit of life, liberty and happiness for all Missourians. Notwithstanding any provision of this section to the contrary, no student of this state shall be required as a function of law or government authority to attend any Missouri school that requires the participation in any religious creed, church or sectarian denomination whatsoever.

2. Subject to the qualifications and procedures set by this section, any K-12 student in the State of Missouri may attend any Missouri charter, private or public school in the State of Missouri outside of the school district boundaries of their home residence, when such K-12 transfer student maintains:

(1) an unexcused attendance record of at least ninety percent (90%) during each semester enrolled at the transfer school; and

(2) a school disciplinary record free of any pattern of bullying or property damage and has not been found to have committed any drug distribution, sexual offense, theft or serious violent offense.

3. Transfer schools, including any transfer school district when such transfer school is a public school, who accept enrollment of any K-12 transfer student pursuant to this section shall receive from the home school district of such K-12 transfer student the sum amount of the per pupil expenditures that would otherwise be allocated by the student's home school district towards the education of such K-12 transfer student, provided no additional per pupil expenditures or tuition may be charged by the transfer school or transfer school district to any K-12 transfer student or such K-12 student's home school district. The Missouri treasurer shall be responsible for the collection of all per pupil expenditures from the student's home school district pursuant to this section and transfer such pupil expenditures to the transfer school on behalf of K-12 transfer students.

4. Transfer schools who seek to enroll any K-12 transfer student pursuant to this section shall abide by the following procedures:

(1) each transfer school shall submit to the Missouri department of elementary and secondary education no later than February 1st of each year the number of new transfer students such transfer school seeks to enroll during the following school year;

(2) the Missouri department of elementary and secondary education shall no later than March 1st of each year distribute a public list containing each transfer school who pledges to enroll transfer students during the following school year;

(3) on March 1st of each year, transfer schools may begin accepting student transfer admission applications for transfer student enrollment during the following school year, which shall be accepted and considered by transfer schools with no application fee charged to any party related to any student transfer application;

(4) transfer student candidates may not maintain more than two (2) active transfer student admission applications filed with transfer schools at the same time, except any transfer student candidate may apply to more than two (2) transfer schools operated by the same public school district, which shall count as one (1) student transfer admission application;

(5) no later than April 15th of each year, transfer schools shall award to transfer student candidates the allotment of transfer student enrollments pledged to the Missouri department of elementary and secondary education for the following school year;

(6) once a transfer student candidate is accepted by a transfer school for student enrollment, such transfer student (a) shall not be required to reapply to continue attendance at such transfer school, which shall also include attendance at any other school operated by a public school district under the authority of such transfer school, and (b) shall be entitled to all rights, privileges and services provided to any student who resides within the residential boundaries of the transfer school; and

(7) the Missouri treasurer and Missouri department of elementary and secondary education shall each create and maintain uniform forms and procedures set by rule for use by home school districts, transfer schools, transfer school districts and transfer student candidates related to this section.

5. When considering student transfer applications from any prospective transfer student currently enrolled in grades 6-12 pursuant to this section, the transfer school shall grant transfer student enrollment priority based upon the following criteria:

(1) transfer student candidates who have a sibling attending any school within transfer school or transfer school district at the time of student transfer application, which shall also include any child raised in the same household as student and/or parent, and maintained an unexcused attendance record of at least 90% during the previous full semester prior to student transfer application shall receive first transfer school admission priority;

(2) transfer student candidates who maintained a minimum 3.0 grade point average and an unexcused attendance record of at least 90% during the previous full semester enrolled at the home school district prior to student transfer application shall receive second transfer school admission priority;

(3) transfer student candidates who maintained (a) a minimum 3.0 grade point average or (b) an unexcused attendance record of at least 90% during the previous full semester enrolled at the home school district prior to student transfer application shall receive third transfer admission priority;

(4) transfer student candidates who are enrolled in a home school district that (a) maintains an average high school graduation rate less than Missouri's average high school graduation rate during the previous school year prior to student transfer application or (b) is under probation or suspended from education accreditation issued by the Missouri department of elementary and secondary education shall receive fourth transfer admission priority;

(5) when any transfer school, or any transfer school district when such transfer school is a public school, receives more student transfer applications from transfer student candidates enrolled in grades 6-12 than the student allotments made available by transfer school or transfer school district for admission of transfer student candidates, such transfer school or transfer school district shall grant the issuance of student transfer enrollment by lottery draw process approved by the Missouri department of elementary and secondary education;

(6) notwithstanding any provision of this subsection, transfer school or transfer school district may at its discretion reject any transfer student from continuing to attend transfer school who does not meet the transfer student requirements set by subsection 2 of this section; and

(7) notwithstanding any provision of this subsection, any private high school that enrolls over seventy-five percent (75%) of their student graduates in a two-year or four-year institution the previous school year may waive the aforementioned student transfer application process requirements pursuant to this subsection and grant admissions to such private school under the same enrollment requirements generally provided by such private high school, provided no application fee may be charged to any party related to any student transfer application.

6. When considering student transfer applications from any prospective transfer student currently enrolled in grades K-5 pursuant to this section, the transfer school shall grant transfer student enrollment priority based upon the following criteria:

(1) transfer student candidates who have a sibling attending any school within transfer school or transfer school district at the time of student transfer application, which shall also include any child raised in the same household as student and/or parent, shall receive first transfer admission priority;

(2) when any transfer school, or any transfer school district when such transfer school is a public school, (a) receives more student transfer applications from transfer student candidates enrolled in grades 1-5 than the student allotments made available by transfer school or transfer school district for admission of transfer student candidates or (b) transfer student candidate is of age to

enroll in kindergarten the following school year, such transfer school or transfer school district shall grant the issuance of student transfer enrollment by lottery draw process approved by the Missouri department of elementary and secondary education; and

(3) notwithstanding any provision of this subsection, transfer school or transfer school district may at its discretion reject any transfer student from continuing to attend transfer school who does not meet the transfer student requirements set by subsection 2 of this section.

7. Notwithstanding any provision of this section, each transfer school, or any transfer school district when such transfer school is a public school, is charged with the responsibility to consider any request to:

(1) waive any attendance, pending application limit or grade point average requirement required by any transfer student candidate, which may be requested prior to or after the initial application has been filed with transfer school or transfer school district;

(2) reconsider any student transfer application decision made pursuant to this section denied by transfer school or transfer school district, when such transfer school or transfer school district determines at its sole discretion that the transfer student candidate has faced adversity that caused lower attendance or grade point average requirement that could reasonably be addressed by enrollment of transfer student candidate in transfer school or transfer school district.

8. Notwithstanding any provision of this section, no transfer school or any transfer school district when such transfer school is a public school, shall charge or be required to provide transportation to any transfer student to or from their home residence, unless such school transportation is otherwise provided by approval from:

(1) transfer school or transfer school district;

(2) authorized by statute enacted by the Missouri general assembly;

(3) as may be required by Federal law; or

(4) as otherwise required by a Federal or Missouri court order.

NOTICE: the proposed amendment revises Article I, section 23 of the Missouri Constitution by adopting additional language to Article I, section 23 of the Missouri Constitution.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I, section 23 of the Missouri Constitution is revised to add the following underlined language:

Section 23(a). That the right of every citizen to keep and bear arms, ammunition, and accessories typical to the normal function of such arms, in defense of his home, person, family and property, or when lawfully summoned in aid of the civil power, shall not be questioned. The rights guaranteed by this section shall be unalienable. Any restriction on these rights shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement. Nothing in this section shall be construed to prevent the general assembly from enacting general laws which limit the rights of convicted violent felons or those adjudicated by a court to be a danger to self or others as result of a mental disorder or mental infirmity.

Section 23(b). No municipal, county or subdivision of the state of Missouri may pass any rule, regulation, ordinance, law or any other legal authority that regulates the right of any citizen to keep and bear arms, ammunition, and accessories typical to the normal function of such arms.

Section 23(c). No person under the age of 18 shall possess any firearm within the state of Missouri, unless such possession of a firearm is possessed (i) under emergency circumstances, (ii) by a member of the United States Armed Forces, (iii) with the permission of a parent, guardian or person entrusted to care for such person under the age of 18, or (iv) under the direct supervision of a person over the age of 25 who has been granted written permission by the parent or guardian of such person possessing a firearm under the age of 18.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-119)**

Subject

Initiative petition from Paul Berry, III regarding a proposed constitutional amendment to Article I. (Received July 21, 2023)

Date

August 10, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, and **St. Louis Community College**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-119 and determined there is no fiscal impact on their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no impact to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-119 proposing to amend Article I.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-119, they assume this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department, Director's office. There is also no impact for the Missouri State Highway Patrol.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated this proposal relating to firearm regulations does not financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-119 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal relating to firearm regulation does not financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-119 a proposed constitutional amendment to Article I, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions

certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender (SPD)** indicated initiative petition 24-119 will have no fiscal impact on SPD.

Officials from the **Office of the State Treasurer** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-119 proposing to amend Article I.

Officials from **St. Louis County** indicated this initiative should have no fiscal impact on their county.

Officials from the **City of Kansas City** indicated this proposed amendment has no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated the University of Missouri System does not foresee any significant cost increase due to this amendment.

Officials from the **St. Louis Community College** indicated they have reviewed the proposed initiative and found no financial impact on their college. However, in the suggested revised Section 23(b), they would be concerned if this section inhibits their rights to not allow firearms on campus.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63**

School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and State Technical College of Missouri.

Fiscal Note Summary

State and local governmental entities estimate no costs or savings.

NOTICE: the proposed amendment revises Article I, section 23 of the Missouri Constitution by adopting additional language to Article I, section 23 of the Missouri Constitution.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I, section 23 of the Missouri Constitution is revised to add the following underlined language:

Section 23(a). That the right of every citizen to keep and bear arms, ammunition, and accessories typical to the normal function of such arms, in defense of his home, person, family and property, or when lawfully summoned in aid of the civil power, shall not be questioned. The rights guaranteed by this section shall be unalienable. Any restriction on these rights shall be subject to strict scrutiny and the state of Missouri shall be obligated to uphold these rights and shall under no circumstances decline to protect against their infringement. Nothing in this section shall be construed to prevent the general assembly from enacting general laws which limit the rights of convicted violent felons or those adjudicated by a court to be a danger to self or others as result of a mental disorder or mental infirmity.

Section 23(b). No municipal, county or subdivision of the state of Missouri may pass any rule, regulation, ordinance, law or any other legal authority that regulates the right of any citizen to keep and bear arms, ammunition, and accessories typical to the normal function of such arms.

Section 23(c). No person under the age of 18 shall possess any firearm within the state of Missouri, unless such possession of a firearm is possessed (i) under emergency circumstances, (ii) by a member of the United States Armed Forces, (iii) with the permission of a parent, guardian or person entrusted to care for such person under the age of 18, or (iv) under the direct supervision of a person over the age of 25 who has been granted written permission by the parent or guardian of such person possessing a firearm under the age of 18.

NOTICE: the proposed amendment revises Article I, section 23 of the Constitution by adopting a new section to be known as Section 23(a).

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I, section 23 of the Missouri Constitution is revised by adding the following:

Section 23(a). In compliance with the Second Amendment of the Constitution of the United States and limited by decisions of the United States Supreme Court or federal law, any county, the City of St. Louis, and the city of Kansas City may, by ordinance duly enacted, regulate the possession or carrying of firearms within the limits of the city or county notwithstanding any other provision of law, subject to the following:

1. An ordinance authorizing the issuance of a permit or certificate may provide for the city or county to charge a fee sufficient to cover the cost of issuing permits or certificates but which does not exceed the cost therefor and provided that such permits or certificates shall be valid for no longer than five years. The city or county may obtain background-check information from the federal National Instant Background Check System or other governmental agency providing information service.
2. Any ordinance adopted in accordance with this section may apply to non-residents as well as residents of the city or county, but shall recognize as valid any permit or certificate issued for possessing or carrying firearms issued by the permit or certificate holder's county of residence. Any such ordinance also shall exempt any active duty or retired law enforcement officer who is currently certified as compliant with state peace officer's standards and training, any full time judge, or any person who must be armed as a condition of employment during active employment as a licensed security guard or as a government employee, including military.
3. Any ordinance adopted hereunder may provide penalties for violation, but such penalties shall not exceed a fine of \$1,000 or imprisonment in the county jail for a term exceeding one year, or both. An ordinance also may authorize seizure of any firearm, by a law enforcement officer upon probable cause, where the possessor is ineligible by law to possess the firearm.

**MISSOURI STATE AUDITOR'S OFFICE

Subject

Initiative petition from Jimmie Edwards regarding a proposed constitutional amendment to Article I. (Received June 30, 2023)

Date

July 20, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, and **St. Louis Community College**.

Assumptions

Officials from the **Attorney General's office** indicated:

TO: Sheri Hoffman

DATE: July 7, 2023

FROM: Diana Haines

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article I (2024-117)

All three of the proposed amendments to Article I would allow certain political subdivisions within Missouri, such as Jackson County, St. Louis County, Kansas City, and St. Louis, to set their own gun control laws. These subdivisions would undoubtedly adopt more restrictive gun control laws than the rest of the State. The Attorney General's Office expects that the enactment of any of these proposals would result in increased crime and litigation. The total cost to Missouri could exceed \$704.14 million. This includes \$696.64 million in increased crime costs and \$7.5 million in increased legal costs for the Attorney General's Office.

Analysis

There are two main areas where these initiative petitions would substantially increase costs to Missouri. Stricter gun control laws in certain subdivisions of the State would meaningfully increase the economic losses from increased crime and the amount that must be spent protecting citizens from crime. The petitions would also trigger significant legal costs because they will certainly give rise to legal challenges in which the Attorney General's Office would be involved.

I. The petitions will increase costs associated with crime.

There are two aspects of crime costs that will increase if the initiative petitions go into effect. First, the total economic losses suffered by Missourians

from crime will increase. Second, Missouri will have to spend more on criminal justice efforts to combat increased crime.

To begin, research demonstrates that Missouri's current constitutional carry regime reduces violent crime. John R. Lott, Jr., *Does Allowing Law-Abiding Citizens to Carry Concealed Handguns Save Lives?*, 31 Val. U. L. Rev. 355, 359 (1997). Permissive carry laws that remove barriers to law abiding citizens owning and carrying firearms reduce overall crime rates. Empirical research has demonstrated that when citizens are free to arm themselves, murder rates decrease by 8%, rape by 5%, aggravated assault by 7%, and robbery by 3%. *Id.* For example, violent crimes, such as homicide, substantially declined in Washington, D.C., after the Supreme Court's decision in *Heller*. Matt Connolly, *D.C. murders fall below triple digits, first time since 1963*, WASHINGTON EXAMINER (Dec. 10, 2012)¹. If the initiative petitions go into effect, the gun control laws adopted by Kansas City and St. Louis will nullify these benefits and create a more crime-friendly environment for criminals.

For St. Louis and Kansas City alone, enacting restrictive gun control regulations is estimated to lead to an additional 32 murders per year. *See* ST. LOUIS POLICE DEPARTMENT, 2022 UCR HOMICIDE ANALYSIS (2023); Makenzie Koch, *Kansas City ends 2022 with second-worst homicide total*, FOX 4 (Jan. 2, 2023)². Each murder produces an economic cost of over \$17 million. Annie Lowrey, *True Crime Costs*, SLATE (Oct. 21, 2010)³. This would bring the total economic loss from murder alone to over \$544 million per year if the proposed initiatives went into effect. Moreover, this is a conservative estimate that does not include the potential crime cost ripple effects outside of these cities.

Unfortunately, the story is similar for rape. The current gun control regime is estimated to prevent an additional 726 rapes per year in Kansas City and St. Louis, MO. *See* MACROTRENDS, *St. Louis MO Rape Statistics 1999-2018* (last visited July 7, 2023)⁴; MACROTRENDS, *Kansas City MO Rape Statistics 1999-2018* (last visited July 7, 2023).⁵ Academics who have studied this issue concluded that victims who engage in some measure of self-protection are, as one group of academics wrote, "much less likely to have the rape completed

¹ <https://www.washingtonexaminer.com/dc-murders-fall-below-triple-digits-first-time-since-1963#.UMdCHYN6qSq>

² <https://fox4kc.com/news/kansas-city-ends-2022-with-second-worst-homicide-total/>

³ <https://slate.com/culture/2010/10/does-every-murder-in-the-united-states-really-cost-society-17-million.html#:~:text=That%20means%20in%202009%2C%20according,the%20order%20of%20%2417%20million>

⁴ <https://www.macrotrends.net/cities/us/mo/st-louis/rape-rate-statistics>

⁵ <https://www.macrotrends.net/cities/us/mo/kansas-city/rape-rate-statistics>

against them than nonresisting victims, a pattern generally apparent regardless of the specific form of resistance” and “The form of resistance that appears most effective in preventing rape completion is resistance with a gun, knife, or other weapon.” Gary Kleck and Susan Sayles, *Social Problems* Vol. 37, No. 2 (May, 1990), pp. 149-162 (available at <https://www.jstor.org/stable/800645>) (last visited July 7, 2023). Each additional rape causes an economic loss of \$122,461. Cora Peterson et al., *Lifetime Economic Burden of Rape Among U.S. Adults*, 52 *Am. J. of Preventative Med.* 691 (2017). In sum, the economic burden of additional rapes traceable to an increasingly disarmed public due to the proposed initiative petitions would be approximately \$88.9 million each year.

For aggravated assault, the petitions would cost \$49.6 million. Roughly 646 aggravated assaults are prevented each year by the current constitutional carry regime. *See* MACROTRENDS, *St. Louis MO Aggravated Assaults 1999-2018* (last visited July 7, 2023);⁶ MACROTRENDS, *Kansas City MO Aggravated Assaults 1999-2018* (last visited July 7, 2023)⁷. And each assault costs \$76,829, which means Missourians (under a conservative estimate) would incur nearly \$50 million per year in additional costs. Andrew Rajkumar & Michael French, *Drug abuse, crime costs, and the economic benefits of treatment*, 13 *J. of Quantitative Criminology* 291 (1997).

Finally, for robberies the petitions would lead to additional costs of \$3.04 million annually, resulting from an increase of 3,088 robberies per year. *See* MACROTRENDS, *St. Louis MO Robberies 1999-2018* (last visited July 7, 2023);⁸ MACROTRENDS, *Kansas City MO Robberies 1999-2018* (last visited July 7, 2023)⁹. Each robbery costs the public \$33,143. Rajkumar & French, *supra*. Thus, even relatively lower cost and less violent crimes would lead to significant economic harms.

In addition to the costs outlines above, there are substantial costs to combatting this crime from a law enforcement perspective. These petitions will require additional expenditures in policing and prisons because of the increased crime. Dr. John Lott, the nation’s foremost researcher in this field, has estimated that the total policing and prison cost increases for Missouri would be between \$11.1 and \$38.3 million per year. That does not include the loss of productivity from incarcerated individuals as more people spend time

⁶ <https://www.macrotrends.net/cities/us/mo/st-louis/assault-rate-statistics>

⁷ <https://www.macrotrends.net/cities/us/mo/kansas-city/assault-rate-statistics>

⁸ <https://www.macrotrends.net/cities/us/mo/st-louis/robbery-rate-statistics>

⁹ <https://www.macrotrends.net/cities/us/mo/kansas-city/robbery-rate-statistics>

in prison rather than in the workforce. Nor does this estimate include lost revenue as businesses leave Missouri for areas with lower crime rates. See Felipe Marques, *Citadel billionaire founder Ken Griffin says it wasn't low taxes that led him to move his company from Chicago to Miami*, FORTUNE (Nov. 8 2022).¹⁰ Each of these costs is fairly traceable to the proposed initiative petitions, the sole purpose of which are to undermine and dilute the legal protections currently in place for the safety of Missouri residents.

Thus, even using conservative estimates, these petitions would cost Missouri \$696.64 million alone *per year* in crime-related economic losses.

II. The petitions will increase legal costs for the Attorney General's Office.

The Attorney General's Office (AGO) would also incur substantial legal costs relating to the proposed petitions. First, the petitions involve a controversial topic that is sure to motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting Second Amendment rights. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of Second Amendment protections, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

Even a cursory analysis of the proposed initiative petitions raise significant constitutional concerns. As such, the State of Missouri may be required to pay the attorneys' fees of parties that challenge the petitions and any resulting regulations approved by local governments.

All told, each lawsuit could cost approximately \$1.5 million based on the AGO's estimates of the additional personnel and resources needed. Even if the petitions' validity was challenged in only the five jurisdictions specifically named in the petitions (and there is reason to believe it would be more), that would still amount to \$7.5 million in additional legal costs.

Conclusion

¹⁰ <https://fortune.com/2022/11/08/citadel-billionaire-founder-ken-griffin-not-low-taxes-led-move-company-from-chicago-to-miami/>

These proposed initiative petitions would subvert current state law and give political subdivisions unconstitutional control over local resident's gun rights. Not only is that wrong-headed, it is expensive. If enacted, these proposed provisions would have a severe, negative economic impact on the State of Missouri. Crime-related costs would increase drastically. Furthermore, resulting litigation would force the AGO to expend significant funds on anticipated litigation, likely including the hiring of outside counsel.

The AGO currently estimates the fiscal impact will be at least \$704.14 million, but it could be more. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

In response to questions, the Attorney General's office provided the following information:

The challenges to the petitions could be brought before or after election. Depending on the number, nature, and timing of the challenges the Attorney General's office would likely need to seek additional appropriations. The office's current appropriation would not be sufficient to litigate the multiple challenges contemplated in the fiscal note response.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-117 and determined there is no fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no impact to their department.

Officials from the **Department of Health and Senior Services** indicated they have reviewed the fiscal note and found no fiscal impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for the initiative petition 24-117 proposing to amend Article I.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-117, they assume this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department, Director's office.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they assume no impact regarding this petition.

Officials from the **Governor's office** indicated this proposal relating to firearm regulation by counties and the cities of Kansas City and St. Louis does not financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated initiative petition 24-117 will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for this initiative petition.

Officials from the **Office of Administration** indicated this proposal relating to firearm regulation by counties and the cities of Kansas City and St. Louis does not financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-117 a proposed constitutional amendment to Article I, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender (SPD)** indicated initiative petition 24-117 will have no fiscal impact on SPD in that it only authorizes creation of a municipal ordinance and Chapter 600 does not authorize SPD representation in municipal ordinance cases.

Officials from the **Office of the State Treasurer** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-117 proposing to amend Article I.

Officials from **St. Louis County** indicated the cost of this proposed initiative is unknown without knowing the details of a subsequent proposed ordinance change.

Officials from the **City of Kansas City** indicated this will have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **University of Missouri** indicated the University of Missouri System will not have any significant cost.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative and determined it does not have any direct financial impact to the college.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, and the State Technical College of Missouri.**

Fiscal Note Summary

The Attorney General estimates increased litigation costs of up to \$7.5 million. Other state and local governmental entities estimate no costs or savings.

RE: Petition approval request from Jimmie Edwards regarding a proposed constitutional amendment to Article I, version 3 (2024-116)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Jimmie Edwards on June 28, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: the proposed amendment revises Article I, section 23 of the Constitution by adopting a new section to be known as Section 23(a).

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I, section 23 of the Missouri Constitution is revised by adding the following:

Section 23 (a). In compliance with the Second Amendment of the Constitution of the United States and limited by decisions of the United States Supreme Court or federal law, Jackson County, St. Louis County, the City of Kansas City and the City of St. Louis may, by ordinance duly enacted, regulate the possession, carrying, or transfer of firearms within the limits of the city or county, notwithstanding any other provision of law, subject to the following:

1. An ordinance authorizing the issuance of a permit or certificate may provide for the city or county to charge a fee sufficient to cover the cost of issuing permits or certificates but which does not exceed the cost therefor and provided that such permits or certificates shall be valid for no longer than five years. The city or county may obtain background-check information from the federal National Instant Background Check System or other governmental agency providing information service.

2. Any ordinance adopted in accordance with this section may apply to non-residents as well as residents of the city or county, but shall recognize as valid any permit or certificate issued for possessing, carrying, or transferring firearms issued by the permit or certificate holder's county of residence. Any such ordinance also shall exempt any active duty or retired law enforcement officer who is currently certified as compliant with state peace officer's standards and training, any full time judge, or any person who must be armed as a condition of employment during active employment as a licensed security guard or as a government employee, including military.

3. Any ordinance adopted hereunder may provide penalties for violation, but such penalties shall not exceed a fine of \$1,000 or imprisonment in the county jail for a term exceeding one year, or both. An ordinance also may authorize seizure of any firearm, by a law enforcement officer upon probable cause, where the possessor is ineligible by law to possess the firearm.

NOTICE: the proposed amendment revises Article I, section 23 of the Constitution by adopting a new section to be known as Section 23(a).

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I, section 23 of the Missouri Constitution is revised by adding the following:

Section 23(a). In compliance with the Second Amendment of the Constitution of the United States and limited by decisions of the United States Supreme Court or federal law, any county, the City of St. Louis, and the City of Kansas City may, by ordinance duly enacted, regulate the possession, carrying, or transfer of firearms within the limits of the city or county notwithstanding any other provision of law, subject to the following:

1. An ordinance adopted by the government of the City of St. Louis, the City of Kansas City, St. Louis County or Jackson County shall take effect upon enactment. In all other counties, the ordinance shall contain a referendum provision and shall only take effect 30 days after approval by the voters of the county in a referendum to be held at the next county-wide election date that allows sufficient time, as prescribed by election law or charter provisions, for placing the referendum question on the ballot.

2. An ordinance authorizing the issuance of a permit or certificate may provide for the city or county to charge a fee sufficient to cover the cost of issuing permits or certificates but which does not exceed the cost therefor and provided that such permits or certificates shall be valid for no longer than five years. The city or county may obtain background-check information from the federal National Instant Background Check System or other governmental agency providing information service.

3. Any ordinance adopted in accordance with this section may apply to non-residents as well as residents of the city or county, but shall recognize as valid any permit or certificate issued for possessing, carrying, or transferring firearms issued by the permit or certificate holder's county of residence. Any such ordinance also shall exempt any active duty or retired law enforcement officer who is currently certified as compliant with state peace officer's standards and training, any full time judge, or any person who must be armed as a condition of employment during active employment as a licensed security guard or as a government employee, including military.

4. Any ordinance adopted hereunder may provide penalties for violation, but such penalties shall not exceed a fine of \$1,000 or imprisonment in the county jail for a term exceeding one year, or both. An ordinance also may authorize seizure of any firearm, by a law enforcement office upon probable cause, where the possessor is ineligible by law to possess the firearm.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-115)**

Subject

Initiative petition from Jimmie Edwards regarding a proposed constitutional amendment to Article I. (Received June 28, 2023)

Date

July 18, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, and **St. Louis Community College**.

Assumptions

Officials from the **Attorney General's office** indicated:

TO: Sheri Hoffman

DATE: July 7, 2023

FROM: Diana Haines

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article I (2024-115)

All three of the proposed amendments to Article I would allow certain political subdivisions within Missouri, such as Jackson County, St. Louis County, Kansas City, and St. Louis, to set their own gun control laws. These subdivisions would undoubtedly adopt more restrictive gun control laws than the rest of the State. The Attorney General's Office expects that the enactment of any of these proposals would result in increased crime and litigation. The total cost to Missouri could exceed \$704.14 million. This includes \$696.64 million in increased crime costs and \$7.5 million in increased legal costs for the Attorney General's Office.

Analysis

There are two main areas where these initiative petitions would substantially increase costs to Missouri. Stricter gun control laws in certain subdivisions of the State would meaningfully increase the economic losses from increased crime and the amount that must be spent protecting citizens from crime. The petitions would also trigger significant legal costs because they will certainly give rise to legal challenges in which the Attorney General's Office would be involved.

I. The petitions will increase costs associated with crime.

There are two aspects of crime costs that will increase if the initiative petitions go into effect. First, the total economic losses suffered by Missourians

from crime will increase. Second, Missouri will have to spend more on criminal justice efforts to combat increased crime.

To begin, research demonstrates that Missouri's current constitutional carry regime reduces violent crime. John R. Lott, Jr., *Does Allowing Law-Abiding Citizens to Carry Concealed Handguns Save Lives?*, 31 Val. U. L. Rev. 355, 359 (1997). Permissive carry laws that remove barriers to law abiding citizens owning and carrying firearms reduce overall crime rates. Empirical research has demonstrated that when citizens are free to arm themselves, murder rates decrease by 8%, rape by 5%, aggravated assault by 7%, and robbery by 3%. *Id.* For example, violent crimes, such as homicide, substantially declined in Washington, D.C., after the Supreme Court's decision in *Heller*. Matt Connolly, *D.C. murders fall below triple digits, first time since 1963*, WASHINGTON EXAMINER (Dec. 10, 2012)¹. If the initiative petitions go into effect, the gun control laws adopted by Kansas City and St. Louis will nullify these benefits and create a more crime-friendly environment for criminals.

For St. Louis and Kansas City alone, enacting restrictive gun control regulations is estimated to lead to an additional 32 murders per year. *See* ST. LOUIS POLICE DEPARTMENT, 2022 UCR HOMICIDE ANALYSIS (2023); Makenzie Koch, *Kansas City ends 2022 with second-worst homicide total*, FOX 4 (Jan. 2, 2023)². Each murder produces an economic cost of over \$17 million. Annie Lowrey, *True Crime Costs*, SLATE (Oct. 21, 2010)³. This would bring the total economic loss from murder alone to over \$544 million per year if the proposed initiatives went into effect. Moreover, this is a conservative estimate that does not include the potential crime cost ripple effects outside of these cities.

Unfortunately, the story is similar for rape. The current gun control regime is estimated to prevent an additional 726 rapes per year in Kansas City and St. Louis, MO. *See* MACROTRENDS, *St. Louis MO Rape Statistics 1999-2018* (last visited July 7, 2023)⁴; MACROTRENDS, *Kansas City MO Rape Statistics 1999-2018* (last visited July 7, 2023).⁵ Academics who have studied this issue concluded that victims who engage in some measure of self-protection are, as one group of academics wrote, "much less likely to have the rape completed

¹ <https://www.washingtonexaminer.com/dc-murders-fall-below-triple-digits-first-time-since-1963#.UMdCHYN6qSq>

² <https://fox4kc.com/news/kansas-city-ends-2022-with-second-worst-homicide-total/>

³ <https://slate.com/culture/2010/10/does-every-murder-in-the-united-states-really-cost-society-17-million.html#:~:text=That%20means%20in%202009%2C%20according,the%20order%20of%20%2417%20million>

⁴ <https://www.macrotrends.net/cities/us/mo/st-louis/rape-rate-statistics>

⁵ <https://www.macrotrends.net/cities/us/mo/kansas-city/rape-rate-statistics>

against them than nonresisting victims, a pattern generally apparent regardless of the specific form of resistance” and “The form of resistance that appears most effective in preventing rape completion is resistance with a gun, knife, or other weapon.” Gary Kleck and Susan Sayles, *Social Problems* Vol. 37, No. 2 (May, 1990), pp. 149-162 (available at <https://www.jstor.org/stable/800645>) (last visited July 7, 2023). Each additional rape causes an economic loss of \$122,461. Cora Peterson et al., *Lifetime Economic Burden of Rape Among U.S. Adults*, 52 *Am. J. of Preventative Med.* 691 (2017). In sum, the economic burden of additional rapes traceable to an increasingly disarmed public due to the proposed initiative petitions would be approximately \$88.9 million each year.

For aggravated assault, the petitions would cost \$49.6 million. Roughly 646 aggravated assaults are prevented each year by the current constitutional carry regime. *See* MACROTRENDS, *St. Louis MO Aggravated Assaults 1999-2018* (last visited July 7, 2023);⁶ MACROTRENDS, *Kansas City MO Aggravated Assaults 1999-2018* (last visited July 7, 2023)⁷. And each assault costs \$76,829, which means Missourians (under a conservative estimate) would incur nearly \$50 million per year in additional costs. Andrew Rajkumar & Michael French, *Drug abuse, crime costs, and the economic benefits of treatment*, 13 *J. of Quantitative Criminology* 291 (1997).

Finally, for robberies the petitions would lead to additional costs of \$3.04 million annually, resulting from an increase of 3,088 robberies per year. *See* MACROTRENDS, *St. Louis MO Robberies 1999-2018* (last visited July 7, 2023);⁸ MACROTRENDS, *Kansas City MO Robberies 1999-2018* (last visited July 7, 2023)⁹. Each robbery costs the public \$33,143. Rajkumar & French, *supra*. Thus, even relatively lower cost and less violent crimes would lead to significant economic harms.

In addition to the costs outlines above, there are substantial costs to combatting this crime from a law enforcement perspective. These petitions will require additional expenditures in policing and prisons because of the increased crime. Dr. John Lott, the nation’s foremost researcher in this field, has estimated that the total policing and prison cost increases for Missouri would be between \$11.1 and \$38.3 million per year. That does not include the loss of productivity from incarcerated individuals as more people spend time

⁶ <https://www.macrotrends.net/cities/us/mo/st-louis/assault-rate-statistics>

⁷ <https://www.macrotrends.net/cities/us/mo/kansas-city/assault-rate-statistics>

⁸ <https://www.macrotrends.net/cities/us/mo/st-louis/robbery-rate-statistics>

⁹ <https://www.macrotrends.net/cities/us/mo/kansas-city/robbery-rate-statistics>

in prison rather than in the workforce. Nor does this estimate include lost revenue as businesses leave Missouri for areas with lower crime rates. See Felipe Marques, *Citadel billionaire founder Ken Griffin says it wasn't low taxes that led him to move his company from Chicago to Miami*, FORTUNE (Nov. 8 2022).¹⁰ Each of these costs is fairly traceable to the proposed initiative petitions, the sole purpose of which are to undermine and dilute the legal protections currently in place for the safety of Missouri residents.

Thus, even using conservative estimates, these petitions would cost Missouri \$696.64 million alone *per year* in crime-related economic losses.

II. The petitions will increase legal costs for the Attorney General's Office.

The Attorney General's Office (AGO) would also incur substantial legal costs relating to the proposed petitions. First, the petitions involve a controversial topic that is sure to motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting Second Amendment rights. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of Second Amendment protections, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

Even a cursory analysis of the proposed initiative petitions raise significant constitutional concerns. As such, the State of Missouri may be required to pay the attorneys' fees of parties that challenge the petitions and any resulting regulations approved by local governments.

All told, each lawsuit could cost approximately \$1.5 million based on the AGO's estimates of the additional personnel and resources needed. Even if the petitions' validity was challenged in only the five jurisdictions specifically named in the petitions (and there is reason to believe it would be more), that would still amount to \$7.5 million in additional legal costs.

Conclusion

¹⁰ <https://fortune.com/2022/11/08/citadel-billionaire-founder-ken-griffin-not-low-taxes-led-move-company-from-chicago-to-miami/>

These proposed initiative petitions would subvert current state law and give political subdivisions unconstitutional control over local resident's gun rights. Not only is that wrong-headed, it is expensive. If enacted, these proposed provisions would have a severe, negative economic impact on the State of Missouri. Crime-related costs would increase drastically. Furthermore, resulting litigation would force the AGO to expend significant funds on anticipated litigation, likely including the hiring of outside counsel.

The AGO currently estimates the fiscal impact will be at least \$704.14 million, but it could be more. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

In response to questions, the Attorney General's office provided the following information:

The challenges to the petitions could be brought before or after election. Depending on the number, nature, and timing of the challenges the Attorney General's office would likely need to seek additional appropriations. The office's current appropriation would not be sufficient to litigate the multiple challenges contemplated in the fiscal note response.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-115 and determined there is no fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no impact to their department.

Officials from the **Department of Health and Senior Services** indicated they have reviewed the fiscal note and found no fiscal impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for initiative petition 24-115 proposing to amend Article I - Regulation of Firearms.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-115, they assume this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department, Director's office.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they assume no impact regarding this petition.

Officials from the **Governor's office** indicated this proposal relating to firearm regulation by counties and the cities of Kansas City and St. Louis does not financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated this initiative petition will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for this initiative petition.

Officials from the **Office of Administration** indicated this proposal relating to firearm regulation by counties and the cities of Kansas City and St. Louis does not financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-115 a proposed constitutional amendment to Article I, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered

fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender (SPD)** indicated initiative petition 24-115 will have no fiscal impact on SPD in that it only authorizes creation of a municipal ordinance and Chapter 600 does not authorize SPD representation in municipal ordinance cases.

Officials from the **Office of the State Treasurer** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no fiscal impact from this petition.

Officials from **Greene County** indicated in reviewing initiative petition 24-115 it has been determined there will be an increased cost to the County of Greene if voters vote to amend Article I - Regulation of Firearms due to election costs.

The language allows the election to be held at the next county election date available where the referendum provision may be presented to voters by a political subdivision. With that understanding the per voters cost to administer an election during an April election when costs are proportionally shared by political subdivisions will be submitted, as well as the costs to host an election when the political subdivision is the only entity to hold an election below:

Scenario 1 – Proportional Costs

The most recent April 2023 election cost **\$361,991.59**. The estimated cost total county portion to be paid from the **\$361,991.59** election cost total is estimated to be **\$99,103.27**.

Scenario 2 – County only Political Subdivision Cost

A countywide special election has an estimated total cost of **\$347,760.08**.

Officials from **St. Louis County** indicated the cost of this proposed initiative to St. Louis County is unknown without knowing the details of a subsequent proposed ordinance change.

Officials from the **City of Kansas City** indicated this will have no fiscal impact to their city.

Officials from **Metropolitan Community College** indicated no fiscal impact on their college.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and do not believe it will directly financially affect their college. However, their college does not allow weapons on its premises and therefore any change that affects that position could force the college to incur costs.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia, the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, and the University of Missouri.**

Fiscal Note Summary

The Attorney General estimates increased litigation costs of up to \$7.5 million. Other state and local governmental entities estimate no costs or savings.

STATE AUDITORS OFFICE

RE: Petition approval request from Jimmie Edwards regarding a proposed constitutional amendment to Article I, version 1 (2024-114)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Jimmie Edwards on June 28, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

County _____

NOTICE: the proposed amendment revises Article I, section 23 of the Constitution by adopting a new section to be known as Section 23(a).

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I, section 23 of the Missouri Constitution is revised by adding the following:

Section 23 (a). In compliance with the Second Amendment of the Constitution of the United States and limited by decisions of the United States Supreme Court or federal law, Jackson County, St. Louis County, the City of Kansas City and the City of St. Louis may, by ordinance duly enacted, regulate the possession, carrying, or transfer of firearms within the limits of the city or county, notwithstanding any other provision of law, subject to the following:

1. An ordinance authorizing the issuance of a permit or certificate may provide for the city or county to charge a fee sufficient to cover the cost of issuing permits or certificates but which does not exceed the cost therefor and provided that such permits or certificates shall be valid for no longer than five years. The city or county may obtain background-check information from the federal National Instant Background Check System or other governmental agency providing information service.

2. Any ordinance adopted in accordance with this section may apply to non-residents as well as residents of the city or county, but shall recognize as valid any permit or certificate issued for possessing, carrying, or transferring firearms issued by the permit or certificate holder's county of residence. Any such ordinance also shall exempt any active duty or retired law enforcement officer who is currently certified as compliant with state peace officer's standards and training, any full time judge, or any person who must be armed as a condition of employment during active employment as a licensed security guard or as a government employee, including military.

3. Any ordinance adopted hereunder may provide penalties for violation, but such penalties shall not exceed a fine of \$1,000 or imprisonment in the county jail for a term exceeding one year, or both. An ordinance also may authorize seizure of any firearm, by a law enforcement officer upon probable cause, where the possessor is ineligible by law to possess the firearm.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-114)**

Subject

Initiative petition from Jimmie Edwards regarding a proposed constitutional amendment to Article I. (Received June 28, 2023)

Date

July 18, 2023

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, and **St. Louis Community College**.

Assumptions

Officials from the **Attorney General's office** indicated:

TO: Sheri Hoffman

DATE: July 7, 2023

FROM: Diana Haines

Fiscal Note: Initiative petition – Proposed constitutional amendment to Article I (2024-114)

All three of the proposed amendments to Article I would allow certain political subdivisions within Missouri, such as Jackson County, St. Louis County, Kansas City, and St. Louis, to set their own gun control laws. These subdivisions would undoubtedly adopt more restrictive gun control laws than the rest of the State. The Attorney General's Office expects that the enactment of any of these proposals would result in increased crime and litigation. The total cost to Missouri could exceed \$704.14 million. This includes \$696.64 million in increased crime costs and \$7.5 million in increased legal costs for the Attorney General's Office.

Analysis

There are two main areas where these initiative petitions would substantially increase costs to Missouri. Stricter gun control laws in certain subdivisions of the State would meaningfully increase the economic losses from increased crime and the amount that must be spent protecting citizens from crime. The petitions would also trigger significant legal costs because they will certainly give rise to legal challenges in which the Attorney General's Office would be involved.

I. The petitions will increase costs associated with crime.

There are two aspects of crime costs that will increase if the initiative petitions go into effect. First, the total economic losses suffered by Missourians

from crime will increase. Second, Missouri will have to spend more on criminal justice efforts to combat increased crime.

To begin, research demonstrates that Missouri's current constitutional carry regime reduces violent crime. John R. Lott, Jr., *Does Allowing Law-Abiding Citizens to Carry Concealed Handguns Save Lives?*, 31 Val. U. L. Rev. 355, 359 (1997). Permissive carry laws that remove barriers to law abiding citizens owning and carrying firearms reduce overall crime rates. Empirical research has demonstrated that when citizens are free to arm themselves, murder rates decrease by 8%, rape by 5%, aggravated assault by 7%, and robbery by 3%. *Id.* For example, violent crimes, such as homicide, substantially declined in Washington, D.C., after the Supreme Court's decision in *Heller*. Matt Connolly, *D.C. murders fall below triple digits, first time since 1963*, WASHINGTON EXAMINER (Dec. 10, 2012)¹. If the initiative petitions go into effect, the gun control laws adopted by Kansas City and St. Louis will nullify these benefits and create a more crime-friendly environment for criminals.

For St. Louis and Kansas City alone, enacting restrictive gun control regulations is estimated to lead to an additional 32 murders per year. *See* ST. LOUIS POLICE DEPARTMENT, 2022 UCR HOMICIDE ANALYSIS (2023); Makenzie Koch, *Kansas City ends 2022 with second-worst homicide total*, FOX 4 (Jan. 2, 2023)². Each murder produces an economic cost of over \$17 million. Annie Lowrey, *True Crime Costs*, SLATE (Oct. 21, 2010)³. This would bring the total economic loss from murder alone to over \$544 million per year if the proposed initiatives went into effect. Moreover, this is a conservative estimate that does not include the potential crime cost ripple effects outside of these cities.

Unfortunately, the story is similar for rape. The current gun control regime is estimated to prevent an additional 726 rapes per year in Kansas City and St. Louis, MO. *See* MACROTRENDS, *St. Louis MO Rape Statistics 1999-2018* (last visited July 7, 2023)⁴; MACROTRENDS, *Kansas City MO Rape Statistics 1999-2018* (last visited July 7, 2023).⁵ Academics who have studied this issue concluded that victims who engage in some measure of self-protection are, as one group of academics wrote, "much less likely to have the rape completed

¹ <https://www.washingtonexaminer.com/dc-murders-fall-below-triple-digits-first-time-since-1963#.UMdCHYN6qSq>

² <https://fox4kc.com/news/kansas-city-ends-2022-with-second-worst-homicide-total/>

³ <https://slate.com/culture/2010/10/does-every-murder-in-the-united-states-really-cost-society-17-million.html#:~:text=That%20means%20in%202009%2C%20according,the%20order%20of%20%2417%20million>

⁴ <https://www.macrotrends.net/cities/us/mo/st-louis/rape-rate-statistics>

⁵ <https://www.macrotrends.net/cities/us/mo/kansas-city/rape-rate-statistics>

against them than nonresisting victims, a pattern generally apparent regardless of the specific form of resistance” and “The form of resistance that appears most effective in preventing rape completion is resistance with a gun, knife, or other weapon.” Gary Kleck and Susan Sayles, *Social Problems* Vol. 37, No. 2 (May, 1990), pp. 149-162 (available at <https://www.jstor.org/stable/800645>) (last visited July 7, 2023). Each additional rape causes an economic loss of \$122,461. Cora Peterson et al., *Lifetime Economic Burden of Rape Among U.S. Adults*, 52 *Am. J. of Preventative Med.* 691 (2017). In sum, the economic burden of additional rapes traceable to an increasingly disarmed public due to the proposed initiative petitions would be approximately \$88.9 million each year.

For aggravated assault, the petitions would cost \$49.6 million. Roughly 646 aggravated assaults are prevented each year by the current constitutional carry regime. *See* MACROTRENDS, *St. Louis MO Aggravated Assaults 1999-2018* (last visited July 7, 2023);⁶ MACROTRENDS, *Kansas City MO Aggravated Assaults 1999-2018* (last visited July 7, 2023)⁷. And each assault costs \$76,829, which means Missourians (under a conservative estimate) would incur nearly \$50 million per year in additional costs. Andrew Rajkumar & Michael French, *Drug abuse, crime costs, and the economic benefits of treatment*, 13 *J. of Quantitative Criminology* 291 (1997).

Finally, for robberies the petitions would lead to additional costs of \$3.04 million annually, resulting from an increase of 3,088 robberies per year. *See* MACROTRENDS, *St. Louis MO Robberies 1999-2018* (last visited July 7, 2023);⁸ MACROTRENDS, *Kansas City MO Robberies 1999-2018* (last visited July 7, 2023)⁹. Each robbery costs the public \$33,143. Rajkumar & French, *supra*. Thus, even relatively lower cost and less violent crimes would lead to significant economic harms.

In addition to the costs outlines above, there are substantial costs to combatting this crime from a law enforcement perspective. These petitions will require additional expenditures in policing and prisons because of the increased crime. Dr. John Lott, the nation’s foremost researcher in this field, has estimated that the total policing and prison cost increases for Missouri would be between \$11.1 and \$38.3 million per year. That does not include the loss of productivity from incarcerated individuals as more people spend time

⁶ <https://www.macrotrends.net/cities/us/mo/st-louis/assault-rate-statistics>

⁷ <https://www.macrotrends.net/cities/us/mo/kansas-city/assault-rate-statistics>

⁸ <https://www.macrotrends.net/cities/us/mo/st-louis/robbery-rate-statistics>

⁹ <https://www.macrotrends.net/cities/us/mo/kansas-city/robbery-rate-statistics>

in prison rather than in the workforce. Nor does this estimate include lost revenue as businesses leave Missouri for areas with lower crime rates. See Felipe Marques, *Citadel billionaire founder Ken Griffin says it wasn't low taxes that led him to move his company from Chicago to Miami*, FORTUNE (Nov. 8 2022).¹⁰ Each of these costs is fairly traceable to the proposed initiative petitions, the sole purpose of which are to undermine and dilute the legal protections currently in place for the safety of Missouri residents.

Thus, even using conservative estimates, these petitions would cost Missouri \$696.64 million alone *per year* in crime-related economic losses.

II. The petitions will increase legal costs for the Attorney General's Office.

The Attorney General's Office (AGO) would also incur substantial legal costs relating to the proposed petitions. First, the petitions involve a controversial topic that is sure to motivate multiple lawsuits by well-funded individuals and organizations dedicated to protecting Second Amendment rights. General litigation costs alone could run into the millions of dollars. Additionally, the AGO will likely have to hire conflict counsel to participate in these suits because the Attorney General has staked out a position strongly in favor of Second Amendment protections, creating a positional conflict that is untenable for the Attorney General and would necessarily generate greater legal costs.

Even a cursory analysis of the proposed initiative petitions raise significant constitutional concerns. As such, the State of Missouri may be required to pay the attorneys' fees of parties that challenge the petitions and any resulting regulations approved by local governments.

All told, each lawsuit could cost approximately \$1.5 million based on the AGO's estimates of the additional personnel and resources needed. Even if the petitions' validity was challenged in only the five jurisdictions specifically named in the petitions (and there is reason to believe it would be more), that would still amount to \$7.5 million in additional legal costs.

Conclusion

¹⁰ <https://fortune.com/2022/11/08/citadel-billionaire-founder-ken-griffin-not-low-taxes-led-move-company-from-chicago-to-miami/>

These proposed initiative petitions would subvert current state law and give political subdivisions unconstitutional control over local resident's gun rights. Not only is that wrong-headed, it is expensive. If enacted, these proposed provisions would have a severe, negative economic impact on the State of Missouri. Crime-related costs would increase drastically. Furthermore, resulting litigation would force the AGO to expend significant funds on anticipated litigation, likely including the hiring of outside counsel.

The AGO currently estimates the fiscal impact will be at least \$704.14 million, but it could be more. As the AGO continues its legal and fiscal analysis of these misguided proposals, it will update the Auditor's Office if new data becomes available.

In response to questions, the Attorney General's office provided the following information:

The challenges to the petitions could be brought before or after election. Depending on the number, nature, and timing of the challenges the Attorney General's office would likely need to seek additional appropriations. The office's current appropriation would not be sufficient to litigate the multiple challenges contemplated in the fiscal note response.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-114 and determined there is no fiscal impact to their agency.

Officials from the **Department of Higher Education and Workforce Development** indicated no impact to their department.

Officials from the **Department of Health and Senior Services** indicated they have reviewed the fiscal note and found no fiscal impact.

Officials from the **Department of Commerce and Insurance** indicated this petition, if passed, will have no anticipated cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated they anticipated no fiscal impact for initiative petition 24-114 proposing to amend Article I - Regulation of Firearms.

Officials from the **Department of Revenue** indicated after a thorough review of IP 24-114, they assume this will not have a fiscal or administrative impact on their department or their operations. Their department also notes no impact is expected to state tax revenue from this IP.

Officials from the **Department of Public Safety** indicated no impact for their department, Director's office.

Officials from the **Missouri Department of the National Guard** indicated no fiscal impact to their department.

Officials from the **Department of Social Services** indicated they assume no impact regarding this petition.

Officials from the **Governor's office** indicated this proposal relating to firearm regulation by Jackson and St. Louis counties and the cities of Kansas City and St. Louis does not financially impact their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated this initiative petition will have no fiscal impact on their department.

Officials from the **Department of Transportation** indicated no fiscal impact expected for their department or the Missouri Highways and Transportation Commission for this initiative petition.

Officials from the **Office of Administration** indicated this proposal relating to firearm regulation by Jackson and St. Louis counties and Kansas City and the City of St. Louis does not financially impact their office.

Officials from the **Office of State Courts Administrator** indicated in reference to Initiative Petition 24-114 a proposed constitutional amendment to Article I, there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated each year, a number of joint resolutions that would refer to a vote of the people a constitutional amendment and bills that would refer to a vote of the people the statutory issue in the legislation may be considered by the General Assembly.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be \$10 million based on the cost of the 2022 primary and general election reimbursements.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered

fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

For the FY22 petitions cycle, their office estimates publication costs at \$70,000 per page. This amount is subject to change based on number of petitions received, length of those petitions and rates charged by newspaper publishers.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender (SPD)** indicated initiative petition 24-114 will have no fiscal impact on SPD in that it only authorizes creation of a municipal ordinance and Chapter 600 does not authorize SPD representation in municipal ordinance cases.

Officials from the **Office of the State Treasurer** indicated no fiscal impact to their office.

Officials from **Clay County** indicated they estimate no impact from this petition.

Officials from **Greene County** indicated there are no estimated costs or savings to report from the County of Greene for initiative petition, 24-114 proposing to amend Article I - Regulation of Firearms.

Officials from **St. Louis County** indicated the cost of this proposed initiative to St. Louis County is unknown without knowing the details of a subsequent proposed ordinance change.

Officials from the **City of Kansas City** indicated this will have no fiscal impact on their city.

Officials from **Metropolitan Community College** indicated no fiscal impact to their college.

Officials from the **St. Louis Community College** indicated they have reviewed the initiative petition and do not believe it will directly financially affect their college. However, their college does not allow weapons on its premises and therefore any change that affects that position could force the college to incur costs.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Cole County, Jackson County, Jasper County, St. Charles County, Taney County, the City of Cape Girardeau, the City of Columbia,**

the City of Jefferson, the City of Joplin, the City of Kirksville, the City of Mexico, the City of Raymore, the City of St. Joseph, the City of St. Louis, the City of Springfield, the City of Union, the City of Wentzville, the City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, and the University of Missouri.

Fiscal Note Summary

The Attorney General estimates increased litigation costs of up to \$7.5 million. Other state and local governmental entities estimate no costs or savings.

STATE AUDITORS OFFICE

RE: Petition approval request from Bradley Ketcher regarding a proposed statutory amendment to Chapter 324 (2024-113)

Dear Auditor Fitzpatrick:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Bradley Ketcher on June 27, 2023.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Andrew Bailey
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

INITIATIVE PETITION

To the Honorable John Ashcroft, Secretary of State for the state of Missouri:

We, the undersigned, registered voters of the state of Missouri and _____ County (or city of St. Louis), respectfully order that the following proposed law shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 5th day of November, 2024, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or city of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

[Official Ballot title]

CIRCULATOR'S AFFIDAVIT

STATE OF MISSOURI, COUNTY OF _____

I, _____, being first duly sworn, say (print or type names of signers)

NAME (Signature)	DATE SIGNED	REGISTERED VOTING ADDRESS (Number) (Street), (City, Town, or Village)	ZIP CODE	CONGR. DIST.	NAME (Printed or Typed)

Address of Notary (Street, City, State & Zip Code)

Be it enacted by the people of the state of Missouri:

Section A. Section 324.272, RSMo, is amended to read as follows:

324.272. 1. Except as provided in subsection 2 of this section, sections 324.240 to 324.275 shall preempt any rule, regulation or order adopted by a political subdivision of the state relating to the licensing or regulation of massage therapists or massage businesses.

2. Sections 324.240 to 324.275 shall not affect:

(1) Local regulations relating to zoning requirements, local health department regulations, or occupational license taxes pertaining to massage therapists or massage businesses; or

(2) Local regulations that do not relate to the practice of massage therapy as performed by a Missouri state licensed massage therapist, including regulations of those professions who perform duties with a licensed massage therapist.

3. Notwithstanding the provisions of this section, local voters shall have the right and option to set local transaction taxes relating to massage therapists and massage businesses.

**MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (24-113)**

Subject

Initiative petition from Bradley Ketcher regarding a proposed amendment to Chapter 324 of the Revised Statutes of Missouri. (Received June 27, 2023)

Date

July 17, 2023

Description

This proposal would amend Chapter 324 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2024.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office**, the **Department of Agriculture**, the **Department of Economic Development**, the **Department of Elementary and Secondary Education**, the **Department of Higher Education and Workforce Development**, the **Department of Health and Senior Services**, the **Department of Commerce and Insurance**, the **Department of Mental Health**, the **Department of Natural Resources**, the **Department of Corrections**, the **Department of Labor and Industrial Relations**, the **Department of Revenue**, the **Department of Public Safety**, the **Missouri Department of the National Guard**, the **Department of Social Services**, the **Governor's office**, the **Missouri House of Representatives**, the **Department of Conservation**, the **Department of Transportation**, the **Office of Administration**, the **Office of State Courts Administrator**, the **Missouri Senate**, the **Secretary of State's office**, the **Office of the State Public Defender**, the **State Treasurer's office**, **Adair County**, **Boone County**, **Callaway County**, **Cass County**, **Clay County**, **Cole County**, **Greene County**, **Jackson County**, **Jasper County**, **St. Charles County**, **St. Louis County**, **Taney County**, the **City of Cape Girardeau**, the **City of Columbia**, the **City of Jefferson**, the **City of Joplin**, the **City of Kansas City**, the **City of Kirksville**, the **City of Mexico**, the **City of Raymore**, the **City of St. Joseph**, the **City of St. Louis**, the **City of Springfield**, the **City of Union**, the **City of Wentzville**, the **City of West Plains**, **Cape Girardeau 63 School District**, **Hannibal 60 School District**, **Malta Bend R-V School District**, **Mehlville School District**, **Wellsville-Middletown R-1 School District**, **State Technical College of Missouri**, **Metropolitan Community College**, **University of Missouri**, and **St. Louis Community College**.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office could absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may be required to request additional appropriations.

Officials from the **Department of Agriculture** indicated no impact.

Officials from the **Department of Economic Development** indicated no fiscal impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated they have reviewed initiative petition 24-113 and determined there is no fiscal impact to their agency.
